² As is also discussed in response to No. 15, YouTube offers a voluntary alternative to a formal Section 512 takedown notice; that alternative relies heavily on an automated process that was developed and implemented by YouTube to allow copyright owners to identify and make claims based on use of their works on YouTube. UMG does not understand the *Lenz II* decision to apply to that process, as it is not subject to the requirements of Section 512. However, most other service providers – which account for millions of additional uploads every day – do not offer such alternative approaches, leaving a Section 512 takedown notice the only remedy. And YouTube’s provision of its voluntary alternative is just that – voluntary. It has taken the position that it is not required to make this alternative available and can instead simply rely upon the provisions of Section 512. *See, e.g., Viacom III*, 940 F. Supp. 2d at 120.

completely music publishers such as UMPG, whose interest is in the composition, not just a particular recording of the composition), this example provided little comfort. More problematically, the court then assumed that such a computer algorithm would “cull” all but “minimal remaining content.” *Id.* The number of videos on YouTube alone that (1) infringe an audio track owned by UMG where UMG has not released an accompanying video; (2) infringe an audio track owned by UMG where the uploader does not actually show a video (*e.g.*, where the uploader simply displays something like a picture of the track’s artist while the audio track plays); (3) prominently feature an audio track owned by UMG over a different video than the official UMG video; (4) incorporate *multiple* copyrighted works (*e.g.*, an artist’s entire album); or (5) infringe compositions owned by UMPG (*e.g.*, “cover” versions of songs) is literally uncountable. The notion that an algorithm applying the criteria quoted above would “cull” most content and leave only “minimal...content” for human review is naïve, to say the least.

However, in *Lenz II*, the panel struck, without explanation, the entirety of the above discussion. *Compare Lenz II*, 2016 WL 1056082, at *7, *with Lenz I*, 801 F.3d at 1135-36. This is presumably because the panel recognized that the statements in the earlier version of its opinion were dicta, and chose to leave for another day the question of the extent to which such automated processes can be used to determine fair use. Regardless of this change, the court’s decision respecting fair use has had a chilling effect on UMG’s ability to protect its copyrights.

The better solution is to treat the fair use determination as an affirmative defense, and relegate its consideration to where it belongs – in connection with a counternotice. Although the Ninth Circuit reached its conclusion respecting *pre*-notice consideration of fair use based on its reading of the Copyright Act, for present purposes it does not matter whether that interpretation of the existing statute is right or wrong. Section 512 should be amended to specify that, for

purposes of the notice-and-takedown procedures, as long as the copyright owner’s work is being used, then the question of whether that use is “fair” need not be considered except to the extent raised in good faith in a valid counternotice. Such an approach would save literally thousands of human hours unnecessarily reviewing masses of content, and shift the timing and focus of the fair use analysis to a smaller, and more suitable, population of online content.

10. Does the notice-and-takedown process sufficiently address the reappearance of infringing material previously removed by a service provider in response to a notice? If not, what should be done to address this concern?

The answer is clearly “no.” UMG’s experience with Taylor Swift’s “1989” album is again illustrative. As noted above, UMG and its agents have sent in excess of 66,000 Section 512 takedown notices in connection with infringements of “1989” since the album was released. But these were not all sent in a single day, or single week, or single month, or even single year. Instead, this is the total number of notices sent over a sixteen-plus month period. If the notice-and-takedown process were sufficient to address the reappearance of infringing material that was previously removed by the service provider, then this volume would not be necessary. But UMG was still sending *hundreds* of takedown notices every week as recently as March 2016, and all to sites that had previously received notices to take down the same infringing material. The following list reflects the number of takedown notices for “1989” that UMG or its agents have sent, from the album’s release through March 11, 2016, to just a few of the many sites that hosted infringing content:

<u>Site</u>	<u>Number of Takedown Notices</u>
4shared.com	4396
tumblr.com	4260
uploaded.net	2308
vibeclouds.net	1467

itemvn.com	1426
searchmusic.me	1324

Such a system is nonsensical – a site should not have to be told *thousands* of times that it must take down infringing works utilizing the *same* tracks from the *same* album.³ And yet that is how the current system operates, based upon the manner in which courts have interpreted Section 512.

One answer to “what should be done” is that, upon receipt of a notice-and-takedown notice with respect to a given work, a service provider should *at least* be required to implement reasonable content identification processes to prevent the uploading of that work again in the future. As discussed further in response to No. 11 below, a requirement that a service provider adopt and use effective content identification technologies – before the service provider is granted a safe harbor from liability for infringement – is a minimum and reasonable step that would aid in establishing an appropriate balance between service providers and copyright owners.

11. Are there technologies or processes that would improve the efficiency and/or effectiveness of the notice-and-takedown process?

Yes, absolutely. There are various technologies and processes that would improve both the efficiency and the effectiveness of the notice-and-takedown process.

First, as described in response to No. 6, some service providers have adopted an online interface that permits a copyright owner to submit takedown notices electronically, and that processes those notices in an automated fashion. Such automated processes should be *de rigueur* – there is no reason that service providers who have developed and built sophisticated online

³ Nor is UMG’s experience in this instance unique. Data collected by IFPI reflects that 94.4% of the takedown notices it sent on behalf of UMG and others were for previously-identified content on the same site.

portals for the storage and distribution of massive quantities of data cannot likewise develop and implement a simple interface for the receipt and processing of takedown notices.

Second, and significantly, are content identification technologies, or “filters,” that can identify and block copyrighted content before it is even uploaded to a service provider’s servers; they can also be used to identify infringing content that is already located on a service provider’s website. Many such technologies are already in existence. Some are proprietary to service providers, such as Content ID, a system developed and implemented by YouTube. *See How Content ID Works*, YouTube Help (available at <https://support.google.com/youtube/answer/2797370?hl=en>). Others technologies are commercially available for license from third-party vendors such as Audible Magic (www.audiblemagic.com) and Gracenote (www.gracenote.com), among several others. For example, Audible Magic licenses its content recognition technology to numerous service providers, including SoundCloud, Dailymotion, and Tunecore. *See Customers & Partners*, Audible Magic (available at <https://www.audiblemagic.com/customers/>). But regardless of the source, active use of dynamic filters can materially diminish the unauthorized reproduction, distribution, and performance of copyrighted works.⁴

Unfortunately, many service providers have refused to incorporate the use of filters, apparently concerned that use of a filter would provide them with actual or “red flag” knowledge of infringing material, thus requiring the service provider to expeditiously remove or disable access to such material. *See* 17 U.S.C. § 512(c)(1)(A). But that is precisely what should occur.

⁴ Another type of viable filtering technology involves key word searching, which can be utilized as a supplemental means for a service provider to identify likely infringing content. Use of an artist’s name in conjunction with a full song title in the description or file name of a user-uploaded video or audio file is a strong indication that the file includes the song; similarly, when a description or title includes an artist and/or album name with the key words “full album,” then UMG’s experience is that the upload consists of a full album recording. Key word searching is a particularly important and valuable mechanism for live recordings, cover recordings, and new releases for which an audio fingerprint (used by content identification technologies such as Content ID) may not be readily available.

That is, use of content identification technologies *should* give a service provider knowledge of infringing activity, which knowledge *should* then require the service provider to take action.

Because these technologies are automated, the burden on the service provider is minimal, and far outweighed by the benefits of increased protection of copyrighted works.

Service providers have also relied on the language of Section 512(m) in defending their refusal to utilize filtering technology. That section provides in relevant part that the availability of Section 512's safe harbors is not conditioned on "a service provider monitoring its service or affirmatively seeking facts indicating infringing activity." 17 U.S.C. § 512(m)(1). Reliance on Section 512(m) has permitted service providers to remain willfully blind to rampant infringement on their websites, and has led courts to incorrectly conclude that such willful blindness is effectively insulated from liability under the DMCA. *See, e.g., Vimeo*, 972 F. Supp. 2d at 525 (relying on Section 512(m) in excusing service provider's refusal to use its own technology to identify and block infringing music content, even in the face of service provider's awareness of extensive infringement on its site).

UMG respectfully submits that a service provider wishing to take advantage of the Section 512 safe harbors must, at a minimum, implement effective content identification technologies – applied *before* any user content can be uploaded to the service provider's servers, as well as to *existing* content available on or through the service provider's website – to identify and block (or, at the option of the copyright owner, monetize) infringing content. Adopting such a requirement would dramatically improve the efficacy of the notice-and-takedown process,

because it would substantially reduce the number of infringements that occur in the first instance.⁵

12. Does the notice-and-takedown process sufficiently protect against fraudulent, abusive or unfounded notices? If not, what should be done to address this concern?

The provisions of Section 512 that are intended to “protect” against fraudulent, abusive, or unfounded notices are likewise in need of reform, as they go *too* far in attempting to protect uploaders. Section 512(f) provides that a person who “knowingly materially misrepresents...that material or activity is infringing...shall be liable for any damages, including costs and attorneys’ fees, incurred by the alleged infringer...who is injured by such misrepresentation.” 17 U.S.C. § 512(f). In the *Lenz* case referenced in response to No. 9 above, the court held that *nominal* damages are sufficient to state a claim under Section 512(f), *i.e.*, that a plaintiff may maintain a claim even in the absence of any monetary loss or other tangible harm. *Lenz II*, 2016 WL 1056082, at *8. Notably, in the *Lenz* case, the plaintiff suffered no such loss or harm: following UMG’s takedown notice, a video of plaintiff’s children dancing was taken down from YouTube for a period of less than two months; it was then reinstated after she sent a counternotice and UMG did not file suit. *Id.* at *1-*2.

The result in *Lenz* is nonsensical. There is simply no reason to burden the courts with a lawsuit to redress an issue that has already been fully redressed (*i.e.*, through the reposting of the

⁵ Having said that, filtering technologies are not a panacea for all that ails the notice-and-takedown process of Section 512. For starters, they are not perfect. UMPG estimates that Content ID fails to identify upwards of 40% of the use of UMPG’s compositions on YouTube. Third party solutions are likewise fallible. *See, e.g., UMG Recordings, Inc. v. Veoh Networks Inc.*, 665 F. Supp. 2d 1099, 1104 (C.D. Cal. 2009) (noting that “the Audible Magic filter had failed to identify as infringing hundreds of...allegedly infringing videos”). Moreover, they can be susceptible to user manipulation of the content that is often designed to circumvent the technology (*e.g.*, speeding up or slowing down the track, thereby affecting the pitch, or cutting out discrete portions of the track that are needed to identify it). Accordingly, such technologies cannot exist in a vacuum. Supplemental processes (*e.g.*, also searching for song titles plus artists’ names) are necessary to identify additional unauthorized uses, and the burden of developing, implementing, and maintaining those processes can and should be shared by online service providers.

content). Reform of this aspect of Section 512 is therefore needed as well; one possible solution is set forth in response to No. 17 below.

13. Has section 512(d), which addresses “information location tools,” been a useful mechanism to address infringement that occurs as a result of a service provider’s referring or linking to infringing content? If not, what should be done to address this concern?

Search engines play a critical role in linking users to infringing copies of music online. Unfortunately, Section 512(d) has been largely ineffective in addressing the resulting infringement, for at least two reasons. First, search engines receiving notices under Section 512(d) generally take down only the specifically-referenced URL. Given the ease with which new URLs pointing to the same infringing content are created, taking down only a single URL that directs a user to infringing content is effectively meaningless. Given this approach, copyright owners have been forced to serve countless “delist” notices relating to search results for the same content (for example, over half a million delist notices have been sent on UMG’s behalf with respect to the “1989” album). Given the technological capability – and the very purpose – of search engines, it is not unreasonable to expect and demand that they should do more to aid in the proactive removal of search engine results that link to infringing content.

Second, after receiving some non-trivial number of delist notices with respect to any given website, search engines should be required to de-index the website, or at least “demote” the website so it appears significantly lower in search results. There is no legitimate reason for the promotion of sites that engage in the widespread infringement of intellectual property; that concept should be integrated into the safe harbor provided by Section 512(d).

For further information and analysis respecting these issues, UMG refers to the comments to the NOI provided by the Music Community.

14. Have courts properly interpreted the meaning of “representative list” under section 512(c)(3)(A)(ii)? If not, what should be done to address this concern?

The answer to the first question is no. On the contrary, courts have effectively “interpreted” the term “representative list” out of Section 512. For example, in *Veoh*, UMG’s agent sent DMCA notices to Veoh that identified several links to infringing content on Veoh’s site, and additionally stated as follows:

We believe your service is hosting the above-referenced files on its network. These files are offering video recordings...by the artists known as AFI, Rihanna, Black Eyed Peas [and others listed by name].... [W]e request that you remove the infringing files from the system or that you disable access to the infringing files.

Veoh I, 665 F. Supp. 2d at 1109-10. This notification was consistent with Section 512(c), which provides that if “multiple copyrighted works at a single online site are covered by a single notification,” a copyright owner’s takedown notice may provide “a representative list of such works at that site.” 17 U.S.C. § 512(c)(3)(A)(ii). The court in *Veoh* nonetheless found the above notices inadequate as to any infringing content other than the videos located at the specific links identified in the notice. *Veoh I*, 665 F. Supp. 2d at 1110. It reasoned that the “names of artists...[and] a representative list of works – are not quite the same.” *Id.* (emphasis in original). But that is beside the point: UMG’s agent did not provide a representative list of artists, it provided a representative list of works by those artists, and then asked that Veoh take down all works by those same artists. It is not clear what else the language of Section 512(c)(3)(A)(ii) could have intended.

The court also relied on the language of Section 512(c)(3)(A)(iii), which requires that the notice include “information reasonably sufficient to permit the service provider to locate the [infringing] material.” 17 U.S.C. § 512(c)(3)(A)(iii). Based on this language, the court effectively concluded a notice must specifically identify each instance of infringement before a

service provider is under any obligation to take down content, and the obligation then extends only to the specifically-identified instance of infringement. *Veoh I*, 665 F. Supp. 2d at 1110 (“An artist’s name is not ‘information reasonably sufficient to permit the service provider to locate [such] material.’”); *see also Capitol Records, Inc. v. mp3tunes, LLC*, 821 F. Supp. 2d 627, 643 (S.D.N.Y. 2011) (“Even assuming the representative lists properly identified EMI’s copyrighted works, EMI had to provide sufficient information – namely, additional web addresses – for MP3tunes to locate other infringing material.”). But limiting the takedown obligation to only specifically-identified infringements renders the “representative list” provision of the preceding statutory section a dead letter; if a copyright owner can provide a “representative” (*e.g.*, non-exhaustive) list of works, but the service provider is required only to take down specifically-identified works at specifically-identified locations on the website, then the “representative list” provision is meaningless.

At a minimum, Section 512 should be amended to provide further guidance as to the meaning and proper application of the “representative list” language. For example, if a copyright owner specifically identifies ten (or fifty, or one hundred) infringements of a given recording by a particular artist on a given site, then it is not unreasonable to shift the burden to the service provider to affirmatively search for, identify, and take down other infringements of that same recording on the site. There is no reason to believe that the copyright owner could do so any more readily than the service provider, and that should be the standard: provide sufficient information to permit the service provider to locate and identify infringing files as readily as the copyright owner could. *Cf.* Fed. R. Civ. P. 33(d) (where a response to interrogatories can be determined by examining business records, permitting a responding party to identify the relevant records “in sufficient detail to enable the interrogating party to locate and identify them as

readily as the responding party could”). This is particularly true where, as is often the case, the sites themselves already index the music that is available on the site by artist name and/or track title.

Similarly, if a copyright owner specifically identifies infringements of two (or five, or ten) different recordings by a particular artist or from a particular album on a given site, and represents that it owns or controls the rights to all recordings by that artist or on that album, then it is not unreasonable to shift the burden to the service provider to affirmatively search for, identify, and take down other infringements of that same artist’s recordings, or infringements of all other recordings from that same album.

Such a requirement is particularly apt where the content is simply the entire track of an album – or worse, an entire album – divorced from any other content. Although many user-uploaded videos incorporate UMG’s music as “background” to home videos or other user-generated content (and UMG can and properly should expect to be compensated for such uses), the more pernicious uses that permeate YouTube and other online services are wholesale copies of UMG’s recordings, played against nothing more than an image of the artist (if even that), or wholesale copies of UMG’s music videos. There is no argument that these substitutional uses (*i.e.*, uses that displace demand for authorized, licensed content) could qualify as “fair,” and no reason that service providers who are given notice that such uses are prevalent on their services should be excused from assisting in the process of taking them down. Only through measures such as this can a reasonable balance of the burden between service providers and copyright owners be restored.

15. Please describe, and assess the effectiveness or ineffectiveness of, voluntary measures and best practices — including financial measures, content “filtering” and takedown procedures — that have been undertaken by interested parties to supplement or improve the efficacy of section 512’s notice-and-takedown process.

Certain service providers have adopted voluntary measures that supplement Section 512’s notice-and-takedown process. To some extent, these measures improve the efficacy of that process, in that they reduce the number of infringements that would otherwise be subject to the process. However, UMG’s experience with these voluntary measures also demonstrates the breadth of the problem that copyright owners face and the corresponding inadequacy of the Section 512 notice-and-takedown process where these measures are not available (*i.e.*, where a service provider has not or will not adopt such approaches).

The most substantial example of a service provider that has supplemented the Section 512 notice-and-takedown process with a voluntary process that sits outside the DMCA is YouTube. This is perhaps unsurprising: YouTube is the largest music streaming service in the world, and unlike other music streaming platforms such as Spotify and Pandora, it is populated with *user*-uploaded content that is more likely to expose YouTube to liability for copyright infringement. *See YouTube – Not Spotify, Pandora or Apple Music – Is the Number One Music Streaming Service Worldwide: Here’s Why*, Tech Times (Jul. 8, 2015) (available at <http://www.techtimes.com/articles/66603/20150708/youtube-not-spotify-pandora-or-apple-music-is-the-number-one-music-streaming-service-worldwide-here-s-why.htm>). While YouTube apparently contends that it could rely exclusively on the Section 512 notice-and-takedown process, it has developed an alternative mechanism, apart from the DMCA process, called “Content ID,” which YouTube describes as an “automated, scalable system that enables copyright owners to identify YouTube videos that include content they own.” *See Using Content*

ID, YouTube Help (available at

https://support.google.com/youtube/answer/3244015?hl=en&ref_topic=4515467).

Using Content ID, a copyright owner is able to provide its content to YouTube, and Content ID matches that content against new uploads before they are published on YouTube. *Id.*⁶ The copyright owner can then set a policy of how YouTube is to handle uploads that match the copyright owner's content: mute the audio, block the entire video, monetize the video by running ads with it, or track a video's viewership statistics. *See How Content ID Works*, YouTube Help (available at <https://support.google.com/youtube/answer/2797370?hl=en>). The user who uploads the video is notified of the claim, and of the policy that the copyright owner has set with respect to its content. In addition to the automated process, YouTube permits copyright owners to manually claim content that is used in YouTube videos, in a manner consistent with the Content ID scheme.

YouTube has also adopted a dispute process in connection with Content ID claims. *See What Is A Content ID Claim?*, YouTube Help (available at <https://support.google.com/youtube/answer/6013276>). A user can choose to dispute a Content ID claim by filling out a simple online form, at which point the copyright owner has thirty days to take action on the claim (during which time the video is not muted, blocked, monetized, or otherwise affected by the copyright owner's claim). The copyright owner can opt to release the claim or uphold the claim (which the user can appeal); the copyright owner can also issue a DMCA takedown notice at that point, thereby activating the processes of Section 512. *See Dispute A Content ID Claim*, YouTube Help (available at

⁶ Content ID can also perform a "legacy scan" of YouTube videos that are already on the site at the time a copyright owner's content is loaded, although such a scan can take as long as six months. *Id.*

<https://support.google.com/youtube/answer/2797454>).⁷ If the copyright owner upholds the claim and the user appeals, the copyright owner again has a thirty-day window in which to act. The copyright owner may release the claim or let it expire; alternatively, the copyright owner must issue a DMCA takedown notice, although it can elect to delay that notice for seven days to permit the user to voluntarily withdraw the appeal. *Id.*⁸

UMG tracked its dispute and appeals experience for its recorded music business over an eight-day period in March 2016, for purposes of illustrating the strengths and the limitations of the Content ID process, as well as the broader challenges that UMG (and any copyright owner) faces in attempting to curb the massive infringement that is occurring online. While this is a non-scientific sample, it is nonetheless reasonably reflective of UMG's typical experience in the Content ID claims process.

Between March 5 and March 12, 2016, inclusive,⁷ the data currently available to UMG reflects that YouTube users disputed a total of 7,068 of UMG's claims, ranging from a low of 840 claims on March 8 to a high of 1,112 on March 6. As of March 5, 2016, UMG already had 13,741 disputes in its queue, resulting in a total of 21,349 active disputes during this eight-day period.

UMG's recorded music business employs approximately a half-dozen persons in the United States and the U.K. solely to address YouTube disputes; they are assisted by employees from UMG's data protection division and additional personnel from other departments as

⁷ If no action is taken within thirty days, the claim expires and the copyright owner is precluded from asserting a claim as to that video in the future.

⁸ YouTube makes this seven-day-delay alternative available so that its users can avoid getting a "copyright strike." Users whose content is claimed through the Content ID system are not treated as infringers for purposes of the "repeat infringers" provision of Section 512(i)(1)(A). In contrast, users whose content is subject to a DMCA takedown notice receive a "copyright strike" from YouTube; according to YouTube's policy, the accounts of users who receive three copyright strikes are terminated. See *Copyright Strike Basics*, YouTube Help (available at <https://support.google.com/youtube/answer/2814000>).

needed. This team was able to process 10,335, or a little less than half, of the existing claims during the same eight-day period. This effort required manual review of the dispute notice and the video for each disputed claim, and resulted in the claim being upheld in 10,168 instances, or approximately 98% of the time. Many of the dispute notices clearly established the absence of any legitimate claim of noninfringement; actual examples of user explanations from this period include the following:

how do i use allow music in my vids

I gave credit in the description of the video by stating...“Audio from Elton John”.

I’m Purchase from iTunes.

I gave credit to the song owners

I am not selling this video or making any money from it at all. I am not claiming this music as my own. I simply enjoyed the music and would like to use it in my video.

I Bought it online!

Music is used for entertainment only we do not claim the song to be ours and have given credit in the about section.

I am not monetizing my video I got the song from public domain, and I just want to introduce the song to my Indonesian friends

The songs are credited in the infobar located in the information section of the video

I have bought the music and had the videoed myself.

I give credit to the song and artist in the video description

i bought the song LEGAL on iTunes. i bought it with my own money, i didn’t steal it. i used the song that i bought.

Many others include a claim of “fair use” and a rote statement to the following effect, with no further elaboration: “This video uses copyright material in a manner that does not require approval of the copyright holder. It is fair use under copyright law.”

In all events, in each instance, UMG carefully reviewed the dispute and the video and upheld its claim where appropriate. However, that effort required a substantial investment of time and money, and it is a never-ending battle. Although the work during this period brought the number of pending disputes down to about 11,000, the queue is continually repopulating. As a result, the number of pending disputes never gets down to zero, and historically has been as high as 20,000 or more.

The experience described above illustrates both a virtue of the YouTube Content ID system and a weakness in the current legal scheme. On the positive side, of the 10,168 disputes that UMG upheld during this period, only 69 resulted in appealed claims, and nineteen of those were withdrawn after UMG indicated its intention to send a formal DMCA takedown notice. Accordingly, this relatively streamlined process dramatically reduced the number of DMCA takedown notices that would otherwise be required (which in turn likely reduced the number of counternotices and potential lawsuits that would follow under the Section 512 structure).

On the other hand, it also illustrates the massive problem that UMG and other copyright owners face, with just one service provider (albeit the largest one). UMG's investment in human capital to contend with just infringement of its content on YouTube is substantial, and as YouTube continues to add content, is only likely to increase. Notably, in December 2014, YouTube claimed that its users uploaded *300 hours* of content *every minute*; just seven months later, in July 2015, that number had increased to *400 hours* of content every minute. *See YouTube Now Gets Over 400 Hours of Content Uploaded Every Minute*, tubefilter.com (July 26, 2015) (available at <http://www.tubefilter.com/2015/07/26/youtube-400-hours-content-every-minute/>). At that rate, YouTube is likely now receiving over *500 hours* of new content every minute. *See 500 Hours of Video Uploaded to YouTube Every Minute [Forecast]*, reelseo.com

(Nov. 13, 2015) (available at <http://www.reelseo.com/hours-minute-uploaded-youtube/>). That new content in turn is typically generating an average of approximately *100,000 new claims* (both automated and manual) by UMG's recorded music business, and nearly *1000* new disputes from YouTube users, *every day of the year*.

UMG has also hired a third-party vendor that charges UMG a percentage of the revenue generated from videos on YouTube that use UMG recordings but which were not identified by Content ID. UMG pays the vendor hundreds of thousands of dollars per year just to find and claim UMG's own content that has been used without authorization on YouTube. YouTube bears none of this expense, but benefits from the advertising revenue generated in connection with its use and display of UMG's copyrighted content.

UMPG is similarly burdened. It owns or controls *millions* of copyrights. UMPG has about a half-dozen full-time employees focused solely on manually claiming UMPG content on YouTube and addressing claim disputes and appeals filed by YouTube users. Given the volume of content on YouTube, this task is massive, and UMPG is forced to focus on target lists of compositions, including compositions on the Billboard charts and other frequently-used content. At any given time, this target list is limited to approximately 500 compositions (out of the millions owned by UMPG), and even with that relatively small number of compositions, UMPG employees identify and review between fifty and sixty thousand potentially infringing YouTube videos *every month*.

Indeed, the volume of content on YouTube alone is so substantial that UMPG has limited capacity, at best, to identify and pursue infringements on other sites. Other factors also influenced this YouTube-focused strategy: the "whack-a-mole" problem that plagues the current system (*see, e.g.,* response to No. 10 above) makes it virtually impossible to meaningfully move

the needle on infringement elsewhere; and the potential liability for improper takedowns on sites where the only alternative is a Section 512 notice, particularly in light of *Lenz*, simply presents too great a risk, given the volume of infringing material at issue.

Counter Notifications

16. How effective is the counternotification process for addressing false and mistaken assertions of infringement?

The counternotification process is flawed. Under Section 512(g)(2), the only option available to a copyright owner that receives a counternotice from a user, and who nonetheless believes the user's content is infringing, is to file a federal court action within ten days "seeking a court order to restrain the subscriber from engaging in infringing activity relating to the material on the service provider's system or network." 17 U.S.C. § 512(g)(2)(C). If such an action is not filed, and barring some other resolution between the copyright owner and the service provider and/or subscriber, the offending content is reposted. *Id.*

Like the YouTube claim disputes that UMG receives, the counternotices that users send to UMG are frequently baseless. For example, over a seventeen-month period between September 2014 and February 2016, UMG's recorded music business reviewed 710 counternotices from YouTube subscribers. Although UMG either released or allowed its claim as to 126 counternotices to expire, and resolved the dispute directly with the subscriber in connection with another three, UMG concluded in 581 cases – or nearly 82% of the time – that the counternotice was without merit.⁹ And not infrequently, the counternotices taunt UMG, as in this example: "You wile-e-coyotes are wasting your time and money with dwarf roadrunners like me. I dare you to sue someone like me."

⁹ Even with respect to those that UMG released or allowed to expire, the counternotice was not necessarily meritorious; instead, UMG simply made the determination that even if there was a credible claim of infringement, the circumstances did not warrant further action on UMG's part.

A contractual arrangement between UMG and YouTube allows UMG to request that these videos remain down, without the necessity of a lawsuit, based on UMG's good faith review and determination of the meritless nature of the counternotice. However, such an agreement is the exception, rather than the norm, and barring such an agreement, the only option available to UMG and other copyright owners is to file a lawsuit to prevent the continued infringement. This drastic alternative – federal litigation over every baseless counternotice – reflects a fundamental problem with the current statutory scheme: forgo enforcement of valuable intellectual property or file *581 new lawsuits*. And UMG, though a significant copyright owner, is merely one among thousands (or millions) whose rights are routinely being violated on a massive scale.

The potentially significant cost of federal court litigation over any given single posting is a powerful (but unjust) deterrent to enforcement of UMG's intellectual property rights. But the alternative is likewise unattractive: burdening the federal court system with thousands of additional lawsuits. Neither outcome appears to be what Congress intended in enacting Section 512. Congress clearly indicated its commitment to *protecting* intellectual property rights, S. Rep. No. 105-190, at 8 (1998), and there is no indication that Congress anticipated that the DMCA would impose a massive additional burden on an already overburdened court system. The counternotice system, with litigation as the only statutory remedy for baseless or fraudulent counternotices, is simply unworkable in its present form.

17. How efficient or burdensome is the counter-notification process for users and service providers? Is it a workable solution over the long run?

For the reasons described above in response to No. 16, the counter-notification process is neither efficient nor workable. There are alternative schemes, including the example set forth below, that can meaningfully address the burden that the current statutory scheme imposes on copyright owners and the absence of any meaningful remedy to an aggrieved copyright owner

under the current system. But whatever alternative approach is adopted, the goal should be a more balanced system, where online users are not unduly restricted in using the Internet as a place for free expression of ideas, but where the interests of copyright owners are meaningfully protected.

First, as noted in response to No. 9 above, Section 512 should be amended to make clear that the appropriate stage for a copyright owner's consideration of affirmative defenses, such as fair use, is in connection with a valid counternotice raising such defenses.

Second, to permit the copyright owner sufficient time to thoughtfully evaluate the counternotice, and to give the parties sufficient time to attempt resolve the dispute between them, the time for taking action should be extended from ten days to sixty days before the content is reposted, subject to the provisions below.

Third, in the event the copyright owner determines to reject the counternotice, the obligation to file a federal lawsuit should be eliminated. For the benefit of all parties, and for the court system, a highly streamlined dispute resolution proceeding should be established so that such disputes can be resolved quickly and inexpensively, during which process the content remains down. One possible approach is a simplified and shortened version of a proceeding comparable to those conducted under the Uniform Domain-Name Dispute Resolution Policy. *See* Uniform Domain Name Dispute Resolution Policy (available at <https://www.icann.org/resources/pages/policy-2012-02-25-en>). But whatever approach is adopted, it must be (a) inexpensive so that it can be utilized by users and copyright owners of all sizes and means, and (b) rapid so that neither party's rights is unduly burdened.

Fourth, if the copyright owner does not initiate such a proceeding within the sixty-day period set forth above, then the content is automatically reposted. Alternatively, the user may

initiate the proceeding at any time starting ten days after serving the counternotice, in order to obtain a more expeditious resolution of the dispute and potential re-posting of the user's content.

And finally, the sole relief available to the user in such a streamlined proceeding, whether initiated by the user or the copyright owner, should be the reposting of the challenged content.¹⁰

The foregoing represents one possible solution to the problems plaguing the existing counternotice system. It would also remedy the problem addressed in response to No. 12 above, namely, the potential for abuse and misapplication of the provisions of Section 512(f), which can expose copyright owners to the prospect of costly and time-consuming litigation in the event of an erroneous Section 512 notice, even where the user suffered no harm. There are doubtless other reasonable approaches as well, but whatever the solution, it is clear that reform of the existing structure is necessary to provide a functional solution to users, service providers, and copyright owners.

18. In what ways does the process work differently for individuals, smallscale entities, and/or large-scale entities that are sending and/or receiving counter notifications?

As noted in response to No. 8, UMG has devoted substantial resources to addressing the entirety of the Section 512 process, including the receipt and consideration of counternotices. It has done so in an effort to be responsive to and respectful of online users and service providers, and to provide a needed and valuable service to its recording artists and songwriters. UMG anticipates that the burden of the Section 512 process weighs at least as heavily on individual and small-scale entities, which likely have fewer resources to redress the overwhelming volume of infringement online.

¹⁰ Alternatively, if the tribunal determines that the copyright owner did not act in good faith in rejecting the counternotice, it may have the power to award the user some modest, statutory monetary award against the copyright owner.

Legal Standards

19. Assess courts' interpretations of the "actual" and "red flag" knowledge standards under the section 512 safe harbors, including the role of "willful blindness" and section 512(m)(1) (limiting the duty of a service provider to monitor for infringing activity) in such analyses. How are judicial interpretations impacting the effectiveness of section 512?

As discussed throughout these responses, judicial interpretations of these provisions have substantially undermined the effectiveness of Section 512. These decisions have incentivized service providers to strenuously avoid learning about or acknowledging infringement, much less taking action to address it. Particularly where service providers have the means – whether already in place, or readily available from a third-party vendor – to identify and filter out large volumes of infringing content, there is no rational basis for this approach to the law.

For further information and analysis respecting these issues, UMG refers to the comments to the NOI provided by the Music Community.

20. Assess courts' interpretations of the "financial benefit" and "right and ability to control" standards under the section 512 safe harbors. How are judicial interpretations impacting the effectiveness of section 512?

Court decisions regarding these provisions have dramatically narrowed the circumstances in which they apply. The result has been to allow services that were founded and built on the widespread availability of unauthorized copyrighted content, and which can readily control access to any and all of that content, to nonetheless take advantage of Section 512's safe harbors. In short, these interpretations have likewise undermined the effectiveness of Section 512 and contributed to the imbalance between service providers and copyright owners.

For further information and analysis respecting these issues, UMG refers to the comments to the NOI provided by the Music Community.

Repeat Infringers

22. Describe and address the effectiveness of repeat infringer policies as referenced in section 512(i)(1)(A).

There are multiple problems with the effectiveness of “repeat infringer” policies as referenced in Section 512(i)(1)(A). First, the statute provides no guidance as to what constitutes a “repeat infringer.” This vacuum has led service providers to adopt policies that make a mockery of the phrase. In *BMG Rights Mgmt. (US) LLC v. Cox Comm’ns, Inc.*, Case No. 1:14-cv-1611, 2015 WL 7756130 (E.D. Va. Dec. 1, 2015), for example, Cox’s “policy” allowed a subscriber to be the subject of *fourteen* takedown notices in every six month period before Cox would even *consider* terminating him or her as a “repeat infringer.” *Id.* at *2-*3. The proposition that infringing copyrights on fourteen occasions in six months renders a person a “repeat infringer,” but not infringing thirteen, or twelve, or even two, in the same period, is so ungrounded and arbitrary as to be ludicrous. Section 512 should be amended to clarify what is meant by an “infringer” (*e.g.*, a user whose content is subject to an uncontested takedown notice, or whose counternotice is rejected as meritless), and what is meant by a “repeat infringer” (*e.g.*, three infringements in a twelve-month period).

Second, and relatedly, service providers have been able to get away with “policies” like the one described above because Section 512 does not contain a clear requirement that service providers disclose their actual policies. Although Section 512 requires service providers to “inform[] subscribers and account holders of...a policy that provides for the termination in appropriate circumstances of...repeat infringers,” 17 U.S.C. § 512(i)(1)(A), courts have not interpreted this requirement to mean that the *terms* of the policy be publicly disclosed. Instead, courts appear to find it sufficient that the service provider merely inform subscribers and account holders that it *has* a policy, without regard to what the policy actually is. *See, e.g., Cox*, 2015

WL 7756130, at *2 (noting without criticism that Cox’s fourteen-step “graduated response procedure” for addressing infringement was “not publicize[d] to customers,” who were instead informed of Cox’s “Acceptable Use Policy,” which merely provided that violations of that policy “may result in the immediate suspension or termination of either...access to the Service and/or [the] Cox account”); *Capitol Records, LLC v. Escape Media Group, Inc.*, Case No. 12-CV-6646 (AJN)(SN), 2015 WL 1402049, at *48 (S.D.N.Y. Mar. 25, 2015) (observing that “Escape does not implement the repeat infringer policy stated in its Terms of Service” disclosed to account holders, and instead evaluating whether the defendant reasonably implemented the undisclosed repeat infringer that it actually maintained). It is only through time-consuming and costly litigation that the *actual* policies adopted by these service providers has been uncovered. Section 512 should be revised to require that a service provider must (a) disclose the specific terms of the “repeat infringer” policy that it actually applies; and (b) routinely disclose data respecting the application of the policy (*e.g.*, routine disclosure of the number of users terminated); moreover, a service provider’s failure to follow the policy that it discloses should preclude the service provider from relying on the Section 512 safe harbors.

Third, some service providers have imposed arbitrary limitations on the receipt of Section 512 takedown notices. These include refusing to accept more than a certain number of takedown notices per day from any given complainant, or refusing to accept takedown notices that include additional language beyond the statutory requirements, such as settlement offers. *See, e.g., Cox*, 2015 WL 7756130, at *2. Section 512 should be revised to preclude service providers from limiting the number of takedown notices that it will accept, and to clarify that as long as a takedown notice includes the statutorily-required elements, *see* 17 U.S.C. § 512(c)(3), it may not be rejected simply because it also includes other information.

And finally, the case law is replete with examples of service providers that pay lip service to the repeat infringer policy requirement, only to disregard any such policy in application. While some courts – including those in the *Cox* and *Escape Media* cases – have seen through the charade and refused DMCA protection for the service providers, other courts appear to have bent over backwards to find compliance (or at least to let a service provider survive summary judgment). *See, e.g., Perfect 10, Inc. v. Giganeews, Inc.*, 993 F. Supp. 2d 1192, 1197 (C.D. Cal. 2014) (denying the copyright owner’s motion for summary judgment respecting the service provider’s failure to reasonably implement a “repeat infringer” policy, even though the service provider had terminated only 46 repeat infringers despite receiving DMCA notices covering more than 531 million messages sent by its users). At a minimum, clarification and then vigorous application and enforcement of the requirements of Section 512(i)(1)(A) is required.

23. Is there sufficient clarity in the law as to what constitutes a repeat infringer policy for purposes of section 512’s safe harbors? If not, what should be done to address this concern?

As described in response to No. 22 above, there is not sufficient clarity on this issue. The response to No. 22 also identifies a number of possible measures to address the concern.

Standard Technical Measures

24. Does section 512(i) concerning service providers’ accommodation of “standard technical measures” (including the definition of such measures set forth in section 512(i)(2)) encourage or discourage the use of technologies to address online infringement?

Section 512(i)’s provision respecting the accommodation of “standard technical measures” appears to have discouraged the use of technology to address online infringement. For information and analysis respecting this issues, UMG refers to the comments to the NOI provided by the Music Community.

25. Are there any existing or emerging “standard technical measures” that could or should apply to obtain the benefits of section 512’s safe harbors?

As described in response to No. 11 above, a service provider should be required to adopt effective content identification technologies in order to obtain the benefit of Section 512’s safe harbors. While such technologies are not a complete answer to the many problems that exist under Section 512, their mandatory adoption would be a meaningful step toward a much-needed rebalancing of the burdens under that statute.

Remedies

26. Is section 512(g)(2)(C), which requires a copyright owner to bring a federal lawsuit within ten business days to keep allegedly infringing content offline—and a counter-notifying party to defend any such lawsuit—a reasonable and effective provision? If not, how might it be improved?

As discussed in response to Nos. 16 and 17 above, the provisions of Section 512(g)(2)(C) are neither reasonable nor effective. One proposal for addressing the flaws in that section is set forth in response to No. 17.

27. Is the limited injunctive relief available under section 512(j) a sufficient and effective remedy to address the posting of infringing material?

The limited injunctive relief under Section 512(j) is rarely invoked and unlikely to be useful in any event. Injunctive relief is often rendered moot through the voluntary take-down of infringing content or termination of an offending user, and given the “whack-a-mole” problem among others, is not a sufficient remedy to address the more fundamental problems afflicting Section 512. For further information and analysis respecting this issue, UMG refers to the comments to the NOI provided by the Music Community.

28. Are the remedies for misrepresentation set forth in section 512(f) sufficient to deter and address fraudulent or abusive notices and counter notifications?

As discussed in response to Nos. 12 and 17, UMG believes that the provisions of Section 512(f) are fundamentally flawed, at least as interpreted and applied in the recent *Lenz* opinion. The response to No. 17 sets forth an alternative proposed scheme for addressing the issue.

Other Issues

29. Please provide any statistical or economic reports or studies that demonstrate the effectiveness, ineffectiveness, and/or impact of section 512's safe harbors.

UMG refers to the comments to the NOI provided by the Music Community, including without limitation Exhibit D to those comments.

RIAA Wins \$22 Million MP3Skull Judgement, But They'll Never See A Dime And The Site Is Still Online

The RIAA has scored a series of high-profile victories against illegal file sharing sites, but its latest win may ring hollow since appears unlikely that the perpetrator will ever be found or pay a single dime of the \$22 million awarded.

Working on behalf of the major labels, the RIAA has won a \$22.2 million dollar judgement against illegal download site MP3Skull. But as of today the site is still online and it appears unlikely that a single dime will ever be collected from its owners.

The judge awarded maximum statutory damages of \$150,000 for each of 148 offending songs. But the party behind mp3skull has never been identified and did not answer the court complaint. As of Friday morning, the site was still online and offering free illegal downloads of dozens of top tracks.

13 One Direction.Mp3
Size: 4.42 MB | Duration: 3:12

▶ DOWNLOADS (2016-02-26 11:27 PM)
▶ DOWNLOAD (2016-02-26 11:27 PM)
▶ DOWNLOAD (2016-02-26 11:27 PM)

The court order allows the RIAA to sieze any domains associated with MP3Skull. But it is likely that a seizure will just begin a cat and mouse game of new domains in other parts of the world. In fact, on Friday MP3Sull was being redirected from yesterday's .yoga domain to a new .mn domain in Mongolia.

But the RIAA is undeterred and explained its focus. "The site's sole purpose is to generate profit from that theft of music, and it makes no pretence about what it does or why it does it," the RIAA said in a [statement](#). "Virtually any commercial recording is available for free to download through the site and the most popular artists and songs ("Top Downloads") are invariably chart-topping hits."

Music labels win \$22.2m damages from MP3Skull – if they can find its owners

Following a lawsuit coordinated by industry body the RIAA, rightsholders are awarded maximum damages and given green light to seize domain names

Stuart Dredge

Friday 26 February 2016 05.20 EST

Music filesharing site MP3Skull has been slapped with a \$22.2m (£15.8m) damages bill after losing a lawsuit filed by record labels in the US.

The labels, working through industry body the RIAA, won a default judgment against the site, with the judge in the case awarding maximum statutory damages of \$150k for each of the 148 songs submitted as evidence.

The judgment also gives the labels the power to seize domain names belonging to MP3Skull, whose operators have been barred from any future activity that infringes the copyrights of the music companies – although their identify remains unknown, and they did not respond to the lawsuit.

That indicates the next challenge for the RIAA, which is to enforce both the damages and the domain seizures. The site is currently operating from the MP3Skull.yoga domain, having moved from .com and .to domains – both of which are blocked by ISPs in the UK under a high-court order.

As TorrentFreak noted in its report, the ruling is likely to “trigger a cat and mouse game, with MP3Skull switching domains” to stay online.

MP3Skull has been in the RIAA’s sights for some time. In October 2015, the industry body attacked the site – which links to MP3 downloads of tracks by a host of popular artists – as being “dedicated to ripping off music”.

“The site’s sole purpose is to generate profit from that theft of music, and it makes no pretence about what it does or why it does it,” claimed the RIAA.

“Virtually any commercial recording is available for free to download through the site and the most popular artists and songs (‘Top Downloads’) are invariably chart-topping hits.”

The default judgement against MP3Skull comes shortly after the RIAA forced another unlicensed music service, Aurous, offline after just a few days of operation, eventually settling with its developer in December 2015.

UNIVERSAL MUSIC GROUP

What concerns the financial community about the music industry

UMG wants to change the financial markets outlook on music and UMG

Key Concerns: Declining Physical Sales

Rate of decline decelerating

US\$ billions

- **Physical sales continue to decline but at a slower rate.**
 - 2010 -14%
 - 2011 1H -7%
- **Physical sales are proving resilient in several markets.**
 - Japan: 73% of sales are physical
 - Germany: 81% of sales are physical
- **CD sales in the U.S. have only declined 4% YTD** (Source: SoundScan)

Key Concerns: Piracy

Piracy continues to negatively impact the industry, but there is a growing recognition amongst policymakers that legislation is required to ensure that intellectual property rights are protected.

Source: IFPI/Nielsen

- A growing number of countries are adopting new laws or programs aimed at curbing online piracy.
- Graduated response systems and website blocking seem to be having an impact on P2P usage.
- While some consumers will move to other pirate services there are indications that some consumers are moving to legal services like Spotify.

Key Concerns: Unbundling of Albums

Cherry picking of tracks for \$0.99/\$1.29 was seen as a key trend of the physical to digital transition reducing the need to purchase full albums for \$9.99 but there are now signs that digital albums will have an important role in the market

- As more music is consumed digitally we are seeing a growing market for digital albums.
- In the United States digital album sales growth has offset the decline in CD sales. The UK market is close.
- Digital has created a massive singles market that was thought lost.

Units Millions	Q3 YTD 2010	Q3 YTD 2011	% Change
CD	157	152	-3.6%
Digital Album	62	74	+19.8%
Digital Track	860	952	+10.6%

Source: SoundScan

Units Millions	Q3 YTD 2010	Q3 YTD 2011	% Change
CD	61	54	-12.5%
Digital Album	12	16	+39.3%
Digital Track	105	120	+14.2%

Source: OCC

Key Concerns: Ownership to Access

Challenge is to get subscription services more widely adopted by the consumer

facebook

- **Ad-supported digital music services have proven to be unsustainable but a useful tool to migrate consumers away from pirates.**
- **Free music (e.g. YouTube, Facebook) is an impediment to the development of a pay model.**
- **UMG encourages the adoption of subscription services as a superior consumer alternative to piracy and as a stable recurring revenue source.**
- **Cloud and other access based models (e.g. locker services) should make the customer offering more compelling.**

Key Concerns: Challenging Retail Landscape

Physical retail faces numerous challenges while digital retail continues to be dominated by Apple's iTunes store

- A key driver behind the decline in CD sales has been the loss of retail outlets and the reduction in shelf space dedicated to music.
- Entertainment retailers also are facing the decline in DVD demand and price competition from supermarket and online retailers.
- The industry is facing the combined challenge in the physical sector of declining SKU's, a demand for deeper discounts and the modification of trading terms.
- Apple's iTunes is likely to dominate the digital retail landscape for the foreseeable future
- New market entrants such as Spotify and Deezer are broadening the digital retail market place.

Key Concerns: Music Publishing

- The Music publishing sector has declined since its peak in 2008, caused by falling revenues from record sales and licensing disputes that have limited growth from digital.
- According to Enders Analysis, music publishing could return to growth in 2012.

2012	2013	2014	2015
+0.7%	+1.8%	+2.1%	+2.1%

(Source - Enders Analysis)

- Growth from performance and synchronization has compensated for some of the decline from mechanical, recorded music revenues.

Business Transformation

Create a global music entertainment company, focused on industry leadership, maximizing our revenues from our investment in creativity and fully leveraging all our strengths and assets.

- **Aligning our cost base to reflect the reality of the market place.**
- **Accelerate the development of new “music” business.**
- **Maintain our investment in creativity – A&R success and talent discovery are at the core of everything we do.**
- **Protect our market leadership position and rights.**

Business Transformation

We have undertaken a comprehensive restructuring of our operations which will result in savings of €100 million per annum. All the steps necessary to deliver these savings have been taken and will be fully implemented in 2012.

- **US label reorganization**
- **Corporate centers**
- **Country transformation**
- **IT outsourcing**
- **Overhaul distribution and “non-creative” costs**

We are in constant pursuit of efficiencies and savings

New Growth Opportunities: Music

A&R success and talent discovery are at the heart of everything that we do.

- #1 destination for artists
- Fresh executive talent in A&R
- Adult contemporary
- Revitalize Motown
- Country music
- Global exploitation of English language repertoire
- TV platforms

New Growth Opportunities: Diversification

UMG is at the centre of artist activity and not just on the periphery of the business as an audio distributor.

VEVO: #1 Music Video Site for original artist content

Strategic Marketing Partnerships (SMPs):

Qatar Telecom (MENA) HP (Brazil) AMEX (US) Reliance (India)

Diversified Business:

Bravado, Beats By Dre, Universal Music Publishing Group

Broader media involvement:

The Voice, American Idol

New Growth Opportunities: Emerging Markets

New business models enable us to establish a presence in emerging markets

- Previous hurdles of vast geographies making physical distribution untenable and a lack of respect for intellectual copyright made monetization a major challenge.
- We will increase our presence and resources in markets such as Russia, China, India, Indonesia, Vietnam and MENA.
- Currently there is a disconnect between social media and monetization (Indonesia is now the second largest Facebook community in the world).
- UMG aligned with Vivendi's expansion into emerging markets e.g. Maroc Telecom (UMG Mobile Music Service – Sub Saharan) and GVT (Power Music Club – Brazil).

A NEW AUDIENCE

NEW DEVICES: PENETRATION AND GROWTH

SOCIAL MEDIA: GROWTH

New Growth Opportunities: Consumer Focus

The creation of brands remains at the heart of our creative process but we are now putting consumers at the heart of our commercial process.

- **Leverage our CRM and develop a closer relationship with the consumer.**
- **Use music to assist global brands to access consumer groups.**
- **By deepening our understanding of consumer demand, we can maximize average revenue per consumer for each and every artist.**

New Growth Opportunities: Subscription

While subscription services still only represent a small portion of the global digital music market, Sweden provides an illustration of the potential.

Sweden Digital Revenues

- In Sweden, 1 out of 2 people under the age of 35 listen to Spotify and 22% of the overall population use the service.
- Digital represented 28% of the Swedish music market in 2010 (France 17%, Germany 13%).
- UMG encourages the adoption of subscription services as a superior consumer alternative to piracy and as a stable recurring revenue source.

New Growth Opportunities: New Business Models

Return on our creative investment

- Strategic global and localized marketing partnerships
- Expanding merchandise operations into the retail sector
- Building brands with artists at the centre

Universal Music Group

HIGHLIGHTS
Q3 YTD 2011

Universal Music Group

UNIVERSAL MUSIC GROUP TO ACQUIRE EMI RECORDED MUSIC

UMG agrees to purchase EMI Recorded Music for £1.2 billion at a likely inflexion point in the music industry cycle

- **Acquire a tremendous catalogue and superstar acts, complementary to UMG in genres and geographies**
- **Attractive valuation with significant synergy potential**
 - **EBITDA multiple of 7x and below 5x post full synergies in excess of £100 million per annum**
- **Very accretive to UMG EBITA margin rate due to broader asset base and synergies**
- **Accretive to earnings in year one* and ROCE to exceed WACC at year 3**
- **Expects to maintain BBB rating. UMG will dispose of non-core assets totaling €500 million in value to partially fund transaction**

Aligned with Vivendi's strategy of investing in premium content with compelling financial returns

* Before expected restructuring costs

Transaction Price

- **Enterprise value of £1.2 billion**
- **7x EBITDA*, and less than 5x EBITDA* post full synergies of over £100 million per annum**
 - **Valuation is DCF-based with a 9.5% WACC, a 0% perpetual growth rate, and applying a 35% tax rate**
 - **Multiple is below assumed price paid for Warner Music Group's recorded music business in May 2011, a transaction which did not generate any synergies**

Conservative earnings prospects do not take into account inflexion point currently seen in certain recorded music markets including the U.S.

* EMI fiscal year ending March 31, 2011

Universal Music Group

SUMMARY

The Future

The recorded music market is approaching its inflection point

- **UMG is best positioned to maximize the benefit from the evolving music market.**
- **The balance of creativity and control are expected to deliver EBITA margins of 15% within 5 years.**

Universal Music Group

Important legal disclaimer

Forward looking Statements

This presentation contains "forward-looking statements" as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are not guarantees of future performance. Actual results may differ materially from the forward-looking statements as a result of a number of risks and uncertainties, many of which are outside our control, including but not limited to the risks that prospects for growth in revenues, earnings and adjusted net income may differ from forecasts made by Vivendi or UMG; UMG will not be able to obtain the regulatory, competition or other approvals necessary to complete certain transactions, including but not limited to the EMI transaction discussed in this presentation; synergies and profits arising from proposed acquisitions will not materialize in the timing or manner described above; UMG will be unable to further identify, develop and achieve success for new products, services and technologies; UMG will face increased competition and that the effect(s) on pricing, spending, third-party relationships and revenues of such competition will limit or reduce UMG's revenue and/or income; as well as any additional risks described in the documents Vivendi has filed previously with the U.S. Securities and Exchange Commission and/or the French Autorité des Marchés Financiers.

Investors and security holders may obtain a free copy of documents filed by Vivendi with the U.S. Securities and Exchange Commission at www.sec.gov, www.amf-france.org or directly from Vivendi. Vivendi does not undertake, nor has any obligation, to provide, update or revise any forward-looking statements.

ARTICLE I: MISSION AND CORE VALUES

Section 1. MISSION

The mission of The Internet Corporation for Assigned Names and Numbers ("CANN") is to coordinate at the overall level the global name space systems of unique identifiers and in particular to ensure the stable and secure operation of the Internet's unique identifier systems in particular [CANN](#)

- 1 Coordinate the allocation and assignment of the three sets of unique identifiers for the Internet which are
 - a Domain names (forming a system referred to as "DNS")
 - b Internet Protocol ("IP") addresses and autonomous system ("AS") numbers and
 - c Protocol port and parameter numbers
- 2 Coordinate the operation and evolution of the DNS root name server system
- 3 Coordinate policy development reasonably and appropriately related to these technical functions

Section 2. CORE VALUES

In performing its mission the following core values should guide the decisions and actions of [CANN](#)

- 1 Preserving and enhancing the operational stability, reliability, security and global interoperability of the Internet
- 2 Respecting the creativity, innovation and flow of information made possible by the Internet by limiting [CANN's](#) activities to those matters within [CANN's](#) mission requiring or significantly benefiting from global coordination
- 3 To the extent feasible and appropriate delegating coordination functions to or recognizing the policy role of other responsible entities that reflect the interests of affected parties
- 4 Seeking and supporting broad informed participation reflecting the functional, geographic and cultural diversity of the Internet at all levels of policy development and decision-making
- 5 Where feasible and appropriate depending on market mechanisms to promote and sustain a competitive environment
- 6 Reducing and promoting competition in the registration of domain names where practicable and beneficial in the public interest
- 7 Employing open and transparent policy development mechanisms that (i) promote well-informed decisions based on expert advice and (ii) ensure that those entities most affected can assist in the policy development process
- 8 Making decisions by applying documented policies neutrally and objectively with integrity and fairness

- 9 Acting with a speed that is responsive to the needs of the member while as part of the decision-making process obtaining informed input from those entities most affected
- 10 Remaining accountable to the member community through mechanisms that enhance CANN's effectiveness
- 11 While remaining rooted in the private sector recognizing that governments and public authorities are responsible for public policy and duly taking into account governments' or public authorities' recommendations

These core values are deliberately expressed in very general terms so that they may provide useful and relevant guidance in the broadest possible range of circumstances. Because they are not narrowly prescriptive the specific way in which they apply individually and collectively to each new situation will necessarily depend on many factors that cannot be fully anticipated or enumerated and because they are statements of principle rather than practice situations will inevitably arise in which perfect fidelity to all eleven core values simultaneously is not possible. Any CANN body making a recommendation or decision shall exercise its judgment to determine which core values are most relevant and how they apply to the specific circumstances of the case at hand and to determine if necessary an appropriate and defensible balance among competing values.

ARTICLE II: POWERS

Section 1. GENERAL POWERS

Except as otherwise provided in the Articles of Incorporation or these Bylaws the powers of CANN shall be exercised by and its properly controlled and its business and affairs conducted by or under the direction of the Board. With respect to any matters that would fall within the provisions of Article Section 6 the Board may act only by a majority vote of all members of the Board in all other matters except as otherwise provided in these Bylaws or by law the Board may act by majority vote of those present at any annual regular or special meeting of the Board. Any references in these Bylaws to a vote of the Board shall mean the vote of only those members present at the meeting where a quorum is present unless otherwise specifically provided in these Bylaws by reference to "all of the members of the Board."

Section 2. RESTRICTIONS

CANN shall not act as a Domain Name System Registry or Registrar or member Protocol Address Registry in competition with entities affected by the policies of CANN. Nothing in this Section is intended to prevent CANN from taking whatever steps are necessary to protect the operational stability of the member in the event of financial failure of a Registry or Registrar or other emergency.

Section 3. NON-DISCRIMINATORY TREATMENT

CANN shall not apply its standards policies procedures or practices inequally or single out any particular party for disparate treatment unless justified by substantial and reasonable cause such as the promotion of effective competition.

ARTICLE III: TRANSPARENCY

Section 1. PURPOSE

CANN and its constituent bodies shall operate to the maximum extent feasible in an open and transparent manner and consistent with procedures designed to ensure fairness.

Section 2. WEBSITE

CANN shall maintain a publicly-accessible member World Wide Web site (the "Website") which may include among other things (i) a calendar of scheduled meetings of the Board Supporting Organizations and Advisory Committees (ii) a docket of all pending policy development matters including their schedule and current status (iii) specific meeting notices and agendas as described below (iv) information on CANN's budget annual audit financial contributors and the amount of their contributions and related matters (v) information about the availability of accountability mechanisms including reconsideration independent review and Ombudsman activities as well as information about the outcome of specific requests and complaints invoking these mechanisms (vi) announcements about CANN activities of interest to significant segments of the CANN community (vii) comments received from the community on policies being developed and other matters (viii) information about CANN's physical meetings and public forums and (ix) other information of interest to the CANN community.

Section 3. MANAGER OF PUBLIC PARTICIPATION

There shall be a staff position designated as Manager of Public Participation or such other title as shall be determined by the President that shall be responsible under the direction of the President for coordinating the various aspects of public participation in CANN including the Website and various other means of communicating with and receiving input from the general community of member users.

Section 4. MEETING NOTICES AND AGENDAS

At least seven days in advance of each Board meeting (or if not practicable as far in advance as is practicable) a notice of such meeting and of the expected agenda for the meeting shall be posted.

Section 5. MINUTES AND PRELIMINARY REPORTS

- 1 All minutes of meetings of the Board and Supporting Organizations (and any councils hereof) shall be approved promptly by the originating body and provided to the CANN Secretary for posting on the Website.
- 2 No later than 11:59 p.m. on the second business days after the conclusion of each meeting (as calculated by local time at the location of CANN's principal office) any resolutions passed by the Board of Directors at that meeting shall be made publicly available on the Website provided however that any actions relating to personnel or employment matters legal matters (other than the Board determines it is necessary or appropriate to protect the interests of CANN) matters that CANN is prohibited by law or

con rat from disclosing publicly and o her ma ers ha he Board de ermines by a hree-quar ers (3/4) vo e of Direc ors presen a he mee ing and vo ing are no appropria e for public dis ribu ion shall no be included in he preliminary repor made publicly available The Secre ary shall send no ice o he Board of Direc ors and he Chairs of he Supporting Organizations (as se for h in Ar icles V - X of hese Bylaws) and Advisory Commi ees (as se for h in Ar icle X of hese Bylaws) informing hem ha he resolu ions have been posed

- 3 No la er han 11 59 p m on he seven h business days af er he conclusion of each mee ing (as calcula ed by local ime a he loca ion of CANN's principal office) any ac ions aken by he Board shall be made publicly available in a preliminary repor on he Websi e subjec o he limia ions on disclosure se for h in Sec ion 5.2 above For any ma ers ha he Board de ermines no o disclose he Board shall describe in general erms in he relevan preliminary repor he reason for such nondisclosure
- 4 No la er han he day af er he da e on which hey are formally approved by he Board (or if such day is no a business day as calcula ed by local ime a he loca ion of CANN's principal office hen he nex immedia ely following business day) he minu es shall be made publicly available on he Websi e provided however ha any minu es rela ing o personnel or employem ma ers legal ma ers (o he exen he Board de ermines i is necessary or appropria e o pro ec he in eres s of CANN) ma ers ha CANN is prohibi ed by law or con rat from disclosing publicly and o her ma ers ha he Board de ermines by a hree-quar ers (3/4) vo e of Direc ors presen a he mee ing and vo ing are no appropria e for public dis ribu ion shall no be included in he minu es made publicly available For any ma ers ha he Board de ermines no o disclose he Board shall describe in general erms in he relevan minu es he reason for such nondisclosure

Section 6. NOTICE AND COMMENT ON POLICY ACTIONS

- 1 Wi h respec o any policies ha are being considered by he Board for adop ion ha subs anially affec he opera ion of he n erme or hird par ies including he imposi ion of any fees or charges CANN shall
 - a provide public no ice on he Websi e explaining wha policies are being considered for adop ion and why a leas wen y-one days (and if prac ical earlier) prior o any ac ion by he Board
 - b provide a reasonable oppor uni y for par ies o commen on he adop ion of he proposed policies o see he commen s of o hers and o reply o hose commen s prior o any ac ion by he Board and
 - c in hose cases where he policy ac ion affec s public policy concerns o reques he opinion of he Governmen al Advisory Commi ee and ake duty in o accoun any advice imely presen ed by he Governmen al Advisory Commi ee on i s own ini ia ive or a he Board's reques

Section 2. RECONSIDERATION

- 1 CANN shall have in place a process by which any person or en i y ma erially affec ed by an ac ion of CANN may reques review or reconsidera ion of ha ac ion by he Board
- 2 Any person or en i y may submi a reques for reconsidera ion or review of an CANN ac ion or inac ion ("Reconsidera ion Reques ") o he exen ha he she or i have been adversely affec ed by
 - a one or more s aff ac ions or inac ions ha con radic es ablished CANN policy(ies) or
 - b one or more ac ions or inac ions of he CANN Board ha have been aken or refused o be aken wi hou considera ion of ma erial informa ion excep where he par y submi ing he reques could have submi ed bu did no submi he informa ion for he Board's considera ion a he ime of ac ion or refusal o ac or
 - c one or more ac ions or inac ions of he CANN Board ha are aken as a resul of he Board's reliance on false or inaccura e ma erial informa ion
- 3 The Board has designa ed he Board Governance Commi ee o review and consider any such Reconsidera ion Reques s The Board Governance Commi ee shall have he au hori y o
 - a evalua e reques s for review or reconsidera ion
 - b summarily dismiss insufficien reques s
 - c evalua e reques s for urgen considera ion
 - d conduc wha ever fac ual inves iga ion is deemed appropria e
 - e reques addi onal wri en submissions from he affec ed par y or from o her par ies

- f make a final determination on Reconsideration Requests regarding suspension or inaction with reference to the Board of Directors and
 - g make a recommendation to the Board of Directors on the merits of the request as necessary
- 4 .CANN shall absorb the normal administrative costs of the reconsideration process. Reserves held to recover from a party requesting review or reconsideration any costs that are deemed to be extraordinary in nature. When such extraordinary costs can be foreseen, the fact and the reasons why such costs are necessary and appropriate to evaluating the Reconsideration Request shall be communicated to the party seeking reconsideration who shall then have the option of withdrawing the request or agreeing to bear such costs.
 - 5 All Reconsideration Requests must be submitted to an e-mail address designated by the Board Governance Committee within fifteen days after
 - a for requests challenging Board actions the date on which information about the challenged Board action is first published in a resolution unless the posting of the resolution is not accompanied by a rationale. In any instance the request must be submitted within 15 days from the initial posting of the rationale.
 - b for requests challenging suspensions the date on which the party submitting the request became aware of or reasonably should have become aware of the challenged suspension or
 - c for requests challenging either Board or suspension the date on which the affected person reasonably concluded or reasonably should have concluded that the action would not be taken in a timely manner.
 - 6 To properly initiate a Reconsideration process all requestors must review and follow the Reconsideration Request form posted on the .CANN website at <http://www.icann.org/en/groups/board/governance/reconsideration>. Requestors must also acknowledge and agree to the terms and conditions set forth in the form when filing.
 - 7 Requestors shall not provide more than 25 pages (double-spaced, 12-point font) of argument in support of a Reconsideration Request. Requestors may submit all documentary evidence necessary to demonstrate why the action or inaction should be reconsidered within the limitation.
 - 8 The Board Governance Committee shall have authority to consider Reconsideration Requests from different parties in the same proceeding so long as (i) the requests involve the same general action or inaction and (ii) the parties submitting Reconsideration Requests are similarly affected by such action or inaction. In addition, consolidated filings may be appropriate if the alleged causal connection and the resulting harm is the same for all of the requestors. Every requestor must be able to demonstrate that it has been materially harmed and adversely impacted by the action or inaction giving rise to the request.
 - 9 The Board Governance Committee shall review each Reconsideration Request upon its receipt to determine if it is sufficiently stated. The Board Governance Committee may summarily dismiss a Reconsideration Request if (i) the requestor fails to meet the requirements for bringing a Reconsideration Request, (ii) it is frivolous, querulous or vexatious, or (iii) the requestor had no notice and opportunity to be heard but did not participate in the public comment period relating to the contested action, if applicable. The Board Governance Committee's summary dismissal of a Reconsideration Request shall be posted on the Website.
 - 10 For all Reconsideration Requests that are not summarily dismissed, the Board Governance Committee shall promptly proceed to review and consideration.
 - 11 The Board Governance Committee may ask the .CANN staff for its views on the matter which comments shall be made publicly available on the Website.
 - 12 The Board Governance Committee may request additional information or clarifications from the requestor and may elect to conduct a meeting with the requestor by telephone, email or if acceptable to the party requesting reconsideration, in person. A requestor may ask for an opportunity to be heard. The Board Governance Committee's decision on any such request is final. To the extent any information gathered in such a meeting is relevant to any recommendation by the Board Governance Committee, it shall so state in its recommendation.
 - 13 The Board Governance Committee may also request information relevant to the request from third parties. To the extent any information gathered is relevant to any recommendation by the Board Governance Committee, it shall so state in its recommendation. Any information collected from third parties shall be provided to the requestor.
 - 14 The Board Governance Committee shall act on a Reconsideration Request on the basis of the public written record, including information submitted by the party seeking reconsideration or review by the .CANN staff and by any third party.
 - 15 For all Reconsideration Requests brought regarding suspension or inaction, the Board Governance Committee shall be delegated authority by the Board of Directors to make a final determination and recommendation on the matter. Board consideration of the recommendation is not required. As the Board Governance Committee deems necessary, it may make a recommendation to the Board for consideration and action. The Board Governance Committee's determination on suspension or inaction shall be posted on the Website. The Board Governance Committee's determination is final and establishes precedential value.
 - 16 The Board Governance Committee shall make a final determination or a recommendation to the Board with respect to a Reconsideration Request within thirty days following its receipt of the request, unless impractical, in which case it shall report to the Board the circumstances that prevented it from making a final recommendation and it shall be exempt from the time required to produce such a final determination or recommendation. The final recommendation shall be posted on the .CANN website.
 - 17 The Board shall not be bound to follow the recommendations of the Board Governance Committee. The final decision of the Board shall be made public as part of the preliminary report and minutes of the Board meeting at which action is taken. The Board shall issue its decision on the recommendation of the Board Governance Committee within 60 days of receipt of the Reconsideration Request or as soon thereafter as feasible. Any circumstances that delay the Board from acting within this timeframe must be identified and posted on the .CANN website. The Board's decision on the recommendation is final.

- 18 If he requestor believes that the Board action or inaction posed for Reconsideration is so urgent that the timing requirements of the Reconsideration process are too long, the requestor may apply to the Board Governance Committee for urgent consideration. Any request for urgent consideration must be made within two business days (calculated as CANN's headquarters in Los Angeles, California) of the posting of the resolution at issue. A request for urgent consideration must include a discussion of why the matter is urgent for reconsideration and must demonstrate a likelihood of success with the Reconsideration Request.
- 19 The Board Governance Committee shall respond to the request for urgent consideration within two business days after receipt of such request. If the Board Governance Committee agrees to consider the matter with urgency, it will cause no notice to be provided to the requestor who will have two business days after notification to complete the Reconsideration Request. The Board Governance Committee shall issue a recommendation on the urgent Reconsideration Request within seven days of the completion of the filing of the Request or as soon thereafter as feasible. If the Board Governance Committee does not agree to consider the matter with urgency, the requestor may still file a Reconsideration Request within the regular time frame set forth in these Bylaws.
- 20 The Board Governance Committee shall submit a report to the Board on an annual basis containing at least the following information for the preceding calendar year:
 - a. the number and general nature of Reconsideration Requests received, including an identification of the requests were acted upon, summarily dismissed, or remain pending;
 - b. for any Reconsideration Requests that remained pending at the end of the calendar year, the average length of time for which such Reconsideration Requests have been pending, and a description of the reasons for any requests pending for more than nine (90) days;
 - c. an explanation of any other mechanisms available to ensure that CANN is accountable to persons materially affected by its decisions; and
 - d. whether or not, in the Board Governance Committee's view, the criteria for which reconsideration may be requested should be revised, or another process should be adopted or modified, to ensure that all persons materially affected by CANN decisions have meaningful access to a review process that ensures fairness while limiting frivolous claims.

Section 3. INDEPENDENT REVIEW OF BOARD ACTIONS

1. In addition to the reconsideration process described in Section 2 of this Article, CANN shall have in place a separate process for independent third-party review of Board actions alleged by an affected party to be inconsistent with the Articles of Incorporation or Bylaws.
2. Any person materially affected by a decision or action by the Board that he or she asserts is inconsistent with the Articles of Incorporation or Bylaws may submit a request for independent review of that decision or action in order to be materially affected, the person must suffer injury or harm that is directly and causally connected to the Board's alleged violation of the Bylaws or the Articles of Incorporation, and not as a result of third parties acting in line with the Board's action.
3. A request for independent review must be filed within thirty days of the posting of the minutes of the Board meeting (and the accompanying Board Briefing Materials, if available) that the requesting party contends demonstrate that CANN violated its Bylaws or Articles of Incorporation. Consolidated requests may be appropriate when the causal connection between the circumstances of the requests and the harm is the same for each of the requesting parties.
4. Requests for such independent review shall be referred to an Independent Review Process Panel ("RP Panel") which shall be charged with comparing contested actions of the Board to the Articles of Incorporation and Bylaws, and with declaring whether the Board has acted consistently with the provisions of those Articles of Incorporation and Bylaws. The RP Panel must apply a defined standard of review to the RP request, focusing on:
 - a. did the Board act withou conflict of interest in making its decision?
 - b. did the Board exercise due diligence and care in having a reasonable amount of facts in front of them? and
 - c. did the Board members exercise independent judgment in making the decision believed to be in the best interests of the company?
5. Requests for independent review shall not exceed 25 pages (double-spaced, 12-point font) of argument. CANN's response shall not exceed the same length. Parties may submit documentary evidence supporting their positions without limitation, but they may not submit expert evidence; such evidence must be provided in writing and there will be a right of reply to the expert evidence.
6. There shall be an omnibus standing panel of between six and nine members with a variety of expertise including jurisprudence, judicial experience, alternative dispute resolution, and knowledge of CANN's mission and work from which each specific RP Panel shall be selected. The panels shall serve for terms that are staggered to allow for continued review of the size of the panel and the range of expertise. A Chair of the standing panel shall be appointed for a term not to exceed three years. Individuals holding an official position or office within CANN's structure are not eligible to serve on the standing panel, but even if an omnibus standing panel (i) is not in place when an RP Panel must be convened for a given proceeding, the RP proceeding will be considered by a one- or three-member panel comprised in accordance with the rules of the RP Provider, or (ii) is in place but does not have the requisite diversity of skill and experience needed for a particular proceeding, the RP Provider shall identify one or more panels, as required, from outside the omnibus standing panel to augment the panel members for that proceeding.
7. All RP proceedings shall be administered by an institutional dispute resolution provider appointed from time to time by CANN ("the RP Provider"). The membership of the standing panel shall be coordinated by the RP Provider subject to approval by CANN.
8. Subject to the approval of the Board, the RP Provider shall establish operating rules and procedures which shall implement and be consistent with this Section 3.
9. Either party may request that the RP be considered by a one- or three-member panel. The Chair of the standing panel shall make the final determination of the size of each RP panel, taking into account the

wishes of the parties and the complexity of the issues presented

- 10 The RP Provider shall determine a procedure for assigning members from the standing panel to individual RP panels
- 11 The RP Panel shall have the authority to
 - a summarily dismiss requests brought with outstanding lacking in substance or that are frivolous or vexatious
 - b request additional written submissions from the party seeking review the Board the Supporting Organizations or from other parties
 - c declare whether an action or inaction of the Board was inconsistent with the Articles of Incorporation or Bylaws and
 - d recommend that the Board say any action or decision or that the Board take any interim action until such time as the Board reviews and acts upon the opinion of the RP
 - e consolidate requests for independent review if the facts and circumstances are sufficiently similar and
 - f determine the timing for each proceeding
- 12 In order to keep the costs and burdens of independent review as low as possible the RP Panel should conduct its proceedings by email and otherwise via the internet to the maximum extent feasible Where necessary the RP Panel may hold meetings by telephone notwithstanding that a telephonic or in-person hearing is convened the hearing shall be limited to argument only all evidence including witness statements must be submitted in writing in advance
- 13 All panel members shall adhere to conflicts-of-interest policies adopted in the RP Provider's operating rules and procedures as approved by the Board
- 14 Prior to initiating a request for independent review the complainant is urged to enter into a period of cooperative engagement with CANN for the purpose of resolving or narrowing the issues that are contemplated to be brought to the RP The cooperative engagement process is published on CANN.org and is incorporated into this Section 3 of the Bylaws
- 15 Upon the filing of a request for an independent review the parties are urged to participate in a conciliation period for the purpose of narrowing the issues that are stated within the request for independent review A conciliation will be appointed from the members of the omnibus standing panel by the Chair of that panel The conciliation shall not be eligible to serve as one of the panels presiding over that particular RP The Chair of the standing panel may deem conciliation unnecessary if cooperative engagement sufficiently narrowed the issues remaining in the independent review
- 16 Cooperative engagement and conciliation are both voluntary However if the party requesting the independent review does not participate in good faith in the cooperative engagement and the conciliation processes if applicable and CANN is the prevailing party in the request for independent review the RP Panel must award to CANN all reasonable fees and costs incurred by CANN in the proceeding including legal fees
- 17 All matters discussed during the cooperative engagement and conciliation phases are to remain confidential and not subject to discovery or as evidence for any purpose with the RP and are without prejudice to either party
- 18 The RP Panel should strive to issue its written declaration no later than six months after the filing of the request for independent review The RP Panel shall make its declaration based solely on the documentation supporting materials and arguments submitted by the parties and in its declaration shall specifically designate the prevailing party The party not prevailing shall ordinarily be responsible for bearing all costs of the RP Provider but in an extraordinary case the RP Panel may in its declaration allocate up to half of the costs of the RP Provider to the prevailing party based upon the circumstances including a consideration of the reasonableness of the parties' positions and their contribution to the public interest Each party to the RP proceedings shall bear its own expenses
- 19 The RP operating procedures and all petitions claims and declarations shall be posted on CANN's website when they become available
- 20 The RP Panel may in its discretion grant a party's request to keep certain information confidential such as trade secrets
- 21 Where feasible the Board shall consider the RP Panel declaration at the Board's next meeting The declarations of the RP Panel and the Board's subsequent action on those declarations are final and have precedential value

Section 4. PERIODIC REVIEW OF ICANN STRUCTURE AND OPERATIONS

1 The Board shall cause a periodic review of the performance and operation of each Supporting Organization each Supporting Organization Council each Advisory Committee (other than the Governmental Advisory Committee) and the Nominating Committee by an entity or entities independent of the organization under review The goal of the review is to be undertaken pursuant to such criteria and standards as the Board shall direct shall be to determine (i) whether the organization has a continuing purpose in the CANN structure and (ii) if so whether any change in structure or operations is desirable to improve its effectiveness

These periodic reviews shall be conducted no less frequently than every five years based on feasibility as determined by the Board Each five-year cycle will be computed from the moment of the reception by the Board of the final report of the relevant review Working Group

The results of such reviews shall be posted on the Website for public review and comment and shall be considered by the Board no later than the second scheduled meeting of the Board after such results have been posted for 30 days The consideration by the Board includes the ability to revise the structure or operation of the parts of CANN being reviewed by a majority vote of all members of the Board

2 The Governmental Advisory Committee shall provide its own review mechanisms

ARTICLE V: OMBUDSMAN

Section 1. OFFICE OF OMBUDSMAN

- 1 There shall be an Office of Ombudsman to be managed by an Ombudsman and to include such staff support as the Board determines is appropriate and feasible. The Ombudsman shall be a full-time position with salary and benefits appropriate to the function as determined by the Board.
- 2 The Ombudsman shall be appointed by the Board for an initial term of two years, subject to renewal by the Board.
- 3 The Ombudsman shall be subject to dismissal by the Board only upon a three-fourths (3/4) vote of the entire Board.
- 4 The annual budget for the Office of Ombudsman shall be established by the Board as part of the annual CANN budget process. The Ombudsman shall submit a proposed budget to the President and the President shall include the budget submission in its entire and without change in the general CANN budget recommended by the CANN President to the Board. Nothing in his Article shall prevent the President from offering separate views on the substance, size, or other features of the Ombudsman's proposed budget to the Board.

Section 2. CHARTER

The charter of the Ombudsman shall be to act as a neutral dispute resolution practitioner for those matters for which the provisions of the Reconsideration Policy set forth in [Section 2 of Article V](#) or the Independent Review Policy set forth in [Section 3 of Article V](#) have not been invoked. The principal function of the Ombudsman shall be to provide an independent internal evaluation of complaints by members of the CANN community who believe that the CANN staff, Board, or an CANN constituent body has treated them unfairly. The Ombudsman shall serve as an objective advocate for fairness and shall seek to evaluate and, where possible, resolve complaints about unfair or inappropriate treatment by CANN staff, the Board, or CANN constituent bodies, clarifying the issues and using conflict resolution tools such as negotiation, facilitation, and "shuttle diplomacy" to achieve these results.

Section 3. OPERATIONS

The Office of Ombudsman shall

- 1 facilitate the fair, impartial, and timely resolution of problems and complaints of affected members of the CANN community (excluding employees and vendors/suppliers of CANN) who have specific actions or failures to act by the Board or CANN staff which have not otherwise become the subject of either the Reconsideration or Independent Review Policies.
- 2 exercise discretion to accept or decline to act on a complaint or question, including by the development of procedures to dispose of complaints that are insufficiently concrete, substantive, or related to CANN's interactions with the community, so as to be inappropriate subjects for the Ombudsman to act on. In addition, and without limiting the foregoing, the Ombudsman shall have no authority to act in any way with respect to internal administrative matters, personnel matters, issues relating to membership on the Board, or issues related to vendor/supplier relations.
- 3 have the right to have access to (but not to publish if otherwise confidential) all necessary information and records from CANN staff and constituent bodies to enable an informed evaluation of the complaint and to assist in dispute resolution where feasible (subject only to such confidentiality obligations as are imposed by the complainant or any generally applicable confidentiality policies adopted by CANN).
- 4 heighten awareness of the Ombudsman program and functions through routine interaction with the CANN community and online availability.
- 5 maintain neutrality and independence and have no bias or personal stake in an outcome, and
- 6 comply with all CANN conflicts-of-interest and confidentiality policies.

Section 4. INTERACTION WITH ICANN AND OUTSIDE ENTITIES

- 1 No CANN employee, Board member, or other participant in Supporting Organizations or Advisory Committees shall prevent or impede the Ombudsman's contact with the CANN community (including employees of CANN). CANN employees and Board members shall direct members of the CANN community who voice problems, concerns, or complaints about CANN to the Ombudsman, who shall advise complainants about the various options available for review of such problems, concerns, or complaints.
- 2 CANN staff and other CANN participants shall observe and respect determinations made by the Office of Ombudsman concerning confidentiality of any complaints received by the Office.
- 3 Contact with the Ombudsman shall not constitute an act of CANN of any particular action or cause of action.
- 4 The Ombudsman shall be specifically authorized to make such reports to the Board as he or she deems appropriate with respect to any particular matter and its resolution or the inability to resolve it. Absent a determination by the Ombudsman in his or her sole discretion, he or she would be inappropriate. Such reports shall be posted on the Website.
- 5 The Ombudsman shall not take any actions not authorized in these Bylaws, and in particular shall not insist upon or support in any way any legal actions challenging CANN's routine procedures, processes, or any conduct by the CANN Board, staff, or constituent bodies.

Section 5. ANNUAL REPORT

The Office of Ombudsman shall publish on an annual basis a consolidated analysis of the year's complaints and resolutions, appropriately dealing with confidentiality obligations and concerns. Such annual reports should include a description of any trends or common elements of complaints received during the period in question, as well as recommendations for steps that could be taken to minimize future complaints. The annual report shall be posted on the Website.

ARTICLE VI: BOARD OF DIRECTORS

Section 1. COMPOSITION OF THE BOARD

The CANN Board of Directors ("Board") shall consist of sixteen voting members ("Directors") in addition four non-voting liaisons ("Liaisons") shall be designated for the purposes set forth in [Section 9 of his Article](#). Only Directors shall be included in determining the existence of quorums and in establishing the validity of votes taken by the CANN Board.

Section 2. DIRECTORS AND THEIR SELECTION; ELECTION OF CHAIRMAN AND VICE-CHAIRMAN

1 The Directors shall consist of

- a Eight voting members selected by the Nominating Committee established by [Article V of these Bylaws](#). These seats on the Board of Directors are referred to in these Bylaws as Seats 1 through 8.
- b Two voting members selected by the Address Supporting Organization according to the provisions of [Article V of these Bylaws](#). These seats on the Board of Directors are referred to in these Bylaws as Seats 9 and Seat 10.
- c Two voting members selected by the Country-Code Names Supporting Organization according to the provisions of [Article X of these Bylaws](#). These seats on the Board of Directors are referred to in these Bylaws as Seats 11 and Seat 12.
- d Two voting members selected by the Generic Names Supporting Organization according to the provisions of [Article X of these Bylaws](#). These seats on the Board of Directors are referred to in these Bylaws as Seats 13 and Seat 14.
- e One voting member selected by the A-Large Community according to the provisions of [Article X of these Bylaws](#). This seat on the Board of Directors is referred to in these Bylaws as Seat 15.
- f The President ex officio who shall be a voting member.

2 In carrying out its responsibilities to fill Seats 1 through 8 the Nominating Committee shall seek to ensure that the CANN Board is composed of members who in the aggregate display diversity in geography, culture, skills, experience, and perspective by applying the criteria set forth in [Section 3 of his Article](#). At no time when it makes its selection shall the Nominating Committee select a Director to fill any vacancy or expired term whose selection would cause the total number of Directors (not including the President) from countries in any one Geographic Region (as defined in [Section 5 of his Article](#)) to exceed five, and the Nominating Committee shall ensure when it makes its selections that the Board includes at least one Director who is from a country in each CANN Geographic Region ("Diversity Calculation").

For purposes of this sub-section 2 of [Article V](#), [Section 2 of the CANN Bylaws](#), if any candidate for director maintains citizenship of more than one country or has been domiciled for more than five years in a country of which the candidate does not maintain citizenship ("Domicile") the candidate may be deemed to be from either country and must select in his/her Statement of Interest the country of citizenship or Domicile that he/she wants the Nominating Committee to use for Diversity Calculation purposes. For purposes of this sub-section 2 of [Article V](#), [Section 2 of the CANN Bylaws](#), a person can only have one "Domicile" which shall be determined by where the candidate has a permanent residence and place of habitation.

3 In carrying out their responsibilities to fill Seats 9 through 15 the Supporting Organizations and the A-Large Community shall seek to ensure that the CANN Board is composed of members that in the aggregate display diversity in geography, culture, skills, experience, and perspective by applying the criteria set forth in [Section 3 of his Article](#). At any given time, no two Directors selected by a Supporting Organization shall be citizens from the same country or of countries located in the same Geographic Region.

For purposes of this sub-section 3 of [Article V](#), [Section 2 of the CANN Bylaws](#), if any candidate for director maintains citizenship of more than one country or has been domiciled for more than five years in a country of which the candidate does not maintain citizenship ("Domicile") the candidate may be deemed to be from either country and must select in his/her Statement of Interest the country of citizenship or Domicile that he/she wants the Supporting Organization or the A-Large Community to use for selection purposes. For purposes of this sub-section 3 of [Article V](#), [Section 2 of the CANN Bylaws](#), a person can only have one "Domicile" which shall be determined by where the candidate has a permanent residence and place of habitation.

4 The Board shall annually elect a Chairman and a Vice-Chairman from among the Directors, not including the President.

Section 3. CRITERIA FOR SELECTION OF DIRECTORS

CANN Directors shall be

- 1 Accomplished persons of integrity, objectivity, and intelligence with reputations for sound judgment and open minds, and a demonstrated capacity for thoughtful group decision-making.
- 2 Persons with an understanding of CANN's mission and the potential impact of CANN decisions on the global name community and committed to the success of CANN.
- 3 Persons who will produce the broadest cultural and geographic diversity on the Board consistent with meeting the other criteria set forth in this Section.
- 4 Persons who in the aggregate have personal familiarity with the operation of gTLD registries and registrars, with ccTLD registries, with P address registries, with Internet technical standards and protocols, with policy-development procedures, legal relations, and the public interest, and with the broad range of business, individual, academic, and non-commercial users of the name, and
- 5 Persons who are able to work and communicate in written and spoken English.

Section 4. ADDITIONAL QUALIFICATIONS

- 1 No individual holding any office herein, or the contrary, no official of a national government, or a multinational entity established by treaty or other agreement between national governments, may serve as a Director. As used

herein the term "official" means a person (i) who holds an elective governmental office or (ii) who is employed by such government or multinational entity and whose primary function with such government or entity is to develop or influence governmental or public policies

2. No person who serves in any capacity (including as a liaison) on any Supporting Organization Council shall simultaneously serve as a Director or liaison of the Board of such a person accepts a nomination to be considered for selection by the Supporting Organization Council or the A-Large Community or be a Director of the person shall not following such nomination participate in any discussion of or vote by the Supporting Organization Council or the committee designated by the A-Large Community relating to the selection of Directors by the Council or Community until the Council or committee(s) designated by the A-Large Community has selected the full complement of Directors it is responsible for selecting. In the event that a person serving in any capacity on a Supporting Organization Council accepts a nomination to be considered for selection as a Director of the constituency group or other group or entity has selected the person may select a replacement for purposes of the Council's selection process. In the event that a person serving in any capacity on the A-Large Advisory Committee accepts a nomination to be considered for selection by the A-Large Community as a Director of the Regional A-Large Organization or other group or entity has selected the person may select a replacement for purposes of the Community's selection process.
3. Persons serving in any capacity on the Nominating Committee shall be ineligible for selection of positions on the Board as provided by [Article V Section 8](#)

Section 5. INTERNATIONAL REPRESENTATION

In order to ensure broad international representation on the Board the selection of Directors by the Nominating Committee each Supporting Organization and the A-Large Community shall comply with all applicable diversity provisions of these Bylaws or of any Memorandum of Understanding referred to in these Bylaws concerning the Supporting Organization. One intent of these diversity provisions is to ensure that all times each Geographic Region shall have at least one Director and at all times no region shall have more than five Directors on the Board (not including the President). As used in these Bylaws each of the following is considered to be a "Geographic Region": Europe, Asia/Australia/Pacific, Latin America/Caribbean islands, Africa, and North America. The specific countries included in each Geographic Region shall be determined by the Board and this Section shall be reviewed by the Board from time to time (but at least every three years) to determine whether any change is appropriate taking account of the evolution of the name.

Section 6. DIRECTORS' CONFLICTS OF INTEREST

The Board through the Board Governance Committee shall require a statement from each Director no less frequently than once a year setting forth all business and other affiliations that relate in any way to the business and other affiliations of CANN. Each Director shall be responsible for disclosing to CANN any matter that could reasonably be considered to make such Director an "interested director" within the meaning of Section 5233 of the California Nonprofit Public Benefit Corporation Law ("CNPBCL"). In addition, each Director shall disclose to CANN any relationship or other fact that could reasonably be considered to cause the Director to be considered to be an "interested person" within the meaning of Section 5227 of the CNPBCL. The Board shall adopt policies specifically addressing Director, Officer, and Supporting Organization conflicts of interest. No Director shall vote on any matter in which he or she has a material and direct financial interest that would be affected by the outcome of the vote.

Section 7. DUTIES OF DIRECTORS

Directors shall serve as individuals who have the duty to act in what they reasonably believe are the best interests of CANN and not as representatives of the entity that selected them, their employers, or any other organizations or constituencies.

Section 8. TERMS OF DIRECTORS

1. The regular term of office of Directors of Sections 1 through 15 shall begin as follows:
 - a. The regular terms of Sections 1 through 3 shall begin at the conclusion of CANN's annual meeting in 2003 and each CANN annual meeting every third year after 2003.
 - b. The regular terms of Sections 4 through 6 shall begin at the conclusion of CANN's annual meeting in 2004 and each CANN annual meeting every third year after 2004.
 - c. The regular terms of Sections 7 and 8 shall begin at the conclusion of CANN's annual meeting in 2005 and each CANN annual meeting every third year after 2005.
 - d. The terms of Sections 9 and 12 shall continue until the conclusion of CANN's annual meeting in 2015. The next terms of Sections 9 and 12 shall begin at the conclusion of CANN's annual meeting in 2015 and each CANN annual meeting every third year after 2015.
 - e. The terms of Sections 10 and 13 shall continue until the conclusion of CANN's annual meeting in 2013. The next terms of Sections 10 and 13 shall begin at the conclusion of CANN's annual meeting in 2013 and each CANN annual meeting every third year after 2013, and
 - f. The terms of Sections 11, 14, and 15 shall continue until the conclusion of CANN's annual meeting in 2014. The next terms of Sections 11, 14, and 15 shall begin at the conclusion of CANN's annual meeting in 2014 and each CANN annual meeting every third year after 2014.
2. Each Director holding any of Sections 1 through 15, including a Director selected to fill a vacancy, shall hold office for a term that lasts until the next term for that Section commences and until a successor has been selected and qualified or until that Director resigns or is removed in accordance with these Bylaws.
3. At least two months before the commencement of each annual meeting, the Nominating Committee shall give the Secretary of CANN written notice of its selection of Directors for each year beginning at the conclusion of the annual meeting.
4. At least six months before the date specified for the commencement of the term as specified in paragraphs 1 d-f above, any Supporting Organization or the A-Large Community shall select a Director for a Section with a term beginning that year shall give the Secretary of CANN written notice of its selection.

- 5 Subject to the provisions of the Transition Article of these Bylaws, no Director may serve more than three consecutive terms. For these purposes, a person selected to fill a vacancy in a term shall not be deemed to have served that term. (No election period prior to the beginning of the first regular term of Sea 15 in 2010. Sea 15 was deemed vacant for the purposes of calculation of terms of service.)
- 6 The term as Director of the person holding the office of President shall be for as long as, and only for as long as, such person holds the office of President.

Section 9. NON-VOTING LIAISONS

- 1 The non-voting liaisons shall include
 - a One appointed by the [Governmental Advisory Committee](#).
 - b One appointed by the Root Server System [Advisory Committee](#) established by [Article X of these Bylaws](#).
 - c One appointed by the [Security and Stability Advisory Committee](#) established by [Article X of these Bylaws](#).
 - d One appointed by the [nerve Engineering Task Force](#).
- 2 The non-voting liaisons shall serve terms that begin at the conclusion of each annual meeting. At least one month before the commencement of each annual meeting, each body entitled to appoint a non-voting liaison shall give the Secretary of [CANN](#) written notice of its appointment.
- 3 Each non-voting liaison may be reappointed and shall remain in his position until a successor has been appointed or until the liaison resigns or is removed in accordance with these Bylaws.
- 4 The non-voting liaisons shall be entitled to attend Board meetings, participate in Board discussions and deliberations, and have access (under conditions established by the Board) to materials provided to Directors for use in Board discussions, deliberations and meetings, but shall otherwise not have any of the rights and privileges of Directors. Non-voting liaisons shall be entitled (under conditions established by the Board) to use any materials provided to them pursuant to this Section for the purpose of consulting with their respective committee or organization.

Section 10. RESIGNATION OF A DIRECTOR OR NON-VOTING LIAISON

Subject to Section 5226 of the CNPBC, any Director or non-voting liaison may resign at any time either by oral tender of resignation at any meeting of the Board (followed by prompt written notice to the Secretary of [CANN](#)) or by giving written notice hereof to the President or the Secretary of [CANN](#). Such resignation shall take effect at the time specified and unless otherwise specified, the acceptance of such resignation shall not be necessary to make it effective. The successor shall be selected pursuant to [Section 12 of his Article](#).

Section 11. REMOVAL OF A DIRECTOR OR NON-VOTING LIAISON

- 1 Any Director may be removed following notice to that Director by a three-fourths (3/4) majority vote of all Directors, provided, however, that the Director who is the subject of the removal action shall not be entitled to vote on such an action or be counted as a voting member of the Board when calculating the required three-fourths (3/4) vote, and provided further that each vote to remove a Director shall be a separate vote on the sole question of the removal of that particular Director. If the Director was selected by a [Supporting Organization](#), notice must be provided to that [Supporting Organization](#) at the same time notice is provided to the Director. If the Director was selected by the A-Large Community, notice must be provided to the A-Large [Advisory Committee](#) at the same time notice is provided to the Director.
- 2 With the exception of the non-voting liaison appointed by the [Governmental Advisory Committee](#), any non-voting liaison may be removed following notice to that liaison and to the organization by which that liaison was selected by a three-fourths (3/4) majority vote of all Directors if the selecting organization fails to promptly remove that liaison following such notice. The Board may request the [Governmental Advisory Committee](#) to consider the replacement of the non-voting liaison appointed by that Committee if the Board, by a three-fourths (3/4) majority vote of all Directors, determines that such an action is appropriate.

Section 12. VACANCIES

- 1 A vacancy or vacancies in the Board of Directors shall be deemed to exist in the case of the death, resignation, or removal of any Director, if the authorized number of Directors is increased, or if a Director has been declared of unsound mind by a final order of court, or convicted of a felony or incarcerated for more than 90 days as a result of a criminal conviction, or has been found by final order or judgment of any court to have breached a duty under Sections 5230 et seq. of the CNPBC. Any vacancy occurring on the Board of Directors shall be filled by the Nominating Committee, unless (a) that Director was selected by a [Supporting Organization](#), in which case that vacancy shall be filled by that [Supporting Organization](#), or (b) that Director was the President, in which case that vacancy shall be filled in accordance with the provisions of [Article X of these Bylaws](#). The selecting body shall give written notice to the Secretary of [CANN](#) of their appointments to fill vacancies. A Director selected to fill a vacancy on the Board shall serve for the unexpired term of his or her predecessor in office and until a successor has been selected and qualified. No reduction of the authorized number of Directors shall have the effect of removing a Director prior to the expiration of the Director's term of office.
- 2 The organizations selecting the non-voting liaisons identified in [Section 9 of his Article](#) are responsible for determining the existence of and filling any vacancies in those positions. They shall give the Secretary of [CANN](#) written notice of their appointments to fill vacancies.

Section 13. ANNUAL MEETINGS

Annual meetings of [CANN](#) shall be held for the purpose of electing Officers and for the transaction of such other business as may come before the meeting. Each annual meeting for [CANN](#) shall be held at the principal office of [CANN](#) or any other appropriate place of the Board's time and choosing, provided such annual meeting is held within 14 months of the immediately preceding annual meeting. If the Board determines that it is practical, the annual meeting should be distributed in real-time and archived video and audio format on the [nerve](#).

Section 14. REGULAR MEETINGS

Regular meetings of the Board shall be held on dates to be determined by the Board in the absence of other designations regular meetings shall be held at the principal office of CANN

Section 15. SPECIAL MEETINGS

Special meetings of the Board may be called by or at the request of one-quarter (1/4) of the members of the Board or by the Chairman of the Board or the President. A call for a special meeting shall be made by the Secretary of CANN in the absence of designation special meetings shall be held at the principal office of CANN

Section 16. NOTICE OF MEETINGS

Notice of time and place of all meetings shall be delivered personally or by telephone or by electronic mail to each Director and non-voting liaison or sent by first-class mail (air mail for addresses outside the United States) or facsimile charges prepaid addressed to each Director and non-voting liaison at the Director's or non-voting liaison's address as it is shown on the records of CANN in case the notice is mailed it shall be deposited in the United States mail at least fourteen (14) days before the time of the holding of the meeting in case the notice is delivered personally or by telephone or facsimile or electronic mail it shall be delivered personally or by telephone or facsimile or electronic mail at least forty-eight (48) hours before the time of the holding of the meeting. No withdrawal of any notice in this Section or the contrary notice of a meeting need not be given to any Director who has signed a waiver of notice or a written consent to holding the meeting or an approval of the minutes hereof whether before or after the meeting or who attends the meeting without protesting prior thereto or at its commencement the lack of notice to such Director. All such waivers, consents and approvals shall be filed with the corporate records or made a part of the minutes of the meetings.

Section 17. QUORUM

All annual, regular and special meetings of the Board a majority of the total number of Directors then in office shall constitute a quorum for the transaction of business and the act of a majority of the Directors present at any meeting at which there is a quorum shall be the act of the Board unless otherwise provided herein or by law. If a quorum shall not be present at any meeting of the Board the Directors present hereinafter may adjourn the meeting from time to time or to another place, time or date. If the meeting is adjourned for more than twenty-four (24) hours notice shall be given to those Directors not at the meeting at the time of the adjournment.

Section 18. ACTION BY TELEPHONE MEETING OR BY OTHER COMMUNICATIONS EQUIPMENT

Members of the Board or any Committee of the Board may participate in a meeting of the Board or Committee of the Board through use of (i) conference telephone or similar communications equipment provided that all Directors participating in such a meeting can speak to and hear one another or (ii) electronic video screen communication or other communication equipment provided that (a) all Directors participating in such a meeting can speak to and hear one another (b) all Directors are provided the means of fully participating in all matters before the Board or Committee of the Board and (c) CANN adopts and implements means of verifying that (x) a person participating in such a meeting is a Director or other person entitled to participate in the meeting and (y) all actions of or votes by the Board or Committee of the Board are taken or cast only by the members of the Board or Committee and no persons who are not members. Participation in a meeting pursuant to this Section constitutes presence in person at such meeting. CANN shall make available at the place of any meeting of the Board the telecommunications equipment necessary to permit members of the Board to participate by telephone.

Section 19. ACTION WITHOUT MEETING

Any action required or permitted to be taken by the Board or a Committee of the Board may be taken without a meeting if all of the Directors entitled to vote hereinafter shall individually or collectively consent in writing to such action. Such written consent shall have the same force and effect as the unanimous vote of such Directors. Such written consent or consents shall be filed with the minutes of the proceedings of the Board.

Section 20. ELECTRONIC MAIL

If permitted under applicable law communication by electronic mail shall be considered equivalent to any communication otherwise required to be in writing. CANN shall take such steps as it deems appropriate under the circumstances to assure itself that communications by electronic mail are authentic.

Section 21. RIGHTS OF INSPECTION

Every Director shall have the right at any reasonable time to inspect and copy all books, records and documents of every kind and to inspect the physical properties of CANN. CANN shall establish reasonable procedures to protect against the inappropriate disclosure of confidential information.

Section 22. COMPENSATION

1. Except for the President of CANN who serves ex officio as a voting member of the Board, each of the Directors shall be entitled to receive compensation for his/her services as a Director. The President shall receive only his/her compensation for service as President and shall not receive additional compensation for service as a Director.
2. If the Board determines to offer a compensation arrangement to one or more Directors other than the President of CANN for services to CANN as Directors, the Board shall follow a process that is calculated to pay an amount for service as a Director that is in line with Reasonable Compensation for such service under the standards set forth in §53.4958-4(b) of the Treasury Regulations.
3. As part of the process, the Board shall retain an independent Valuation Expert to consult with and to advise the Board regarding Director compensation arrangements and to issue to the Board a Reasoned Written Opinion from such expert regarding the ranges of Reasonable Compensation for any such services by a Director. The expert's opinion shall address all relevant factors affecting the level of compensation to be paid a Director including of fees held on the Board, a balance of Board and Committee meetings, the nature of service on the Board and on Board Committees and appropriate data as to comparability regarding director compensation arrangements for U.S.-based nonprofit tax-exempt organizations possessing a global employee base.
4. After having reviewed the expert's written opinion, the Board shall meet with the expert to discuss the

expert's opinion and to ask questions of the expert regarding the expert's opinion, the comparability data obtained and relied upon and the conclusions reached by the expert.

5. The Board shall adequately document the basis for any determination the Board makes regarding a Director compensation arrangement concurrently with making that determination.
6. In addition to authorizing payment of compensation for services as Directors as set forth in this Section 22, the Board may also authorize the reimbursement of actual and necessary reasonable expenses incurred by any Director and by non-voting liaisons performing their duties as Directors or non-voting liaisons.
7. As used in this Section 22, the following terms shall have the following meanings:
 - a. An "Independent Valuation Expert" means a person retained by CANN to value compensation arrangements that (i) holds itself out to the public as a compensation consultant, (ii) performs valuations regarding compensation arrangements on a regular basis with a majority of its compensation consulting services performed for persons other than CANN, (iii) is qualified to make valuations of the type of services involved in any engagement by and for CANN, (iv) issues to CANN a Reasoned Written Opinion regarding a particular compensation arrangement, and (v) includes in its Reasoned Written Opinion a certification that it meets the requirements set forth in (i) through (iv) of this definition.
 - b. A "Reasoned Written Opinion" means a written opinion of a valuation expert who meets the requirements of subparagraph 7(a) (i) through (iv) of this Section. To be reasoned, the opinion must be based upon a full disclosure by CANN to the valuation expert of the factual situation regarding the compensation arrangement that is the subject of the opinion. The opinion must articulate the applicable valuation standards relevant in valuing such compensation arrangements and the opinion must apply those standards to such compensation arrangements and the opinion must arrive at a conclusion regarding whether the compensation arrangement is within the range of Reasonable Compensation for the services covered by the arrangement. A written opinion is reasoned even though it reaches a conclusion that is subsequently determined to be incorrect so long as the opinion addresses itself to the facts and the applicable standards. However, a written opinion is not reasoned if it does nothing more than recite the facts and express a conclusion.
 - c. "Reasonable Compensation" shall have the meaning set forth in §53.4958-4(b)(1)(ii) of the Regulations issued under §4958 of the Code.
8. Each of the non-voting liaisons of the Board, with the exception of the Governmental Advisory Committee liaison, shall be entitled to receive compensation for his/her services as a non-voting liaison if the Board determines to offer a compensation arrangement to one or more non-voting liaisons. The Board shall approve that arrangement by a required three-fourths (3/4) vote.

Section 23. PRESUMPTION OF ASSENT

A Director present at a Board meeting at which action on any corporate matter is taken shall be presumed to have assented to the action taken unless his or her dissent or abstention is entered in the minutes of the meeting or unless such Director files a written dissent or abstention on such action with the person acting as the secretary of the meeting before the adjournment hereof or forwards such dissent or abstention by registered mail to the Secretary of CANN immediately after the adjournment of the meeting. Such right of dissent or abstention shall not apply to a Director who voted in favor of such action.

ARTICLE VII: NOMINATING COMMITTEE

Section 1. DESCRIPTION

There shall be a Nominating Committee of CANN responsible for the selection of all CANN Directors except the President and those Directors selected by CANN's Supporting Organizations and for such other selections as are set forth in these Bylaws.

Section 2. COMPOSITION

The Nominating Committee shall be composed of the following persons:

1. A non-voting Chair appointed by the CANN Board.
2. A non-voting Chair-Elect appointed by the CANN Board as a non-voting advisor.
3. A non-voting liaison appointed by the CANN Root Server System Advisory Committee established by [Article X of these Bylaws](#).
4. A non-voting liaison appointed by the CANN Security and Safety Advisory Committee established by [Article X of these Bylaws](#).
5. A non-voting liaison appointed by the Governmental Advisory Committee.
6. Subject to the provisions of the Transition Article of these Bylaws, five voting delegates selected by the Large Advisory Committee established by [Article X of these Bylaws](#).
7. Voting delegates of the Nominating Committee shall be selected from the Generic Names Supporting Organizations established by [Article X of these Bylaws](#) as follows:
 - a. One delegate from the Registries Stakeholder Group.
 - b. One delegate from the Registry Stakeholder Group.
 - c. Two delegates from the Business Consistency, one representing small business users and one representing large business users.
 - d. One delegate from the Internet Service Providers Consistency.
 - e. One delegate from the Intellectual Property Consistency and
 - f. One delegate from consumer and civil society groups selected by the Non-Commercial Users Consistency.

8. One voting delegate each selected by the following entities:
 - a. The Council of the County Code Names Supporting Organizations established by [Article X of these Bylaws](#)
 - b. The Council of the Address Supporting Organizations established by [Article V of these Bylaws](#) and
 - c. The name Engineering Task Force
9. A non-voting Associate Chair who may be appointed by the Chair at his or her sole discretion to serve during all or part of the term of the Chair. The Associate Chair may not be a person who is otherwise a member of the same Nominating Committee. The Associate Chair shall assist the Chair in carrying out the duties of the Chair but shall not serve temporarily or otherwise in the place of the Chair.

Section 3. TERMS

Subject to the provisions of the [Transition Article of these Bylaws](#)

1. Each voting delegate shall serve a one-year term. A delegate may serve a maximum of two successive one-year terms after which at least two years must elapse before the individual is eligible to serve another term.
2. The regular term of each voting delegate shall begin at the conclusion of an CANN annual meeting and shall end at the conclusion of the immediately following CANN annual meeting.
3. Non-voting liaisons shall serve during the term designated by the entity that appoints them. The Chair, the Chair-Elect, and any Associate Chair shall serve as such until the conclusion of the next CANN annual meeting.
4. It is anticipated that upon the conclusion of the term of the Chair-Elect, the Chair-Elect will be appointed by the Board to the position of Chair. However, the Board retains the discretion to appoint any other person to the position of Chair. At the time of appointing a Chair-Elect, if the Board determines that the person identified to serve as Chair shall be appointed as Chair for a successive term, the Chair-Elect position shall remain vacant for the term designated by the Board.
5. Vacancies in the positions of delegate, non-voting liaison, Chair or Chair-Elect shall be filled by the entity entitled to select the delegate, non-voting liaison, Chair or Chair-Elect involved. For any term that the Chair-Elect position is vacant pursuant to paragraph 4 of this Article or until any other vacancy in the position of Chair-Elect can be filled, a non-voting advisor to the Chair may be appointed by the Board from among persons with prior service on the Board or a Nominating Committee, including the immediately previous Chair of the Nominating Committee. A vacancy in the position of Associate Chair may be filled by the Chair in accordance with the criteria established by Section 2(9) of this Article.
6. The existence of any vacancies shall not affect the obligation of the Nominating Committee to carry out the responsibilities assigned to it in these Bylaws.

Section 4. CRITERIA FOR SELECTION OF NOMINATING COMMITTEE DELEGATES

Delegates to the CANN Nominating Committee shall be:

1. Accomplished persons of integrity, objectivity, and intelligence with reputations for sound judgment and open minds, and with experience and competence with collegial large group decision-making.
2. Persons with wide contacts, broad experience in the name community, and a commitment to the success of CANN.
3. Persons whom the selecting body is confident will consult widely and accept input in carrying out their responsibilities.
4. Persons who are neutral and objective without any fixed personal commitments to particular individuals, organizations, or commercial objectives in carrying out their Nominating Committee responsibilities.
5. Persons with an understanding of CANN's mission and the potential impact of CANN's activities on the broader name community who are willing to serve as volunteers without compensation other than the reimbursement of certain expenses, and
6. Persons who are able to work and communicate in written and spoken English.

Section 5. DIVERSITY

In carrying out its responsibilities to select members of the CANN Board (and selections to any other CANN bodies as the Nominating Committee is responsible for under these Bylaws), the Nominating Committee shall take into account the continuing membership of the CANN Board (and such other bodies) and seek to ensure that the persons selected to fill vacancies on the CANN Board (and each such other body) shall, to the extent feasible and consistent with the other criteria required to be applied by [Section 4 of this Article](#), make selections guided by Core Value 4 in [Article Section 2](#).

Section 6. ADMINISTRATIVE AND OPERATIONAL SUPPORT

CANN shall provide administrative and operational support necessary for the Nominating Committee to carry out its responsibilities.

Section 7. PROCEDURES

The Nominating Committee shall adopt such operating procedures as it deems necessary, which shall be published on the Website.

Section 8. INELIGIBILITY FOR SELECTION BY NOMINATING COMMITTEE

No person who serves on the Nominating Committee in any capacity shall be eligible for selection by any means to any position on the Board or any other CANN body having one or more membership positions, that the Nominating Committee is responsible for filling, until the conclusion of an CANN annual meeting that coincides with or is after the conclusion of that person's service on the Nominating Committee.

Section 9. INELIGIBILITY FOR SERVICE ON NOMINATING COMMITTEE

No person who is an employee of or paid consultant to CANN (including the Ombudsman) shall simultaneously serve in any of the Nominating Committee positions described in [Section 2 of his Article](#)

ARTICLE VIII: ADDRESS SUPPORTING ORGANIZATION

Section 1. DESCRIPTION

- 1 The Address Supporting Organization (ASO) shall advise the Board with respect to policy issues relating to the operation, assignment and management of name addresses
- 2 The ASO shall be hereby established by the Memorandum of Understanding entered on 21 October 2004 between CANN and the Number Resource Organization (NRO) an organization of the existing regional name registries (R Rs)

Section 2. ADDRESS COUNCIL

- 1 The ASO shall have an Address Council consisting of the members of the NRO Number Council
- 2 The Address Council shall select Directors whose seats on the Board designated to be filled by the ASO

ARTICLE IX: COUNTRY-CODE NAMES SUPPORTING ORGANIZATION

Section 1. DESCRIPTION

There shall be a policy-development body known as the Country-Code Names Supporting Organization (ccNSO) which shall be responsible for

- 1 developing and recommending to the Board global policies relating to country-code top-level domains
- 2 Nurturing consensus across the ccNSO's community including the name-related activities of ccTLDs and
- 3 Coordinating with other CANN Supporting Organizations, committees and constituencies under CANN

Policies that apply to ccNSO members by virtue of their membership are only those policies developed according to section 4.10 and 4.11 of this Article. However, the ccNSO may also engage in other activities authorized by its members. Adherence to the results of these activities will be voluntary and such activities may include seeking to develop voluntary best practices for ccTLD managers, assisting in skills building within the global community of ccTLD managers and enhancing operational and technical cooperation among ccTLD managers

Section 2. ORGANIZATION

The ccNSO shall consist of (i) ccTLD managers that have agreed in writing to be members of the ccNSO (see [Section 4\(2\) of his Article](#)) and (ii) a ccNSO Council responsible for managing the policy-development process of the ccNSO

Section 3. ccNSO COUNCIL

- 1 The ccNSO Council shall consist of (a) three ccNSO Council members selected by the ccNSO members within each of [CANN's Geographic Regions](#) in the manner described in [Section 4\(7\) through \(9\) of his Article](#) (b) three ccNSO Council members selected by the CANN Nominating Committee as described in [paragraph 2 of his Section](#) and (iv) observers as described in [paragraph 3 of his Section](#)
- 2 There shall also be one liaison to the ccNSO Council from each of the following organizations to whom they choose to appoint such a liaison (a) the Governmental Advisory Committee (b) the A-Large Advisory Committee and (c) each of the Regional Organizations described in [Section 5 of his Article](#). These liaisons shall not be members of or enrolled to vote on the ccNSO Council but otherwise shall be enrolled to participate on equal footing with members of the ccNSO Council. Appointments of liaisons shall be made by providing written notice to the CANN Secretary with a notification copy to the ccNSO Council Chair and shall be for the term designated by the appointing organization as stated in the written notice. The appointing organization may recall from office or replace its liaison at any time by providing written notice of the recall or replacement to the CANN Secretary with a notification copy to the ccNSO Council Chair
- 3 The ccNSO Council may agree with the Council of any other CANN Supporting Organization to exchange observers. Such observers shall not be members of or enrolled to vote on the ccNSO Council but otherwise shall be enrolled to participate on equal footing with members of the ccNSO Council. The appointing Council may designate its observer (or revoke or change the designation of its observer) on the ccNSO Council at any time by providing written notice to the CANN Secretary with a notification copy to the ccNSO Council Chair
- 4 Subject to the provisions of the [Transition Article of these Bylaws](#) (a) the regular term of each ccNSO Council member shall begin at the conclusion of an CANN annual meeting and shall end at the conclusion of the third CANN annual meeting hereafter (b) the regular terms of the three ccNSO Council members selected by the ccNSO members within each CANN Geographic Region shall be staggered so that one member's term begins in a year divisible by three, a second member's term begins in the first year following a year divisible by three and the third member's term begins in the second year following a year divisible by three and (c) the regular terms of the three ccNSO Council members selected by the Nominating Committee shall be staggered in the same manner. Each ccNSO Council member shall hold office during his or her regular term and until a successor has been selected and qualified or until the member resigns or is removed in accordance with these Bylaws
- 5 A ccNSO Council member may resign at any time by giving written notice to the CANN Secretary with a notification copy to the ccNSO Council Chair
- 6 ccNSO Council members may be removed for no other than ending three consecutive meetings of the ccNSO Council without sufficient cause or for grossly inappropriate behavior both as determined by at least a 66% vote of all of the members of the ccNSO Council

- 7 A vacancy on the ccNSO Council shall be deemed to exist in the case of the death, resignation or removal of any ccNSO Council member. Vacancies in the positions of the three members selected by the Nominating Committee shall be filled for the unexpired term involved by the Nominating Committee giving the CANN Secretary written notice of its selection with a notation copy to the ccNSO Council Chair. Vacancies in the positions of the ccNSO Council members selected by ccNSO members shall be filled for the unexpired term by the procedure described in [Section 4\(7\) through \(9\) of his Article](#).
- 8 The role of the ccNSO Council is to administer and coordinate the affairs of the ccNSO (including coordinating meetings including an annual meeting of ccNSO members as described in [Section 4\(6\) of his Article](#)) and to manage the development of policy recommendations in accordance with Section 6 of his Article. The ccNSO Council shall also undertake such other roles as the members of the ccNSO shall decide from time to time.
- 9 The ccNSO Council shall make selections of all Sections 11 and 12 on the Board by written ballot or by action at a meeting. Any such selection must have affirmative votes of a majority of all the members of the ccNSO Council then in office. Notification of the ccNSO Council's selections shall be given by the ccNSO Council Chair in writing to the CANN Secretary consistent with Article V [Sections 8\(4\) and 12\(1\)](#).
- 10 The ccNSO Council shall select from among its members the ccNSO Council Chair and such Vice Chair(s) as it deems appropriate. Selections of the ccNSO Council Chair and Vice Chair(s) shall be by written ballot or by action at a meeting. Any such selection must have affirmative votes of a majority of all the members of the ccNSO Council then in office. The term of office of the ccNSO Council Chair and any Vice Chair(s) shall be as specified by the ccNSO Council at or before the time the selection is made. The ccNSO Council Chair or any Vice Chair(s) may be recalled from office by the same procedure as used for selection.
- 11 The ccNSO Council subject to direction by the ccNSO members shall adopt such rules and procedures for the ccNSO as it deems necessary provided they are consistent with these Bylaws. Rules for ccNSO membership and operating procedures adopted by the ccNSO Council shall be published on the Website.
- 12 Except as provided by [paragraphs 9 and 10 of his Section](#), the ccNSO Council shall act at meetings. The ccNSO Council shall meet regularly on a schedule it determines but no fewer than four times each calendar year. At the discretion of the ccNSO Council, meetings may be held in person or by other means provided that all ccNSO Council members are permitted to participate by at least one means described in [paragraph 14 of his Section](#). Except where determined by a majority vote of the members of the ccNSO Council present, a closed session is appropriate. Physical meetings shall be open to a audience by all interested persons. To the extent practicable, ccNSO Council meetings should be held in conjunction with meetings of the Board or of one or more of CANN's other Supporting Organizations.
- 13 Notice of time and place (and information about means of participation other than personal attendance) of all meetings of the ccNSO Council shall be provided to each ccNSO Council member, liaison and observer by e-mail, telephone, facsimile, or a paper notice delivered personally or by post. In case the notice is sent by postal mail, it shall be sent at least 21 days before the day of the meeting. In case the notice is delivered personally or by telephone, facsimile, or e-mail, it shall be provided at least seven days before the day of the meeting. At least seven days in advance of each ccNSO Council meeting (or if not practicable, as far in advance as is practicable), a notice of such meeting and of the then known agenda for the meeting shall be posted.
- 14 Members of the ccNSO Council may participate in a meeting of the ccNSO Council through personal attendance or use of electronic communication (such as telephone or video conference) provided that (a) all ccNSO Council members participating in the meeting can speak to and hear one another, (b) all ccNSO Council members participating in the meeting are provided the means of fully participating in all matters before the ccNSO Council, and (c) there is a reasonable means of verifying the identity of ccNSO Council members participating in the meeting and their votes. A majority of the ccNSO Council members (if those entitled to vote) then in office shall constitute a quorum for the transaction of business and actions by a majority vote of the ccNSO Council members present at any meeting at which there is a quorum shall be actions of the ccNSO Council unless otherwise provided in these Bylaws. The ccNSO Council shall transmit minutes of its meetings to the CANN Secretary who shall cause those minutes to be posted on the Website as soon as practicable following the meeting and no later than 21 days following the meeting.

Section 4. MEMBERSHIP

- 1 The ccNSO shall have a membership consisting of ccTLD managers. Any ccTLD manager has met the membership qualifications set forth in [paragraph 2 of his Section](#) shall be entitled to be members of the ccNSO. For purposes of this Article, a ccTLD manager is the organization or entity responsible for managing an SO 3166 country-code top-level domain and referred to in the IANA database under the current heading of "Sponsoring Organization" or under any alternate variant for that country-code top-level domain.
- 2 Any ccTLD manager may become a ccNSO member by submitting an application to a person designated by the ccNSO Council to receive applications. Subject to the provisions of the Transition Article of these Bylaws, the application shall be in writing in a form designated by the ccNSO Council. The application shall include the ccTLD manager's recognition of the role of the ccNSO within the CANN structure as well as the ccTLD manager's agreement for the duration of its membership in the ccNSO: (a) to adhere to the rules of the ccNSO including membership rules; (b) to abide by policies developed and recommended by the ccNSO and adopted by the Board in the manner described by paragraphs 10 and 11 of his Section; and (c) to pay ccNSO membership fees established by the ccNSO Council under [Section 7\(3\) of his Article](#). A ccNSO member may resign from membership at any time by giving written notice to a person designated by the ccNSO Council to receive notices of resignation. Upon resignation, the ccTLD manager ceases to agree to (a) adhere to the rules of the ccNSO including membership rules; (b) to abide by policies developed and recommended by the ccNSO and adopted by the Board in the manner described by paragraphs 10 and 11 of his Section; and (c) to pay ccNSO membership fees established by the ccNSO Council under [Section 7\(3\) of his Article](#). In the absence of designation by the ccNSO Council of a person to receive applications and notices of resignation, they shall be sent to the CANN Secretary who shall notify the ccNSO Council of receipt of any such applications and notices.
- 3 Neither membership in the ccNSO nor membership in any Regional Organization described in [Section 5 of his Article](#) shall be a condition for access to or registration in the IANA database. Any individual relationship a ccTLD manager has with CANN or the ccTLD manager's receipt of IANA services is not

any way con ingen upon membership in he ccNSO

- 4 The Geographic Regions of ccTLDs shall be as described in [Article V Section 5 of these Bylaws](#). For purposes of this Article managers of ccTLDs within a Geographic Region shall be members of the ccNSO. The ccNSO members within the Geographic Region shall be referred to as ccNSO members "within" the Geographic Region regardless of the physical location of the ccTLD manager. In cases where the Geographic Region of a ccNSO member is unclear the ccTLD member should self-select according to procedures adopted by the ccNSO Council.
- 5 Each ccTLD manager may designate in writing a person, organization, or entity to represent the ccTLD manager in the absence of such a designation the ccTLD manager shall be represented by the person, organization, or entity listed as the administrative contact in the ANA database.
- 6 There shall be an annual meeting of ccNSO members which shall be coordinated by the ccNSO Council. Annual meetings should be open for all to attend and a reasonable opportunity shall be provided for ccTLD managers who are not members of the ccNSO as well as other non-members of the ccNSO to address the meeting. To the extent practicable annual meetings of the ccNSO members shall be held in person and should be held in conjunction with meetings of the Board or of one or more of CANN's other Supporting Organizations.
- 7 The ccNSO Council members selected by the ccNSO members from each Geographic Region (see [Section 3\(1\)\(a\) of this Article](#)) shall be selected through nomination and if necessary election by the ccNSO members within the Geographic Region. At least 90 days before the end of the regular term of any ccNSO-member-selected member of the ccNSO Council or upon the occurrence of a vacancy in the seat of such a ccNSO Council member the ccNSO Council shall establish a nomination and election schedule which shall be sent to all ccNSO members within the Geographic Region and posted on the Website.
- 8 Any ccNSO member may nominate an individual to serve as a ccNSO Council member representing the ccNSO member's Geographic Region. Nominations must be seconded by another ccNSO member from the same Geographic Region. By accepting their nomination individuals nominated to the ccNSO Council agree to support the policies committed to by ccNSO members.
- 9 (a) In the close of nominations there are no more candidates nominated (with seconds and acceptances) in a particular Geographic Region than there are seats on the ccNSO Council available for that Geographic Region then the nominated candidates shall be selected to serve on the ccNSO Council. Otherwise an election by written ballot (which may be by e-mail) shall be held to select the ccNSO Council members from among those nominated (with seconds and acceptances) with ccNSO members from the Geographic Region being entitled to vote in the election through their designated representatives. In such an election a majority of all ccNSO members in the Geographic Region entitled to vote shall constitute a quorum and the selected candidate must receive the votes of a majority of those cast by ccNSO members within the Geographic Region. The ccNSO Council Chair shall provide the CANN Secretary prompt written notice of the selection of ccNSO Council members under this paragraph.
- 10 Subject to clause 4(11) CANN policies shall apply to ccNSO members by virtue of their membership in the ccNSO and only to the extent that the policies (a) only address issues that are within the scope of the ccNSO according to Article X Section 6 and Annex C (b) have been developed through the ccPDP as described in [Section 6 of this Article](#) and (c) have been recommended as such by the ccNSO or the Board and (d) are adopted by the Board as policies provided that such policies do not conflict with the law applicable to the ccTLD manager which shall at all times remain paramount. In addition such policies shall apply to CANN in its activities concerning ccTLDs.
- 11 A ccNSO member shall not be bound if it provides a declaration to the ccNSO Council stating that (a) implementation of the policy would require the member to breach custom, religion, or public policy (not embodied in the applicable law described in [paragraph 10 of this Section](#)) and (b) failure to implement the policy would not impair DNS operations or interoperability giving detailed reasons supporting its statement. After investigation the ccNSO Council will provide a response to the ccNSO member's declaration. If there is a ccNSO Council consensus disagreeing with the declaration which may be demonstrated by a vote of 14 or more members of the ccNSO Council the response shall state the ccNSO Council's disagreement with the declaration and the reasons for disagreement. Otherwise the response shall state the ccNSO Council's agreement with the declaration. If the ccNSO Council disagrees the ccNSO Council shall review the situation after a six-month period. At the end of that period the ccNSO Council shall make findings as to (a) whether the ccNSO members' implementation of the policy would require the member to breach custom, religion, or public policy (not embodied in the applicable law described in [paragraph 10 of this Section](#)) and (b) whether failure to implement the policy would impair DNS operations or interoperability. In making any findings disagreeing with the declaration the ccNSO Council shall proceed by consensus which may be demonstrated by a vote of 14 or more members of the ccNSO Council.

Section 5. REGIONAL ORGANIZATIONS

The ccNSO Council may designate a Regional Organization for each CANN Geographic Region provided that the Regional Organization is open to full membership by all ccNSO members within the Geographic Region. Decisions to designate or de-designate a Regional Organization shall require a 66% vote of all of the members of the ccNSO Council and shall be subject to review according to procedures established by the Board.

Section 6. ccNSO POLICY-DEVELOPMENT PROCESS AND SCOPE

- 1 The scope of the ccNSO's policy-development role shall be as stated in [Annex C of these Bylaws](#); any modifications to the scope shall be recommended to the Board by the ccNSO by use of the procedures of the ccPDP and shall be subject to approval by the Board.
- 2 In developing global policies within the scope of the ccNSO and recommending them to the Board the ccNSO shall follow the ccNSO Policy-Development Process (ccPDP). The ccPDP shall be as stated in [Annex B of these Bylaws](#); modifications shall be recommended to the Board by the ccNSO by use of the procedures of the ccPDP and shall be subject to approval by the Board.

Section 7. STAFF SUPPORT AND FUNDING

- 1 Upon request of the ccNSO Council a member of the CANN staff may be assigned to support the ccNSO and shall be designated as the ccNSO Staff Manager. Alternatively the ccNSO Council may designate a ccNSO expense and other person to serve as ccNSO Staff Manager. The work of the ccNSO Staff

Manager on substantive matters shall be assigned by the Chair of the ccNSO Council and may include the duties of ccPDP Issue Manager

- 2 Upon request of the ccNSO Council, CANN shall provide administrative and operational support necessary for the ccNSO to carry out its responsibilities. Such support shall not include an obligation for CANN to fund travel expenses incurred by ccNSO participants for travel on any meeting of the ccNSO or for any other purpose. The ccNSO Council may make provision for a ccNSO expense for administrative and operational support in addition or as an alternative to support provided by CANN.
- 3 The ccNSO Council shall establish fees to be paid by ccNSO members to defray ccNSO expenses as described in paragraphs 1 and 2 of this Section as approved by the ccNSO members.
- 4 Written notices given to the CANN Secretary under this Article shall be permanently retained and shall be made available for review by the ccNSO Council on request. The CANN Secretary shall also maintain the roll of members of the ccNSO, which shall include the name of each ccTLD manager's designated representative and which shall be posted on the Website.

ARTICLE X: GENERIC NAMES SUPPORTING ORGANIZATION

Section 1. DESCRIPTION

There shall be a policy-development body known as the Generic Names Supporting Organization (GNSO) which shall be responsible for developing and recommending to the CANN Board substantive policies relating to generic top-level domains.

Section 2. ORGANIZATION

The GNSO shall consist of

- i A number of Constituencies where applicable, organized within the Stakeholder Groups as described in Section 5 of this Article.
- ii Four Stakeholder Groups organized within Houses as described in Section 5 of this Article.
- iii Two Houses within the GNSO Council as described in Section 3(8) of this Article, and
- iv a GNSO Council responsible for managing the policy development process of the GNSO as described in Section 3 of this Article.

Except as otherwise defined in these Bylaws, the four Stakeholder Groups and the Constituencies will be responsible for defining their own characters with the approval of their members and of the CANN Board of Directors.

Section 3. GNSO COUNCIL

1 Subject to the provisions of Transition Article XX, Section 5 of these Bylaws and as described in Section 5 of Article X, the GNSO Council shall consist of

- a three representatives selected from the Registries Stakeholder Group
- b three representatives selected from the Registrars Stakeholder Group
- c six representatives selected from the Commercial Stakeholder Group
- d six representatives selected from the Non-Commercial Stakeholder Group, and
- e three representatives selected by the CANN Nominating Committee, one of which shall be non-voting but otherwise entitled to participate on equal footing with other members of the GNSO Council including the making and seconding of motions and of serving as Chair if elected. One Nominating Committee Appointee voting representative shall be assigned to each House (as described in Section 3(8) of this Article) by the Nominating Committee.

No individual representative may hold more than one seat on the GNSO Council at the same time.

Stakeholder Groups should in their characters ensure their representation on the GNSO Council is as diverse as possible and practicable, including considerations of geography, GNSO Constituency sector, ability and gender.

There may also be liaisons to the GNSO Council from other CANN Supporting Organizations and/or Advisory Committees from time to time. The appointing organization shall designate, revoke or change its liaison on the GNSO Council by providing written notice to the Chair of the GNSO Council and to the CANN Secretary. Liaisons shall not be members of or entitled to vote to make or second motions or to serve as an officer on the GNSO Council but otherwise liaisons shall be entitled to participate on equal footing with members of the GNSO Council.

2 Subject to the provisions of Transition Article XX and Section 5 of these Bylaws, the regular term of each GNSO Council member shall begin at the conclusion of an CANN annual meeting and shall end at the conclusion of the second CANN annual meeting hereafter. The regular term of two representatives selected from Stakeholder Groups with three Council seats shall begin in even-numbered years and the regular term of the other three representatives selected from the Stakeholder Group shall begin in odd-numbered years. The regular term of three representatives selected from Stakeholder Groups with six Council seats shall begin in even-numbered years and the regular term of the other three representatives selected from the Stakeholder Group shall begin in odd-numbered years. The regular term of one of the three members selected by the Nominating Committee shall begin in even-numbered years and the regular term of the other two of the three members selected by the Nominating Committee shall begin in odd-numbered years. Each GNSO Council member shall hold office during his or her regular term and until a successor has been selected and qualified or until the member resigns or is removed in accordance with these Bylaws.

Except in a "special circumstance" such as but not limited to meeting geographic or other diversity requirements defined in the Stakeholder Group characters, where no alternative representative is available, to serve no Council member may be selected to serve more than two consecutive terms, in such a special circumstance a Council member may serve one additional term. For these purposes, a person selected to fill a vacancy in a term shall not be deemed to have served that term. A former Council member who has served two consecutive terms

mus remain out of office for one full term prior to serving any subsequent term as Council member. A "special circumstance" is defined in the GNSO Operating Procedures.

3. A vacancy on the GNSO Council shall be deemed to exist in the case of the death, resignation, or removal of any member. Vacancies shall be filled for the unexpired term by the appropriate Nominating Committee or Stakeholder Group that selected the member holding the position before the vacancy occurred by giving the GNSO Secretariat written notice of its selection. Procedures for handling Stakeholder Group-appointed GNSO Council member vacancies, resignations, and removals are prescribed in the applicable Stakeholder Group Charter.

A GNSO Council member selected by the Nominating Committee may be removed for cause (i) satisfied by a three-fourths (3/4) vote of all members of the applicable House to which the Nominating Committee appointee is assigned, or (ii) satisfied by a three-fourths (3/4) vote of all members of each House in the case of the non-voting Nominating Committee appointee (see [Section 3\(8\) of his Article](#)). Such removal shall be subject to reversal by the CANN Board on appeal by the affected GNSO Council member.

4. The GNSO Council is responsible for managing the policy development process of the GNSO. It shall adopt such procedures (the "GNSO Operating Procedures") as it sees fit to carry out its responsibility provided that such procedures are approved by a majority vote of each House. The GNSO Operating Procedures shall be effective upon the expiration of a twenty-one (21) day public comment period and shall be subject to Board oversight and review. Until any modifications are recommended by the GNSO Council, the applicable procedures shall be as set forth in [Section 6 of his Article](#).

5. No more than one officer, director, or employee of any particular corporation or other organization (including its subsidiaries and affiliates) shall serve on the GNSO Council at any given time.

6. The GNSO shall make selections to fill Sections 13 and 14 on the CANN Board by written ballot or by action at a meeting. Each of the two voting Houses of the GNSO, as described in [Section 3\(8\) of his Article](#), shall make a selection to fill one of two CANN Board seats as outlined below. Any such selection must have affirmative votes comprising sixty percent (60%) of all the respective voting House members:

- a. The Contracted Party House shall select a representative to fill Section 13, and
- b. The Non-Contracted Party House shall select a representative to fill Section 14.

Election procedures are defined in the GNSO Operating Procedures.

Notification of the Board seat selections shall be given by the GNSO Chair in writing to the CANN Secretary consistent with Article V, Sections [8\(4\)](#) and [12\(1\)](#).

7. The GNSO Council shall select the GNSO Chair for a term the GNSO Council specifies but no longer than one year. Each House (as described in [Section 3\(8\) of his Article](#)) shall select a Vice-Chair who will be a Vice-Chair of the whole of the GNSO Council for a term the GNSO Council specifies but no longer than one year. The procedures for selecting the Chair and any other officers are contained in the GNSO Operating Procedures. In the event that the GNSO Council has not elected a GNSO Chair by the end of the previous Chair's term, the Vice-Chairs will serve as interim GNSO Co-Chairs until a successful election can be held.

8. Except as otherwise required in these Bylaws for voting purposes, the GNSO Council (see [Section 3\(1\) of his Article](#)) shall be organized into a bicameral House structure as described below:

- a. The Contracted Parties House includes the Registries Stakeholder Group (three members), the Registries Stakeholder Group (three members), and one voting member appointed by the CANN Nominating Committee for a total of seven voting members, and
- b. The Non-Contracted Parties House includes the Commercial Stakeholder Group (six members), the Non-Commercial Stakeholder Group (six members), and one voting member appointed by the CANN Nominating Committee of that House for a total of thirteen voting members.

Except as otherwise specified in these Bylaws, each member of a voting House is entitled to cast one vote in each separate matter before the GNSO Council.

9. Except as otherwise specified in these Bylaws, [Annex A](#), [Annex A-1](#), and [Annex A-2](#) here or the GNSO Operating Procedures, the default threshold to pass a GNSO Council motion or other voting action requires a simple majority vote of each House. The voting thresholds described below shall apply to the following GNSO actions:

- a. Create an Issues Report requires an affirmative vote of more than one-fourth (1/4) vote of each House or majority of one House.
- b. Initiate a Policy Development Process ("PDP") Within Scope (as described in [Annex A](#)) requires an affirmative vote of more than one-third (1/3) of each House or more than two-thirds (2/3) of one House.
- c. Initiate a PDP, No Within Scope requires an affirmative vote of GNSO Supermajority.
- d. Approve a PDP Team Charter for a PDP, Within Scope requires an affirmative vote of more than one-third (1/3) of each House or more than two-thirds (2/3) of one House.
- e. Approve a PDP Team Charter for a PDP, No Within Scope requires an affirmative vote of a GNSO Supermajority.
- f. Changes to an Approved PDP Team Charter. For any PDP Team Charter approved under d or e above, the GNSO Council may approve an amendment to the Charter through a simple majority vote of each House.
- g. Terminate a PDP. Once initiated and prior to the publication of a Final Report, the GNSO Council may terminate a PDP only for significant cause upon a motion that passes with a GNSO Supermajority Vote in favor of termination.
- h. Approve a PDP Recommendation Without a GNSO Supermajority requires an affirmative vote of a majority of each House and further requires that one GNSO Council member represent a minimum of at least three (3) of the four Stakeholder Groups supporting the Recommendation.
- i. Approve a PDP Recommendation With a GNSO Supermajority requires an affirmative vote of a GNSO

Supermajority

- j Approve a PDP Recommendation imposing New Obligations on Certain Contracting Parties where an CANN contract provision specifies that a "two-thirds vote of the council" demonstrates the presence of a consensus the GNSO Supermajority vote threshold will have to be met or exceeded
- k Modification of Approved PDP Recommendation Prior to Final Approval by the CANN Board an Approved PDP Recommendation may be modified or amended by the GNSO Council with a GNSO Supermajority vote
- l Initiation of an Expedited Policy Development Process (EPDP) requires an affirmative vote of a GNSO Supermajority
- m Approve an EPDP Team Charter requires an affirmative vote of a GNSO Supermajority
- n Approval of EPDP recommendations requires an affirmative vote of a GNSO Supermajority
- o Approve an EPDP Recommendation imposing New Obligations on Certain Contracting Parties where an CANN contract provision specifies that a "two-thirds vote of the council" demonstrates the presence of a consensus the GNSO Supermajority vote threshold will have to be met or exceeded
- p Initiation of a GNSO Guidance Process (GGP) requires an affirmative vote of more than one-third (1/3) of each House or more than two-thirds (2/3) of one House
- q Rejection of initiation of a GGP requested by the CANN Board requires an affirmative vote of a GNSO Supermajority
- r Approval of GGP recommendations requires an affirmative vote of a GNSO Supermajority
- s A "GNSO Supermajority" shall mean (a) two-thirds (2/3) of the Council members of each House or (b) three-fourths (3/4) of one House and a majority of the other House "

Section 4. STAFF SUPPORT AND FUNDING

- 1 A member of the CANN staff shall be assigned to support the GNSO whose work on substantive matters shall be assigned by the Chair of the GNSO Council and shall be designated as the GNSO Staff Manager (Staff Manager)
- 2 CANN shall provide administrative and operational support necessary for the GNSO to carry out its responsibilities. Such support shall not include an obligation for CANN to fund travel expenses incurred by GNSO participants for travel to any meeting of the GNSO or for any other purpose. CANN may at its discretion fund travel expenses for GNSO participants under any travel support procedures or guidelines that it may adopt from time to time.

Section 5. STAKEHOLDER GROUPS

- 1 The following Stakeholder Groups are hereby recognized as representative of a specific group of one or more Constituencies or interest groups and subject to the provisions of the [Transition Article XX Section 5 of these Bylaws](#)
 - a Registries Stakeholder Group representing all gTLD registries under contract to CANN
 - b Registrars Stakeholder Group representing all registrars accredited by and under contract to CANN
 - c Commercial Stakeholder Group representing the full range of large and small commercial entities of the Internet and
 - d Non-Commercial Stakeholder Group representing the full range of non-commercial entities of the Internet
- 2 Each Stakeholder Group is assigned a specific number of Council seats in accordance with [Section 3\(1\) of this Article](#)
- 3 Each Stakeholder Group identified in [paragraph 1 of this Section](#) and each of its associated Constituencies where applicable shall maintain recognition with the CANN Board. Recognition is granted by the Board based upon the extent to which in fact the entity represents the global interests of the stakeholder communities it purports to represent and operates to the maximum extent feasible in an open and transparent manner consistent with procedures designed to ensure fairness. Stakeholder Group and Constituency Charters may be reviewed periodically as prescribed by the Board
- 4 Any group of individuals or entities may petition the Board for recognition as a new or separate Constituency in the Non-Contracted Parties House. Any such petition shall contain
 - a A detailed explanation of why the addition of such a Constituency will improve the ability of the GNSO to carry out its policy-development responsibilities
 - b A detailed explanation of why the proposed new Constituency adequately represents on a global basis the stakeholders it seeks to represent
 - c A recommendation for organizational placement within a particular Stakeholder Group and
 - d A proposed charter that adheres to the principles and procedures contained in these Bylaws

Any petition for the recognition of a new Constituency and the associated charter shall be posted for public comment

- 5 The Board may create new Constituencies as described in [Section 5\(3\)](#) in response to such a petition or on its own motion if the Board determines that such action would serve the purposes of CANN. In the event the Board is considering acting on its own motion it shall post a detailed explanation of why such action is necessary or desirable, set a reasonable time for public comment and not make a final decision on whether to create such new Constituency until after reviewing all comments received. Whenever the Board posts a petition or recommendation for a new Constituency for public comment the Board shall notify the GNSO Council and the appropriate Stakeholder Group affected and shall consider any response to that notification prior to taking action

Section 6. POLICY DEVELOPMENT PROCESS

The policy-development procedures to be followed by the GNSQ shall be as set out in [Annex A](#) of these Bylaws. These procedures may be supplemented or revised in the manner set out in [Section 3\(4\) of this Article](#).

ARTICLE XI: ADVISORY COMMITTEES

Section 1. GENERAL

The Board may create one or more Advisory Committees in addition to those set forth in this Article. Advisory Committee membership may consist of Directors only, Directors and non-directors, or non-directors only, and may also include non-voting or alternate members. Advisory Committees shall have no legal authority to act for CANN, but shall report their findings and recommendations to the Board.

Section 2. SPECIFIC ADVISORY COMMITTEES

There shall be at least the following Advisory Committees:

1. Governmental Advisory Committee

- a. The Governmental Advisory Committee should consider and provide advice on the activities of CANN as they relate to concerns of governments, particularly matters where there may be an interaction between CANN's policies and various laws and international agreements or where they may affect public policy issues.
- b. Membership in the Governmental Advisory Committee shall be open to all national governments. Membership shall also be open to Disinc Economies as recognized in international fora and multinational governmental organizations and treaty organizations on the invitation of the Governmental Advisory Committee through its Chair.
- c. The Governmental Advisory Committee may adopt its own charter and internal operating principles or procedures to guide its operations to be published on the Website.
- d. The chair of the Governmental Advisory Committee shall be elected by the members of the Governmental Advisory Committee pursuant to procedures adopted by such members.
- e. Each member of the Governmental Advisory Committee shall appoint one accredited representative to the Committee. The accredited representative of a member must hold a formal official position with the member's public administration. The term "official" includes a holder of an elected governmental office or a person who is employed by such government, public authority or multinational governmental or treaty organization and whose primary function with such government, public authority or organization is to develop or influence governmental or public policies.
- f. The Governmental Advisory Committee shall annually appoint one non-voting liaison to the CANN Board of Directors with authority to reappoint and shall annually appoint one non-voting liaison to the CANN Nominating Committee.
- g. The Governmental Advisory Committee may designate a non-voting liaison to each of the Supporting Organization Councils and Advisory Committees to the extent the Governmental Advisory Committee deems it appropriate and useful to do so.
- h. The Board shall notify the Chair of the Governmental Advisory Committee in a timely manner of any proposal raising public policy issues on which it or any of CANN's supporting organizations or advisory committees seeks public comment and shall take duty into account any timely response or notification prior to taking action.
- i. The Governmental Advisory Committee may put issues to the Board directly either by way of comment or prior advice, or by way of specifically recommending action or new policy development or revision of existing policies.
- j. The advice of the Governmental Advisory Committee on public policy matters shall be duly taken into account both in the formulation and adoption of policies. Nonetheless, the CANN Board determines to take an action that is not consistent with the Governmental Advisory Committee advice, it shall so inform the Committee and state the reasons why it decided not to follow the advice. The Governmental Advisory Committee and the CANN Board will then try in good faith and in a timely and efficient manner to find a mutually acceptable solution.
- k. If no such solution can be found, the CANN Board will state in its final decision the reasons why the Governmental Advisory Committee advice was not followed, and such statement will be without prejudice to the rights or obligations of Governmental Advisory Committee members with regard to public policy issues falling within their responsibilities.

2. Security and Stability Advisory Committee

- a. The role of the Security and Stability Advisory Committee ("SSAC") is to advise the CANN community and Board on matters relating to the security and integrity of the Internet's naming and address allocation systems. It shall have the following responsibilities:
 1. To communicate on security matters with the Internet technical community and the operators and managers of critical DNS infrastructure services, to include the root name server operator, the top-level domain registries and registrars, the operators of the reverse delegation trees such as in-addr.arpa and ip6.arpa, and others as events and developments dictate. The Committee shall gather and articulate requirements to offer to those engaged in technical revision of the protocols related to DNS and address allocation and those engaged in operations planning.
 2. To engage in ongoing threat assessments and risk analysis of the Internet naming and address allocation services, to assess where the principal threats to stability and security lie, and to advise the CANN community accordingly. The Committee shall recommend any necessary audit activities to assess the current status of DNS and address allocation security in relation to identified risks and threats.
 3. To communicate with those who have direct responsibility for Internet naming and address allocation security matters (ETF, RSSAC, RRs, name registries, etc.) to ensure that its advice on security risks, issues, and priorities is properly synchronized with existing standardization, deployment, operational, and coordination activities. The Committee shall monitor these activities.

and inform the CANN community and Board on their progress as appropriate

4 To report periodically to the Board on its activities

5 To make policy recommendations to the CANN community and Board

- b The SSAC's chair and members shall be appointed by the Board. SSAC membership appointments shall be for a three-year term commencing on 1 January and ending the second year hereafter on 31 December. The chair and members may be re-appointed and there are no limits on the number of terms the chair or members may serve. The SSAC chair may provide recommendations to the Board regarding appointments to the SSAC. The SSAC chair shall suggest appointments/recommendations so that approximately one-third (1/3) of the membership of the SSAC is considered for appointments or re-appointments each year. The Board shall also have the power to remove SSAC appointees as recommended by or in consultation with the SSAC. (Note: The first full term under this paragraph shall commence on 1 January 2011 and end on 31 December 2013. Prior to 1 January 2011, the SSAC shall be comprised as set in the Bylaws as amended 25 June 2010 and the SSAC chair shall recommend the re-appointments of all current SSAC members on full or partial terms as appropriate to implement the provisions of this paragraph.)
- c The SSAC shall annually appoint a non-voting liaison to the CANN Board according to [Section 9 of Article V](#)

3. Root Server System Advisory Committee

- a The role of the Root Server System Advisory Committee ("RSSAC") is to advise the CANN community and Board on matters relating to the operation, administration, security and integrity of the Internet's Root Server System. It shall have the following responsibilities:
1. Communicate on matters relating to the operation of the Root Servers and their multiple instances with the Internet technical community and the CANN community. The Committee shall gather and articulate requirements to offer to those engaged in technical revision of the protocols and best common practices related to the operation of DNS servers.
 2. Communicate on matters relating to the administration of the Root Zone with those who have direct responsibility for its administration. These matters include the processes and procedures for the production of the Root Zone File.
 3. Engage in ongoing threat assessment and risk analysis of the Root Server System and recommend any necessary activities to assess the current status of root servers and the root zone.
 4. Respond to requests for information or opinions from the CANN Board of Directors.
 5. Report periodically to the Board on its activities.
 6. Make policy recommendations to the CANN community and Board.
- b The RSSAC shall be led by two co-chairs. The RSSAC's chairs and members shall be appointed by the Board.
1. RSSAC membership appointments shall be for a three-year term commencing on 1 January and ending the second year hereafter on 31 December. Members may be re-appointed and there are no limits on the number of terms the members may serve. The RSSAC chairs shall provide recommendations to the Board regarding appointments to the RSSAC. If the board declines to appoint a person nominated by the RSSAC, then it will provide the rationale for its decision. The RSSAC chairs shall suggest appointments/recommendations so that approximately one-third (1/3) of the membership of the RSSAC is considered for appointments or re-appointments each year. The Board shall also have the power to remove RSSAC appointees as recommended by or in consultation with the RSSAC. (Note: The first term under this paragraph shall commence on 1 July 2013 and end on 31 December 2015 and shall be considered a full term for all purposes. All other full terms under this paragraph shall begin on 1 January of the corresponding year. Prior to 1 July 2013, the RSSAC shall be comprised as set in the Bylaws as amended 16 March 2012 and the RSSAC chairs shall recommend the re-appointments of all current RSSAC members on full or partial terms as appropriate to implement the provisions of this paragraph.)
 2. The RSSAC shall recommend the appointment of the chairs to the board following a nomination process that it devises and documents.
- c The RSSAC shall annually appoint a non-voting liaison to the CANN Board according to [Section 9 of Article V](#)

4. A-Large Advisory Committee

- a The A-Large Advisory Committee (ALAC) is the primary organizational home within CANN for individual Internet users. The role of the ALAC shall be to consider and provide advice on the activities of CANN insofar as they relate to the interests of individual Internet users. This includes policies created through CANN's Supporting Organizations, as well as the many other issues for which community input and advice is appropriate. The ALAC, which plays an important role in CANN's accountability mechanisms, also coordinates some of CANN's outreach to individual Internet users.
- b The ALAC shall consist of (i) two members selected by each of the Regional A-Large Organizations ("RALOs") established according to paragraph 4(g) of [his Section](#) and (ii) five members selected by the Nominating Committee. The five members selected by the Nominating Committee shall include one citizen of a country within each of the five Geographic Regions established according to [Section 5 of Article V](#).
- c Subject to the provisions of the [Transition Article of these Bylaws](#), the regular terms of members of the ALAC shall be as follows:
1. The term of one member selected by each RALO shall begin at the conclusion of an CANN annual meeting in an even-numbered year.
 2. The term of the other member selected by each RALO shall begin at the conclusion of an CANN annual meeting in an odd-numbered year.

- 3 The terms of three of the members selected by the Nominating Committee shall begin at the conclusion of an annual meeting in an odd-numbered year and the terms of the other two members selected by the Nominating Committee shall begin at the conclusion of an annual meeting in an even-numbered year
 - 4 The regular term of each member shall end at the conclusion of the second CANN annual meeting after the term began
- d The Chair of the ALAC shall be elected by the members of the ALAC pursuant to procedures adopted by the Committee
- e The ALAC shall after consultation with each RALO annually appoint five voting delegates (no two of whom shall be citizens of countries in the same Geographic Region as defined according to [Section 5 of Article V](#)) of the Nominating Committee
- f Subject to the provisions of the [Transition Article of these Bylaws](#) the A-Large Advisory Committee may designate non-voting liaisons to each of the ccNSO Council and the GNSO Council
- g There shall be one RALO for each Geographic Region established according to [Section 5 of Article V](#). Each RALO shall serve as the main forum and coordination point for public input to CANN in its Geographic Region and shall be a non-profit organization certified by CANN according to criteria and standards established by the Board based on recommendations of the A-Large Advisory Committee. An organization shall become the recognized RALO for its Geographic Region upon entering a Memorandum of Understanding with CANN addressing the respective roles and responsibilities of CANN and the RALO regarding the process for selecting ALAC members and requirements of openness, participatory opportunities, transparency, accountability and diversity in the RALO's structure and procedures, as well as criteria and standards for the RALO's constituent A-Large Structures
- h Each RALO shall be comprised of self-supporting A-Large Structures within its Geographic Region that have been certified to meet the requirements of the RALO's Memorandum of Understanding with CANN according to [paragraph 4\(i\) of this Section](#). If so provided by its Memorandum of Understanding with CANN, a RALO may also include individual members who are citizens or residents of countries within the RALO's Geographic Region
- i Membership in the A-Large Community
- 1 The criteria and standards for the certification of A-Large Structures within each Geographic Region shall be established by the Board based on recommendations from the ALAC and shall be stated in the Memorandum of Understanding between CANN and the RALO for each Geographic Region
 - 2 The criteria and standards for the certification of A-Large Structures shall be established in such a way that participation by individual members who are citizens or residents of countries within the Geographic Region (as defined in [Section 5 of Article V](#)) of the RALO will predominate in the operation of each A-Large Structure within the RALO while not necessarily excluding additional participation compatible with the interests of the individual members within the region by others
 - 3 Each RALO's Memorandum of Understanding shall also include provisions designed to allow to the greatest extent possible every individual member user who is a citizen of a country within the RALO's Geographic Region to participate in at least one of the RALO's A-Large Structures
 - 4 To the extent compatible with these objectives, the criteria and standards should also afford to each RALO the type of structure that best fits the customs and characteristics of its Geographic Region
 - 5 Once the criteria and standards have been established as provided in this Clause, the ALAC, with the advice and participation of the RALO where the applicant is based, shall be responsible for certifying organizations as meeting the criteria and standards for A-Large Structure accreditation
 - 6 Decisions to certify or decertify an A-Large Structure shall be made as decided by the ALAC in its Rules of Procedure, save always that any changes made to the Rules of Procedure in respect of ALS applications shall be subject to review by the RALOs and by the CANN Board
 - 7 Decisions as to whether to accredit, to deaccredit or disaccredit an A-Large Structure shall be subject to review according to procedures established by the Board
 - 8 On an ongoing basis, the ALAC may also give advice as to whether a prospective A-Large Structure meets the applicable criteria and standards
- j The ALAC is also responsible, working in conjunction with the RALOs, for coordinating the following activities
- 1 Making a selection by the A-Large Community to fill [Section 15](#) on the Board. Noification of the A-Large Community's selection shall be given by the ALAC Chair in writing to the CANN Secretary consistent with [Article V](#), [Sections 8\(4\)](#) and [12\(1\)](#)
 - 2 Keeping the community of individual members informed about the significant news from CANN
 - 3 Distributing (through posting or otherwise) an updated agenda/news about CANN and information about items in the CANN policy-development process
 - 4 Promoting outreach activities in the community of individual members
 - 5 Developing and maintaining on-going information and education programs regarding CANN and its work
 - 6 Establishing an outreach strategy about CANN issues in each RALO's Region
 - 7 Participating in the CANN policy development processes and providing input and advice that accurately reflects the views of individual members
 - 8 Making public and analyzing CANN's proposed policies and its decisions and their (potential) regional impact and (potential) effect on individuals in the region
 - 9 Offering member-based mechanisms that enable discussions among members of A-Large

structures and

10. Establishing mechanisms and processes that enable two-way communication between members of A-Large Structures and those involved in CANN decision-making so interested individuals can share their views on pending CANN issues

Section 3. PROCEDURES

Each Advisory Committee shall determine its own rules of procedure and quorum requirements

Section 4. TERM OF OFFICE

The chair and each member of a committee shall serve until his or her successor is appointed or until such committee is sooner terminated or until he or she is removed, resigns, or otherwise ceases to qualify as a member of the committee

Section 5. VACANCIES

Vacancies on any committee shall be filled in the same manner as provided in the case of original appointments

Section 6. COMPENSATION

Committee members shall receive no compensation for their services as a member of a committee. The Board may however authorize the reimbursement of actual and necessary expenses incurred by committee members including Directors performing their duties as committee members

ARTICLE XI-A: OTHER ADVISORY MECHANISMS

Section 1. EXTERNAL EXPERT ADVICE

1. Purpose: The purpose of seeking external expert advice is to allow the policy-development process within CANN to take advantage of existing expertise that resides in the public or private sector or outside of CANN in those cases where there are relevant public bodies with expertise or where access to private expertise could be helpful. The Board and constituent bodies should be encouraged to seek advice from such expert bodies or individuals
2. Types of Expert Advisory Panels
 - a. On its own initiative or at the suggestion of any CANN body, the Board may appoint or authorize the President to appoint Expert Advisory Panels consisting of public or private sector individuals or entities if the advice sought from such Panels concerns issues of public policy. The provisions of [Section 1\(3\)\(b\) of this Article](#) shall apply
 - b. In addition, in accordance with [Section 1\(3\) of this Article](#), the Board may refer issues of public policy pertinent to matters within CANN's mission to a multinational governmental or reay organization
3. Process for Seeking Advice-Public Policy Matters
 - a. The Governmental Advisory Committee may at any time recommend that the Board seek advice concerning one or more issues of public policy from an external source as set out above
 - b. In the event that the Board determines upon such a recommendation or otherwise that external advice should be sought concerning one or more issues of public policy, the Board shall, as appropriate, consult with the Governmental Advisory Committee regarding the appropriate source from which to seek the advice and the arrangements including definition of scope and process for requesting and obtaining that advice
 - c. The Board shall, as appropriate, transmit any request for advice from a multinational governmental or reay organization including specific terms of reference to the Governmental Advisory Committee with the suggestion that the request be transmitted by the Governmental Advisory Committee to the multinational governmental or reay organization
4. Process for Seeking and Advice-Other Matters: Any reference of issues not concerning public policy to an Expert Advisory Panel by the Board or President in accordance with [Section 1\(2\)\(a\) of this Article](#) shall be made pursuant to terms of reference describing the issues on which input and advice is sought and the procedures and schedule to be followed
5. Receipt of Expert Advice and its Effect: External advice pursuant to this Section shall be provided in written form. Such advice is advisory and non-binding and is intended to augment the information available to the Board or other CANN body in carrying out its responsibilities
6. Opportunity to Comment: The Governmental Advisory Committee, in addition to the Supporting Organizations and other Advisory Committees, shall have an opportunity to comment upon any external advice received prior to any decision by the Board

Section 2. TECHNICAL LIAISON GROUP

1. Purpose: The quality of CANN's work depends on access to complete and authoritative information concerning the technical standards that underlie CANN's activities. CANN's relationship to the organizations that produce these standards is therefore particularly important. The Technical Liaison Group (TLG) shall connect the Board with appropriate sources of technical advice on specific matters pertinent to CANN's activities
2. TLG Organizations: The TLG shall consist of four organizations: the European Telecommunications Standards Institute (ETSI), the International Telecommunications Union's Telecommunication Standardization Sector (ITU-T), the World Wide Web Consortium (W3C), and the Internet Architecture Board (IAB)
3. Role: The role of the TLG organizations shall be to channel technical information and guidance to the Board and to other CANN entities. This role has both a responsive component and an active "watchdog" component which involve the following responsibilities
 - a. In response to a request for information to connect the Board or other CANN body with

appropriate sources of technical expertise. This component of the TLG role covers circumstances in which CANN seeks an authoritative answer to a specific technical question. Where information is requested regarding a particular technical standard for which a TLG organization is responsible, requests shall be directed to that TLG organization.

b. As an ongoing "watchdog" activity to advise the Board of the relevance and progress of technical developments in the areas covered by each organization's scope, it could affect Board decisions or other CANN actions and to draw attention to global technical standards issues that affect policy development within the scope of CANN's mission. This component of the TLG role covers circumstances in which CANN is unaware of a new development and would therefore otherwise not realize that a question should be asked.

4. **TLG Procedures.** The TLG shall not have officers or hold meetings nor shall it provide policy advice to the Board as a committee (although TLG organizations may individually be asked by the Board to do so as the need arises in areas relevant to their individual characters). Neither shall the TLG debate or otherwise coordinate technical issues across the TLG organizations, establish or attempt to establish unified positions, or create or attempt to create additional layers or structures within the TLG for the development of technical standards or for any other purpose.

5. **Technical Work with the ETF.** The TLG shall have no involvement with the CANN's work for the nerve Engineering Task Force (ETF), nerve Research Task Force, or the nerve Architecture Board (AB) as described in the ETF-CANN Memorandum of Understanding Concerning the Technical Work of the Nerve Assigned Numbers Authority ratified by the Board on 10 March 2000.

6. **Individual Technical Experts.** Each TLG organization shall designate two individual technical experts who are familiar with the technical standards issues that are relevant to CANN's activities. These 8 experts shall be available as necessary to determine through an exchange of e-mail messages where to direct a technical question from CANN when CANN does not ask a specific TLG organization directly.

ARTICLE XII: BOARD AND TEMPORARY COMMITTEES

Section 1. BOARD COMMITTEES

The Board may establish one or more committees of the Board which shall continue to exist until otherwise determined by the Board. Only Directors may be appointed to a Committee of the Board; if a person appointed to a Committee of the Board ceases to be a Director, such person shall also cease to be a member of any Committee of the Board. Each Committee of the Board shall consist of two or more Directors. The Board may designate one or more Directors as alternate members of any such committee who may replace any absent member at any meeting of the committee. Committee members may be removed from a committee at any time by a two-thirds (2/3) majority vote of all members of the Board, provided, however, that any Director or Directors which are the subject of the removal action shall not be entitled to vote on such an action or be counted as a member of the Board when calculating the required two-thirds (2/3) vote, and provided further, however, that in no event shall a Director be removed from a committee unless such removal is approved by no less than a majority of all members of the Board.

Section 2. POWERS OF BOARD COMMITTEES

1. The Board may delegate to Committees of the Board all legal authority of the Board except with respect to:
 - a. The filling of vacancies on the Board or on any committee.
 - b. The amendment or repeal of Bylaws or the Articles of Incorporation or the adoption of new Bylaws or Articles of Incorporation.
 - c. The amendment or repeal of any resolution of the Board which by its express terms is not so amendable or repealable.
 - d. The appointment of committees of the Board or the members thereof.
 - e. The approval of any self-dealing transaction as such transactions are defined in Section 5233(a) of the CNPBCL.
 - f. The approval of the annual budget required by [Article XV](#) or
 - g. The compensation of any officer described in [Article X](#).
2. The Board shall have the power to prescribe the manner in which proceedings of any Committee of the Board shall be conducted. In the absence of any such prescription, such committee shall have the power to prescribe the manner in which its proceedings shall be conducted. Unless these Bylaws, the Board or such committee shall otherwise provide, the regular and special meetings shall be governed by the provisions of [Article V](#) applicable to meetings and actions of the Board. Each committee shall keep regular minutes of its proceedings and shall report the same to the Board from time to time as the Board may require.

Section 3. TEMPORARY COMMITTEES

The Board may establish such temporary committees as it sees fit with membership duties and responsibilities as set forth in the resolutions or charters adopted by the Board in establishing such committees.

ARTICLE XIII: OFFICERS

Section 1. OFFICERS

The officers of CANN shall be a President (who shall serve as Chief Executive Officer), a Secretary and a Chief Financial Officer. CANN may also have at the discretion of the Board any additional officers that it deems appropriate. Any person other than the President may hold more than one office, except that no member of the Board (other than the President) shall simultaneously serve as an officer of CANN.

Section 2. ELECTION OF OFFICERS

The officers of CANN shall be elected annually by the Board pursuant to the recommendation of the President or

in the case of the President or the Chairman of the CANN Board. Each such officer shall hold his or her office until he or she resigns, is removed, is otherwise disqualified to serve, or his or her successor is elected.

Section 3. REMOVAL OF OFFICERS

Any Officer may be removed either with or without cause by a two-thirds (2/3) majority vote of all the members of the Board. Should any vacancy occur in any office as a result of death, resignation, removal, disqualification, or any other cause, the Board may delegate the powers and duties of such office to any Officer or to any Director until such time as a successor for the office has been elected.

Section 4. PRESIDENT

The President shall be the Chief Executive Officer (CEO) of CANN in charge of all of its activities and business. All other officers and staff shall report to the President or his or her delegate unless stated otherwise in these Bylaws. The President shall serve as an ex officio member of the Board and shall have all the same rights and privileges of any Board member. The President shall be empowered to call special meetings of the Board as set forth herein and shall discharge all other duties as may be required by these Bylaws and from time to time may be assigned by the Board.

Section 5. SECRETARY

The Secretary shall keep or cause to be kept the minutes of the Board in one or more books provided for that purpose. He shall see that all notices are duly given in accordance with the provisions of these Bylaws or as required by law and in general shall perform all duties as from time to time may be prescribed by the President or the Board.

Section 6. CHIEF FINANCIAL OFFICER

The Chief Financial Officer ("CFO") shall be the chief financial officer of CANN if required by the Board. The CFO shall give a bond for the faithful discharge of his or her duties in such form and with such surety or sureties as the Board shall determine. The CFO shall have charge and custody of all the funds of CANN and shall keep or cause to be kept in books belonging to CANN full and accurate amounts of all receipts and disbursements and shall deposit all money and other valuable effects in the name of CANN in such depositories as may be designated for that purpose by the Board. The CFO shall disburse the funds of CANN as may be ordered by the Board or the President and whenever requested by them shall deliver to the Board and the President an account of all his or her transactions as CFO and of the financial condition of CANN. The CFO shall be responsible for CANN's financial planning and forecasting and shall assist the President in the preparation of CANN's annual budget. The CFO shall coordinate and oversee CANN's funding, including any audits or other reviews of CANN or its Supporting Organizations. The CFO shall be responsible for all other matters relating to the financial operation of CANN.

Section 7. ADDITIONAL OFFICERS

In addition to the officers described above, any additional or assistant officers who are elected or appointed by the Board shall perform such duties as may be assigned to them by the President or the Board.

Section 8. COMPENSATION AND EXPENSES

The compensation of any Officer of CANN shall be approved by the Board. Expenses incurred in connection with the performance of their officer duties may be reimbursed to Officers upon approval of the President (in the case of Officers other than the President) by another Officer designated by the Board (in the case of the President) or the Board.

Section 9. CONFLICTS OF INTEREST

The Board through the Board Governance Committee shall establish a policy requiring a statement from each Officer not less frequently than once a year setting forth all business and other affiliations that relate in any way to the business and other affiliations of CANN.

ARTICLE XIV: INDEMNIFICATION OF DIRECTORS, OFFICERS, EMPLOYEES, AND OTHER AGENTS

CANN shall to maximum extent permitted by the CNPBCL indemnify each of its agents against expenses, judgments, fines, settlements, and other amounts actually and reasonably incurred in connection with any proceeding arising by reason of the fact that any such person is or was an agent of CANN provided that the indemnified person's acts were done in good faith and in a manner that the indemnified person reasonably believed to be in CANN's best interests and no criminal. For purposes of this Article, an "agent" of CANN includes any person who is or was a Director, Officer, employee, or any other agent of CANN (including a member of any Supporting Organization, any Advisory Committee, the Nominating Committee, any other CANN committee, or the Technical Liaison Group) acting within the scope of his or her responsibility or is or was serving at the request of CANN as a Director, Officer, employee, or agent of another corporation, partnership, joint venture, trust, or other enterprise. The Board may adopt a resolution authorizing the purchase and maintenance of insurance on behalf of any agent of CANN against any liability asserted against or incurred by the agent in such capacity or arising out of the agent's status as such whether or not CANN would have the power to indemnify the agent against that liability under the provisions of this Article.

ARTICLE XV: GENERAL PROVISIONS

Section 1. CONTRACTS

The Board may authorize any Officer or Officers, agent or agents, to enter into any contract or execute or deliver any instrument in the name of and on behalf of CANN and such authority may be general or confined to specific instances. In the absence of a contrary Board authorization, contracts and instruments may only be executed by the following Officers: President, any Vice President, or the CFO. Unless authorized or ratified by the Board, no other Officer, agent, or employee shall have any power or authority to bind CANN or to render it liable for any debts or obligations.

Section 2. DEPOSITS

All funds of CANN not otherwise employed shall be deposited from time to time to the credit of CANN in such banks, trust companies, or other depositories as the Board or the President under its delegation may select.

Section 3. CHECKS

All checks, drafts, or other orders for the payment of money, notes, or other evidences of indebtedness issued in the name of CANN shall be signed by such Officer or Officers, agent or agents of CANN and in such a manner as shall from time to time be determined by resolution of the Board.

Section 4. LOANS

No loans shall be made by or for CANN and no evidences of indebtedness shall be issued in its name unless authorized by a resolution of the Board. Such authority may be general or confined to specific instances provided, however, that no loans shall be made by CANN to its Directors or Officers.

ARTICLE XVI: FISCAL MATTERS

Section 1. ACCOUNTING

The fiscal year end of CANN shall be determined by the Board.

Section 2. AUDIT

At the end of the fiscal year, the books of CANN shall be closed and audited by certified public accountants. The appointment of the fiscal auditors shall be the responsibility of the Board.

Section 3. ANNUAL REPORT AND ANNUAL STATEMENT

The Board shall publish at least annually a report describing its activities, including an audited financial statement and a description of any payments made by CANN to Directors (including reimbursements of expenses). CANN shall cause the annual report and the annual statement of certain transactions as required by the CNPBCL to be prepared and sent to each member of the Board and to such other persons as the Board may designate no later than one hundred twenty (120) days after the close of CANN's fiscal year.

Section 4. ANNUAL BUDGET

At least forty-five (45) days prior to the commencement of each fiscal year, the President shall prepare and submit to the Board a proposed annual budget of CANN for the next fiscal year, which shall be posted on the Website. The proposed budget shall identify anticipated revenue sources and levels and shall, to the extent practical, identify anticipated material expense items by line item. The Board shall adopt an annual budget and shall publish the adopted Budget on the Website.

Section 5. FEES AND CHARGES

The Board may set fees and charges for the services and benefits provided by CANN, with the goal of fully recovering the reasonable costs of the operation of CANN and establishing reasonable reserves for future expenses and contingencies reasonably related to the legitimate activities of CANN. Such fees and charges shall be fair and equitable, shall be published for public comment prior to adoption, and once adopted shall be published on the Website in a sufficiently detailed manner so as to be readily accessible.

ARTICLE XVII: MEMBERS

CANN shall not have members as defined in the California Nonprofit Public Benefit Corporation Law ("CNPBCL") notwithstanding the use of the term "Member" in these Bylaws, in any CANN document, or in any action of the CANN Board or staff.

ARTICLE XVIII: OFFICES AND SEAL

Section 1. OFFICES

The principal office for the transaction of the business of CANN shall be in the County of Los Angeles, State of California, United States of America. CANN may also have an additional office or offices within or outside the United States of America as it may from time to time establish.

Section 2. SEAL

The Board may adopt a corporate seal and use the same by causing it or a facsimile hereof to be impressed or affixed or reproduced or otherwise.

ARTICLE XIX: AMENDMENTS

Except as otherwise provided in the Articles of Incorporation or these Bylaws, the Articles of Incorporation or Bylaws of CANN may be altered, amended, or repealed and new Articles of Incorporation or Bylaws adopted only upon action by a two-thirds (2/3) vote of all members of the Board.

ARTICLE XX: TRANSITION ARTICLE

Section 1. PURPOSE

This Transition Article sets forth the provisions for the transition from the processes and structures defined by the CANN Bylaws as amended and revised on 29 October 1999 and amended through 12 February 2002 (the "Old Bylaws") to the processes and structures defined by the Bylaws of which this Article is a part (the "New Bylaws") [Explanatory Note (dated 10 December 2009): For Section 5(3) of this Article, reference to the Old Bylaws refers to the Bylaws as amended and revised through 20 March 2009].

Section 2. BOARD OF DIRECTORS

1. For the period beginning on the adoption of this Transition Article and ending on the Effective Date and Time of the New Board, as defined in [paragraph 5 of this Section 2](#), the Board of Directors of the

Corporation ("Transition Board") shall consist of the members of the Board who would have been Directors under the Old Bylaws immediately after the conclusion of the annual meeting in 2002 except those A-Large members of the Board under the Old Bylaws who elected to do so by notifying the Secretary of the Board on 15 December 2002 or in writing or by e-mail no later than 23 December 2002 shall also serve as members of the Transition Board. Notwithstanding the provisions of [Article V Section 12 of the New Bylaws](#) vacancies on the Transition Board shall not be filled. The Transition Board shall not have liaisons as provided by [Article V Section 9 of the New Bylaws](#). The Board Committees existing on the date of adoption of this Transition Article shall continue in existence subject to any change in Board Committees or their membership that the Transition Board may adopt by resolution.

2. The Transition Board shall elect a Chair and Vice-Chair to serve until the Effective Date and Time of the New Board.
3. The "New Board" is the Board described in [Article V Section 2\(1\) of the New Bylaws](#).
4. Promptly after the adoption of this Transition Article a Nominating Committee shall be formed including to the extent feasible the delegates and liaisons described in [Article V Section 2 of the New Bylaws](#) with terms to end at the conclusion of the CANN annual meeting in 2003. The Nominating Committee shall proceed without delay to select Directors to fill Seats 1 through 8 on the New Board with terms to conclude upon the commencement of the first regular terms specified for those Seats in [Article V Section 8\(1\)\(a\)-\(c\) of the New Bylaws](#) and shall give the CANN Secretary written notice of the selection.
5. The Effective Date and Time of the New Board shall be a time as designated by the Transition Board during the first regular meeting of CANN in 2003 that begins no less than seven calendar days after the CANN Secretary has received written notice of the selection of Directors to fill at least one of Seats 1 through 14 on the New Board. As of the Effective Date and Time of the New Board it shall assume from the Transition Board all the rights, duties, and obligations of the CANN Board of Directors. Subject to Section 4 of this Article the Directors ([Article V Section 2\(1\)\(a\)-\(d\)](#)) and non-voting liaisons ([Article V Section 9](#)) as to which the CANN Secretary has received notice of selection shall, along with the President ([Article V Section 2\(1\)\(e\)](#)) be seated upon the Effective Date and Time of the New Board and hereafter any additional Directors and non-voting liaisons shall be seated upon the CANN Secretary's receipt of notice of their selection.
6. The New Board shall elect a Chairman and Vice-Chairman as its first order of business. The terms of those Board offices shall expire at the end of the annual meeting in 2003.
7. Committees of the Board in existence as of the Effective Date and Time of the New Board shall continue in existence according to their existing charters but the terms of all members of those committees shall conclude at the Effective Date and Time of the New Board. Temporary committees in existence as of the Effective Date and Time of the New Board shall continue in existence with their existing charters and membership subject to any change the New Board may adopt by resolution.
8. In applying the term-limitation provision of [Section 8\(5\) of Article V](#) a Director's service on the Board before the Effective Date and Time of the New Board shall count as one term.

Section 3. ADDRESS SUPPORTING ORGANIZATION

The Address Supporting Organization shall continue in operation according to the provisions of the [Memorandum of Understanding originally entered on 18 October 1999](#) between CANN and a group of regional internet registries (RIRs) and [amended in October 2000](#) until a replacement Memorandum of Understanding becomes effective. Promptly after the adoption of this Transition Article the Address Supporting Organization shall make selections and give the CANN Secretary written notice of those selections of:

1. Directors to fill Seats 9 and 10 on the New Board with terms to conclude upon the commencement of the first regular terms specified for each of those Seats in [Article V Section 8\(1\)\(d\) and \(e\) of the New Bylaws](#) and
2. the delegate to the Nominating Committee selected by the Council of the Address Supporting Organization as called for in [Article V Section 2\(8\)\(f\) of the New Bylaws](#).

With respect to the CANN Directors that is intended to select and taking into account the need for rapid selection to ensure that the New Board becomes effective as soon as possible the Address Supporting Organization may select those Directors from among the persons it previously selected as CANN Directors pursuant to the Old Bylaws. To the extent the Address Supporting Organization does not provide the CANN Secretary written notice on or before 31 March 2003 of its selections for Seats 9 and 10 the Address Supporting Organization shall be deemed to have selected for Seat 9 the person it selected as an CANN Director pursuant to the Old Bylaws for a term beginning in 2001 and for Seat 10 the person it selected as an CANN Director pursuant to the Old Bylaws for a term beginning in 2002.

Section 4. COUNTRY-CODE NAMES SUPPORTING ORGANIZATION

1. Upon the enrollment of thirty ccTLD managers (with a least four within each Geographic Region) as members of the ccNSO written notice shall be posted on the Website. As soon as feasible after that notice the members of the initial ccNSO Council to be selected by the ccNSO members shall be selected according to the procedures set forth in [Article X Section 4\(8\) and \(9\)](#). Upon the completion of the selection process a written notice that the ccNSO Council has been constituted shall be posted on the Website. Three ccNSO Council members shall be selected by the ccNSO members within each Geographic Region with one member to serve a term that ends upon the conclusion of the first CANN annual meeting after the ccNSO Council is constituted, a second member to serve a term that ends upon the conclusion of the second CANN annual meeting after the ccNSO Council is constituted, and the third member to serve a term that ends upon the conclusion of the third CANN annual meeting after the ccNSO Council is constituted. (The definition of "ccTLD manager" set forth in [Article X Section 4\(1\)](#) and the definitions set forth in [Article X Section 4\(4\)](#) shall apply within this Section 4 of Article XX.)
2. After the adoption of [Article X of these Bylaws](#) the Nominating Committee shall select the three members of the ccNSO Council described in [Article X Section 3\(1\)\(b\)](#) by selecting three individuals to serve on the ccNSO Council. The Nominating Committee shall designate one to serve a term that ends upon the conclusion of the first CANN annual meeting after the ccNSO Council is constituted, a second member to serve a term that ends upon the conclusion of the second CANN annual meeting after the ccNSO Council is constituted, and the third member to serve a term that ends upon the conclusion of the third CANN

annual meeting after the ccNSO Council is constituted. The three members of the ccNSO Council selected by the Nominating Committee shall not take their seats before the ccNSO Council is constituted.

3. Upon the ccNSO Council being constituted, the A-Large Advisory Committee and the Governmental Advisory Committee may designate one liaison each to the ccNSO Council as provided by [Article X Section 3\(2\)\(a\) and \(b\)](#).
4. Upon the ccNSO Council being constituted, the Council may designate Regional Organizations as provided in [Article X Section 5](#). Upon its designation, a Regional Organization may appoint a liaison to the ccNSO Council.
5. Until the ccNSO Council is constituted, Sections 11 and 12 on the New Board shall remain vacant. Promptly after the ccNSO Council is constituted, the ccNSO shall through the ccNSO Council make selections of Directors to fill Sections 11 and 12 on the New Board with terms to conclude upon the commencement of the next regular term specified for each of those Sections in [Article V Section 8\(1\)\(d\) and \(f\) of the New Bylaws](#) and shall give the CANN Secretary written notice of its selections.
6. Until the ccNSO Council is constituted, the delegate of the Nominating Committee established by the New Bylaws designated to be selected by the ccNSO shall be appointed by the Transition Board or New Board depending on which is in existence at the time any particular appointment is required after due consultation with members of the ccTLD community. Upon the ccNSO Council being constituted, the delegate of the Nominating Committee appointed by the Transition Board or New Board according to his Section 4(9) when serving shall remain in office except that the ccNSO Council may replace that delegate with one of its choosing within three months after the conclusion of CANN's annual meeting or in the event of a vacancy. Subsequent appointments of the Nominating Committee delegate described in [Article V Section 2\(8\)\(c\)](#) shall be made by the ccNSO Council.

Section 5. GENERIC NAMES SUPPORTING ORGANIZATION

1. The Generic Names Supporting Organization ("GNSO") upon the adoption of this Transition Article shall continue its operations; however, it shall be restructured into four new Stakeholder Groups which shall represent organizationally the former Constituencies of the GNSO, subject to CANN Board approval of each individual Stakeholder Group Charter:
 - a. The gTLD Registries Constituency shall be assigned to the Registries Stakeholder Group.
 - b. The Registrars Constituency shall be assigned to the Registrars Stakeholder Group.
 - c. The Business Constituency shall be assigned to the Commercial Stakeholder Group.
 - d. The Intellectual Property Constituency shall be assigned to the Commercial Stakeholder Group.
 - e. The Internet Services Providers Constituency shall be assigned to the Commercial Stakeholder Group and
 - f. The Non-Commercial Users Constituency shall be assigned to the Non-Commercial Stakeholder Group.
2. Each GNSO Constituency described in paragraph 1 of this subsection shall continue operating substantially as before and no Constituency official, working group, or other activity shall be changed until further action of the Constituency provided that each GNSO Constituency described in paragraph 1 (c-f) shall submit to the CANN Secretary a new or revised Charter inclusive of its operating procedures adopted according to the Constituency's processes and consistent with these Bylaws Amendments no later than the CANN meeting in October 2009 or another date as the Board may designate by resolution.
3. Prior to the commencement of the CANN meeting in October 2009 or another date, the Board may designate by resolution the GNSO Council shall consist of its current Constituency structure and of officers as described in [Article X Section 3\(1\) of the Bylaws](#) (as amended and revised on 29 October 1999 and amended through 20 March 2009 (the "Old Bylaws")). Thereafter, the composition of the GNSO Council shall be as provided in these Bylaws as they may be amended from time to time. All committees, task forces, working groups, drafting committees, and similar groups established by the GNSO Council and in existence immediately before the adoption of this Transition Article shall continue in existence with the same characters, membership, and activities, subject to any change by action of the GNSO Council or CANN Board.
4. Beginning with the commencement of the CANN Meeting in October 2009 or another date, the Board may designate by resolution (the "Effective Date of the Transition") the GNSO Council seats shall be assigned as follows:
 - a. The three seats currently assigned to the Registry Constituency shall be reassigned as three seats of the Registries Stakeholder Group.
 - b. The three seats currently assigned to the Registrar Constituency shall be reassigned as three seats of the Registrars Stakeholder Group.
 - c. The three seats currently assigned to each of the Business Constituency, the Intellectual Property Constituency, and the Internet Services Provider Constituency (nine total) shall be decreased to be six seats of the Commercial Stakeholder Group.
 - d. The three seats currently assigned to the Non-Commercial Users Constituency shall be increased to be six seats of the Non-Commercial Stakeholder Group.
 - e. The three seats currently selected by the Nominating Committee shall be assigned by the Nominating Committee as follows: one voting member of the Contracted Party House, one voting member of the Non-Contracted Party House, and one non-voting member assigned to the GNSO Council at large.

Representatives on the GNSO Council shall be appointed or elected consistent with the provisions in each applicable Stakeholder Group Charter approved by the Board and sufficiently in advance of the October 2009 CANN Meeting that will permit those representatives to act in their official capacities at the start of said meeting.

5. The GNSO Council, as part of its Resilience Implementation Plan, will document (a) how vacancies, if any, will be handled during the transition period, (b) for each Stakeholder Group, how each assigned

Council shall take effect at the 2009 CANN annual meeting will be filled whether through a continuation of an existing term or a new election or appointment (c) how it plans to address staggered terms such as the new GNSO Council preserves as much continuity as reasonably possible and (d) the effect of Bylaws term limits on each Council member

- 6 As soon as practical after the commencement of the CANN meeting in October 2009 or otherwise the Board may designate by resolution the GNSO Council shall in accordance with [Article X Section 3\(7\)](#) and its GNSO Operating Procedures elect officers and give the CANN Secretary written notice of its selections

Section 6. PROTOCOL SUPPORTING ORGANIZATION

The [Protocol Supporting Organization](#) referred to in the [Old Bylaws](#) is discontinued

Section 7. ADVISORY COMMITTEES AND TECHNICAL LIAISON GROUP

- 1 Upon the adoption of the New Bylaws the Governmental Advisory Committee shall continue in operation according to its existing operating principles and practices until further action of the committee. The Governmental Advisory Committee may designate liaisons to serve with other CANN bodies as contemplated by the New Bylaws by providing written notice to the CANN Secretary. Promptly upon the adoption of this Transition Article the Governmental Advisory Committee shall notify the CANN Secretary of the person selected as its delegate to the Nominating Committee as set forth in [Article V Section 2 of the New Bylaws](#)
- 2 The organizations designated as members of the Technical Liaison Group under [Article X-A Section 2\(2\) of the New Bylaws](#) shall each designate two individual technical experts described in [Article X-A Section 2\(6\) of the New Bylaws](#) by providing written notice to the CANN Secretary. As soon as feasible the delegate from the Technical Liaison Group to the Nominating Committee shall be selected according to [Article X-A Section 2\(7\) of the New Bylaws](#)
- 3 Upon the adoption of the New Bylaws the [Security and Stability Advisory Committee](#) shall continue in operation according to its existing operating principles and practices until further action of the committee. Promptly upon the adoption of this Transition Article the Security and Stability Advisory Committee shall notify the CANN Secretary of the person selected as its delegate to the Nominating Committee as set forth in [Article V Section 2\(4\) of the New Bylaws](#)
- 4 Upon the adoption of the New Bylaws the [Root Server System Advisory Committee](#) shall continue in operation according to its existing operating principles and practices until further action of the committee. Promptly upon the adoption of this Transition Article the Root Server Advisory Committee shall notify the CANN Secretary of the person selected as its delegate to the Nominating Committee as set forth in [Article V Section 2\(3\) of the New Bylaws](#)
- 5 A-Large Advisory Committee
 - a There shall exist an interim A-Large Advisory Committee until such time as CANN recognizes through the entry of a Memorandum of Understanding all of the Regional A-Large Organizations (RALOs) identified in [Article X Section 2\(4\) of the New Bylaws](#). The interim A-Large Advisory Committee shall be composed of (i) ten individuals (two from each CANN region) selected by the CANN Board following nominations by the A-Large Organizing Committee and (ii) five additional individuals (one from each CANN region) selected by the initial Nominating Committee as soon as feasible in accordance with the principles established in [Article V Section 5 of the New Bylaws](#). The initial Nominating Committee shall designate two of these individuals to serve terms until the conclusion of the CANN annual meeting in 2004 and three of these individuals to serve terms until the conclusion of the CANN annual meeting in 2005
 - b Upon the entry of each RALO in such a Memorandum of Understanding, herein, shall be entitled to select two persons who are citizens and residents of that Region to be members of the A-Large Advisory Committee established by [Article X Section 2\(4\) of the New Bylaws](#). Upon the entry's written notification to the CANN Secretary of such selections, those persons shall immediately assume the seats held until their notification by the interim A-Large Advisory Committee members previously selected by the Board from the RALO's region
 - c Upon the seating of persons selected by all five RALOs, the interim A-Large Advisory Committee shall become the A-Large Advisory Committee as established by [Article X Section 2\(4\) of the New Bylaws](#). The five individuals selected to the interim A-Large Advisory Committee by the Nominating Committee shall become members of the A-Large Advisory Committee for the remainder of the terms for which they were selected
 - d Promptly upon its creation, the interim A-Large Advisory Committee shall notify the CANN Secretary of the persons selected as its delegates to the Nominating Committee as set forth in [Article V Section 2\(6\) of the New Bylaws](#)

Section 8. OFFICERS

CANN officers (as defined in [Article X of the New Bylaws](#)) shall be elected by the then-existing Board of CANN at the annual meeting in 2002 to serve until the annual meeting in 2003

Section 9. GROUPS APPOINTED BY THE PRESIDENT

Notwithstanding the adoption or effectiveness of the New Bylaws, task forces and other groups appointed by the CANN President shall continue unchanged in membership, scope, and operation until changes are made by the President

Section 10. CONTRACTS WITH ICANN

Notwithstanding the adoption or effectiveness of the New Bylaws, all agreements including employment and consulting agreements entered by CANN shall continue in effect according to their terms

The following process shall govern the GNSO policy development process ("PDP") until such time as modifications are recommended to and approved by the CANN Board of Directors ("Board"). The role of the GNSO is outlined in Article X of these Bylaws. If the GNSO is conducting activities that have no intended result in a Consensus Policy, the Council may act through other processes.

Section 1 Required Elements of a Policy Development Process

The following elements are required as a minimum to form Consensus Policies as defined within CANN contracts and any other policies for which the GNSO Council requests application of this Annex A:

- a) Final Issue Report requested by the Board, the GNSO Council ("Council") or Advisory Committee, which should include as a minimum a) the proposed issue raised for consideration, b) the identity of the party submitting the issue, and c) how the party is affected by the issue.
- b) Formal initiation of the Policy Development Process by the Council.
- c) Formation of a Working Group or other designated work method.
- d) Initial Report produced by a Working Group or other designated work method.
- e) Final Report produced by a Working Group or other designated work method and forwarded to the Council for deliberation.
- f) Council approval of PDP Recommendations contained in the Final Report by the required thresholds.
- g) PDP Recommendations and Final Report shall be forwarded to the Board through a Recommendations Report approved by the Council and
- h) Board approval of PDP Recommendations.

Section 2 Policy Development Process Manual

The GNSO shall maintain a Policy Development Process Manual (PDP Manual) within the operating procedures of the GNSO maintained by the GNSO Council. The PDP Manual shall contain specific additional guidance on completion of all elements of a PDP, including those elements that are not otherwise defined in these Bylaws. The PDP Manual and any amendments thereto are subject to a twenty-one (21) day public comment period as well as Board oversight and review as specified in Article X, Section 3.6.

Section 3 Requesting an Issue Report

Board Request: The Board may request an Issue Report by instructing the GNSO Council ("Council") to begin the process outlined in the PDP Manual. In the event the Board makes a request for an Issue Report, the Board should provide a mechanism by which the GNSO Council can consult with the Board to provide information on the scope, timing, and priority of the request for an Issue Report.

Council Request: The GNSO Council may request an Issue Report by a vote of at least one-fourth (1/4) of the members of the Council of each House or a majority of one House.

Advisory Committee Request: An Advisory Committee may raise an issue for policy development by action of such committee to request an Issue Report and transmission of the request to the Staff Manager and GNSO Council.

Section 4 Creation of an Issue Report

Within forty-five (45) calendar days after receipt of either (i) an instruction from the Board, (ii) a properly supported motion from the GNSO Council, or (iii) a properly supported motion from an Advisory Committee, the Staff Manager will create a report (a "Preliminary Issue Report"). In the event the Staff Manager determines that more time is necessary to create the Preliminary Issue Report, the Staff Manager may request an extension of time for completion of the Preliminary Issue Report.

The following elements should be considered in the Issue Report:

- a) The proposed issue raised for consideration.
- b) The identity of the party submitting the request for the Issue Report.
- c) How the party is affected by the issue, if known.
- d) Support for the issue, including the PDP, if known.
- e) The opinion of the CANN General Counsel regarding whether the issue proposed for consideration within the Policy Development Process is properly within the scope of the CANN's mission, policy process, and more specifically, the role of the GNSO as set forth in the Bylaws.
- f) The opinion of CANN Staff as to whether the Council should initiate the PDP on the issue.

Upon completion of the Preliminary Issue Report, the Preliminary Issue Report shall be posted on the CANN website for a public comment period that complies with the designated practice for public comment periods within CANN.

The Staff Manager is responsible for drafting a summary and analysis of the public comments received on the Preliminary Issue Report and producing a Final Issue Report based upon the comments received. The Staff Manager should forward the Final Issue Report along with any summary and analysis of the public comments received to the Chair of the GNSO Council for consideration for initiation of a PDP.

Section 5 Initiation of the PDP

The Council may initiate the PDP as follows:

Board Request: If the Board requests an Issue Report, the Council within the timeframe set forth in the PDP Manual shall initiate a PDP. No vote is required for such action.

GNSO Council or Advisory Committee Requests The Council may only initiate the PDP by a vote of the Council. Initiation of a PDP requires a vote as set forth in [Article X Section 3 paragraph 9\(b\) and \(c\)](#) in favor of initiating the PDP.

Section 6 Reports

Annual Reports should be delivered to the GNSO Council and posted for a public comment period that complies with the designated practice for public comment periods within CANN, which time may be extended in accordance with the PDP Manual. Following the review of the comments received and, if required, additional deliberations, a Final Report shall be produced for transmission to the Council.

Section 7 Council Deliberation

Upon receipt of a Final Report, whether as the result of a working group or otherwise, the Council chair will (i) distribute the Final Report to all Council members and (ii) call for Council deliberation on the matter in accordance with the PDP Manual.

The Council approval process is set forth in [Article X Section 3 paragraph 9\(d\) through \(g\)](#) as supplemented by the PDP Manual.

Section 8 Preparation of the Board Report

If the PDP recommendations contained in the Final Report are approved by the GNSO Council, a Recommendations Report shall be approved by the GNSO Council for delivery to the CANN Board.

Section 9 Board Approval Processes

The Board will meet to discuss the GNSO Council recommendation as soon as feasible, but preferably no later than the second meeting after receipt of the Board Report from the Staff Manager. Board deliberation on the PDP Recommendations contained within the Recommendations Report shall proceed as follows:

- a. Any PDP Recommendations approved by a GNSO Supermajority Vote shall be adopted by the Board unless, by a vote of more than two-thirds (2/3) of the Board, the Board determines that such policy is not in the best interests of the CANN community or CANN. If the GNSO Council recommendation was approved by less than a GNSO Supermajority Vote, a majority vote of the Board will be sufficient to determine that such policy is not in the best interests of the CANN community or CANN.
- b. Notwithstanding the Board determines in accordance with paragraph a. above that the policy recommended by a GNSO Supermajority Vote or less than a GNSO Supermajority vote is not in the best interests of the CANN community or CANN (the Corporation), the Board shall (i) articulate the reasons for its determination in a report to the Council (the "Board Statement") and (ii) submit the Board Statement to the Council.
- c. The Council shall review the Board Statement for discussion with the Board as soon as feasible after the Council's receipt of the Board Statement. The Board shall determine the method (e.g., by teleconference, e-mail, or otherwise) by which the Council and Board will discuss the Board Statement.
- d. At the conclusion of the Council and Board discussions, the Council shall meet to affirm or modify its recommendation and communicate that conclusion (the "Supplemental Recommendation") to the Board, including an explanation for the then-current recommendation. Notwithstanding the Council is unable to reach a GNSO Supermajority Vote on the Supplemental Recommendation, the Board shall adopt the recommendation unless more than two-thirds (2/3) of the Board determines that such policy is not in the best interests of the CANN community or CANN. For any Supplemental Recommendation approved by less than a GNSO Supermajority Vote, a majority vote of the Board shall be sufficient to determine that the policy in the Supplemental Recommendation is not in the best interests of the CANN community or CANN.

Section 10 Implementation of Approved Policies

Upon a final decision of the Board adopting the policy, the Board shall, as appropriate, give authorization or direction to CANN staff to work with the GNSO Council to create an implementation plan based upon the implementation recommendations identified in the Final Report and to implement the policy. The GNSO Council may, but is not required to, direct the creation of an implementation review team to assist in implementation of the policy.

Section 11 Maintenance of Records

Throughout the PDP, from policy suggestion to a final decision by the Board, CANN will maintain on the Website a status web page detailing the progress of each PDP issue. Such a status page will outline the completed and upcoming steps in the PDP process and contain links to key resources (e.g., Reports, Comments, Forums, WG Discussions, etc.).

Section 12 Additional Definitions

"Comments Site," "Comments Forum," "Comments For a" and "Website" refer to one or more websites designated by CANN on which notifications and comments regarding the PDP will be posted.

"Supermajority Vote" means a vote of more than sixty-six (66) percent of the members present at a meeting of the applicable body with the exception of the GNSO Council.

"Staff Manager" means an CANN staff person(s) who manages the PDP.

"GNSO Supermajority Vote" shall have the meaning set forth in the Bylaws.

Section 13 Applicability

The procedures of this Annex A shall be applicable to all requests for Issue Reports and PDPs initiated after 8 December 2011. For all ongoing PDPs initiated prior to 8 December 2011, the Council shall determine the feasibility of transitioning to the procedures set forth in this Annex A for all remaining steps within the PDP. If the Council determines that any ongoing PDP cannot be feasibly transitioned to these updated procedures, the PDP shall be concluded according to the procedures set forth in Annex A in force on 7 December 2011.

Annex A-1: GNSO Expedited Policy Development Process

The following process shall govern the specific instances where the GNSO Council invokes the GNSO Expedited Policy Development Process ("EPDP"). The GNSO Council may invoke the EPDP in the following limited circumstances: (1) to address a narrowly defined policy issue that was identified and scoped after either the adoption of a GNSO policy recommendation by the CANN Board or the implementation of such an adopted recommendation; or (2) to create new or additional recommendations for a specific policy issue that had been substantially scoped previously such that extensive pertinent background information already exists, e.g. (a) in an Issue Report for a possible PDP, that was not initiated; (b) as part of a previous PDP, that was not completed; or (c) through other projects such as a GGP. The following process shall be in place until such time as modifications are recommended, adopted and approved by the CANN Board of Directors. Where a conflict arises in relation to an EPDP between the PDP Manual (see Annex 2 of the GNSO Operating Procedures) and the procedures described in this Annex A-1, the provisions of this Annex A-1 shall prevail.

The role of the GNSO is outlined in Article X of these Bylaws. Provided the Council believes and documents via Council vote that the above-listed criteria are met, an EPDP may be initiated to recommend an amendment to an existing Consensus Policy; however, in all cases where the GNSO is conducting policy-making activities, it does not meet the above criteria as documented in a Council vote, the Council should act through a Policy Development Process (see Annex A).

Section 1 Required Elements of a GNSO Expedited Policy Development Process

The following elements are required as a minimum to develop expedited GNSO policy recommendations including recommendations that could result in amendments to an existing Consensus Policy as part of a GNSO Expedited Policy Development Process:

- a. Formal initiation of the GNSO Expedited Policy Development Process by the GNSO Council including an EPDP scoping document
- b. Formation of an EPDP Team or other designated work methodology
- c. Initial Report produced by an EPDP Team or other designated work methodology
- d. Final EPDP Policy Recommendation(s) Report produced by an EPDP Team or other designated work methodology and forwarded to the Council for deliberation
- e. GNSO Council approval of EPDP Policy Recommendation(s) contained in the Final EPDP Policy Recommendation(s) Report by the required thresholds
- f. EPDP Recommendations and Final EPDP Recommendation(s) Report forwarded to the Board through a Recommendation Report approved by the Council and
- g. Board approval of EPDP Recommendation(s)

Section 2 Expedited Policy Development Process Manual

The GNSO shall include a specific section(s) on the EPDP process as part of its mainenance of the GNSO Policy Development Process Manual (PDP Manual) described in Annex 5 of the GNSO Operating Procedures. The EPDP Manual shall contain specific additional guidance on completion of all elements of an EPDP, including those elements that are not otherwise defined in these Bylaws. The EPDP Manual and any amendments thereto are subject to a twenty-one (21) day public comment period, a minimum, as well as Board oversight and review as specified in Article X, Section 3.4.

Section 3 Initiation of the EPDP

The Council may initiate an EPDP as follows:

The Council may only initiate the EPDP by a vote of the Council. Initiation of an EPDP requires an affirmative Supermajority vote of the Council (as defined in these Bylaws) in favor of initiating the EPDP.

The request to initiate an EPDP must be accompanied by an EPDP scoping document which is expected to include at a minimum the following information:

1. Name of Council Member / SG / C
2. Origin of issue (e.g. previously completed PDP)
3. Scope of the effort (detailed description of the issue or question that the EPDP is expected to address)
4. Description of how this issue meets the criteria for an EPDP, i.e. how the EPDP will address either (1) a narrowly defined policy issue that was identified and scoped after either the adoption of a GNSO policy recommendation by the CANN Board or the implementation of such an adopted recommendation; or (2) new or additional policy recommendations on a specific GNSO policy issue that had been scoped previously as part of a PDP, that was not completed or other similar effort including relevant supporting information in either case.
5. If not provided as part of item 4, the opinion of the CANN General Counsel as to whether the issue proposed for consideration is properly within the scope of the CANN's mission, policy process and more specifically the role of the GNSO.
6. Proposed EPDP mechanism (e.g. WG, DT, individual volunteers)
7. Method of operation if different from GNSO Working Group Guidelines
8. Decision-making methodology for EPDP mechanism if different from GNSO Working Group Guidelines
9. Target completion date

Section 4 Council Deliberation

Upon receipt of an EPDP Final Recommendation(s) Report whether as the result of an EPDP Team or otherwise, the Council chair will (i) distribute the Final EPDP Recommendation(s) Report to all Council members

and (ii) call for Council deliberation on the matter in accordance with the PDP Manual

Approval of EPDP Recommendation(s) requires an affirmative vote of the Council meeting the thresholds set forth in Article X Section 3 paragraphs 9-10 as supplemented by the PDP Manual

Section 5 **Preparation of the Board Report**

If the EPDP Recommendation(s) contained in the Final EPDP Recommendation(s) Report are approved by the GNSO Council, a Recommendation(s) Report shall be approved by the GNSO Council for delivery to the CANN Board

Section 6 **Board Approval Processes**

The Board will meet to discuss the EPDP recommendation(s) as soon as feasible but preferably no later than the second meeting after receipt of the Recommendation(s) Report from the Staff Manager Board deliberation on the EPDP Recommendations contained within the Recommendation(s) Report shall proceed as follows

- a. Any EPDP Recommendations approved by a GNSO Supermajority Vote shall be adopted by the Board unless by a vote of more than two-thirds (2/3) of the Board the Board determines that such policy is not in the best interests of the CANN community or CANN. If the GNSO Council recommendation was approved by less than a GNSO Supermajority Vote, a majority vote of the Board will be sufficient to determine that such policy is not in the best interests of the CANN community or CANN
- b. Not even if the Board determines in accordance with paragraph a above that the proposed EPDP Recommendations are not in the best interests of the CANN community or CANN (the Corporation) the Board shall (i) articulate the reasons for its determination in a report to the Council (the "Board Statement") and (ii) submit the Board Statement to the Council
- c. The Council shall review the Board Statement for discussion with the Board as soon as feasible after the Council's receipt of the Board Statement. The Board shall determine the method (e.g. by teleconference, e-mail, or otherwise) by which the Council and Board will discuss the Board Statement
- d. At the conclusion of the Council and Board discussions, the Council shall meet to affirm or modify its recommendation and communicate that conclusion (the "Supplemental Recommendation") to the Board including an explanation for the then-current recommendation. Not even if the Council is able to reach a GNSO Supermajority Vote on the Supplemental Recommendation, the Board shall adopt the recommendation unless more than two-thirds (2/3) of the Board determines that such guidance is not in the best interests of the CANN community or CANN. For any Supplemental Recommendation approved by less than a GNSO Supermajority Vote, a majority vote of the Board shall be sufficient to determine that the guidance in the Supplemental Recommendation is not in the best interests of the CANN community or CANN

Section 7 **Implementation of Approved Policies**

Upon a final decision of the Board adopting the EPDP recommendations, the Board shall, as appropriate, give authorization or direction to CANN staff to implement the EPDP Recommendations if deemed necessary. The Board shall direct CANN staff to work with the GNSO Council to create a guidance implementation plan based upon the guidance recommendations identified in the Final EPDP Recommendation(s) Report

Section 8 **Maintenance of Records**

Throughout the EPDP from initiation to a final decision by the Board, CANN will maintain on the Website a status web page detailing the progress of each EPDP issue. Such a status page will outline the completed and upcoming steps in the EPDP process and contain links to key resources (e.g. Reports, Comments, Forums, EPDP Discussions, etc.)

Section 9 **Applicability**

The procedures of this Annex A-1 shall be applicable from 28 September 2015 onwards

Annex A-2: GNSO Guidance Process

The following process shall govern the GNSO guidance process ("GGP") until such time as modifications are recommended to and approved by the CANN Board of Directors ("Board"). The role of the GNSO is outlined in Article X of these Bylaws. If the GNSO is conducting activities that are intended to result in a Consensus Policy, the Council should act through a Policy Development Process (see Annex A)

Section 1 **Required Elements of a GNSO Guidance Process**

The following elements are required as a minimum to develop GNSO guidance

1. Formal initiation of the GNSO Guidance Process by the Council, including a GGP scoping document
2. Identification of the types of expertise needed on the GGP Team
3. Recruiting and formation of a GGP Team or other designated work method
4. Proposed GNSO Guidance Recommendation(s) Report produced by a GGP Team or other designated work method
5. Final GNSO Guidance Recommendation(s) Report produced by a GGP Team or other designated work method and forwarded to the Council for deliberation
6. Council approval of GGP Recommendations contained in the Final Recommendation(s) Report by the required thresholds
7. GGP Recommendations and Final Recommendation(s) Report shall be forwarded to the Board through a Recommendation(s) Report approved by the Council and
8. Board approval of GGP Recommendation(s)

Section 2 GNSO Guidance Process Manual

The GNSO shall maintain a GNSO Guidance Process (GGP Manual) within the operating procedures of the GNSO maintained by the GNSO Council. The GGP Manual shall contain specific additional guidance on completion of all elements of a GGP including those elements that are not otherwise defined in these Bylaws. The GGP Manual and any amendments thereto are subject to a twenty-one (21) day public comment period a minimum as well as Board oversight and review as specified in Article X, Section 3.4.

Section 3 **Initiation of the GGP**

The Council may initiate a GGP as follows:

The Council may only initiate the GGP by a vote of the Council or at the formal request of the CANN Board. Initiation of a GGP requires a vote as set forth in Article X, Section 3, paragraph 9 p in favor of initiating the GGP. In the case of a GGP requested by the CANN Board, a GGP will automatically be initiated unless the GNSO Council votes against the initiation of a GGP as set forth in Article X, Section 3, paragraph 9 q.¹

The request to initiate a GGP must be accompanied by a GGP scoping document which is expected to include a minimum of the following information:

1. Name of Council Member / SG / C
2. Origin of issue (e.g. board request)
3. Scope of the effort (detailed description of the issue or question that the GGP is expected to address)
4. Proposed GGP mechanism (e.g. WG, DT, individual volunteers)
5. Method of operation if different from GNSO Working Group Guidelines
6. Decision-making methodology for GGP mechanism if different from GNSO Working Group Guidelines
7. Desired completion date and rationale

In the event the Board makes a request for a GGP, the Board should provide a mechanism by which the GNSO Council can consult with the Board to provide information on the scope, timing, and priority of the request for a GGP.

Section 4 **Council Deliberation**

Upon receipt of a Final Recommendation(s) Report, whether as the result of a GGP Team or otherwise, the Council chair will (i) distribute the Final Recommendation(s) Report to all Council members and (ii) call for Council deliberation on the matter in accordance with the GGP Manual.

The Council approval process is set forth in Article X, Section 3, paragraph 9 r² as supplemented by the GGP Manual.

Section 5 **Preparation of the Board Report**

If the GGP recommendations contained in the Final Recommendation(s) Report are approved by the GNSO Council, a Recommendations Report shall be approved by the GNSO Council for delivery to the CANN Board.

Section 6 **Board Approval Processes**

The Board will meet to discuss the GNSO Guidance recommendation(s) as soon as feasible, but preferably no later than the second meeting after receipt of the Board Report from the Staff Manager. Board deliberation on the GGP Recommendations contained within the Recommendations Report shall proceed as follows:

- a. Any GGP Recommendations approved by a GNSO Supermajority Vote shall be adopted by the Board unless by a vote of more than two-thirds (2/3) of the Board, the Board determines that such guidance is not in the best interests of the CANN community or CANN.
- b. In the event that the Board determines in accordance with paragraph a above that the proposed GNSO Guidance recommendation(s) adopted by a GNSO Supermajority Vote is not in the best interests of the CANN community or CANN (the Corporation), the Board shall (i) articulate the reasons for its determination in a report to the Council (the "Board Statement") and (ii) submit the Board Statement to the Council.
- c. The Council shall review the Board Statement for discussion with the Board as soon as feasible after the Council's receipt of the Board Statement. The Board shall determine the method (e.g. by teleconference, e-mail, or otherwise) by which the Council and Board will discuss the Board Statement.
- d. At the conclusion of the Council and Board discussions, the Council shall meet to affirm or modify its recommendation and communicate that conclusion (the "Supplemental Recommendation") to the Board including an explanation for the then-current recommendation. In the event that the Council is unable to reach a GNSO Supermajority Vote on the Supplemental Recommendation, the Board shall adopt the recommendation unless more than two-thirds (2/3) of the Board determines that such guidance is not in the best interests of the CANN community or CANN.

Section 7 **Implementation of Approved GNSO Guidance**

Upon a final decision of the Board adopting the guidance, the Board shall, as appropriate, give authorization or direction to CANN staff to implement the GNSO Guidance. If deemed necessary, the Board may direct CANN staff to work with the GNSO Council to create a guidance implementation plan, if deemed necessary, based upon the guidance recommendations identified in the Final Recommendation(s) Report.

Section 8 **Maintenance of Records**

Throughout the GGP, from initiation to a final decision by the Board, CANN will maintain on the Website a status web page detailing the progress of each GGP issue. Such status page will outline the completed and upcoming steps in the GGP process and contain links to key resources (e.g. Reports, Comments, Forums, GGP Discussions).

e c)

Section 9 Additional Definitions

"Comments Site" "Comments Forum" "Comments Fora" and "Website" refer to one or more websites designated by CANN on which notifications and comments regarding the GGP will be posted

"GGP Staff Manager" means an CANN staff person(s) who manages the GGP

Annex B: ccNSO Policy-Development Process (ccPDP)

The following process shall govern the ccNSO policy-development process ("PDP")

1. Request for an Issue Report

An Issue Report may be requested by any of the following

- a *Council* The ccNSO Council (in this Annex B the "Council") may call for the creation of an Issue Report by an affirmative vote of at least seven of the members of the Council present at any meeting or voting by e-mail
- b *Board* The CANN Board may call for the creation of an Issue Report by requesting the Council to begin the policy-development process
- c *Regional Organization* One or more of the Regional Organizations representing ccTLDs in the CANN recognized Regions may call for creation of an Issue Report by requesting the Council to begin the policy-development process
- d *ICANN Supporting Organization or Advisory Committee* An CANN Supporting Organization or an CANN Advisory Committee may call for creation of an Issue Report by requesting the Council to begin the policy-development process
- e *Members of the ccNSO* The members of the ccNSO may call for the creation of an Issue Report by an affirmative vote of at least ten members of the ccNSO present at any meeting or voting by e-mail

Any request for an Issue Report must be in writing and must set out the issue upon which an Issue Report is requested in sufficient detail to enable the Issue Report to be prepared. It shall be open to the Council to request further information or undertake further research or investigation for the purpose of determining whether or not the requested Issue Report should be created

2. Creation of the Issue Report and Initiation Threshold

Within seven days after an affirmative vote as outlined in item 1(a) above or the receipt of a request as outlined in items 1 (b) (c) or (d) above the Council shall appoint an Issue Manager. The Issue Manager may be a staff member of CANN (in which case the costs of the Issue Manager shall be borne by CANN) or such other person or persons selected by the Council (in which case the ccNSO shall be responsible for the costs of the Issue Manager)

Within fifteen (15) calendar days after appointment (or such other time as the Council shall in consultation with the Issue Manager deem to be appropriate) the Issue Manager shall create an Issue Report. Each Issue Report shall contain at least the following

- a The proposed issue raised for consideration
- b The identity of the party submitting the issue
- c How the party is affected by the issue
- d Support for the issue outlined in the PDP.
- e A recommendation from the Issue Manager as to whether the Council should move to initiate the PDP for this issue (the "Manager Recommendation"). Each Manager Recommendation shall include and be supported by an opinion of the CANN General Counsel regarding whether the issue is properly within the scope of the CANN policy process and within the scope of the ccNSO. In coming to his or her opinion the General Counsel shall examine whether
 - 1 The issue is within the scope of CANN's mission statements
 - 2 Analysis of the relevant factors according to Article X Section 6(2) and Annex C affirmatively demonstrates that the issue is within the scope of the ccNSOin the event that the General Counsel reaches an opinion in the affirmative with respect to points 1 and 2 above then the General Counsel shall also consider whether the issue
 - 3 Implicates or affects an existing CANN policy
 - 4 Is likely to have lasting value or applicability albeit with the need for occasional updates and to establish a guide or framework for future decision-making

In all events consideration of revisions to the ccPDP (in this Annex B) or to the scope of the ccNSO (Annex C) shall be within the scope of CANN and the ccNSO

In the event that the General Counsel is of the opinion the issue is not properly within the scope of the ccNSO. Scope the Issue Manager shall inform the Council of his opinion. If after an analysis of the relevant factors according to Article X Section 6 and Annex C a majority of 10 or more Council members is of the opinion the issue is within scope the Chair of the ccNSO shall inform the Issue Manager accordingly. General Counsel and the ccNSO Council shall engage in a dialogue according to agreed rules and procedures to resolve the matter. In the event no agreement is reached between General Counsel and the Council as to whether the issue is within or outside Scope of the ccNSO then by a vote of 15 or more members the Council may decide the issue is within scope. The Chair of the ccNSO shall inform General Counsel and the Issue Manager accordingly. The Issue Manager shall then proceed with a recommendation whether or not the Council should move to initiate the PDP including both the opinion and analysis of General Counsel and

Council in the Issues Report

- f. If not even after the Manager Recommendation is in favor of initiating the PDP, a proposed timeline for conducting each of the stages of PDP outlined herein (PDP Time Line)
- g. If possible, the issue report shall indicate whether the resulting output is likely to result in a policy to be approved by the CANN Board. In some circumstances, it will not be possible to do this until subsequent discussions on the issue have taken place. In these cases, the issue report should indicate this uncertainty. Upon completion of the Issues Report, the Issue Manager shall distribute it to the full Council for a vote on whether to initiate the PDP.

3. Initiation of PDP

The Council shall decide whether to initiate the PDP as follows:

- a. Within 21 days after receipt of an Issue Report from the Issue Manager, the Council shall vote on whether to initiate the PDP. Such vote should be taken at a meeting held in any manner deemed appropriate by the Council, including in person or by conference call, but if a meeting is not feasible, the vote may occur by e-mail.
- b. A vote of ten or more Council members in favor of initiating the PDP shall be required to initiate the PDP, provided that the Issue Report satisfies that the issue is properly within the scope of the CANN mission statement and the ccNSO Scope.

4. Decision Whether to Appoint Task Force; Establishment of Time Line

At the meeting of the Council where the PDP has been initiated (or where the Council employs a vote by e-mail in accordance with paragraph 3 above), the Council shall decide, by a majority vote of members present at the meeting (or voting by e-mail), whether or not to appoint a task force to address the issue. If the Council votes

- a. in favor of convening a task force, it shall do so in accordance with item 7 below.
- b. Against convening a task force, then it shall collect information on the policy issue in accordance with item 8 below.

The Council shall also, by a majority vote of members present at the meeting or voting by e-mail, approve or amend and approve the PDP Time Line set out in the Issue Report.

5. Composition and Selection of Task Forces

- a. Upon voting to appoint a task force, the Council shall invite each of the Regional Organizations (see [Article X, Section 6](#)) to appoint two individuals to participate in the task force (the "Representatives"). Additionally, the Council may appoint up to three advisors (the "Advisors") from outside the ccNSO and following formal request for GAC participation in the Task Force, accept up to two Representatives from the Governmental Advisory Committee or sit on the task force. The Council may increase the number of Representatives that may sit on a task force in its discretion in circumstances that it deems necessary or appropriate.
- b. Any Regional Organization wishing to appoint Representatives to the task force must provide the names of the Representatives to the Issue Manager within ten (10) calendar days after such request, so that they are included on the task force. Such Representatives need not be members of the Council, but each must be an individual who has an interest and ideally knowledge and expertise in the subject matter coupled with the ability to devote a substantial amount of time to the task force's activities.
- c. The Council may also pursue other actions that it deems appropriate to assist in the PDP, including appointing a particular individual or organization to gather information on the issue or scheduling meetings for deliberation or briefing. All such information shall be submitted to the Issue Manager in accordance with the PDP Time Line.

6. Public Notification of Initiation of the PDP and Comment Period

After initiation of the PDP, CANN shall post a notification of such action on the Website and on the other CANN Supporting Organizations and Advisory Committees. A comment period (in accordance with the PDP Time Line and ordinarily at least 21 days long) shall be commenced for the issue. Comments shall be accepted from ccTLD managers, other Supporting Organizations, Advisory Committees, and from the public. The Issue Manager or some other designated Council representative shall review the comments and incorporate them into a report (the "Comment Report") to be included in either the Preliminary Task Force Report or the final Report, as applicable.

7. Task Forces

- a. *Role of Task Force*. A task force is created; its role shall be responsible for (i) gathering information, documenting the positions of the ccNSO members within the Geographic Regions and other parties and groups, and (ii) otherwise obtaining relevant information that shall enable the Task Force Report to be as complete and informative as possible to facilitate the Council's meaningful and informed deliberation.

The task force shall not have any formal decision-making authority. Rather, the role of the task force shall be to gather information that shall document the positions of various parties or groups as specifically and comprehensively as possible, thereby enabling the Council to have a meaningful and informed deliberation on the issue.
- b. *Task Force Charter or Terms of Reference*. The Council, with the assistance of the Issue Manager, shall develop a charter or terms of reference for the task force (the "Charter") within the time designated in the PDP Time Line. Such Charter shall include:
 1. The issue to be addressed by the task force, as such issue was articulated for the vote before the Council has initiated the PDP.
 2. The specific timeline that the task force must adhere to, as set forth below, unless the Council determines that there is a compelling reason to extend the timeline, and
 3. Any specific instructions from the Council for the task force, including whether or not the task force should solicit the advice of outside advisors on the issue.

The task force shall prepare its report and otherwise conduct its activities in accordance with the Charter. Any request to deviate from the Charter must be formally presented to the Council and may only be undertaken by the task force upon a vote of a majority of the Council members present at a meeting or voting by e-mail. The quorum requirements of [Article X Section 3\(14\)](#) shall apply to Council actions under this item 7(b).

c. **Appointment of Task Force Chair** The Issue Manager shall convene the first meeting of the task force within the time designated in the PDP Time Line. At the initial meeting the task force members shall among other things vote to appoint a task force chair. The chair shall be responsible for organizing the activities of the task force including compiling the Task Force Report. The chair of a task force need not be a member of the Council.

d. **Collection of Information**

1. **Regional Organization Statements** The Representatives shall each be responsible for soliciting the position of the Regional Organization for their Geographic Region at a minimum and may solicit other comments as each Representative deems appropriate including the comments of ccNSO members in that region that are not members of the Regional Organization regarding the issue under consideration. The position of the Regional Organization and any other comments gathered by the Representatives should be submitted in a formal statement to the task force chair (each a "Regional Statement") within the time designated in the PDP Time Line. Every Regional Statement shall include at least the following:

- i. If a Supermajority Vote (as defined by the Regional Organization) was reached a clear statement of the Regional Organization's position on the issue.
- ii. If a Supermajority Vote was not reached a clear statement of all positions espoused by the members of the Regional Organization.
- iii. A clear statement of how the Regional Organization arrived at its position(s). Specifically the statement should detail specific meetings, teleconferences, or other means of deliberating an issue, and a list of all members who participated or otherwise submitted their views.
- iv. A statement of the position on the issue of any ccNSO members that are not members of the Regional Organization.
- v. An analysis of how the issue would affect the Region, including any financial impact on the Region, and
- vi. An analysis of the period of time that would likely be necessary to implement the policy.

2. **Outside Advisors** The task force may in its discretion solicit the opinions of outside advisors, experts, or other members of the public. Such opinions should be set forth in a report prepared by such outside advisors and (i) clearly labeled as coming from outside advisors, (ii) accompanied by a detailed statement of the advisors' (a) qualifications and relevant experience and (b) potential conflicts of interest. These reports should be submitted in a formal statement to the task force chair within the time designated in the PDP Time Line.

e. **Task Force Report** The chair of the task force, working with the Issue Manager, shall compile the Regional Statements, the Comment Report, and other information or reports as applicable, into a single document ("Preliminary Task Force Report") and distribute the Preliminary Task Force Report to the full task force within the time designated in the PDP Time Line. The task force shall have a final task force meeting to consider the issues and try and reach a Supermajority Vote. After the final task force meeting the chair of the task force and the Issue Manager shall create the final task force report (the "Task Force Report") and post it on the Website and on the other CANN Supporting Organizations and Advisory Committees. Each Task Force Report must include:

1. A clear statement of any Supermajority Vote (being 66% of the task force) position of the task force on the issue.
2. If a Supermajority Vote was not reached a clear statement of all positions espoused by task force members submitted within the time line for submission of consultancy reports. Each statement should clearly indicate (i) the reasons underlying the position and (ii) the Regional Organizations that held the position.
3. An analysis of how the issue would affect each Region, including any financial impact on the Region.
4. An analysis of the period of time that would likely be necessary to implement the policy, and
5. The advice of any outside advisors appointed to the task force by the Council, accompanied by a detailed statement of the advisors' (i) qualifications and relevant experience and (ii) potential conflicts of interest.

8. Procedure if No Task Force is Formed

- a. If the Council decides not to convene a task force, each Regional Organization shall within the time designated in the PDP Time Line appoint a representative to solicit the Region's views on the issue. Each such representative shall be asked to submit a Regional Statement to the Issue Manager within the time designated in the PDP Time Line.
- b. The Council may in its discretion take other steps to assist in the PDP, including for example, appointing a particular individual or organization to gather information on the issue or scheduling meetings for deliberation or briefing. All such information shall be submitted to the Issue Manager within the time designated in the PDP Time Line.
- c. The Council shall formally request the Chair of the GAC to offer opinion or advice.
- d. The Issue Manager shall take all Regional Statements, the Comment Report, and other information and compile (and post on the Website) an initial Report within the time designated in the PDP Time Line. Thereafter, the Issue Manager shall in accordance with item 9 below create a Final Report.

9. Comments to the Task Force Report or Initial Report

- a. A comment period (in accordance with the PDP Time Line and ordinarily at least 21 days long) shall be opened for comments on the Task Force Report or initial Report. Comments shall be accepted from ccTLD managers, other Supporting Organizations, Advisory Committees, and from the public. All

comments shall include the author's name, relevant experience, and inferences in the issue.

- b. At the end of the comment period, the Issue Manager shall review the comments received and may, in the Issue Manager's reasonable discretion, add appropriate comments to the Task Force Report or final Report to prepare the "Final Report." The Issue Manager shall not be obligated to include all comments made during the comment period, nor shall the Issue Manager be obligated to include all comments submitted by any one individual or organization.
- c. The Issue Manager shall prepare the Final Report and submit it to the Council chair within the time designated in the PDP Time Line.

10. Council Deliberation

- a. Upon receipt of a Final Report, whether as the result of a task force or otherwise, the Council chair shall (i) distribute the Final Report to all Council members, (ii) call for a Council meeting within the time designated in the PDP Time Line wherein the Council shall work towards achieving a recommendation to present to the Board, and (iii) formally send to the GAC Chair an invitation to the GAC to offer opinion or advice. Such meeting may be held in any manner deemed appropriate by the Council, including in person or by conference call. The Issue Manager shall be present at the meeting.
- b. The Council may commence its deliberation on the issue prior to the formal meeting, including via in-person meetings, conference calls, e-mail discussions, or any other means. The Council may choose
- c. The Council may, if it so chooses, solicit the opinions of outside advisors at its final meeting. The opinions of these advisors, if relied upon by the Council, shall be (i) embodied in the Council's report to the Board, (ii) specifically identified as coming from an outside advisor, and (iii) accompanied by a detailed statement of the advisor's (a) qualifications and relevant experience and (b) potential conflicts of interest.

11. Recommendation of the Council

In considering whether to make a recommendation on the issue (a "Council Recommendation"), the Council shall seek to act by consensus. If a minority opposes a consensus position, a minority shall prepare and circulate to the Council a statement explaining its reasons for opposition. If the Council's discussion of the statement does not result in consensus, then a recommendation supported by 14 or more of the Council members shall be deemed to reflect the view of the Council and shall be conveyed to the Members as the Council's Recommendation. No whimsical or foregone conclusions as outlined below, all viewpoints expressed by Council members during the PDP must be included in the Members Report.

12. Council Report to the Members

Notwithstanding a Council Recommendation is adopted pursuant to item 11, then the Issue Manager shall, within seven days after the Council meeting, incorporate the Council's Recommendation together with any other viewpoints of the Council members into a Members Report to be approved by the Council and then to be submitted to the Members (the "Members Report"). The Members Report must contain at least the following:

- a. A clear statement of the Council's recommendation.
- b. The Final Report submitted to the Council, and
- c. A copy of the minutes of the Council's deliberation on the policy issue (see item 10) including all the opinions expressed during such deliberation, accompanied by a description of who expressed such opinions.

13. Members Vote

Following the submission of the Members Report and within the time designated by the PDP Time Line, the ccNSO members shall be given an opportunity to vote on the Council Recommendation. The vote of members shall be electronic and members' votes shall be lodged over such a period of time as designated in the PDP Time Line (at least 21 days long).

Notwithstanding at least 50% of the ccNSO members lodge votes within the voting period, the resulting vote will be employed without further process. If fewer than 50% of the ccNSO members lodge votes in the first round of voting, the first round will not be employed and the results of a final second round of voting conducted after at least thirty days notice to the ccNSO members will be employed if at least 50% of the ccNSO members lodge votes. If more than 66% of the votes received at the end of the voting period shall be in favor of the Council Recommendation, then the recommendation shall be conveyed to the Board in accordance with item 14 below as the ccNSO Recommendation.

14. Board Report

The Issue Manager shall, within seven days after a ccNSO Recommendation being made in accordance with item 13, incorporate the ccNSO Recommendation into a report to be approved by the Council and then to be submitted to the Board (the "Board Report"). The Board Report must contain at least the following:

- a. A clear statement of the ccNSO recommendation.
- b. The Final Report submitted to the Council, and
- c. the Members' Report.

15. Board Vote

- a. The Board shall meet to discuss the ccNSO Recommendation as soon as feasible after receipt of the Board Report from the Issue Manager, taking into account procedures for Board consideration.
- b. The Board shall adopt the ccNSO Recommendation unless by a vote of more than 66% the Board determines that such policy is not in the best interests of the CANN community or of CANN.
 1. Notwithstanding that the Board determines not to act in accordance with the ccNSO Recommendation, the Board shall (i) state its reasons for its determination not to act in accordance with the ccNSO Recommendation in a report to the Council (the "Board Statement") and (ii) submit the Board Statement to the Council.
 2. The Council shall discuss the Board Statement with the Board within thirty days after the Board Statement is submitted to the Council. The Board shall determine the method (e.g., by

eleconference, e-mail, or otherwise) by which the Council and Board shall discuss the Board's action. The discussions shall be held in good faith and in a timely and efficient manner, and a mutually acceptable solution.

3. At the conclusion of the Council and Board discussions, the Council shall meet to affirm or modify its Council Recommendation. A recommendation supported by 14 or more of the Council members shall be deemed to reflect the view of the Council (the Council's "Supplemental Recommendation"). The Supplemental Recommendation shall be conveyed to the Members in a Supplemental Members Report, including an explanation for the Supplemental Recommendation under the same conditions outlined in item 13. If, even though more than 66% of the votes cast by ccNSO Members during the voting period are in favor of the Supplemental Recommendation, then the recommendation shall be conveyed to the Board as the ccNSO Supplemental Recommendation and the Board shall adopt the recommendation unless by a vote of more than 66% of the Board determines that acceptance of such policy would constitute a breach of the fiduciary duties of the Board of the Company.
4. If, even though the Board does not accept the ccNSO Supplemental Recommendation, it shall state its reasons for doing so in its final decision ("Supplemental Board Statement").
5. If, even though the Board determines not to accept a ccNSO Supplemental Recommendation, then the Board shall not be entitled to set policy on the issue addressed by the recommendation and the status quo shall be preserved until such time as the ccNSO shall, under the ccPDP, make a recommendation on the issue that is deemed acceptable by the Board.

16. Implementation of the Policy

Upon adoption by the Board of a ccNSO Recommendation or ccNSO Supplemental Recommendation, the Board shall, as appropriate, direct or authorize CANN to implement the policy.

17. Maintenance of Records

With respect to each ccPDP for which an Issue Report is requested (see item 1), CANN shall maintain on the Website a status web page detailing the progress of each ccPDP, which shall provide a list of relevant dates for the ccPDP and shall also link to the following documents, to the extent they have been prepared pursuant to the ccPDP:

- a. Issue Report
- b. PDP Time Line
- c. Comment Report
- d. Regional Statement(s)
- e. Preliminary Task Force Report
- f. Task Force Report
- g. Initial Report
- h. Final Report
- i. Members' Report
- j. Board Report
- k. Board Statement
- l. Supplemental Members' Report, and
- m. Supplemental Board Statement

In addition, CANN shall post on the Website comments received in electronic written form specifically suggesting that a ccPDP be initiated.

Annex C: The Scope of the ccNSO

This annex describes the scope and the principles and method of analysis to be used in any further development of the scope of the ccNSO's policy-development role. As provided in [Article X, Section 6\(2\)](#) of the Bylaws, the scope shall be defined according to the procedures of the ccPDP.

The scope of the ccNSO's authority and responsibilities must recognize the complex relationship between CANN and ccTLD managers/registries with regard to policy issues. This annex shall assist the ccNSO, the ccNSO Council, and the CANN Board and staff in delineating relevant global policy issues.

Policy areas

The ccNSO's policy role should be based on an analysis of the following functional model of the DNS:

1. Data is registered/mainained to generate a zone file.
2. A zone file is in turn used in TLD name servers.

Within a TLD, two functions have to be performed (these are addressed in greater detail below):

1. Entering data into a database (Data Entry Function) and
2. Maintaining and ensuring upkeep of name-servers for the TLD (Name Server Function).

These two core functions must be performed at the ccTLD registry level as well as at a higher level (ANA function and root servers) and at lower levels of the DNS hierarchy. This mechanism, as RFC 1591 points out, is recursive.

There are no requirements on sub domains of top-level domains beyond the requirements on higher-level domains themselves. That is, the requirements in this memo are applied recursively. In particular, all sub domains shall be allowed to operate their own domain name servers, providing in them whatever information the sub domain manager sees it (as long as it is true and correct).

The Core Functions

1 Data Entry Function (DEF)

Looking at a more detailed level, the first function (entering and maintaining data in a database) should be fully defined by a naming policy. This naming policy must specify the rules and conditions

- a under which data will be collected and entered into a database or data changed (at the TLD level among others: data to reflect a transfer from registrar to registrar or changing registrar) in the database
- b for making certain data generally and publicly available (be it for example through Whois or nameservers)

2 The Name-Server Function (NSF)

The name-server function involves essential in operability and stability issues at the heart of the domain name system. The importance of this function extends to nameservers at the ccTLD level but also to the root servers (and root-server system) and nameservers at lower levels.

On its own merit and because of in operability and stability considerations, properly functioning nameservers are of utmost importance to the individual as well as to the local and the global name communities.

With regard to the nameserver function, therefore, policies need to be defined and established. Most parties involved, including the majority of ccTLD registries, have accepted the need for common policies in this area by adhering to the relevant RFCs, among others RFC 1591.

Respective Roles with Regard to Policy, Responsibilities, and Accountabilities

In the instances of CANN and ccTLD managers, to ensure the stable and proper functioning of the domain name system, CANN and the ccTLD registries each have a distinctive role to play in this regard. It can be defined by the relevant policies. The scope of the ccNSO cannot be established without reaching a common understanding of the allocation of authority between CANN and ccTLD registries.

Three roles can be distinguished as to which responsibility must be assigned on any given issue:

- Policy role: i.e. the ability and power to define a policy
- Executive role: i.e. the ability and power to act upon and implement the policy and
- Accountability role: i.e. the ability and power to hold the responsible entity accountable for exercising its power

Firstly, responsibility presupposes a policy and this delineates the policy role. Depending on the issue, it needs to be addressed: those who are involved in defining and setting the policy need to be determined and defined. Secondly, this presupposes an executive role: defining the power to implement and act within the boundaries of a policy. Finally, as a counter-balance to the executive role, the accountability role needs to be defined and determined.

The information below offers an aid to:

- 1 delineate and identify specific policy areas
- 2 define and determine roles with regard to these specific policy areas

This annex defines the scope of the ccNSO with regard to developing policies. The scope is limited to the policy role of the ccNSO policy-development process for functions and levels explicitly stated below. It is anticipated that the accuracy of the assignments of policy, executive, and accountability roles shown below will be considered during a scope-definition ccPDP process.

Name Server Function (as to ccTLDs)

Level 1 Root Name Servers

Policy role: ETF, RSSAC (CANN)
Executive role: Root Server System Operators
Accountability role: RSSAC (CANN) (US DoC-CANN MoU)

Level 2 ccTLD Registry Name Servers in respect to in operability

Policy role: ccNSO Policy Development Process (CANN) for best practices a ccNSO process can be organized
Executive role: ccTLD Manager
Accountability role: par CANN (ANA) par Local Name Community including local government

Level 3 User's Name Servers

Policy role: ccTLD Manager, ETF (RFC)
Executive role: Registrar
Accountability role: ccTLD Manager

Data Entry Function (as to ccTLDs)

Level 1 Root Level Registry

Policy role: ccNSO Policy Development Process (CANN)
Executive role: CANN (ANA)
Accountability role: CANN community and ccTLD Managers, US DoC (national authorities in some cases)

Level 2 ccTLD Registry

Policy role: Local Name Community including local government and/or ccTLD Manager according to local structure

Executive role [ccTLD Manager](#)

Accountability role Local Name Community including national authorities in some cases

Level 3 Second and Lower Levels

Policy role [Registrar](#)

Executive role [Registrar](#)

Accountability role [Registrar](#) users of lower-level domain names

¹A [GNSO Supermajority Vote](#) will be required to initiate a GGP following a formal request from the [CANN Board](#)

The Internet Corporation for Assigned Names and Numbers

James Bladel
Chair, GNSO Council

12 April 2016

Re: GNSO Council Response to ICANN Board Letter concerning New gTLD Program Committee Resolutions Concerning Exclusive Registry Access for gTLD Strings Representing Generic Terms

Dear James:

I am writing in response to the GNSO Council letter of 24 November 2015. In that letter, the Council appears to request three items of information regarding the following: 1) information that demonstrates how the Board has interpreted and considered the public interest in relation to its responsibilities under the ICANN Bylaws; 2) information on the research done by ICANN into "the development and implementation of a global public interest framework bounded by ICANN's mission;" and 3) timing and next steps in developing a global public interest framework bounded by ICANN's mission.

The Board supports the Council member statements regarding the importance of a global public interest framework bounded by ICANN's mission and, in light of discussions at ICANN55, I am glad to have the opportunity to further update you on this work.

I. Board interpretation and consideration of the public interest

While, historically at ICANN, there has been no explicit definition of the term "global public interest," the Board has understood the term within the context of [Paragraph 3 of the Articles of Incorporation](#):

"In furtherance of the foregoing purposes, and in recognition of the fact that the Internet is an international network of networks, owned by no single nation, individual or organization, the Corporation shall, except as limited by Article 5 hereof, pursue the charitable and public purposes of lessening the burdens of government and promoting the global public interest in the operational stability of the Internet by (i) coordinating the assignment of Internet technical

parameters as needed to maintain universal connectivity on the Internet; (ii) performing and overseeing functions related to the coordination of the Internet Protocol ("IP") address space; (iii) performing and overseeing functions related to the coordination of the Internet domain name system ("DNS"), including the development of policies for determining the circumstances under which new top level domains are added to the DNS root system; (iv) overseeing operation of the authoritative Internet DNS root server system; and (v) engaging in any other related lawful activity in furtherance of items (i) through (iv)."

II. ICANN research on global public interest framework

As you noted in your letter, Nora Abusitta, Senior Vice President of ICANN's Development and Public Responsibility Programs, has been facilitating this process as set out in ICANN's strategic plan. Recognizing the intense focus on other ongoing dialogues, she and her team have been preparing resources that will be useful for all involved when the time comes to embark upon a deeper exploration of definitions of the public interest within ICANN's remit.

To date, the following materials have been collated:

- The report and related resources from the Strategy Panel on the Public Responsibility Framework which first proposed a definition of public interest with community input in 2014;
- Desk research on ICANN Department current understandings of the term and its application. This was carried out with a view to understand ICANN's internal processes and documentation that relates to this term, given that we will all need to be cognizant of the fiscal, legal, and operational parameters and limitations to any potential definition(s);
- An inventory of ICANN documents that reference either the term 'global public interest' or 'public interest';
- Useful resources: including links to recent sessions where this topic has recently been discussed and relevant online articles.

In response to requests during discussions, these resources were placed on a [community wikispace](#) launched in late December 2015 for ease of access. To facilitate discussion and organization on this topic, [a mailing list was created](#). As per requests, the topic was submitted

as High Interest Session at ICANN55, and took place on Monday 7th March 2016, details and materials of which can be found [here](#).

III. Next steps

Future conversation and work on exploring the public interest within ICANN's remit will require global, multistakeholder, bottom up discussion and I am glad to see the GNSO Council, along with other groups, is already taking a keen interest in these next steps.

Regards,

A handwritten signature in dark ink, which appears to read "Steve Crocker". The signature is fluid and cursive, written in a professional style.

Steve Crocker
Chairman, ICANN Board

ICANN CALL FOR EXPRESSIONS OF INTEREST (EOIs) for a New gTLD Comparative Evaluation Panel

25 February 2009

1 Introduction

Generic top-level domains (gTLDs) are an important part of the structure of the DNS. Examples of existing gTLDs include .BIZ, .COM, .INFO and .JOBS. A complete listing of all gTLDs is available at <http://www.iana.org/gtld/gtld.htm>. The responsibility for operating each gTLD (including maintaining the authoritative registry of all domain names registered within that gTLD) is delegated to a particular organization. These organizations are referred to as "registry operators" or "sponsors," depending upon the type of agreement they have with ICANN.

Following years of community-driven policy development that recommended the introduction of new gTLDs, ICANN is preparing a process to receive applications to operate new generic top-level domain (gTLD) registries. This new program is described in detail at <http://www.icann.org/en/topics/new-gtld-program.htm>. ICANN has published a draft Applicant Guidebook at <http://www.icann.org/en/topics/new-gtlds/comments-2-en.htm> that provides detailed information about the process for applying to operate a new gTLD. The Applicant Guidebook will constitute the request for proposals (RFP) for new gTLDs.

The development of the Applicant Guidebook is an iterative process, which includes seeking public comment on draft versions. The comment resulting from the publication of the first draft Applicant Guidebook led to the identification of several overarching issues that will require additional examination and discussion to resolve. Although ICANN has prepared a revised Applicant Guidebook, the information in the Guidebook is not yet fixed and the new gTLD process is not yet launched. While that work goes forward, steps will also be taken to assure there will be a robust, effective and timely evaluation process in place to review applications once the round is launched. Retaining competent evaluation panels with sufficient expertise, resources and geographic diversity is expected to take many months. Some preliminary steps, such as the publication of this call for expressions of interest, are being taken now, even as important decisions regarding the overall implementation process are still being considered.

ICANN is now seeking expertise to enable the formation of panels to evaluate applications against the criteria published in the Applicant Guidebook. Expressions of Interest (EOIs) in providing management and evaluation services are sought in the following five areas of assessment:

1. Has the applicant demonstrated their technical capability to run a registry for the purpose specified in the application, as measured against the criteria in the Applicant Guidebook?
2. Has the applicant demonstrated their financial and organizational capability, as measured against the criteria in the Applicant Guidebook?
3. In the context of the criteria specified in the Applicant Guidebook, does the gTLD represent a geographical name, and if so, have authenticated support from the relevant government?

4. Will the introduction of the proposed gTLD string likely result in user confusion with (i.e., due to similarity with) (i) a reserved name; (ii) an existing TLD; or (iii) other proposed gTLDs?
5. In the context of resolving contention among two or more applicants for the same or similar gTLD string, does an applicant claim to represent a community and if so, satisfy the criteria for prevailing in a comparative evaluation?

ICANN also seeks information from potential providers regarding estimation of reasonable timeframes for each type of evaluation (e.g., per string or per application) and anticipated costs associated with conducting the evaluation. The cost and time to process an application are critical factors that must be carefully considered in the information provided by the interested parties.

This EOI refers to question 5 above and describes the criteria and requirements for providers that seeking to perform the comparative evaluation of applications for identical (or very similar) strings. The comparative evaluation seeks to award a priority to applications representing communities. Providers should respond by 13 April 2009 23:59 UTC with the required information that is described below. From the information provided, ICANN will invite respondents to exchange additional information.

Contracts will not be awarded from this EOI, but ICANN expects to use the responses to identify entities capable of providing the various evaluation roles and better refine the costs and time frames for conducting evaluation as part of the new gTLD process.

2 Background

The [Internet Corporation for Assigned Names and Numbers](#) (ICANN) is a not-for-profit, multi-stakeholder, international organization that has responsibility for Internet Protocol (IP) address space allocation, protocol identifier assignment, generic (gTLD) and country code (ccTLD) top-level domain name system management, and root server system management functions. ICANN's mission is to coordinate, at the overall level, the global Internet's systems of unique identifiers, and in particular to ensure the stable and secure operation of these systems. It coordinates policy development reasonably and appropriately related to these technical functions, consistent with ICANN's core values. Among these values are:

- Preserving and enhancing the operational stability, reliability, security, and global interoperability of the Internet;
- Where feasible and appropriate, depending on market mechanisms to promote and sustain a competitive environment;
- Introducing and promoting competition in the registration of domain names where practicable and beneficial in the public interest; and
- Seeking and supporting broad, informed participation reflecting the functional, geographic, and cultural diversity of the Internet at all levels of policy development and decision-making.

New gTLDs have previously been established based on proposals that were submitted to ICANN during two specific application periods. Materials from the 2000 application round, which led to the delegation of .AERO, .BIZ, .COOP, .INFO, .MUSEUM, .NAME and .PRO, are available at <http://www.icann.org/tlds/app-index.htm>. Materials from the 2003 round, which led to the delegation of .ASIA, .CAT, .JOBS, .MOBI, .TEL and .TRAVEL, are available at <http://www.icann.org/tlds/std-apps-19mar04>. Applications received during both of these rounds were evaluated on the basis of instructions and criteria contained in the respective RFPs published by ICANN. Applicants that were successful went on to negotiate and enter gTLD agreements with ICANN.

ICANN is now seeking a provider to supply and enable comparative evaluation of applications in cases of contention involving two or more applications for the same or similar strings, when one of the applicants indicates that it represents a community. (Note: A separate EOI is being issued for experts to assist with the Applicant Evaluation, i.e., assessment of technical and financial criteria; geographic names; and string similarity. It is recommended that potential providers review all drafts of the Applicant Guidebook and other resources on the new gTLD program available at <http://www.icann.org/en/topics/new-gtld-program.htm>).

The number of applications that will be received is unknown; however it is estimated to be several hundred or more. It is therefore vital that the provider be able to convene – or have the capacity to convene - as many panels of evaluators as is necessary to evaluate all the applications, in a timely and complete manner. For example, the provider may wish to consider the process it will use to evaluate applications, and how that process will scale if 100, 250, 500, 700, 900 or more applications are received. There should be a statement describing how 2000 applications would be processed (even though this is thought to be highly unlikely). The provider should also consider how the number of applications may impact evaluation timeframes and costs of evaluations.

It is expected that there will be more than one application round. Therefore, there may be an opportunity for cyclical work in evaluating applications. In the longer term, the work may become continuous with new gTLD applications being submitted and evaluated at any time.

In addition, given the international nature of the ICANN community and the likelihood that applications will be received for both ASCII and non-ASCII new gTLDs, it will be important that the provider can convene – or have the capacity to convene - globally diverse panels familiar with internationalized domain names (IDNs). A non-ASCII domain name, also called an IDN, is one that utilizes characters from the full Unicode set rather than just the “letter-digit-hyphen” characters specified in the original DNS standards. Using IDNs, for example, make it possible to add TLDs in Arabic, Hebrew, Cyrillic and other scripts. For more information on IDNs, please visit <http://www.icann.org/en/topics/idn/>.

3 Comparative evaluation

If multiple Applicants request the same string, or strings that are determined to be unacceptably similar¹ to one another, a “string contention” process is invoked to determine which Applicant(s) should be permitted to proceed. The new gTLD policy states a claim to support a community by

¹ String similarity is determined through a separate process that takes place prior to comparative evaluation.

one party will be a reason to award priority to that application. “Comparative evaluation” refers to the process whereby the claims of one or more Applicants to represent defined communities² are compared with respect to a set of evaluation criteria to determine if such a priority should be given. The process and the evaluation criteria are specified in [Module 4](#) of the Applicant Guidebook and in the new gTLD program [explanatory memorandum](#) “Resolving String Contention.” See appendix A, “Applicant Guidebook section describing Comparative Evaluation Process.”

Comparative evaluation is used only when a contention set³ identified during the string contention process contains one or more self-declared community Applicant(s) and at least one of those community Applicants declared a preference for comparative evaluation. When these conditions are met, comparative evaluation applies to all of the community Applicants in a contention set, including those that did not declare a preference for comparative evaluation during the Application Phase.

Community Applicants will be asked to respond to a set of questions during the Application Phase to provide information should a comparative evaluation be necessary. Before a comparative evaluation begins, an Applicant may be asked by the evaluation service provider sought here to furnish additional information to substantiate its claim to represent the designated community.

String contention is resolved only after Applications have been subjected to and passed other evaluations, however, comparative evaluation is an independent analysis which does not consider any other results.⁴

When comparative evaluation is invoked during the string contention resolution process, a comparative evaluation panel will review and score the community Applicants according to four criteria:

- Nexus between proposed string and community
- Dedicated registration policies
- Community establishment
- Community endorsement

These criteria are defined in Module 4 of the Applicant Guidebook, which also defines the way in which the string contention process incorporates the various possible outcomes of comparative evaluation. The scoring process requires that the evaluators exercise considerable subjective judgment concerning the extent to which each community Applicant meets or fails to meet the standards defined for each of the four criteria. (A section of the Guidebook describing the criteria and scoring is attached in Appendix A.)

4 Criteria

ICANN anticipates expressions of interest (i.e., answers to questions posed in section 5 below) from providers to conduct the comparative evaluation of applications in contention must meet the following criteria:

² Comparative evaluation applies only to Applicants claiming to represent different defined communities. Applicants competing to represent the same defined community must resolve their differences outside of the new gTLD program.

³ The term “contention set” is defined in Module 4 of the Applicant Guidebook.

⁴ An Application that fails at any point during IE or EE will, of course, never be involved in string contention.

1. The provider will be an internationally recognized firm or organization with significant demonstrated expertise in the evaluation and assessment of proposals in which the relationship of the proposal to a defined public or private community plays an important role.
2. The provider must be able to convene (either in advance or rapidly on-demand) a linguistically and culturally diverse panel capable (even though the applications will be submitted in English), in the aggregate, of evaluating Applications from a wide variety of different communities, which may:
 - be local or global in scope;
 - be based on geography, political affiliation, common interests, or other factors;
 - involve either commercial or non-commercial interests (or both); and
 - be either objectively defined or self-defining.⁵
3. The provider must propose a structure and plan for the comparative evaluation panel that is viable for a range in number of Applications, as the number of Applications, and the percentage of those that will invoke the comparative evaluation process, will not be known in advance. It is anticipated that the percentage of applications requiring comparative evaluation will be relatively small compared to the total number. Applications requiring comparative evaluation must: be a self-declared community-based TLD; be in contention with other applicants; and elect comparative evaluation.
4. Considering the comparative evaluation criteria defined in Module 4 of the Applicant Guidebook and described in Section 3 of this document, the provider must propose a panel that is capable of:
 - exercising consistent and somewhat subjective judgment in making its evaluations, (the Guidebook criteria seeks to make the judgment as objective as possible)
 - reaching conclusions that are compelling and defensible, and
 - documenting the way in which it has done so in each case.
5. The provider must convene and operate the comparative evaluation panel so as to prevent communication between the panel (or any of its members) and any party with an interest in the Applications being evaluated, except as may be explicitly permitted by the process as defined in the Applicant Guidebook, and to avoid conflicts of interest.
6. The provider should be comfortable that the Applicant Guidebook is comprehensive and satisfactorily expresses all selection criteria, but understand that it is not finalized. It is possible, that the provider will be selected before the Applicant Guidebook is finalized, it will have the opportunity to review the text to ensure that the basis for the evaluation is clear. The criteria must be objective, measurable, publicly available at the outset of the evaluation process, and described fully in the Applicant Guidebook. All applications will be evaluated against these criteria.
7. The evaluation process for selection of new gTLDs will respect the principles of fairness, transparency, avoiding potential conflicts of interest, and non-discrimination.

5 Response to EOI Requirements

Interested parties should respond to each of the eight subject areas below. Responses will be gauged on the basis of the criteria defined in this document and Applicant Guidebook. Candidates desiring to express their interest to ICANN in the comparative evaluation role in the new gTLD program should provide the following:

⁵ An example of an objectively defined community is “the registered voters in the city of Perth, Australia”; an example of a self-defining community is “people who are interested in dogs.”

1. A Statement of Suitability that includes a detailed description of the candidate's ability to perform the work described in the previous section which demonstrates knowledge, experience and expertise, including but not limited to projects, consulting work, research, publications and other relevant information.
2. Evidence of the candidate's knowledge of and familiarity with ICANN, its role, structure and processes, including the Internet's Domain Name System (DNS) and past gTLD application and evaluation rounds.
3. The *curriculum vitae* for each person proposed by the candidate to manage or lead work on this project, the candidate's selection process for persons being proposed to ICANN, and explanation of the role that each named person would play. Also indicate the experience and availability of proposed panelists. The submission should identify any potential conflicts that would prevent them from making an objective evaluation of any application and how the conflict can be addressed.
4. A warrant that the candidate, if selected, will operate under ICANN's non-disclosure agreement and standard consulting agreement, and that neither the candidate nor any individual who might be engaged to work on this project (whether or not declared pursuant to (4) above) has a known conflict of interest.
5. A statement of the candidate's plan for ensuring fairness, nondiscrimination and transparency.
6. Considering the nature of the expertise necessary for evaluating applications for financial and technical criteria at a global scale, a statement of the candidate's plan for ensuring that the evaluation teams will consist of qualified individuals and that the candidate will make every effort to ensure a consistently diverse and international panel.
7. Project and operational timelines.
 - a. A proposed work schedule for planning and starting panel operations including key milestone dates, consistent with but more detailed than those specified in this document.
 - b. Projected targets for the time frame necessary for it to complete a thorough and careful evaluation of all applications. Identification of volumes of applications that can be processed in those timeframes.
8. Costs. The candidate should provide a detailed statement of the proposed fee structure, including any variable provisions that may be based on the number of comparative evaluations conducted, the number of comparative evaluations that involve IDNs, or other factors.

6 Deadline

Interested providers must submit expressions of interest by email to compara-eval-eoi@icann.org by 13 April 2009, 23:59 UTC. A confirmation email will be sent for each submission received within one business day.

Also send queries regarding this request to compara-eval-eoi@icann.org. Questions will be accepted until 3 April 2009, 23:59 UTC. Queries and answers will be posted to a page on the ICANN website dedicated to this purpose.

If selected, the successful candidate is expected to be ready to assist ICANN with the finalization of the Applicant Guidebook, prepare for the evaluation phase, and be ready to begin work within four months after release of the final Applicant Guidebook.

Thanks you for your interest.

1 Summary

New gTLD application evaluation was a labor-intensive business process performed by multiple vendors and hundreds of individuals on a global basis. Initial Evaluation (IE) included seven distinct evaluation types: applicant background, financial capability, technical/operational capability, registry services, geographic names, DNS stability, and string similarity. For commercial and practical reasons, including application volume and handling conflicts of interest between an applicant and evaluator, multiple evaluator firms were contracted. Application evaluation was performed against detailed criteria as published in the *New gTLD Applicant Guidebook* (AGB).¹ Quality and consistency of evaluation across all applications and all evaluator firms was a key business requirement for ICANN. Given the importance of demonstrable quality, 50% of the applications were subject to quality sampling in some capacity and 100% of the applications were reviewed using analytical techniques. All application data was subject to a suite of manual and automated data consistency checks performed by ICANN staff and JAS.

At a high level, the new gTLD application evaluation training and quality program was designed to both *improve* and *measure*:

- **Consistency/Precision:** a measure of the degree of agreement between independent assessments of a particular sample. Precision is expressed in terms of the standard deviation of the consistency rating among primary and independent half-blind *de novo* assessments (calculation of the consistency rating is described in Section 5.2). Precision is important because multiple evaluator firms should produce similar results given similar applications. Situations where precision was not as expected triggered additional training, documentation, and may inform future process revisions.
- **Accuracy:** a measure of the degree of agreement of a sample with an accepted reference. In the case of application evaluation, the accepted reference is the result of “work-out” conferences between the primary evaluator firm, the quality firm, and ICANN when discrepancies occur. Accuracy is expressed in terms of percent of the samples reflecting the expected value. Situations where accuracy was not as expected triggered additional training, documentation, and may inform future process revisions.
- **Process Fidelity:** a measure of the alignment between the expected process per the vendor’s contract and the actual process performed for a given application. Process fidelity is expressed in terms of a percent of the samples where a post-evaluation Procedural Inspection indicated that proper procedures were followed.

As quality measurement and improvement are typically somewhat competing goals (performing quality improvement on a process while measurement is occurring leads to a degree of Heisenberg uncertainty), the overall quality program was designed primarily to monitor, incent, and improve quality during evaluation with a secondary objective of providing analysis and a quantitative baseline to assess the process in arrears and inform future rounds.

¹ *New gTLD Applicant Guidebook*, ICANN, 4 June 2012, <http://newgtlds.icann.org/en/applicants/agb>

The training and quality program is comprised of six functions:

Unified Training

A unified, cross-firm approach to training was developed and implemented prior to the commencement of production evaluation. Unified training was essential in bringing together the evaluation operations of all evaluator firms – particularly the large-scale operations of the three technical/operational and financial firms – and maintaining ongoing alignment in a challenging and dynamic environment.

For technical/operational and financial panels – the most complex evaluations – all three evaluator firms shared training materials and conducted joint training sessions. For other panels, standardized training templates were utilized.

Content Reviews

Content Reviews were discussions between two or more evaluator firms that had completed a full or partial review of the same application. Content Reviews were designed to improve consistency/precision and accuracy among the three technical/operational and financial evaluator firms. Content Reviews of selected applications were performed as a part of the comprehensive training program prior to commencement of production evaluation and additionally throughout Initial Evaluation to maintain communication and alignment between all three evaluator firms. One special case of content reviews was the applicant-facing Clarifying Question (CQ) pilot that provided immense value. Of the 1917 application IDs receiving Prioritization Draw results, 107 applications were involved in a complete or partial content review at some point.

Blind Content Inspections

Content Inspections were half-blind independent evaluation and scoring of a randomly selected set of applications. The Content Inspection included review of the primary evaluator firm's Clarifying Questions (CQs) prior to issuance, and independently generated final scoring by the quality evaluator firm. Blind Content Inspections were designed to measure and improve consistency/precision and accuracy among the three technical/operational and financial panel firms. The inspections were half-blind in that the primary panel firm did not know in advance which applications were selected for inspection and the quality firm was not aware of the primary firm's scores in advance. Content Inspections were conducted on a randomly selected 15% of the 1917 application IDs receiving Prioritization Draw results.

Blind Procedural Inspections

Procedural Inspections were half-blind reviews of the primary firm's records to gain confidence that the agreed-upon processes and procedures were performed as expected. Procedural Inspections were designed to measure the process fidelity of the panel firms. The inspections were blind in that the primary panel firm did not know in advance which applications were selected for inspection. Procedural Inspections were conducted on a randomly selected 35% of the 1917 application IDs receiving Prioritization Draw results.

Analytics

ICANN received in excess of 1900 applications, largely comprised of unstructured text and attachments. Many latent similarities existed between the applications due to common applicants, consultants, and service providers. Analytical tools were developed to highlight these latent similarities and improve confidence that applications with similar content received a similar final disposition. Moreover, in excess of 5000 Clarifying Questions (CQs) were generated as a part of evaluation; as CQ generation is labor-intensive and subject to a range of error modalities, analytical systems provided automated quality and content checks of CQs prior to issuance.

Data Consistency Checks

Application evaluation was a large-scale global operation with a number of dynamic components. Ensuring that ICANN's systems of record were both internally consistent and accurately reflective of the authoritative evaluation results as documented in numerous vendor reports was critical. Automated systems provided routine data validation and crosschecking spanning numerous systems and record types to reduce likelihood of consistency errors.

1.1 Program Coverage

While designing training and quality programs, the process of application evaluation was divided into *content* and *process* components. The process components covered each vendor's obligation to perform their contracted duties and interact with the broader system and ICANN as specified, and the general requirement to maintain data consistency across several systems given emergent and fast-moving processes. The content components covered each vendor's obligation to evaluate the application pursuant to the Applicant Guidebook and all relevant guidance. The training and quality program recognized and provided coverage to both of these at multiple points in time during application processing.

Content-oriented aspects of the training and quality program were focused on the technical/operational and financial panel types due to the nature of these evaluations and the complexity and scale of the combined evaluation operations of all three evaluator firms. For all panel types, the process-oriented aspects of the quality program were focused on ensuring that all evaluator panels followed procedures agreed upon with ICANN.

Panel Type	Prior to CQ Release	Final Scoring (IE)	
	Content	Content	Process
Financial	Training Content Review Blind Content Inspection Analytics	Ongoing Training & Communication Content Review Blind Content Inspection Analytics	Training Blind Procedural Inspection Data Consistency Checks
Technical/Operational	Training Content Review Blind Content Inspection Analytics	Ongoing Training & Communication Content Review Blind Content Inspection Analytics	Training Blind Procedural Inspection Data Consistency Checks
Registry Services	Training	Analytics	Training Blind Procedural Inspection Data Consistency Checks
DNS Stability	Training		Training Blind Procedural Inspection Data Consistency Checks
String Contention	Training		Training Blind Procedural Inspection Data Consistency Checks
Geographic	Training		Training Blind Procedural Inspection Data Consistency Checks

Table 1: Training and Quality Program Coverage

1.2 Program Scope

The training and quality programs were operational prior to the commencement of production evaluation and continued through the completion of Initial Evaluation. Extended Evaluation was not included in the scope of the quality program.

1.3 Roles and Responsibilities

JAS Global Advisors LLC (“JAS”) was responsible for designing the overall training and quality programs based on requirements developed with ICANN. JAS was responsible for administering the quality program during execution, coordinating content reviews, performing Content Inspections, performing Procedural Inspections, implementing analytical and consistency checking systems, and reporting results. JAS was the primary technical/operational and financial reviewer for fewer than 50 applications and only in situations where no other technical/operational and financial firms were available due to a conflict of interest with the applicant. Related to the training and quality programs, all evaluator firms had obligations to provide data, participate in training activities, produce documentation, and generally cooperate with training and quality activities.

2 Program Objectives

The training and quality program was designed to achieve multiple objectives. The most important objective was to provide confidence that applications with similar content received a similar final pass/fail disposition. It's important to note that with respect to scoring, the quality program viewed Initial Evaluation as a pass/fail exercise consistent with the description in the Applicant Guidebook. No meaning is or should be imparted to numerical differences in score between two passing (or two failing) applications.

To achieve this objective, training and quality programs focused on:

- Upfront “calibration” among evaluator firms via unified training, discussion, scoring exercises, and pilots;
- Encouraging and maintaining ongoing communication among evaluator firms throughout the process via training, scoring exercises, and comparison of evaluation results;
- Leveraging analytics to identify latent similarities and determine potential scoring inconsistencies; and
- Providing visibility and early notification to ICANN in the event inconsistencies were discovered.

Clearly, *communication* and *visibility* are the central themes. Given the scale and nature of evaluation, absent active mechanisms to maintain communication between firms and with ICANN, there was a risk that evaluator firms would become isolated and produce increasingly divergent results over time. A central objective was to maintain open communication among all participants during the entire evaluation process.

A second central objective was to provide ICANN visibility into evaluation quality throughout the evaluation time period. Absent active mechanisms to assess quality during evaluation, it would be hard to quickly determine if quality was acceptable or unacceptable, converging or diverging, or if process improvements or additional training was required, leading to a sort of unmanaged Markov process.

By creating active communication and visibility mechanisms, ICANN was able to successfully keep the evaluation process under control.

Additionally, the program had the following secondary objectives:

- Improve quality of issued CQs
- Reduce data and clerical errors
- Provide quantitative baseline for future rounds

3 Content Reviews

Content Reviews were discussions between two or more firms that had completed a full or partial review of the same application. Content Reviews were designed to improve consistency/precision and accuracy among the three technical/operational and financial evaluator firms.

Content Reviews were performed early in the process – during training and early in Initial Evaluation – in order to add maximum value to the calibration process; subsequent and less frequent Content Reviews were performed throughout Initial Evaluation to encourage continued communication and alignment, particularly around emergent issues. Content Reviews were performed on technical/operational and financial panel results.

One special case of content reviews was the applicant-facing Clarifying Question (CQ) pilot that provided immense value; multiple pilots that were not applicant-facing were also conducted.

3.1 Process and Sampling

Content Reviews leveraged approximately 107 applications that both a primary reviewer and a secondary reviewer had evaluated (in part or in full) in some capacity. An effort was made to select applications for Content Review that represented a wide range of applicants and service providers to maximize the value of the exercise. Applications utilized for Content Reviews were not eligible for selection for Content Inspection.

3.2 Roles and Responsibilities

JAS coordinated Content Review activities among the three technical/operational and financial evaluator firms. Prior to the availability of actual applicant data, JAS developed several mock applications as a part of the training materials.

3.3 Exceptions

Differences in scoring were discussed and remediated between the evaluator firms with input from ICANN requested on an as-needed basis.

3.4 Metrics and Reporting

The primary objective was to facilitate calibration and maintain communication; the Content Review program did not generate metrics.

4 Blind Content Inspections

A statistically relevant number of technical/operational and financial evaluations were subject to half-blind Content Inspection reviews performed on a *de novo* basis. A *de novo* review is a complete and independent review performed “from the beginning” by the quality firm simultaneously with – but independently from – the primary evaluator firm. The review is also half-blind; the primary evaluator firm did not know in advance which applications were selected for Content Inspection. The intent of the review was to measure CQ and scoring consistency and accuracy against scoring guidance and training, and to provide an opportunity to quickly detect quality and consistency issues.

4.1 Process and Sampling

Blind Content Inspections were selected via random ordering of the 1917 application IDs receiving Prioritization Draw results. JAS performed the random ordering via computer on 20 Dec 2012. Note that withdrawals reduced the size of the population, requiring limited selection of additional samples to compensate for the aforementioned issues. The first 15% (288) applications in the random ordering were selected for Content Inspection. As additional samples were needed due to withdrawals or other factors requiring de-sampling, applications starting at 289 in the random ordering were selected.

Final metrics for the quality control program were taken on 28 August 2013 at the conclusion of Initial Evaluation work and are as follows:

Total Active Applications (28 Aug 2013)	1768
Applications Sampled	274
Sampled Proportion	15.50%

Table 2: Content Inspection Sampling

4.2 Metrics

The blind Content Inspections produced the following quantitative metrics:

- **Consistency Rating (per question).** This is the simple numeric pairwise comparison between the primary and QC review final scores on a per question basis. A pairwise comparison of 0 indicates that the primary and QC review final scores are identical whereas a pairwise comparison of +1 or -1 indicates the final scores differ. Instances of non-objection were de-sampled (see below).

For the purpose of QC, no distinction is made between passing scores with score = 1 and score > 1. Any score greater than or equal to 1 will be considered a 1 for the purpose of QC – for both the primary firm score and the QC firm score. For example, a score of 2 is equal to a score of 1 and to a score of 3 – all were transformed to a score of 1 prior to calculation of the consistency rating. This transformation is necessary to align the QC program with the pass/fail design of Initial Evaluation as described in the Applicant Guidebook.

- **Consistency Rating (per application).** This is a proportional measure of consistency of final (pass/fail) dispositions for a given application. The quality evaluator firm maintained the option to deem an application “non-objection” meaning that for reasons related to maintaining the

integrity of the half-blind selection, not enough information was available to score the application but the quality evaluator firm did not find sufficient cause to disagree with the primary firm's pass/fail disposition.

4.3 Roles and Responsibilities

JAS was the quality evaluator firm. If an application was selected for Content Inspection where JAS was the Primary Review Firm (due to conflict with both primary evaluator firms), the application was de-sampled for quality control purposes and the next application in the random ordering that had not already been released was selected.

JAS' small number of primary evaluations were therefore ineligible for Content Inspection; however, as JAS was a party to each and every consistency rating metric, evaluation of JAS' performance as compared to the other firms was evident and obvious.

4.4 Exceptions

Differences in scoring appear in the consistency rating; exceptions were brought to ICANN's attention as soon as they were discovered for discussion with the evaluator firms as necessary.

4.5 Results

Content Inspections generated metrics on a horizontal basis (per question across applications) and on a per-application basis. Content Inspection samples were taken before and after the Outreach phase. Outreach was an ICANN process that in limited situations allowed the applicant to provide missing information that may have stemmed from an oversight.

Shown below are statistics describing the Content Inspection samples taken prior to Outreach; following Outreach, all primary and Content Inspection evaluations were in agreement (consistency rating = 0). Small variances in the sample size in the table below occurred because in certain limited circumstances the quality firm asserted "non-objection" discrepancies as described above and those individual questions were de-sampled for statistical purposes.

In summary, prior to the Outreach phase there were six individual application question/response instances (1 technical/operational and 5 financial) where a bona-fide scoring discrepancy existed that would have impacted the final disposition of the application (moving an application from a pass to a fail or vice versa). To highlight root causes, for purposes of this analysis and presentation, a single scoring issue that cascaded into multiple scoring discrepancies has been reduced to the single root cause and the cascading discrepancies are not reflected here. For example, a discrepancy in financial cost calculations may cascade into a discrepancy in the question 50 Continuation of Operations (COI) Instrument calculation; the former is indicative of a root cause quality issue whereas the latter is not.

Applications containing a question that received a zero score following the Clarifying Question phase proceeded to the Outreach phase. All of the per-question discrepancies below were resolved during Outreach; following Outreach, all primary and Content Inspection evaluations were in agreement and every question selected for Content Inspection received a passing (non-zero) score.

Question #	n where consistency rating = 0 (Consistent)	n where consistency rating != 0 (Not Consistent)	Standard Deviation of Consistency Rating for the Population
24	261	0	0.000
25	256	0	0.000
26	261	0	0.000
27	260	0	0.000
28	261	0	0.000
29	261	0	0.000
30	261	0	0.000
31	261	0	0.000
32	260	1	0.024
33	260	0	0.000
34	261	0	0.000
35	261	0	0.000
36	261	0	0.000
37	261	0	0.000
38	261	0	0.000
39	261	0	0.000
40	261	0	0.000
41	261	0	0.000
42	261	0	0.000
43	260	0	0.000
44	N/A – Optional	N/A – Optional	N/A – Optional
45	258	2	0.037
46	261	1	0.000
47	261	0	0.000
48	261	0	0.000
49	261	0	0.000
50	256	2	0.041

Table 3: Per-Question Consistency Rating

An application must have no individually failing questions (score=0) and reach a minimum score threshold in both technical/operational and financial questions in order to pass evaluation. As an application with all passing individual questions may still fail due to insufficient total points, consistency was also analyzed on a per-application basis to capture this aspect.

In summary, prior to the Outreach phase there were five (5) applications where a bona-fide scoring discrepancy existed that would have impacted the final disposition of the application (moving an application from a pass to a fail or vice versa).

Note that this analysis is considering an application as a whole whereas the previous analysis is considering all question/response instances. In the former, there were six (6) question/response instances where the consistency rating was not zero; in the later, there were five (5) whole applications where the final disposition was not consistent pre-Outreach. All inconsistencies were resolved Post Outreach.

Application Status	n	%
Consistent Pre-Outreach	261	95.26%
Not Consistent Pre-Outreach	5	1.82%
No Objection	8	2.92%
Consistent Post Outreach	274	100.00%

Table 4: Per-Application Consistency Rating

Analyzing the five (5) instances where there was a scoring discrepancy prior to Outreach on a per-evaluator firm basis revealed balanced data (note that aliases are used to identify evaluator firms):

Status	n
Evaluator Firm Alpha consistency rating as compared to quality firm is > 0 (Evaluator Firm Alpha scored higher than quality firm)	1
Evaluator Firm Alpha consistency rating as compared to quality firm is < 0 (Evaluator Firm Alpha scored lower than quality firm)	2
Evaluator Firm Bravo consistency rating as compared to quality firm is > 0 (Evaluator Firm Bravo scored higher than quality firm)	0
Evaluator Firm Bravo consistency rating as compared to quality firm is < 0 (Evaluator Firm Bravo scored lower than quality firm)	2

Table 5: Per Evaluator Firm Analysis of Application Discrepancies

4.6 Analysis and Discussion

Given the overall scale, scope, and challenge of Initial Evaluation, evaluation was remarkably consistent. Several points are worth noting:

- Evaluator firms spent considerable effort in training and calibration, and clearly it proved effective. The Applicant Guidebook describes Initial Evaluation as a pass/fail exercise (as long as the minimum point requirements are met, there is no benefit in receiving additional points and no penalty in receiving fewer points). As such, during initial training and calibration, evaluator firms focused on “zero/non-zero” issues/scoring to gain confidence that pass/fail alignment

would be high. As a result, pass/fail consistency was very high but raw numeric scoring – which included the additional points – was less consistent. Analysis of the additional point system beyond the minimum pass/fail thresholds was not a part of the design of the quality program.

- Consistency of CQs was desirable but not always possible. Variance in internal firm processes and other factors reduced the overall consistency of CQs. However, pass/fail application disposition remained high despite variance in CQs. A contributing factor is that a significant proportion of CQ inconsistencies were related to additional points components of questions (criteria required to receive a score of two (2) or three (3) on a question).
- Consistency issues are highly concentrated in very few questions, particularly financial questions 45 and 50. Anyone familiar with the application process will recognize these questions and not be at all surprised with this finding. The fact that these questions were the subject of the majority of post-AGB ICANN guidance – both to applicants and evaluators – underscores the localized difficulties present in these two questions. Discrepancies that surfaced in questions 45 and 50 tended to be systemic issues (symptoms of unanticipated scenarios and/or broader lack of clarity) whereas the discrepancies that surfaced in other questions tended to be isolated and unusual corner cases.
- Numerous subjective terms (such as “adequate,” “commensurate,” “comprehensive,” “highly developed,” and similar terms) appear frequently in the Applicant Guidebook. Evaluator firms and ICANN spent significant effort defining these terms crisply and calibrating for the purpose of consistent evaluation. While the results show that this effort was largely successful, additional definition of subjective terms in future revisions of the Applicant Guidebook would be of value.
- The Applicant Guidebook did not recognize the concept of a Registry Service Provider nor did it contemplate an applicant describing a registry being run as a cost center with limited or no revenue. Ambiguity surrounding these concepts was the root cause of several calibration discussions and scoring discrepancies. Overt recognition of these concepts in future revisions of the Applicant Guidebook would be of value.

5 Blind Procedural Inspections

Work performed by technical/operational, financial, string similarity, and geographic name panels/providers was subject to a Procedural Inspection on a statistically relevant randomly selected sample of applications. The intent of the Procedural Inspection was to provide assurance that the application was fully processed, and that all panel providers completed (and provided evidence of completing) all the steps required of them as documented in the Applicant Guidebook and individual SOWs. A team of JAS personnel conducted the Procedural Inspections.

Each of the five panel types had a “procedural checklist” which was developed by ICANN and the panel providers in advance. Multiple firms performing the same function (e.g. financial review) used the same procedural checklist. The procedural checklist was the basis on which the Procedural Inspections were conducted.

5.1 Process and Sampling

Blind Procedural Inspections were selected via random ordering of the 1917 application IDs receiving Prioritization Draw results. The first 35% (671) applications in the random ordering were selected for Procedural Inspection; if additional samples were needed due to withdrawals, selection of an application where the applicant is conflicted with both primary evaluator firms, or other factor requiring de-sampling, applications starting at 672 in the random ordering were selected. Each selected application was subjected to a Procedural Inspection for all panel types. Note that the random ordering generated for Procedural Inspections was different – and independent – from the random ordering generated for Content Inspections.

Procedural Inspections were conducted on final work products after final scoring was submitted to ICANN.

Final metrics for the quality control program were taken on 28 August 2013 and are as follows:

Total Active Applications (28 Aug 2013)	1768
Applications Sampled	639
Sampled Proportion	36.14%
Compliance Rate	99.84%

Table 6: Procedural Inspection Sampling

As the String Similarity panel operated on unique strings, a separate random ordering and selection were performed for these Procedural Inspections. Content Inspection metrics for String Similarity are as follows:

Unique Strings (28 Aug 2013)	1388
Applications Sampled	490
Sampled Proportion	35.30%
Compliance Rate	100.00%

Table 7: String Similarity Procedural Inspection Sampling

5.2 Metrics

Each Procedural Inspection reviewed the primary evaluation as a whole and generated one metric per application. The resulting metric is an assessment of the fidelity with which the primary evaluation followed the agreed-upon Procedural Checklist for the specific application. The metric is one of: *Compliant (C)*; *Minor Discrepancy (MD)*; *Significant Discrepancy (SD)*.

5.3 Roles and Responsibilities

JAS was the quality evaluator firm. If an application was selected for Procedural Inspection where JAS was the Primary Review Firm (due to conflict with both primary evaluator firms), the application was de-sampled for quality control purposes and the next application in the random ordering that had not already been released was selected.

5.4 Exceptions

Exceptions were brought to ICANN’s attention as soon as they were discovered for discussion with the evaluator firms as necessary.

5.5 Results

Procedural Inspections generated metrics on a per-evaluator firm basis for each evaluation type. One sample was taken after the primary evaluator firm submitted final results for an application that was selected for Procedural Inspection.

Evaluation Type	Evaluator Firm (alias)	n Compliant	n Minor Discrepancy	n Significant Discrepancy
Technical/Operational	Charlie	329	1	0
Technical/Operational	Delta	309	0	0
Financial	Charlie	329	1	0
Financial	Delta	309	0	0
Geographic	Echo	399	0	0
Geographic	Foxtrot	240	0	0
DNS Stability	Golf	639	0	0
Registry Services	Lima	639	0	0
String Similarity ²	Oscar	490	0	0

Table 8: Per Evaluator Firm Analysis of Procedural Inspections

5.6 Analysis and Discussion

Each evaluation vendor’s adherence to agreed-upon evaluation procedures was a critical success factor for the program. Procedural Inspection results show that this adherence did indeed occur.

² Note that String Similarity Procedural Inspections were performed on 490 evaluations based on applications for 1388 unique strings.

6 Analytical System Review

ICANN received in excess of 1900 applications, largely comprised of unstructured text and attachments. Many latent similarities existed between the applications due to common applicants, consultants, and service providers. Analytical tools were developed to achieve three objectives:

- Provide confidence that all similar applications received similar final (pass/fail) dispositions;
- Help identify potential CQ inconsistencies that could lead to a discrepancy in final disposition;
- Improve the quality of CQs by programmatically checking application and Applicant Guidebook citations.

While the previously described quality procedures applied to a sample of applications, analytical techniques were performed on all applications and CQs.

The analytical system allowed the evaluator firms, quality firm, and ICANN to visually review connections between similar applications, the CQs generated for those applications, the responses to those CQs from applicants, and the final score on an ongoing basis. While complete and absolute consistency through all of those steps would be a desirable – albeit Quixotic – outcome, in reality, analytics allowed discrepancies to be identified and reviewed for impact. Potentially problematic discrepancies were identified and rectified.

6.1 Process

Financial and technical/operator evaluator firms interacted with the analytical system at three points in time:

1. Following submission of CQs to ICANN’s application management system (but prior to their transmission to the applicant);
2. Prior to submitting final scores to ICANN; and
3. Following submission of final scores to ICANN.

Following submission of CQs to ICANN’s application management system, the analytical system programmatically matched quotes and citations appearing in the CQs to the relevant application and the Applicant Guidebook. Matches were confirmed and potential mismatches were flagged for manual verification. This step reduced the occurrence of misquotes and copy/paste errors given that thousands of similar CQs were generated. This was an especially important error mode to control, given that oft-quoted portions of the applications were confidential. Additionally, the analytical system compared the CQs for the submitted application to the CQs generated for similar applications and flagged discrepancies for manual verification.

Following submission of final scores to ICANN’s application management system, the analytical system compared the scores of the submitted application to the scores of similar applications previously submitted. Potential discrepancies were flagged for manual verification.

Finally, at the completion of Initial Evaluation, JAS performed an analytical review of all applications that completed Initial Evaluation successfully vs. those that were referred to Extended Evaluation.

6.2 Analysis and Discussion

The sheer volume and unstructured nature of the application data necessitated an analytical approach. During each weekly application processing cycle, reports were delivered to evaluator firms and ICANN containing the results of the analytical reviews described above. As manual verification confirmed or refuted analytical results, false positives were identified and tuned out to improve future efficacy of the system. Noting that analytical reviews were a backstop measure designed to catch issues that remained undetected relatively late in the application cycle, a low and decreasing number of analytical system exceptions were indicative of high quality work by the evaluator firms. While there was an initial burst of analytical system exceptions, by the end of Initial Evaluation, very few valid analytical exceptions were being identified. This was an indication that the evaluation system was performing adequately and that the internal quality procedures being performed by each firm were effective. This was the desired behavior.

Following the completion of Initial Evaluation, JAS performed an analytical comparison of all applications that completed Initial Evaluation successfully vs. those that were referred to Extended Evaluation and found that the applications that were referred to Extended Evaluation were materially different than the applications that passed Initial Evaluation successfully. As this analysis took the entire population of applications into consideration, this step served as a valuable system-wide double-check on all of the previous sample-oriented quality programs.

Despite acknowledged inconsistencies in CQs and numeric scores (above and beyond the passing thresholds), this last analysis provided a strong indication that – when the process reached completion – all similar applications received passing scores and the applications referred to Extended Evaluation correctly were individual special cases requiring additional clarification.

7 Overall Analysis, Discussion, and Recommendations

The ICANN New gTLD evaluation program resulted in the successful evaluation of over 1900 applications from a full range of global applicants, delivering a demonstrably high level of evaluation consistency while providing ICANN with the practical and commercial benefits of evaluator depth and diversity. Some additional overall comments in closing:

1. The extensive advanced preparation, training, synchronization, and evaluation exercises (pilots) undertaken by the technical/operational and financial evaluator firms were essential and probably the single largest critical success factor. As verified by the positive quality program results, a unified approach to these activities coalesced the team and substantially mitigated the risk of isolation and inconsistent or divergent evaluations.
2. As quality practitioners well know, one value of a proactive quality program is that the mere (visible) existence of such a program helps incent the desired behaviors. In this case, it is highly probable that the existence of a visible and well-publicized proactive quality program properly incited all evaluation panel vendors to be appropriately cognizant of evaluation consistency, accuracy, and process fidelity, and perform accordingly.
3. Although the questions were provided in advance and there was an expectation that applicants would be clear on the material, it was apparent that many applicants, including sophisticated applicants, were confused as to how to respond to the questions. This resulted in two undesirable effects: (a) applicants tended to “over-respond” to the application, adding unnecessary volume and complexity; and (b) there was more effort put into clarification communications (including CQs) than was probably intended in the original vision. While not “providing the answers” there is an opportunity to make the application process more objective and deterministic for both applicants and evaluators. Reducing subjectivity of evaluation will enable improved quality and consistency and reduce costs associated with extensive synchronization activities.
4. The lack of structured application data was an impediment during evaluation; future application rounds should capture data in a more structured format, greatly facilitating evaluation, quality reviews, and subsequent processes like contracting.
5. Several questions, particularly technical/operational questions, have overlapping remits complicating evaluation, quality processes, and unnecessarily creating the appearance of inconsistency. Some topics, such as the use of IDNs, often have material spread throughout several questions. This makes it harder for applicants to “know what to put where” and for evaluators to find the information they’re looking for. A highly structured application will help address this issue.
6. Releasing results incrementally opened the opportunity for difficult-to-manage inconsistencies. Future rounds designed for one release of results at the end will make comprehensive consistency and quality checking more effective.
7. The publication of detailed numeric scores confused and undermined the AGB-driven premise that evaluation was pass/fail. Inconsistencies in numeric scores incorrectly sent a message that evaluation was much more inconsistent than the final results and the quality programs assert.

Future application rounds should either publish results as pass/fail only, or re-calibrate the entire process to produce numerically consistent scores.

8. Financial evaluation of questions 45 and 50 exhibited systemic issues that made consistent evaluation difficult. Recognizing applicants that choose to run their registry as a cost center and revising the approach to the problematic question 50 regarding the Continuity of Operations Instrument will go a long way to increase the evaluation consistency of these questions.

COMMUNITY PRIORITY EVALUATION PANEL AND ITS PROCESSES

Overview

At the time of submitting the new gTLD application, applicants had the opportunity to designate themselves as a community-based application, as prescribed in the section 1.2.3 of the Applicant Guidebook (AGB).

Community Priority Evaluation (CPE) is defined in section 4.2 of the AGB, and allows a community based-application to undergo an evaluation against the criteria as defined in section 4.2.3 of the AGB, to determine if the application warrants the minimum score of 14 points (out of a maximum of 16 points) to earn priority and thus win the contention set.

Only community-based applicants are eligible to participate in a community priority evaluation. A determination by a community priority panel, appointed by ICANN, must be made before a community name is awarded to an applicant. This determination will be based on the string and the completeness and validity of supporting documentation.

There are two possible outcomes to a Community Priority Evaluation:

- Determination that the application met the CPE requirements specified in the Applicant Guidebook (Section 4.2.2) to receive priority over other applications for the same or confusingly similar string = Prevalled.
- Determination that the application did not meet the CPE requirements specified in the Applicant Guidebook (Section 4.2.2) to receive priority over other applications for the same or confusingly similar string = Did not prevail.

Section 4.2.2 of the AGB prescribes that the Community Priority Evaluations will be conducted by an independent panel. ICANN selected the Economist Intelligence Unit (EIU) as the panel firm for Community Priority Evaluations.

The Economist Intelligence Unit

The Economist Intelligence Unit (EIU) was selected as a Panel Firm for the gTLD evaluation process. The EIU is the business information arm of The Economist Group, publisher of The Economist. Through a global network of more than 500 analysts and contributors, the EIU continuously assesses political, economic, and business conditions in more than 200 countries. As the world's leading provider of country intelligence, the EIU helps executives, governments, and institutions by providing timely, reliable, and impartial analysis.

The evaluation process respects the principles of fairness, transparency, avoidance of potential conflicts of interest, and non-discrimination. Consistency of approach in scoring applications is of particular importance. In this regard, the Economist Intelligence Unit has more than six decades of experience building evaluative frameworks and benchmarking models for its clients, including governments, corporations, academic institutions and NGOs. Applying scoring systems to complex questions is a core competence.

EIU evaluators and core team

The Community Priority Evaluation panel comprises a core team, in addition to several independent¹ evaluators. The core team comprises a Project Manager, who oversees the Community Priority Evaluation project, a Project Coordinator, who is in charge of the day-to-day management of the project and provides guidance to the independent evaluators, and other senior staff members, including The Economist Intelligence Unit's Executive Editor and Global Director of Public Policy. Together, this team assesses the evaluation results. Each application is assessed by seven individuals: two independent evaluators, and the core team, which comprises five people.

The following principles characterize the EIU evaluation process for gTLD applications:

- All EIU evaluators, including the core team, have ensured that no conflicts of interest exist.
- All EIU evaluators undergo regular training to ensure full understanding of all CPE requirements as listed in the Applicant Guidebook, as well as to ensure consistent judgment. This process included a pilot training process, which has been followed by regular training sessions to ensure that all evaluators have the same understanding of the evaluation process and procedures.
- EIU evaluators are highly qualified, they speak several languages and have expertise in applying criteria and standardized methodologies across a broad variety of issues in a consistent and systematic manner.
- Language skills and knowledge of specific regions are also considered in the selection of evaluators and the assignment of specific applications.

CPE Evaluation Process

The EIU evaluates applications for gTLDs once they become eligible for review under CPE.

The evaluation process as described in section 4.2.3 of the Applicant Guidebook and discussed in the CPE Guidelines document is described below:

- The Panel Firm's Project Manager is notified by ICANN that an application for a gTLD is ready for CPE, and the application ID and public comments are delivered to the EIU. The EIU is responsible for gathering the application materials and other documentation, including letter(s) of support and relevant correspondence, from the public ICANN website. The EIU Project Manager reviews the application and associated materials, in conjunction with the EIU Project Coordinator. The Project Coordinator assigns the application to each of two evaluators, who work independently to assess and score the application.
- Each evaluator reviews the application and accompanying documentation, such as letter(s) of support and opposition. Based on this information and additional independent research, the evaluators assign scores to the four CPE criteria as defined in the Applicant Guidebook.
- As part of this process, one of the two evaluators assigned to assess the same string is asked to verify the letters of support and opposition. (Please see "Verification of letter(s) of support and opposition" section for further details.)
- When evaluating an application the CPE Panel also considers the public application comments. The public comments are provided to EIU by ICANN following the close of the 14-day window associated with the CPE invitation. For every comment of support/opposition received, the designated evaluator assesses the relevance of the organization of the poster along with the content of the comment. A separate verification of the comment author is not performed as the Application Comments

¹ The term "independent" means that the evaluators do not have any conflict of interest with CPE applicants. It also means that the evaluators sit outside the core EIU team; they provide individual evaluation results based on their assessment of the AGB criteria, application materials, and secondary research without any influence from core team members.

system requires that users register themselves with an active email account before they are allowed to post any comments. However, the evaluator will check the affiliated website to ascertain if the person sending the comment(s) is at that entity/organization named, unless the comment has been sent in an individual capacity.

- Once the two evaluators have completed this process, the evaluation results are reviewed by the Project Coordinator, who checks them for completeness and consistency with the procedures of the Applicant Guidebook.
- If the two evaluators disagree on one or more of the scores, the Project Coordinator mediates and works to achieve consensus, where possible.
- The Project Director and Project Coordinator, along with other members of the core team, meet to discuss the evaluators' results and to verify compliance with the Applicant Guidebook. Justifications for the scores are further refined and articulated in this phase.
- If the core team so decides, additional research may be carried out to answer questions that arise during the review, especially as they pertain to the qualitative aspects of the Applicant Guidebook scoring procedures.
- If the core team so decides, the EIU may provide a clarifying question (CQ) to be issued via ICANN to the applicant to clarify statements in the application materials and/or to inform the applicant that letter(s) of support could not be verified.
- When the core team achieves consensus on the scores for each application, an explanation, or justification, for each score is prepared. A final document with all scores and justifications for a given application, including a determination of whether the application earned the requisite 14 points for prevailing, is presented to ICANN.
- The Economist Intelligence Unit works with ICANN when questions arise or when additional process information may be required to evaluate an application.
- The Panel Firm exercises consistent judgment in making its evaluations in order to reach conclusions that are compelling and defensible, and documents the way in which it has done so in each case.

Verification of letter(s) of support and opposition

As part of this CPE evaluation process, one of the two evaluators assigned to assess the same string verifies the letters of support and opposition. This process is outlined below:

- On a regular basis, the EIU reviews ICANN's public correspondence page (<http://newgtlds.icann.org/en/program-status/correspondence>) for recently received correspondence to assess whether it is relevant to an ongoing evaluation. If it is relevant, the public correspondence is provided to the evaluators assigned to the evaluation for review.
- For every letter of support/opposition received, the designated evaluator assesses both the relevance of the organization and the validity of the documentation. Only one of the two evaluators is responsible for the letter verification process.
- With few exceptions, verification emails are sent to every entity that has sent a letter(s) of support or opposition to validate their identity and authority.
- The exceptions noted above regarding sending verification letter(s) include but may not be limited to:
 - If there are no contact details included in the letter(s). However, the evaluator will attempt to obtain this information through independent research.
 - If the person sending the letters(s) does not represent an organization. However, if the content of the letter(s) suggests that the individual sending a letter has sent this letter(s) on behalf of an organization/entity the evaluator will attempt to validate this affiliation.
- The verification email for letter(s) of support/opposition requests the following information from the author of the letter:
 - Confirmation of the authenticity of the organization(s) letter.
 - Confirmation that the sender of the letter has the authority to indicate the organization(s) support/opposition for the application.
 - In instances where the letter(s) of support do not clearly and explicitly endorse the applicant, the verification email asks for confirmation as to whether or not the organization(s) explicitly supports the community based application.
- To provide every opportunity for a response, the evaluator regularly contacts the organization for a response by email and phone for a period of at least a month.
- A verbal acknowledgement is not sufficient. The contacted individual must send an email to the EIU acknowledging that the letter is authentic.

UNITED STATES DISTRICT COURT
CENTRAL DISTRICT OF CALIFORNIA

CIVIL MINUTES - GENERAL

Case No. **16-CV-00862 RGK (JCx)** Date April 12, 2016

Title *DotConnectAfrica Trust v. Internet Corporation for Assigned Names and Numbers & ZA Central Registry*

Present: The Honorable R. GARY KLAUSNER, U.S. DISTRICT JUDGE

Sharon L. Williams (Not Present)	Not Reported	N/A
Deputy Clerk	Court Reporter / Recorder	Tape No.

Attorneys Present for Plaintiffs:
Not Present

Attorneys Present for Defendants:
Not Present

Proceedings: (IN CHAMBERS) Order re: Plaintiff’s Motion for Preliminary Injunction (DE 16)

I. INTRODUCTION

On February 26, 2016, Plaintiff DotConnectAfrica Trust (“DCA”) filed a First Amended Complaint (“FAC”) against Defendants Internet Corporation for Assigned Names and Numbers (“ICANN”), and ZA Central Registry (“ZACR”) (collectively “Defendants”) alleging the following claims: (1) Breach of Contract; (2) Intentional Misrepresentation; (3) Negligent Misrepresentation; (4) Fraud & Conspiracy to Commit Fraud; (5) Unfair Competition (Violation of Cal. Bus. & Prof. Code. § 17200); (6) Negligence; (7) Intentional Interference with Contract; (8) Confirmation of IRP Award; (9) Declaratory Relief (that ICANN follow the IRP Declaration and allow the DCA application to proceed through the delegation phase of the process); (10) Declaratory Relief (that the registry agreement between ZACR and ICANN is null and void and that ZACR’s application does not meet ICANN standards); and (11) Declaratory Relief (that the covenant not to sue is unenforceable, unconscionable, procured by fraud and/or void as a matter of law and public policy).

Presently before the Court is DCA’s Motion for Preliminary Injunction. For the following reasons, the Court **GRANTS** the Motion.

II. STATEMENT OF FACTS

The following facts are alleged in the Complaint.

Defendant ICANN is the sole organization worldwide that assigns rights to Generic Top-level

Domains (“gTLDs”). In 2011, ICANN approved the expansion of the number of gTLDs available to eligible applicants as part of its 2012 Generic Top-Level Domains Internet Expansion Program (“New gTLD Program”). Examples of gTLDs include .Lat, .Wales, .Africa, and .Swiss. ICANN invited eligible parties to submit applications to obtain the rights to these various gTLDs. ICANN promised to conduct the bid process in a transparent manner, ensure competition, and abide by its own bylaws and the rules set forth in the gTLD Applicant’s Guidebook. In March 2012, Plaintiff DCA submitted an application to ICANN to obtain the rights to the .Africa gTLD. DCA paid ICANN the mandatory application fee of \$185,000. On February 17, 2014, Defendant ZACR also submitted an application for .Africa.

A. Geographic Name Applications and the Governmental Advisory Committee

ICANN’s Applicant Guidebook contains an overview of the application process. (Bekele Decl., Ex. 3 at 1-3–1-14, ECF No. 17.) After the administrative completeness check, ICANN conducts an initial evaluation of the application. (Bekele Decl., Ex. 3 at 1-7, ECF No. 17.) During the initial evaluation, ICANN conducts string reviews, which determine whether a gTLD is too similar to existing TLDs. (Bekele Decl., Ex. 3 at 1-7, ECF No. 17.) The initial evaluation also includes the geographic name evaluation, in which ICANN determines whether an application contains sufficient endorsements, along with determining whether an applicant has the requisite technical, operational, and financial capabilities to operate a gTLD. (Bekele Decl., Ex. 3 at 1-7, ECF No. 17.) Applicants can request an extended evaluation if it fails the initial evaluation. (Bekele Decl., Ex. 3 at 1-11, ECF No. 17.) Applicants who have successfully completed the initial evaluation (and the extended evaluation, if requested) proceed to the delegation stage, which includes executing a registry agreement with ICANN and conducting a pre-delegation technical test to validate information in the application. (Bekele Decl., Ex. 3 at 1-14, ECF No. 17.)

According to ICANN’s policy and procedures, applicants for geographic gTLDs must obtain endorsements from 60% of the national governments in the region and no more than one written objection from the relevant governments or public authorities associated with the region. DCA obtained endorsements of the United Nations Economic Commission for Africa (“UNECA”) in August 2008 and the African Union Commission (“AUC”) in August 2009. In 2010, however, AUC sent a letter informing DCA that it has “reconsidered its approach” and “no longer endorses individual initiatives in this matter related to continental resource.” (FAC ¶ 24, ECF No. 10.) The Guidebook states that a government may withdraw its endorsement only if the conditions of its endorsement have not been satisfied. Contrary to ICANN’s allegations, DCA maintains that the AUC letter did not formally withdraw its endorsement of DCA because AUC did not have conditions on its endorsement.

On behalf of ICANN, InterConnect Communications (“ICC”) performs string similarity and geographic review during the initial evaluation stage of the gTLD application process. ICC explained to ICANN that if the endorsements of regional organizations like AUC and UNECA were not applied toward the 60% requirement, neither DCA nor Defendant ZACR would have sufficient geographic support. (Bekele Decl., Ex. 19 & 23, ECF No. 17.) ICANN decided to accept endorsements from both AUC and UNECA. During its initial evaluation, the ICC was required to inform applicants of any problems with their endorsements. The ICC failed to inform DCA of any such problems. Therefore DCA assumed that its endorsements from AUC and UNECA were sufficient.

In 2011, AUC itself, attempted to obtain the rights to .Africa by requesting ICANN to include .Africa in the list of Top-Level Reserved Names, which would have made .Africa unavailable for delegation under the New gTLD Program. In a March 8, 2012 letter, the ICANN Board Chairman Stephen Crocker explained to AUC that ICANN could not reserve .Africa for AUC’s use. However, Crocker explained, AUC could “play a prominent role in determining the outcome of any application” for .Africa as a public authority associated with the continent by (1) filing one written statement of objection, (2) filing a community objection, or (3) utilizing the Governmental Advisory Committee

(“GAC”) to combat a competing application. (FAC ¶ 69, ECF No. 10.) The Governmental Advisory Committee (“GAC”) is an internal committee that considers applicants and provides advice related to governmental concerns. Under ICANN’s rules, the GAC can recommend that ICANN cease reviewing an application if all of the GAC members agree that an application should not proceed because an applicant is sensitive or problematic. Membership on the GAC is open to representatives of all national governments. AUC became a GAC member in June 2012, apparently on the advice of ICANN.

Because AUC could not obtain .Africa directly through ICANN, AUC contracted with ZACR in March 2014. In exchange for AUC’s endorsement, ZACR would assign to AUC all rights relating to .Africa upon its delegation to ZACR. Subsequently, because of AUC’s interest in ZACR’s application for .Africa, AUC used its influence as a GAC member to campaign against DCA’s application. In June 2013, ICANN accepted the GAC’s advice and rejected DCA’s application for lacking the requisite endorsements. This decision was made amid DCA’s objection that several members of the GAC had conflicts of interest and that Kenya was unrepresented at the GAC meeting. (Bekele Decl., Ex. 24 & 25, ECF. No. 17.) Contrary to ICANN’s contentions, DCA maintains that the lack of unanimous support within the GAC rendered the decision to suspend DCA’s application improper.

DCA further argues that, if ICANN applied the GAC’s rationale for rejecting DCA’s application equally to ZACR, ZACR’s application should have failed as well. Specifically, applying the same standards, ZACR did not have sufficient country specific endorsements to meet ICANN’s requirements: (1) only five of the purported endorsement letters from specific African governments referenced ZACR by name; and (2) ZACR filed support letters in which African governments generally endorsed AUC’s “Reserved Names” initiative without specifically referencing ZACR. ZACR presumably passed the 60% threshold requirement based on the same regional endorsements that the GAC used to derail DCA’s application. Nonetheless, ZACR passed the initial evaluation and entered into the delegation phase with ICANN.

B. The Independent Review Process

As a means to challenge ICANN’s actions with respect to gTLD applications, ICANN provides applicants with an independent review process (“IRP”). The IRP is arbitration comprised of an independent panel of arbitrators. In October 2013, DCA sought an IRP to review ICANN’s processing of its application, including ICANN’s handling of the GAC opinion. In its decision, the IRP Panel found against ICANN as follows: (1) ICANN’s actions and inactions with respect to DCA’s application were inconsistent with ICANN’s bylaws and articles of incorporation; and (2) ICANN should refrain from delegating .Africa and permit DCA’s application to proceed through the remainder of the evaluation process.

DCA asserts that ICANN did not act in accordance with the decision, which was binding. Instead of allowing DCA’s application to proceed through the remainder of the application process (i.e. the delegation phase), ICANN restarted DCA’s application from the beginning and re-reviewed its endorsements. In September 2015, during the second review, ICANN issued clarifying questions regarding DCA’s endorsements, which it did not raise during the initial evaluation of these same endorsements. The DCA requested an extended evaluation, hoping to gain insight on what was wrong with its application. Rather than providing clarification, ICANN merely restated the same questions – allegedly as a pretext to deny DCA’s application – then denied DCA’s application in February 2016. Soon thereafter, ICANN began the process of delegating .Africa to ZACR.

On March 4, 2016, this Court issued a Temporary Restraining Order to prevent ICANN from delegating .Africa to ZACR until the Court decided this present Motion.

III. JUDICIAL STANDARD

“[I]njunctive relief [is] an extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief.” *Winter v. Natural Res. Def. Council, Inc.*, 555 U.S. 7, 22 (2008). For a court to grant a preliminary injunction, a plaintiff must establish the following: (1) likelihood of success on the merits, (2) likelihood of irreparable harm in the absence of preliminary relief, (3) that the balance of equities tips in its favor, and (4) that the public interest favors injunction. *Id.* at 20.

The Ninth Circuit also employs a “sliding scale” approach to preliminary injunctions. *Alliance for the Wild Rockies v. Cottrell*, 632 F.3d 1127, 1131 (9th Cir. 2011). This approach uses the same four factors as the *Winter* test, but allows the plaintiff to receive a preliminary injunction in situations where there are “serious questions” going toward the plaintiff’s likelihood of success on the merits, so long as the “balance of hardships tips sharply in the plaintiff’s favor.” *Id.* at 1134-35. The plaintiff must still demonstrate a likelihood of irreparable harm and that public interest favors the injunction. *Id.* at 1135.

VI. DISCUSSION

DCA seeks a preliminary injunction barring ICANN from issuing the rights to .Africa until this case is resolved. DCA moves for a preliminary injunction based on its Ninth Claim for Declaratory Relief. DCA’s Ninth Claim seeks a judicial declaration that ICANN follow the IRP decision and allow the DCA application to proceed through the delegation phase of the application process. In determining whether relief should be granted, the Court addresses each of the relevant factors for preliminary injunction.

A. Likelihood of Success on the Merits

1. *The Release Does Not Bar DCA’s Claim at This Time.*

As a preliminary matter, ICANN argues that DCA, by submitting a New gTLD Program application, is bound by the terms in the Applicant Guidebook. These terms include a Release barring applicants from challenging in court any decision made by ICANN. (Bekele Decl. 6-4, Ex. 3, ECF No. 17.) DCA argues, however, that the Release is unenforceable because it violates California Civil Code § 1668, is unconscionable, and was procured by fraud. The Court finds substantial questions as to the Release, weighing toward its unenforceability.

California Civil Code § 1668 finds that “[a]ll contracts which have for their object, directly or indirectly, to exempt anyone from responsibility for his own fraud, or willful injury to the person or property or another, or violation of law, whether willful or negligent, are against the policy of the law.”

The Release applies to all gTLD applicants and states, in relevant part:

Applicant hereby releases ICANN . . . from any and all claims by applicant that arise out of, are based upon, or are in any way related to, any action, or failure to act, by ICANN . . . in connection with ICANN’s . . . review of this application. . . . Applicant agrees not to challenge . . . and irrevocably waives any right to sue or proceed in court.

(Bekele Decl. 6-4, Ex. 3, ECF No. 17.) On its face, the Release is “against the policy of the law” because it exempts ICANN from *any and all claims* arising out of the application process, even those arising from fraudulent or willful conduct. Cal. Civ. Code § 1668.

ICANN argues that Section 1668 is limited only to agreements involving the public interest,

which the Guidebook is not, and cites to *Tunkl v. Regents of Cal.*, 383 P.2d 441 (Cal. 1963) for support. However, *Tunkl* concerns the validity of a release from liability for negligence, not intentional acts or fraud. Here, the Release waives all liability, not just liability resulting from negligence. Thus, *Tunkl* is distinguishable, and the Court need not determine whether the Release is in an agreement involving the public interest.

ICANN further argues that, if the Release is found to violate Section 1668, the Court should limit its unenforceability to DCA's claims sounding in fraud. ICANN contends that because the request for preliminary injunction is based solely on DCA's Declaratory Relief Claim, which does not sound in fraud, the Release is enforceable as it pertains to this Claim. (Def.'s Opp'n to Mot. for Prelim. Inj. 15:12-14, ECF No. 35.) The Court disagrees. ICANN fails to recognize that the alleged conduct giving rise to this claim is intentional. Specifically, DCA alleges that ICANN intended to deny DCA's application after the IRP proceeding under any pretext and without a legitimate reason. (FAC ¶ 59, ECF No. 10.) DCA claims that "the process ICANN put Plaintiff through was a sham with a predetermined ending – ICANN's denial of Plaintiff's application so that ICANN could steer the gTLD to ZACR." (FAC ¶ 60, ECF No. 10.)

In support, DCA offers the following evidence. ICANN's initial evaluation report in July 2013 stated that DCA's endorsement letters "met all relevant criteria in Section 2.2.1.4.3 of the Applicant Guidebook." (Bekele Decl. ¶ 40, Ex. 27, ECF No. 17.) After the IRP Decision, ICANN performed a second evaluation on the same information originally submitted by DCA. In the second evaluation, however, ICANN found that the endorsement letters did not meet the same criteria applied in the first evaluation, and sent DCA clarifying questions regarding its endorsements. (Bekele Decl. ¶ 24, Ex. 15, ECF No. 17.) The clarifying questions required DCA to submit endorsement letters that "[d]emonstrate[d] the government's or public authority's understanding that the string is being sought through the gTLD application process and that the applicant is willing to accept the conditions under which the string will be available." (Bekele Decl. ¶ 24, Ex. 15, ECF No. 17.) The discrepancy between the pre-IRP and post-IRP evaluations led DCA to seek further clarification, specifically regarding the standard imposed on the endorsement letters at issue. However, in response, ICANN merely sent the same questions. (Bekele Decl. ¶ 26, Ex. 17, ECF No. 17.) DCA then submitted to an extended evaluation, which allows further review and is available to applicants who failed the initial evaluation. Without further communication, ICANN then issued a final decision that restated that the endorsement letters "did not meet the criteria described in Section 2.2.1.4.3 of the Applicant Guidebook." (Bekele Decl. ¶ 28, Ex. 18, ECF No. 17.) ICANN's conduct thereby rendered DCA's application ineligible for further review. (Bekele Decl. ¶ 28, Ex. 18, ECF No. 17.)

The evidence suggests that ICANN intended to deny DCA's application based on pretext. Defendants have not introduced any controverting facts. As such, the Court finds serious questions regarding the enforceability of the Release due to California Civil Code § 1668.

Because the Court finds serious questions regarding the enforceability of the Release due to California Civil Code § 1668, the Court need not address DCA's arguments regarding unconscionability or procurement by fraud.

2. *There Are Serious Questions as to the Merits of DCA's Ninth Claim.*

After its review, the IRP Panel declared: (1) "both the actions and inactions of the Board with respect to the application of DCA [] relating to the .AFRICA gTLD were inconsistent with the Articles of Incorporation and Bylaws of ICANN" and (2) ICANN "continue to refrain from delegating the .AFRICA gTLD and permit [DCA's] application to proceed through the remainder of the [New gTLD Program] application process." (Bekele Decl., Ex. 1 ¶ 61, ECF No. 17.) DCA alleges in its Ninth Claim that ICANN failed to follow the IRP Panel's binding order, resulting in ICANN's not properly

considering DCA's application.

After the IRP Decision, ICANN placed DCA at the geographic name evaluation stage of the application process and thereafter determined that DCA lacked the requisite support. (Bekele Decl. ¶ 28, Ex. 18, ECF No. 17.) DCA contends that ICANN violated the IRP Decision by restarting the geographic name evaluation, which it had already passed, rather than permitting the application to resume at the delegation phase. (Pl.'s Mot. for Prelim. Inj. 13:4-5, ECF No.16.) ICANN, however, argues that at the time DCA's application had been initially rejected, the application was still under review at the geographic name evaluation stage, and the evaluation was not yet complete. (Def.'s Opp'n to Mot. for Prelim. Inj. 17:20-22, ECF No. 35.) Accordingly, ICANN maintains that it placed DCA's application at the proper stage of evaluation after the IRP Decision.

Despite ICANN's contention, the evidence presents serious questions pointing in favor of DCA's argument. First, a March 2013 email from ICC to ICANN stated that ICANN needs to clarify AUC's endorsements since AUC properly endorsed both DCA and ZACR. (Bekele Decl. ¶ 30, Ex. 19, ECF No. 17.) Subsequently, ICANN's July 2013 initial evaluation report found that the endorsement letters have "met all relevant criteria in Section 2.2.1.4.3 of the Applicant Guidebook." (Bekele Decl. ¶ 40, Ex. 27, ECF No. 17.) Because ICANN found DCA's application passed the geographic names evaluation in the July 2013 initial evaluation report, the Court finds serious questions in DCA's favor as to whether DCA's application should have proceeded to the delegation stage following the IRP Decision.

ICANN further argues that even if ICANN failed to follow the IRP Decision, the Decision was only advisory, and not binding. The evidence does not provide clear indications on this point. On the one hand, the Panel concluded "that its [Decision] on the IRP and its future [Decision] on the Merits of the case were binding on the Parties." (Bekele Decl., Ex. 1 ¶ 23, ECF No. 17.) The Panel explains, "[v]arious provisions of ICANN's Bylaws and the Supplementary Procedures support the conclusion that the Panel's decisions, opinions and declarations are binding . . . [t]he selection of the [International Dispute Resolution Procedures] as the baseline set of procedures for IRP's, therefore, points to a binding adjudicative process." (Bekele Decl., Ex. 1 ¶ 23, ECF No. 17.) The Panel opined that if the decision is not binding, then at a minimum, "the IRP should forthrightly explain and acknowledge that the process is merely advisory." (Bekele Decl., Ex. 1 ¶ 23, ECF No. 17.) The IRP did not provide such explanation or acknowledgment. (Bekele Decl., Ex. 1 ¶ 23, ECF No. 17.) On the other hand, language in the IRP Decision states that the Panel "*recommends* that ICANN continue to refrain from delegating the .Africa gTLD and permit [DCA's] application to proceed through the remainder of the new gTLD application process." (Bekele Decl., Ex. 1 ¶ 149, ECF No. 17 (emphasis added).) It is clear the decision that ICANN violated its bylaws by failing to fairly review DCA's application is binding. However, it is *not* clear whether ICANN was mandated to permit DCA's application to proceed through the remainder of the process. Without extrinsic evidence as a guide, logic dictates that if the "recommendation" is, in fact, non-binding, the Panel's decision that ICANN violated its bylaws (which is undisputedly binding) is rendered ineffectual. Because the IRP is presumably in place to effect dispute resolution, and the IRP provided no explanation or acknowledgment that its decision was merely advisory, the Court finds serious questions on this issue.

For the reasons stated above, the Court finds serious questions going toward the merits of DCA's Ninth Claim.

B. Likelihood of Irreparable Harm

As DCA points out, without preliminary relief, DCA will lose the opportunity to fairly have its application reviewed by ICANN. If DCA loses this opportunity, DCA will suffer irreparable harm because .Africa can be delegated only once, and only by ICANN. (Bekele Decl., Ex. 3 Application Terms and Conditions ¶ 3, ECF No. 17.) Further, only one entity can operate .Africa. (Bekele Decl., Ex. 3 at 4-2, ECF No. 17.) DCA has sufficiently demonstrated that, due to the unique nature of .Africa, it will likely suffer irreparable harm without preliminary relief.

Moreover, on March 4, 2016, the Court issued a temporary restraining order precluding ICANN from delegating the rights to .Africa until the Court rules on the present motion. (Order Granting TRO, ECF No. 27.) In that Order, the Court found that without a TRO, ICANN would have immediately delegated the rights to .Africa. (Order Granting TRO, ECF No. 27.) The Court finds no evidence indicating a change in circumstances. It is reasonable to believe that without a preliminary injunction, ICANN will immediately delegate the rights to .Africa to ZACR, causing DCA to suffer irreparable harm.

ICANN argues only that DCA cannot possibly suffer irreparable harm because it seeks compensatory relief. This argument is unavailing. Seeking compensatory damages does not preclude the Court from finding irreparable harm, as the control over .Africa cannot fully be compensated by money. *See Blackwater Lodge & Training Ctr., Inc. v. Broughton*, 2008 U.S. Dist. Lexis 49371 at *28 (S.D. Cal. 2008) (granting preliminary injunction despite plaintiff seeking monetary relief).

The Court thus finds that without relief, DCA will likely suffer irreparable harm.

C. Balance of Equities

The balance of equities tips in favor of granting the preliminary injunction. Without a preliminary injunction, DCA will lose the opportunity to obtain rights to .Africa because ICANN will likely delegate the rights to ZACR prior to the conclusion of this action, and these rights can be delegated only once. DCA has invested much time and money in the application process under the representation that the process would be unbiased and fair. Although DCA may be able to recover certain funds through litigation, such as the application fee, the opportunity to obtain the rights to .Africa would be forever gone. ICANN's position, however, will be no different if it delays delegating the rights to .Africa. Thus, the balance of equities tips sharply in DCA's favor.

D. The Public Interest Favors Granting Preliminary Injunction

The public interest favors granting a preliminary injunction. "The public interest analysis for the issuance of a preliminary injunction requires us to consider whether there exists some critical public interest that would be injured by the grant of preliminary relief." *Alliance for the Wild Rockies v. Cottrell*, 632 F.3d 1127, 1138 (9th Cir. 2011). Here, the public has an interest in the fair and transparent application process that grants gTLD rights. ICANN regulates the internet – a global system that dramatically impacts daily life in today's society. The IRP Declaration recognizes that ICANN's function is "special, unique, and publicly important" and ICANN itself "is the steward of a highly valuable and important international resources." (Bekele Decl. ¶ 23.110, Ex. 1, ECF No. 17.)

ICANN argues that a delay in delegating .Africa will prejudice the African community's efforts to participate in the Internet economy and strengthen their technology sectors. (Def.'s Opp'n to Mot. for Prelim. Inj. 20:3-5, ECF No. 35.) The evidence supporting ICANN's argument is a declaration of Moctar Yedaly, the head of the Information Society Division of the AUC's Infrastructure and Energy Department. (Yedaly Decl. ¶ 11, ECF No. 40.) The AUC's relationship with ZACR, and its interest in

preventing the delay of issuing rights to .Africa creates a conflict of interest. Therefore, on this point, the Court accords little weight to the Yedaly Declaration. On balance, the Court finds it more prejudicial to the African community, and the international community in general, if the delegation of .Africa is made prior to a determination on the fairness of the process by which it was delegated.

For the reasons stated, the Court finds the public interest favors granting the preliminary injunction.

E. Implementing the “Sliding Scale” Approach

Implementing the Ninth Circuit’s “sliding scale” approach to preliminary injunctions, the Court finds “serious questions” going toward DCA’s likelihood of success on the merits and a balance of hardships that tips sharply in DCA’s favor. *Alliance for the Wild Rockies* at 1131. Additionally, the Court finds that both the likelihood of irreparable injury and the public interest favors the injunction. As such, the Court **GRANTS** a preliminary injunction barring ICANN from delegating the rights to .Africa until this case is resolved.

VI. CONCLUSION

For the foregoing reasons, the Court **GRANTS** Plaintiff’s Motion for Preliminary Injunction.

IT IS SO ORDERED.

Judge Halts .Africa Domain; Lengthy Litigation Likely

From [Electronic Commerce and Law Report](#)

FREE TRIAL

By [Joseph Wright](#)

April 13 — A pan-African Internet domain remains on hold after a federal court April 12 enjoined the Internet Corporation for Assigned Names and Numbers from finalizing the domain while an unsuccessful competitor's lawsuit proceeds.

Judge R. Gary Klausner of the U.S. District Court for the Central District of California granted DotConnectAfrica Trust's request to enjoin ICANN from delegating the .africa top-level domain (similar to .com or .org) to the ZA Central Registry. DotConnect and ZACR were the only two applicants for operating the domain.

"The evidence suggests that ICANN intended to deny DCA's application based on pretext," Judge Klausner said.

The decision undermines two important pieces of the legal framework underlying ICANN's expansion of the domain name space in recent years—a broad litigation waiver for all applicants, and ICANN's longstanding view that independent review process (IRP) arbitrations challenging ICANN decisions are merely advisory.

The decision also comes at the end of a long process to enhance ICANN's accountability as it prepares to free itself from U.S. government oversight. Paul Rosenzweig, principal at Red Branch Consulting and a former deputy assistant secretary for policy with the Department of Homeland Security, told Bloomberg BNA April 13 that the decision underscores the importance of those enhancements.

“You've got a neutral federal judge on top of three arbitration panelists saying ICANN's not playing by the rules,” Rosenzweig said. “It's a paradigm about the accountability of ICANN and the board. We're giving ICANN an awful lot of power to make decisions like this.”

The decision also addressed many of the arguments raised in ICANN's pending motion to dismiss the suit, strongly suggesting the case will proceed to discovery and a much longer delay before the domain can become active. The motion to dismiss hearing is scheduled for April 25. ICANN's arguments for dismissal relied heavily on the litigation waiver that the court found ineffective in the injunction ruling, DotConnect's attorney told Bloomberg BNA April 13.

“That finding now means that, at the very least, the substantial majority of DCA's case will survive the Motion to Dismiss and the case against ICANN will move forward to full litigation and discovery,” said Ethan Brown, partner at Brown Neri Smith & Khan LLP in Los Angeles.

Neil Dundas, executive director of ZACR, told Bloomberg BNA April 13 that the injunction ruling is “devastating for the African Internet community.”

“The voice of the African community has not been heard during this prolonged war of attrition between a U.S. organisation and (what is essentially) a U.S. resident,” Dundas said in an e-mail. “No true African entity has been party to these legal proceedings, but the outcomes have had a profound negative effect on the African digital landscape.”

Competing Applicants

DotConnect and ZACR each applied to ICANN to operate the .africa domain. Under ICANN's rules, applicants for names matching multinational regions must have the support of at least 60 percent of affected governments. The African Union, consisting of all African countries except Morocco, initially backed DotConnect but revoked that support in favor of ZACR, which operates South Africa's .za domain. DotConnect has asserted that the African Union's revocation of support was ineffective under ICANN's rules.

Both applicants passed ICANN's initial evaluation, but government representatives flagged DotConnect's bid and ultimately advised that it not proceed (18 ECLR 717, 4/17/13). ICANN's board accepted that advice, but an IRP panel determined it did so without an appropriate investigation and recommended that DotConnect's application go forward (20 ECLR 956, 7/15/15). ICANN restarted DotConnect's application at the geographic names review stage and failed the bid, saying it lacked the necessary support (21 ECLR 250, 2/24/16).

DotConnect sued ICANN for breach of contract, fraud and declaratory relief that ICANN should refrain from processing ZACR's application and that it shouldn't have required a new geographic names evaluation. DotConnect obtained a

temporary restraining order against ICANN and sought an injunction (21 ECLR 325, 3/9/16).

ICANN responded that DotConnect had agreed to a broad litigation waiver and that all disputes would be resolved through the IRP process (21 ECLR 404, 3/23/16).

Litigation Waiver Unenforceable

The court found that an injunction was appropriate because DotConnect raised serious questions on the merits. It also found that .africa is a unique asset and DotConnect could suffer irreparable harm without an injunction.

The court said that ICANN's broad litigation waiver, which includes intentional and fraudulent behavior, is likely unenforceable under California law. DotConnect alleged that ICANN intentionally put its application through a “sham” process with a predetermined outcome.

The crux of DotConnect's argument is that the initial evaluation report on its application said it met the criteria for a geographic name with properly documented support. That evidence raised serious questions that ICANN's post-IRP geographic evaluation was pretextual, the court found. ICANN had argued that DotConnect didn't complete geographic review before its application was initially denied.

The court previously found that ICANN was likely to delegate .africa to ZACR immediately had it not granted DotConnect a temporary restraining order. It said that was still true if it didn't grant a preliminary injunction.

ICANN argued DotConnect's damages request suggested no irreparable harm would come from an injunction denial. The court disagreed, saying an alternative request for damages didn't preclude seeking an injunction.

The court also said the public interest is best served by a “fair and transparent application process” for domains.

ICANN argued delay is harming Africa's ability to participate in the Internet economy. But the court said it gave little weight to an African Union official's declaration because of the Union's relationship with ZACR.

ICANN didn't respond to a request for comment.

Jones Day LLP represented ICANN.

Governance

Guiding principles

[Privacy](#)[Cookies information](#)[Ownership](#)[Board](#)[Trustees](#)

Guiding principles

The Economist Group's guiding principles

The Group operates in a clear and ethical context, and the Board has therefore approved the following guiding principles:

- We aim to offer insight and analysis and services that are valued by our customers.
- Underpinning our ability to fulfil this objective is our commitment to independence, integrity and delivering high quality in everything we do. These values govern our relationships with readers, customers and clients, shareholders, staff, suppliers and the community at large.
- We believe in conducting business with common decency. We are opposed to bribery and do not engage in corrupt practices. We abide by strict guidelines governing the acceptance of gifts and the disclosure of potential conflicts of interest.
- As an international company, we conduct business in many different markets around the world. In the countries in which we operate, we abide by local laws and regulations. We make an active contribution to local charities by charitable giving. We encourage our people to participate in charitable and community activities and we permit them to take time off for this purpose. We match employee donations of time and money to charities.
- We respect environmental standards and comply with relevant local laws. We take environmental issues seriously. We review the environmental impact of our operations, specifically carbon emissions, annually. Plans to reduce or mitigate those emissions are ongoing.
- The Economist and its sister publications, Intelligent Life and The World In series, account for the majority of our annual spend on paper and printing. All suppliers of paper and print services used in producing these publications adhere to one or more of the following internationally recognised environmental standards: ISO 14001, FSC and PEFC.
- We value our colleagues and treat each other fairly. The Group is committed to equality of opportunity in all employment practices and policies. We do not discriminate against employees or job applicants based on the grounds of age, sex, sexual orientation, marital status, race, colour, religion, national origin or disability. We support staff who through disability or illness are unable to perform their duties, by adapting the work environment and hours of work to suit the employee where it is reasonable for the business.
- The Group is committed to increasing staff diversity. We particularly focus on ensuring that we recruit from the widest possible pool of talent. We are also keen that people feel comfortable and valued at work, regardless of their background.
- We recognise that it is essential to keep employees informed of the progress of the Group. We regularly provide employees with information on the Group's activities and its financial performance through staff meetings and communication through our intranet. We have a strong consultative culture and we follow legal and regulatory requirements to consult with staff on major issues affecting the company.

The Internet Corporation for Assigned Names and Numbers

4 December 2015

Mr. Constantine Roussos, Founder & CEO
Mr. Paul Zamek, EVP: Communications & Strategic Relationships
DotMusic Limited
4058 Wayland Drive
Nashville, TN 37215

Re: Community Support Letters and Deadline for Submission

Dear Mr. Roussos and Mr. Zamek:

Thank you for the letter from Mr. Zamek, dated 1 December 2015. We have posted the letter to the gTLD correspondence page (<https://www.icann.org/en/system/files/correspondence/zamek-to-icann-eiu-01dec15-en.pdf>), where it is available for the community to review.

We would like to remind DotMusic Limited of the deadlines relevant to letters of support or non opposition in the Community Priority Evaluation (CPE) process.

Per the CPE Panel Process document (<http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf>), the CPE Panel will review public correspondence and verify any letters deemed to be relevant. Any correspondence or application comments received more than 14 days after the date of invitation may not be considered by the CPE Panel. In the case of DotMusic Limited's application for .MUSIC (1-1115 14110), the 14 day window closed on 12 August 2015. For more information, please see the CPE Frequently Asked Questions document (<http://newgtlds.icann.org/en/applicants/cpe/faqs-10sep14-en.pdf>).

As you are aware, DotMusic Limited and its supporters have submitted a high volume of correspondence (hundreds of letters) to ICANN for the CPE Panel's consideration. Much of this correspondence was submitted well after the deadline, including the most recent document submitted on 1 December 2015, which included 500 letters. Please be advised that the Panel has attempted to verify correspondence dated 13 October 2015 or earlier. We will continue to publish letters submitted to ICANN to the gTLD correspondence page so that they are available to the CPE Panel, however, any correspondence dated later than 13 October 2015 or submitted from today on will not go through the Panel's verification process and may not be considered by the Panel. This is to support fairness to all applicants and to prevent delays to the evaluation.

Thank you for your participation in the New gTLD Program. Should you have any questions, please do not hesitate to contact us.

Sincerely,

A handwritten signature in blue ink, which appears to read "Christine A. Willett". The signature is fluid and cursive, written over a light blue horizontal line.

Re: Response to .MUSIC LLC’s (“Far Further”) Letter; International Law and Conventions

Dear ICANN BGC Chair Chris Disspain, ICANN BGC and ICANN Board:

We write in response to the letter submitted by Far Further¹ attempting to obstruct the .MUSIC Reconsideration Request 16-5² (“RR”). This repeated pattern of behavior of filing spurious letters and abuse of accountability mechanisms³ is misguided and anti-competitive. The Far Further letter was intended to purposely derail the RR to serve the interests of Far Further’s shareholders not the interests of Far Further’s supporting organizations, many of whom are RR co-filers⁴ or have supported the RR.⁵ Please note that DotMusic’s application has received more support than all CPE applicants combined.⁶

On November 18th, 2014, the BGC rejected⁷ a Reconsideration Request 14-45 filed by Far Further concerning their CPE Report (released on October 7, 2014), which scored 3 points and did not pass.⁸

The GAC Category 1 Resolutions were accepted by the Board and the NGPC on February 5th, 2014⁹ (i.e. before Far Further’s CPE result).

² <https://www.icann.org/resources/pages/reconsideration-16-5-dotmusic-request-2016-02-25-en>

³ For example, Far Further attempted to obstruct DotMusic’s Public Interest Commitments (against the interests of the majority of Far Further’s supporting organizations that have also supported DotMusic) by filing a Reconsideration Request 15-6, which was rejected by the BGC on May 6th, 2015. See BGC Reconsideration Request Determination 15-6, <https://icann.org/en/system/files/files/determination-15-6-music-06may15-en.pdf>

⁴ RR co-filers - the International Federation of Musicians, Association of Independent Music, American Association of Independent Music, Independent Music Companies Association and the Nashville Songwriters Association International - are also Far Further supporting organizations. Yet, Far Further opposes the RR against their interests.

⁵ See letter from the International Federation for the Phonographic Industry, <https://icann.org/en/system/files/files/reconsideration-16-5-dotmusic-letter-ifpi-to-icann-24feb16-en.pdf>

⁶ DotMusic is supported by organizations with members representing over 95% of music consumed globally: See <http://music.us/supporters>. An overwhelming majority of Far Further’s supporting organizations have also supported DotMusic. DotMusic’s logical alliance of supporting music organizations is the largest ever amassed for a music cause.

Far Further chose not to file for relief or utilize other accountability mechanisms to challenge the BGC's Reconsideration Request 14-45 decision or any ICANN action/inaction relating to GAC Category 1 Resolutions. Rather than initiating a timely Independent Review Proceeding (or timely invoking any other ICANN accountability mechanism), Far Further waited nearly a year and a half after the BGC decision on their Reconsideration Request 14-45 to speak out – and only did so as to challenge DotMusic's RR. As such, any claim by Far Further is time-barred.¹⁰ Furthermore, according to the BGC, Far Further did not identify any procedural failures with respect to their CPE. The BGC's Determination noted that Far Further (i) "*claim[ed] that the number of points awarded by the CPE Panel for various criteria was 'wrong';*" and (ii) did "*not claim that the CPE Panel violated established policy or procedure, but instead improperly challenge[d] the CPE Panels' substantive determination.*"

In contrast, the RR filed by DotMusic and co-requesters relate to process violations and contravening established procedures. Contrary to Far Further's flawed assertions that "*the BGC affirmed the Panel's determination not to award [Far Further] community status, and that BGC opinions "establish[] precedential value,"*" the BGC cannot determine the RR based on another applicant's application in this manner. While "*consistency of approach in scoring Applications*" is "*of particular importance*" to "*exercise consistent judgment...to reach conclusions that are compelling and defensible,*"¹¹ it is important to note that Far Further's application and Request for Reconsideration 14-45 are completely different to DotMusic's application (or those applications that have passed CPE) and RR. Agreeing to such an improper request would violate established AGB procedures to "*ensure applications are evaluated in an objective and independent manner*"¹² and to "*avoid any double-counting.*"¹³ As such, the BGC must follow ICANN processes to provide fair and equitable, reasonable and non-discriminatory treatment.¹⁴

The claim by Far Further that DotMusic "*applied for community status for the same string, for essentially the same community*" is factually imprecise because DotMusic's definition of the music community ("*a strictly*

⁹ See Approved ICANN Board Resolutions, <https://icann.org/resources/board-material/resolutions-new-gtld-2014-02-05-en>; Also see <https://icann.org/en/groups/board/documents/resolutions-new-gtld-annex-1-05feb14-en.pdf>, <https://icann.org/en/system/files/files/resolutions-new-gtld-annex-2-05feb14-en.pdf>

¹⁰ See ICANN Accountability Mechanisms timing at <https://icann.org/resources/pages/mechanisms-2014-03-20-en>

¹¹ See CPE Guidelines, <https://newgtlds.icann.org/en/applicants/cpe/guidelines-27sep13-en.pdf>, p.22

¹² See AGB, Module 2, Evaluation Procedures, 2.4.3.1, p. 2-33

¹³ See AGB, Module 4.2.3, pp. 4-9 - 4-10 ("The sequence of the criteria reflects the order in which they will be assessed by the panel. The utmost care has been taken to avoid any "double-counting" - any negative aspect found in assessing an application for one criterion should only be counted there and should not affect the assessment for other criteria")

¹⁴ The BGC must conduct adequate diligence to ensure that ICANN's policies and procedures are applied fairly and in an open and transparent manner. It is well recognized under principles of international law that the obligations to treat entities fairly and equitably are "related to the traditional standard of due diligence," which international tribunals have defined as requiring the reasonable amount of prevention that one would expect well administered organization to provide. See e.g. CME v. Czech Republic, Partial Award of Sept. 13, 2001, <http://italaw.com/sites/default/files/case-documents/ita0178.pdf>, ¶614, p.174 (Unfair and inequitable treatment, ...unreasonable actions...are together a violation of the principles of international law); Lauder v. Czech Republic, Final Award of Sept. 2001, <http://italaw.com/sites/default/files/case-documents/ita0451.pdf>, ¶292, pp.67-68 (Fair and equitable treatment is related to the traditional standard of due diligence and provides a 'minimum international standard which forms part of customary international law.');

In addition, ICANN's obligation to conduct due diligence and exercise due care is an express area of focus when comparing contested actions of the Board to the Articles and Bylaws Art. IV, § 3(4)(b).

*delineated and organized logical alliance of communities that relate to music*¹⁵) is entirely different from Far Further's stated community definition, which only covers four (4) million members and restricts registration to members of select music organizations.

Far Further lost three (3) points under *Registration Policies*, so even if they were awarded a full score in all other sections (including *Community Establishment* that relates to *cohesion*), Far Further would still not pass CPE. In contrast, DotMusic would pass CPE if the Panel followed established procedures and ICANN processes were "*in conformity with relevant principles of international law and applicable international conventions*" as mandated by ICANN's Articles of Incorporation that, among other things, calls for recognition of principles of international law and international conventions:

The Corporation shall operate for the benefit of the Internet community as a whole, carrying out its activities in conformity with relevant principles of international law and applicable international conventions and local law and, to the extent appropriate and consistent with these Articles and its Bylaws, through open and transparent processes that enable open competition and open entry in Internet-related markets. To this effect, the Corporation shall cooperate as appropriate with relevant international organizations.¹⁶

As such, the BGC should accept the RR and recognize music community *cohesion* through "*applicable international conventions*," such as the 1886 Berne Convention (that relates to the protection of copyright signed by 170 countries¹⁷).

On that subject, please further note that The Economist, the parent company of the Economist Intelligence Unit (the "EIU"), also recognizes the Berne Convention because The Economist is reliant on copyright cohesion and international law protection¹⁸ to conduct its activities. According to The Economist's website:

Copyright is a property right that gives the creators of certain kinds of material rights to control the ways in which such material can be used. These rights are established as soon as the material has been created, with no need for official registration. Copyright applies globally and is regulated by a number of international treaties and conventions (including the Berne Convention, the Universal Copyright Convention, the Rome Convention and the Geneva Convention).¹⁹

The Economist's own words invalidate the EIU's CPE Report rationale that "*application materials and further research provide no substantive evidence of what the AGB calls "cohesion" – that is, that the various members of the community as defined by the application are "united or form a whole."*"²⁰ Concluding that there is "*no substantive evidence*" that the music community defined in its entirety has no cohesion (i.e. does not unite cohesively under international music copyright or is reliant on international conventions) is not a compelling and defensible argument. Indeed, in The Economist's own words: "*copyright applies globally*

¹⁵ As explicitly outlined in the AGB, DotMusic's "logical alliance" community definition explicitly meets the AGB criteria. According to the AGB, Module 4, 4.2.3, p. 4-12: "*With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities.*"

¹⁶ ICANN Articles of Incorporation, <https://www.icann.org/resources/pages/governance/articles-en>, Article 4

¹⁷ Berne Convention for the Protection of Literary and Artistic Works of 1886 with 170 contracting countries (See http://wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15)

¹⁸ See The Economist website, *Terms of Use, "Governing Law and Jurisdiction,"* <http://economist.com/legal/terms-of-use>, ("*The Economist shall also retain the right to bring proceedings as to the substance of the matter in the courts of the country of your residence.*")

¹⁹ See The Economist website, *Copyright Information,* <https://economist.com/rights/copyright.html>

and is regulated by a number of international treaties and conventions.” It thus appears that the EIU failed to undertake appropriate (if any) research to support its conclusions. The decision was rendered despite DotMusic's provision of thousands of pages of “*application materials and...research*” as “*substantive evidence*” of “*cohesion*,” including citing in numerous materials the international Berne Convention. For example, DotMusic defined its Community and clarified that:

The requisite awareness of the community is clear: participation in the Community, the logical alliance of communities of similar nature related to music, -- a symbiotic, interconnected eco-system that functions because of the awareness and recognition of its members. The delineated community exists through its members participation within the logical alliance of communities related to music (the “Community” definition). Music community members participate in a shared system of creation, distribution and promotion of music with common norms and communal behavior e.g. commonly-known and established norms in regards to how music entities perform, record, distribute, share and consume music, including a shared legal framework in a regulated sector governed by common copyright law under the **Berne Convention**, which was established and agreed upon by over 167 international governments with shared rules and communal regulations.²¹

To that end, as mentioned in our previous letter, in 2014, the members of the ICANN Board and the NGPC (who are also members of the BGC) accepted GAC Category 1 Advice that .MUSIC is a “*string that is linked to regulated sector*” that “*should operate in a way that is consistent with applicable laws;*”²² a Resolution that, in effect, agrees that all music groups that comprise the music community defined (“*logical alliance of communities that relate to music*”) participate as a whole in a regulated sector with demonstrated activities tied to music that cohere to international copyright law, united under international treaties, agreements and conventions.

We hope it is helpful to have provided you with clarifications in response to Far Further’s letter and to raise pertinent issues relating to international law and conventions. Thank you in advance for your consideration.

Please let us know should you have any questions.

Dear Messrs Chehadé, Crocker and Disspain

.MUSIC COMMUNITY PRIORITY EVALUATION REPORT APPLICATION ID. 1-1115-14110

We write following the publication of the .MUSIC Community Priority Evaluation (CPE) Report for Application ID. 1-1115-14110 (the "DotMusic" application), which found that the applicant had failed to establish that it represents the music community for the purposes of ICANN's CPE evaluation. We believe the finding to be flawed, not least in view of the support for the application provided by representative organisations from all areas of the music community, including IFPI. Given the scale of the music community's support for the DotMusic application, it is difficult to understand what level of support a CPE applicant would need to demonstrate to prevail, and this gives rise to serious misgivings about the transparency, consistency, and accountability of the CPE process.

On 5th March, IFPI co-signed a letter to ICANN from a coalition of national and international trade associations representing songwriters; recordings artists, music publishers, record labels, studio professionals, and performing rights societies around the world. In that letter we expressed our shared disappointment with the CPE process, highlighting the disparity

www.ifpi.org

between the decisions of the EIU Panel. Unfortunately, these inconsistencies have continued in the EIU Panel's evaluation of the DotMusic application. We have read DotMusic Limited's Request for Reconsideration, and we note with concern the different criteria that appear to have been applied to the .HOTEL and .MUSIC CPE applications respectively.

Also of concern is the EIU Panel's finding that DotMusic failed to provide documented support from "recognised community institution(s)/member organization(s)". IFPI is a globally recognised organisation representing 1,300 record companies. Our members operate in 61 countries and IFPI has affiliated organisations, including national groups in 57 countries. We also administer the internationally recognised ISRC system. We therefore object to the EIU Panel's finding.

We previously provided our support for the DotMusic application in our letter dated 18 May 2015, in which we expressed the importance of the .MUSIC gTLD being administered by an applicant that had committed to meaningful and robust safeguards to protect against online infringement. This remains crucial to the music community, as expressed in the numerous letters of support provided by members of our community. We reiterate that given the Public Interest Commitments submitted by DotMusic Limited for their community application, we understand that DotMusic has made such commitments. Accordingly, we continue to support this applicant (in addition to our support for the other community priority applicant for .music) and we request that ICANN gives due recognition to the music community's support when making a determination on the DotMusic Reconsideration Request.

Yours sincerely

Patrick Charnley

Reconsideration Request 16-5: ICANN Board and NGPC Policy Resolutions set precedent for BGC

Dear ICANN and Board Governance Committee:

We write to you to remind you of the consensus GAC Category 1 Advice Resolutions that were accepted by the ICANN Board and NGPC in 2014, which set precedent for DotMusic’s CPE and RR.

As you may be aware, DotMusic (with Application ID 1-1115-14110)¹ and ten (10) other globally-recognized music community organizations recently filed a Reconsideration Request 16-5² (“RR”) concerning the .MUSIC CPE Report³ (“Report”). The Report did not follow numerous established processes and policies or recognize international law, agreements, treaties or conventions concerning the music community.

To that end, in 2014 the ICANN Board and the NGPC accepted GAC Category 1 Advice that .MUSIC is a “*string that is linked to regulated sector*” that “*should operate in a way that is consistent with applicable laws*;⁴” a Resolution that, in effect, agrees that all music groups that comprise the music community defined (“*logical alliance of communities that relate to music*”) participate as a whole in a regulated sector with demonstrated activities tied to music that cohere to copyright law, united under international treaties, agreements and conventions.⁵ Despite this acceptance, the Report did not recognize the music community or

¹DotMusic community Application (ID 1-1115-14110), <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

²<https://www.icann.org/resources/pages/reconsideration-16-5-dotmusic-request-2016-02-25-en>

³DotMusic CPE Report, <https://icann.org/sites/default/files/tlds/music/music-cpe-1-1115-14110-en.pdf>

⁴<https://icann.org/en/system/files/correspondence/crocker-to-schneider-23jun15-en.pdf>, pp.1-2

⁵The ICANN’s Board’s and NGPC’s Resolutions (2014.02.05.NG01) provide that the music community defined in its entirety abides to copyright law that provides protection for copyrightable work once it is created (i.e. “fixed in a tangible medium of expression”) regardless whether it is commercial or not. International conventions, treaties and agreements include the Berne Convention for the Protection of Literary and Artistic Works of 1886 with 170

 Monies Flow to the Music Community.
 Governed by the Global Music Community.
 Available to the Entire Global Music Community.

evaluate the Application in a manner that acknowledges that music is a globally regulated sector united by copyright law with cohesion and recognized international rights protections.

The Resolution, consistent with applicable international law and a cohesive music regulated sector, provides, in pertinent part:

Whereas, the NGPC is undertaking this action pursuant to the authority granted to it by the Board on 10 April 2012, to exercise the ICANN Board's authority for any and all issues that may arise relating to the New gTLD Program. Resolved (2014.02.05.NG01), the NGPC adopts the "GAC Advice (Beijing, Durban, Buenos Aires): Actions and Updates" (5 February 2014), attached as Annex 1⁶ to this Resolution, in response to open items of Beijing, Durban and Buenos Aires GAC advice as presented in the scorecard.⁷

This means that the ICANN Board and NGPC have accepted that the music community, in its entirety, has cohesion based on international law. The above-referenced Resolution alone should have led to a prevailing DotMusic CPE.⁸

Given the overlap between the ICANN Board, NPGC and the BGC, DotMusic believes it would be helpful for BGC members to be reminded of the relevancy of the 2014 Resolution to the CPE process and in assessing the RR in accordance to ICANN's Bylaws. The Bylaws establish that "*ICANN shall not apply its standards, policies, procedures, or practices inequitably or single out any particular party for disparate treatment unless justified by substantial and reasonable cause, such as the promotion of effective competition.*"⁹ This Bylaw reflects the prohibition on discrimination where "*(i) similar cases are (ii) treated differently (iii) and without reasonable justification.*"¹⁰

As such, BGC members cannot render a RR determination that does incorporate established ICANN policy and Resolutions (2014.02.05.NG01) because it would violate ICANN's Bylaws and be grossly negligent and create irreparable harm to the Applicant and the Community.

Furthermore, at the Meeting of the ICANN Board on March 10, 2016, the Board affirmed the serious issues that were raised by an Independent Review Proceeding Panel concerning lack of consistency or predictability in the CPE process. The Board resolved that:

contracting countries (See http://wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15) and the Agreement on Trade-Related Aspects of Intellectual Property Rights of 1994 ("TRIPS") with 162 contracting countries (See http://wipo.int/wipolex/en/other_treaties/parties.jsp?treaty_id=231&group_id=22)

⁶ <https://www.icann.org/en/groups/board/documents/resolutions-new-gtld-annex-1-05feb14-en.pdf>

⁷ Approved Resolutions, Meeting of the New gTLD Program Committee, <https://www.icann.org/resources/board-material/resolutions-new-gtld-2014-02-05-en>, <https://www.icann.org/en/groups/board/documents/resolutions-new-gtld-annex-1-05feb14-en.pdf>, <https://www.icann.org/en/system/files/files/resolutions-new-gtld-annex-2-05feb14-en.pdf>

⁸ The Reconsideration Request 16-5 includes additional process violations and other related issues. The lack of implementation of the ICANN Resolutions is only one of these. However, it is sufficient to overturn the CPE result.

⁹ Bylaws, <https://www.icann.org/resources/pages/bylaws-2012-02-25-en>, Art. II, § 3

Resolved (2016.03.10.11), the Board notes the Panel's suggestions, and: directs the President and CEO, or his designee(s), to ensure that the New gTLD Program Reviews take into consideration the issues raised by the Panel as they relate to the consistency and predictability of the CPE process and third-party provider evaluations.¹¹

ICANN must apply policy Resolutions in all evaluations to ensure transparency, predictability and consistency according to its Bylaws, regardless whether or not a Panel chooses to contravene ICANN process-related Resolutions or relevant facts originating from these Resolutions in its Report. As its consulting agreement with ICANN states, the Panel is a consultant. ICANN is the ultimate decision-maker.

We look forward to a positive result of the RR so that the Music Community is able to launch a safe, trusted and secure .MUSIC gTLD in a timely manner to serve the public interest and benefit the Music and general Internet Community.

Mr Fadi Chehadé
CEO, ICANN
(fadi.chehadé@icann.org)

Mr Chris Disspain
Chair of the Board Governance Committee, ICANN
(chris.disspain@icann.org)

Dear Messrs Chehadé, Crocker and Disspain,

I am writing on behalf of the board of directors of the National Music Council and the almost one million individual constituents of our member organizations. We would like to express our concern for the decision by ICANN to reject the DotMusic application ID. 1-1115-14110, on the basis that it failed to represent the music community for the purposes of ICANN's CPE evaluation. The international music community has come together across the globe to support the DotMusic application, and we cannot comprehend how the application could have failed on the community criteria.

The National Music Council of the United States was founded in 1940 and chartered by the 84th Congress in 1956 to act as a clearinghouse for the joint opinion and decision of its members and to work to strengthen the importance of music in the nation's life and culture. The Music Council represents the United States to the International Music Council. The Council's initial membership of 13 has grown to almost 50 national music organizations, encompassing every important form of professional and commercial musical activity and education.

The protection of intellectual property rights is vitally important to our members. For that reason, we want to do our part to ensure that any

music-themed, generic top-level domains are operated in the best interests of the legitimate music community. Any alternative is likely to encourage and support damaging and debilitating piracy that negatively impacts every fan, musician and music professional.

We therefore object to the decision noted above, the basis of which is an apparent inconsistency in the application of the governing rules. The global music community supports the DotMusic application, and we urge you to reconsider this decision, as we fear the alternatives will have far-reaching and damaging consequences to the public and to the music industry.

We would be happy to discuss this situation further with you at your convenience.

Yours Sincerely,

Dr. David Sanders
Director

3. Description of specific action you are seeking to have reconsidered.

The above-referenced requesters request to have the .MUSIC Community Priority Evaluation (“CPE”) Report for Application ID. 1-1115-14110 (“Report”)¹² corrected and properly graded to accurately reflect the true nature of DotMusic’s *community establishment, community definition, support* and *nexus* based on established Applicant Guidebook (“AGB”) policies and processes.¹³

The Report provided a total score of ten (10) points, resulting in a failing grade for the Application’s request for Community Status. The result unfairly denied Music Community recognition and necessary intellectual property protection. A review of the Report evidences multiple prejudicial errors that ICANN, both directly and as extension of the Economist Intelligence Unit (“EIU”) Panel, either incorrectly applied ICANN-approved processes and policies, or completely failed to apply ICANN established processes and policies. Such material errors resulted in the incorrect evaluation of the Application, an improper scoring of points when compared to over forty-three (43) independent expert testimony letters (*See* Expert Chart, Exhibit A40)¹⁴ and inconsistent, disparate treatment when compared to prevailing CPE Applicants (*See* CPE Comparison Chart, Exhibit A41).¹⁵ Each error, when corrected and overturned, would result to a total Application score of sixteen (16) points. Despite a materially improper evaluation by the EIU, and the disclaimer contained in the Report that “[...] *these Community Priority Evaluation results do not necessarily determine the final result of the application,*” ICANN accepted the Report’s inaccurate results and changed the “*Contention Resolution Result*” to “*Into Contention.*”¹⁶ Accordingly, DotMusic and other affected global organizations identified above (collectively referenced as the “Requesters”) seek to overturn the “*Contention Resolution Result*” to “*Prevailed Contention.*”

4. Date of action/inaction: February 10th, 2016 PST

5. On what date did you became aware of action or that action would not be taken?

February 10th, 2016 PST

6. Describe how you believe you are materially affected by the action or inaction:

¹² DotMusic CPE Report, <https://icann.org/sites/default/files/tlds/music/music-cpe-1-1115-14110-en.pdf>, Ex.A1

¹³ *See* AGB, <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>, §4.2.3

¹⁴ *See* Independent Expert Testimony Letters Scoring Chart, Ex.A40

¹⁵ *See* linear CPE Comparison Chart, Ex.A41

¹⁶ DotMusic community application, Application ID: 1-1115-14110, Prioritization Number: 448; *See* <https://gtldresult.icann.org/applicationstatus/applicationdetails/1392>, Ex. A2

DotMusic is adversely affected by ICANN's actions and inactions. If DotMusic is not awarded .MUSIC, DotMusic, will suffer material brand dilution¹⁷ and be subject to expensive auctions which (as agreed upon by the EU¹⁸) were designed to favor deep pocketed Applicants - such as Amazon and Google (who also have a prior history with the piracy of music: Google as a provider of ad networks to pirate sites and Amazon as a leading advertiser on pirate sites).¹⁹ As set forth in the Application, DotMusic has an all-inclusive tent that is united by its core principles consistent with its articulated community-based purpose:

- Creating a trusted, safe online haven for music consumption and licensing
- Establishing a safe home on the Internet for Music Community ("Community") members regardless of locale or size
- Protecting intellectual property & fighting piracy
- Supporting Musicians' welfare, rights & fair compensation
- Promoting music and the arts, cultural diversity & music education
- Following a multi-stakeholder approach of fair representation of all types of global music constituents, including a rotating regional Advisory Committee Board working in the Community's best interest. The global Music Community includes both reaching commercial and non-commercial stakeholders.²⁰

Per DotMusic's Application and Public Interest Commitments ("PIC"),²¹ .MUSIC will be launched as a safe haven for legal music consumption that ensures that .MUSIC domains are trusted and authenticated to benefit the interests of the Internet community and the global music community. DotMusic, its current and future music members and supporters will be adversely affected if the Report stands and DotMusic is awarded to any of the competing non-community applicants²² (which will also be a disservice to the Internet user community in general) because competing applicants either: (i) lack the music community multi-stakeholder governance model to represent the community's interests; and/or (ii) lack the extensive music-tailored safeguard policies that DotMusic has.²³

Allowing the Report to stand would turn .MUSIC into an unsafe, unreliable and untrusted string governed by non-community interests that will create material harm to the legitimate interests

¹⁷ DotMusic holds the European community trademarks for "*DotMusic*" and "*MUSIC*." Ex.A35, A37 and A38

²² All of the competing non-community applicants in DotMusic's contention set are existing gTLD portfolio registries (Google, Amazon, Donuts/Rightside, Radix, Minds & Machines and Famous Four Media).

²³ See Application 20E; Also See PIC, Commitments 1-8, pp.1-2; PIC, pp.22-27; Also see .MUSIC Applicant Comparison Chart, <https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-2-redacted-12aug15-en.pdf>, Appendix C, pp.43-45, Ex.A32

of the Music Community by increasing intellectual property infringement and other types of malicious abuse. Music is a sensitive string driven by content and copyright protection that must be operated responsibly within its regulated sector as outlined in the Application. The Music Community is one of the Internet's most vulnerable communities given the adverse effects of mass piracy, intellectual property infringement and malicious abuse on the web and the inefficiencies of the outdated 1998 DMCA Law to provide adequate music copyright protection online.²⁴ By not awarding .MUSIC to DotMusic, the Music Community will lose the only opportunity to offer assurance to Internet users that all .MUSIC sites are indeed trusted, safe and licensed, which will also help search engines provide a better user experience by replacing unsafe, insecure pirate sites (that dominate music-themed web search results today) with relevant and higher quality .MUSIC sites.²⁵

By virtue of ICANN's actions and inactions, the public interest is harmed and the multi-stakeholder music community will not be able to ensure trust and reliability in the DNS for Internet users because the music community will not be able to govern the last remaining music-themed gTLD,²⁶ in violation of ICANN's "*key responsibilities is introducing and promoting competition*"²⁷ in the registration of domain names, while ensuring the security and stability of the domain name system (DNS)."²⁸ Further, ICANN disregards its own 2007 Recommendations and Principles that stated "*where an applicant lays any claim that the TLD is intended to support a particular community...that claim will be taken on trust*."²⁹

Without a reserved, safe and reliable zone on the Internet dedicated to the Music Community, the community and the public will be harmed because the music community will be unable to promote a trusted and secure sector through enhanced safeguards. The Music Community (the

Ex.A5

defined “*logical alliance*” with members representing over 95% of music consumed globally) has been negatively affected by the Report.

7. Describe how others may be adversely affected by the action or inaction, if you believe that this is a concern.

See Answer to Question 6 above.

8. Detail of Board Action/Inaction – Required Information

In this section, DotMusic presents the evidence required for ICANN to approve the request in this RR: **(8.1)** The relationship and contractual obligations between ICANN and the Economist with respect to the CPE process; **(8.2)** the AGB process and relevance of ICANN-approved GAC Category 1 and 2 Advice; **(8.3)** Comparisons to other CPE-prevailing community applications, demonstrating quality control deficiencies, unpredictability, inconsistencies, process failures, fairness issues and disparate treatment; and **(8.4)** Facts and procedural violations demonstrating that ICANN did not follow established processes in the evaluation of the Application in its grading as set forth in the .MUSIC Report, including material errors and omissions in determining the critical areas of *community establishment, nexus and support*. As a result of the material process, procedural errors and omissions set forth below, the Application was prevented from scoring the full 16 points and improperly did not receive a passing CPE grade.

(8.1) The relationship and contractual obligations between ICANN and the EIU.

Ultimately, ICANN makes the final decision on CPE results. The ICANN Board is responsible for the acts of its Staff and the EIU with respect to the CPE process because it is within ICANN’s sole discretion whether an applicant passes or fails. Pursuant to its contract with ICANN, the EIU provides “*recommended scores to ICANN for final review and approval*” and ICANN is “*free in its complete discretion to decide whether to follow [the EIU]’s determination and to issue a decision on that basis or not.*”³⁰ ICANN and the EIU specifically acknowledge that: “*each decision and all associated materials must be issued by ICANN in its own name only;*” that CPE results are “*ICANN’s final decision;*” and that “*ICANN will be solely responsible to applicants and other interested parties for the decisions it decides to issue.*”³¹ In a declaration, the EIU confirmed that:

³⁰ <https://icann.org/en/system/files/files/additional-submission-exhibits-c35-13jul15-en.pdf>, New gTLD Program Consulting Agreement, Statement of Work No.: 2, ICANN New gTLD Program, Application Evaluation Services – Community Priority Evaluation and Geographic Names p.6, § 10(b) (ii) (12 Mar. 2012) [Ex. C-40]), Ex.A7

³¹ *Id.*, § 10(b) (iii)-(iv), (vii)

[t]he EIU is a privately held company working as a vendor to ICANN. We are not a gTLD decision-maker but simply a consultant to ICANN.³²

Moreover, ICANN is the gatekeeper of all information exchanged between applicants and the EIU, including alerting the EIU of relevant GAC Advice pertaining to the existence of a “*cohesive*” regulated sector for the string evaluated to ensure scoring predictability and scoring consistency. ICANN and the EIU “*agreed that [the] EIU, while performing its contracted functions, would operate largely in the background, and that ICANN would be solely responsible for all legal matters pertaining to the application process.*”³³ Furthermore, the Report includes a disclaimer representing that ICANN is ultimately responsible for determining whether or not to implement the EIU evaluators’ conclusions.³⁴ While the Board may not be responsible for its Staff’s day-to-day operations, the Board is responsible for final CPE determinations, process, evaluations, and acceptance or rejection of the .MUSIC Report.

(8.2) The AGB process and the relevance of ICANN-approved GAC Category 1 and 2 Advice.

Per the AGB, Board decisions on certain strings are not merely a “box-ticking” administrative exercise by staff or consultants. The Board has accepted GAC Advice on many occasions to determine the fate of certain strings (e.g. .AMAZON and .AFRICA); and even superseding the determinations of Panels if deemed necessary by ICANN to serve the public interest (e.g. the Community Objections for .ISLAM and .HALAL). In relation to .MUSIC, the ICANN Board accepted GAC Advice with respect to Category 1 and Category 2 Safeguards,³⁵ but the Board took no action pertaining to GAC’s Advice to give “*preferential treatment for all applications which have demonstrable community support*” such as DotMusic’s. At the Singapore ICANN meeting in

³² EIU Declaration <https://icann.org/en/system/files/files/eiu-declaration-13apr15-en.pdf>, Pg.2, Ex.A8

³³ New gTLD Program Consulting Agreement, Statement of Work No.: 2, ICANN New gTLD Program, Application Evaluation Services – Community Priority Evaluation and Geographic Names p.6, § 10(b)(ii) (12 Mar. 2012) [<https://icann.org/en/system/files/files/additional-submission-exhibits-c35-13jul15-en.pdf>, Ex. C-40].), § 10(b)(iii)-(iv), (vii), Ex.A7

³⁴ See Report, p.9. Each CPE report states that “these Community Priority Evaluation results do not necessarily determine the final result of the application. *In limited cases the results might be subject to change.*” New gTLD Program, Report; see also New gTLD Program Consulting Agreement, p. 2 (26 July 2011) (“ICANN retains the right to inspect, to stop work, to prescribe alterations, and generally supervise the Contractor’s work to insure its conformity with the . . . Statement of Work”) [<https://www.icann.org/en/system/files/files/additional-submission-exhibits-c35-13jul15-en.pdf>, Ex. C-41], Ex.A9

³⁵ DotMusic’s Application was a community application with music-tailored enhanced safeguards that extended beyond the minimum GAC Advice requirements. To serve the public interest, the Internet community and the entire global music community, DotMusic also filed a PIC to reflect its accountability and to clarify its Application’s specifications, which also pertained to its *community definition, community establishment, nexus, registration policies* and *support*. See PIC

March 2014, GAC reiterated that advice to ICANN “to protect the public interest and improve outcomes for communities”³⁶ and to take “better account of community views and improving outcomes for communities”³⁷ (i.e. giving community applicants the benefit of the doubt). Throughout the process, ICANN has allowed non-community applicants to materially alter their applications to follow GAC Advice to either remain in contention or be awarded sensitive strings (such as .GMBH³⁸). Because such change requests for non-community applicants were allowed and accepted (in response to GAC Advice), it is equally and reasonably fair to allow DotMusic to be awarded .MUSIC based on trust, GAC’s Advice favoring community applicants with demonstrable support and ICANN’s own acceptance that the music string has cohesion under an ICANN-approved regulated sector. It is also reasonable to award DotMusic this sensitive string, because the Application responsibly and conscientiously already had the requisite music-tailored enhanced safeguards that served a higher purpose when it filed its Application in 2012 (notably, DotMusic’s safeguards exceed GAC Category 1 Safeguard Advice). Further, it should have been clear to ICANN and the EIU that the Application exceeds the CPE criteria and serves the public interest, Internet community and music community, as outlined in the Application and confirmed in more detail throughout its PIC. For these reasons alone the .MUSIC Report should be overturned and a passing grade awarded to Applicant.

(8.3) Comparisons to other CPE-prevailing community applications, demonstrate inconsistencies, unpredictability, process failures, fairness issues and disparate treatment.

ICANN did not follow established procedures in the *community establishment, nexus* and *support* evaluation process, which resulted in a failing CPE grade. For example, the criterion concerning “*organization*” (that relates to having support from a “*recognized*” organization), the Report specifically failed to consider many globally-recognized organizations that are *mainly* dedicated to the music community addressed (“*logical alliance of communities that relate to music*”).

³⁶ <https://gacweb.icann.org/download/attachments/27132037/Final%20Communique%20-%20Singapore%202014.pdf?version=2&modificationDate=1396429776778&api=v2> Section 3, 1a, p.4, ExA10

³⁷ <http://icann.org/en/groups/board/documents/resolutions-new-gtld-annex-1-10sep13-en.pdf>, Register #18, Ex.A11

³⁸ Donuts was allowed to make material changes to their application to proceed with the delegation of .GMBH based on GAC advice and Donuts’ Public Interest Commitments (PIC), *See* <https://www.icann.org/en/system/files/correspondence/willett-to-metzger-28jan16-en.pdf>. ICANN rejected a similar change request by the .CPA community applicants. ICANN “deferred consideration of AICPA’s December 2014 Change Request, including changes made to reflect the principles of the Beijing Communiqué,” *See* <https://www.icann.org/en/system/files/files/reconsideration-request-15-17-aicpa-redacted-19sep15-en.pdf>, p.4

The FIM, an “*international federation of national communities of similar nature*”³⁹ representing the “*voice of musicians worldwide*” (musicians represent the overwhelming majority of the Music Community). This is contrary to the unsubstantiated, indefensible and undocumented opinion of ICANN that the FIM is not a “*recognized community institution(s)/member organization(s)*.”⁴⁰

The IFPI, another globally recognized supporting organization, also exceeds the same criteria under *community establishment* and *support*. The IFPI is only associated with music and it is the globally-recognized organization that administers the International Standard Recording Code (ISRC), an international standard code for uniquely identifying sound recordings and music video recordings, which is reciprocally recognized across all segments of the Music Community. The code was developed with the ISO technical committee 46, subcommittee 9 (TC 46/SC 9), which codified the standard as ISO 3901 in 1986.⁴¹ The IFPI’s ISRC is “intentionally standardised under ISO,” globally structured⁴² and “well established, widely accepted internationally”⁴³ Furthermore, it relates to the addressed music community defined by DotMusic, an “*organized and delineated logical alliance of communities that relate to music*.” The IFPI does not restrict ISRC codes to solely its members. In fact, ISRC eligibility is available and dedicated to the entire global music community, irrespective of whether they are members of organizations or not, are professionals or amateurs, are independent or non-independent, commercial or non-commercial:

Owners of recordings may for example be independent artists, record labels or recorded music groups. ISRC is available to all owners of recordings regardless of their membership⁴⁴ (or not) with any industry association.⁴⁵

³⁹ CPE Guidelines: “With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities,” <https://newgtlds.icann.org/en/applicants/cpe/guidelines-27sep13-en.pdf>, p.4, Ex.A12-1; Also see AGB, <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>, 4-12, Ex.A13 and “Descriptions should include: How the community is structured and organized. For a community consisting of an alliance of groups, details about the constituent parts are required,” Notes, 20A, A-14, Ex.A13

⁴⁰ The FIM is a globally-recognized music community organization with documented official relations with the United Nations Economic and Social Council (“ECOSOC”) (Ros C); the United Nations Educational, Scientific and Cultural Organization (“UNESCO”) (Consultative Status); the World Intellectual Property Organization (“WIPO”) (Permanent Observer Status); and the Organisation Internationale de la Francophonie (“OIF”). The FIM is also consulted by the Council of Europe, the European Commission and the European Parliament. FIM is also a member of the International Music Council (“IMC”).

⁴¹ http://www.iso.org/iso/home/store/catalogue_tc/catalogue_detail.htm?csnumber=23401

⁴² <http://isrc.ifpi.org/en/isrc-standard/structure>

⁴³ <http://isrc.ifpi.org/en/why-use/benefits>

⁴⁴ DotMusic’s community application defines the community as “a strictly delineated and organized community of individuals, organizations and business, a “logical alliance of communities of a similar nature,” that relate to music: the art of combining sounds rhythmically, melodically or harmonically.” The IFPI’s ISRC codes do not restrict eligibility to members of select music organizations but are available to the entire music community as defined.

In fact, without the IFPI's ISRC codes there would not be legal music consumption because there would be no way to appropriately and efficiently attribute music to music community members.⁴⁶

In the case of .HOTEL's CPE Report, the prevailing applicant received a full grade for "Organization" **because** the Panel found "*recognized community institution(s)/member organization(s)*,"⁴⁷ the International Hotel & Restaurant Association (IH&RA) and HOTREC:

the community as defined in the application has at least one entity mainly dedicated to the community. In fact there are several entities that are mainly dedicated to the community, such as the International Hotel and Restaurant Association (IH&RA), Hospitality Europe (HOTREC), the American Hotel & Lodging Association (AH&LA) and China Hotel Association (CHA)...⁴⁸

...The applicant possesses documented support from the recognized community institution(s)/member organization(s).⁴⁹

In awarding .HOTEL the full two (2) points for *support*, the Panel concluded that the .HOTEL applicant fulfilled two options (either option was acceptable under the CPE Guidelines):

[t]hese groups constitute the recognized institutions to represent the community, and a majority of the overall community as described by the applicant.⁵⁰

The .HOTEL community applicant passed with full scores for *community establishment* and *support* where several entities were found to be *mainly dedicated to the community* and *recognized*, despite those organizations also representing other interests or sectors such as "restaurants" (or some being geographically focused like the AH&LA and the CHA). Conversely, the .MUSIC Report failed to provide full scoring to DotMusic stating that "[t]here is no single such organization recognized by all of the defined community's members as representative of the defined community in its entirety."⁵¹ This finding is improper because there is no policy or rule that requires an organization to represent a community *in its entirety* in order to score the full two points under *support*. While there is an option requiring the "*authority to represent the community*," the Guidelines provided other alternative options available to score the full two points under "*support*." The CPE Guidelines define

⁴⁵ <http://isrc.ifpi.org/en/using-isrc>

⁴⁶ Without the IFPI's ISRC codes, YouTube Music (which is consumed by over 1 billion YouTube users) would be unable to effectively credit the corresponding music copyright owner related to each music video, *see* <https://support.google.com/youtube/answer/6007080> and; For the same reason, nearly all digital music retailers rely on and require ISRC codes, including Apple iTunes⁴⁶ (the world's largest music retailer with over 43 million music tracks⁴⁶, *see* <http://apple.com/itunes/working-itunes/sell-content/music-faq.html> and <http://apple.com/itunes/music> and <http://www.digitalmusicnews.com/2014/04/24/itunes800m>

⁴⁷ .HOTEL CPE, <https://www.icann.org/sites/default/files/tlds/hotel/hotel-cpe-1-1032-95136-en.pdf>, p.6, Ex.A14

⁴⁸ Ibid, *community establishment*, p.2

⁴⁹ Ibid, *support*, p.6

⁵⁰ Ibid

⁵¹ Report, p.3 and p.8

“recognized” as “*institution(s)/organization(s) that are clearly recognized by the community members as representative of that community*” i.e. not in their “*entirety*” but merely “*representative*.” According to the Oxford dictionary, the primary definition of “*recognize*” is to “identify.”⁵² According to the Oxford dictionary, the definition of the adjective “*representative*” is “typical of a class, group, or body of opinion” or “containing typical examples of many or all types” or “to act and speak on behalf of a wider group.”⁵³

Even if an “*entirety*” criterion (not specifically mentioned in the AGB or CPE Guidelines) is assessed, both the International Federation of Arts Councils and Culture Agencies (“IFACCA”) (the only international federation representing government culture agencies and arts councils globally covering all of the Application’s music categories and subsets in their entirety⁵⁴) and ReverbNation (the world’s largest music-dedicated community covering nearly 4 million musicians and industry individuals and organizations in over 100 countries and across all of the Application’s music categories and subsets in their entirety⁵⁵) qualify because they represent all the music categories and music subsets delineated in their entirety without discrimination globally. Based on the foregoing, it is clear that both co-requesters IFACCA and ReverbNation are “typical of a group” that is representative of the “music” community defined in its entirety. Therefore, it is clear that the Application had demonstrable support from multiple globally-recognized organizations mainly dedicated to the Music Community. ICANN’s and the EIU’s failure to properly evaluate the application and find support for the community is apparent when the .MUSIC Report is compared to other prevailing CPE Determinations. Thus, the rationale ICANN used to find that the International Hotel & Restaurant Association (IH&RA) is representative of “hotel” community should apply to IFACCA and ReverbNation in the case of Music Community. That is, if the IH&RA is found to be “recognized” and “representative” entity of the “hotel” community, then the IFACCA and ReverbNation are “representative” [of the music community] too because they share similar characteristics as the IH&RA and other entities found to have satisfy CPE in other determinations. Per the Guidelines:

⁵² http://www.oxforddictionaries.com/us/definition/american_english/recognize

⁵³ http://www.oxforddictionaries.com/us/definition/american_english/representative

⁵⁴ http://ifacca.org/membership/current_members and http://ifacca.org/membership/current_members

⁵⁵ <https://reverbnation.com/band-promotion> (Artists/Bands), <https://reverbnation.com/industryprofessionals>, (Industry), <https://reverbnation.com/venue-promotion> (Venues), and <https://reverbnation.com/fan-promotion> (Fans)

*Consistency of approach in scoring Applications will be of particular importance...⁵⁶ and “[t]he panel must be able to exercise **consistent** and somewhat subjective judgment in making its evaluations in order to reach conclusions that are compelling and defensible...⁵⁷*

According to the CPE Guidelines, the contextual interpretation of community particularities requires in-depth knowledge and expertise of the community.⁵⁸ All the Music Community categories and Music Community subsets that DotMusic delineated as members are essential for the global music sector to operate. Further, the “*logical alliance of communities that related to music*” (or “*alliance of groups*”) functions with cohesion as a whole in a regulated sector to protect music under agreed-upon structures governed by copyright law and international treaties. Without this cohesion, there would be no regulated music sector, and more importantly, music would not exist as we know it.

There are other clear examples of error relating to: consistency, fairness, predictability, equal treatment and procedural violations pertaining to DotMusic’s CPE process in comparison to community applicants that have prevailed CPE for whom ICANN applied the right threshold to pass. For example, ICANN’s scoring of the prevailing .RADIO applicant, in which ICANN assessed the “*majority*” support criterion (thereby granting .RADIO full points), while in contrast for DotMusic’s Application ICANN did not assess the “*majority*” criterion as outlined earlier in this RR:

However, the [.RADIO] applicant possesses documented support from institutions/organizations representing a majority of the community addressed.⁵⁹

The EIU also determined that all .RADIO, .HOTEL, .OSAKA, .ECO, .GAY and .SPA community applicants had “*cohesion*” for *community establishment*:

(i) The EIU established that the .RADIO had *cohesion* solely on the basis of being “*participants in this...[radio] industry*.”⁶⁰

(ii) The EIU awarded .HOTEL full points for *community establishment* for a “*cohesive*” community definition that is comprised of “*categories [that] are a logical alliance of members*.”⁶¹

Even though DotMusic similarly presents music community based on “*logical alliance*” definition that is delineated by “music categories” and “music subsets,” its Application received no points. Failure to recognize the alliance that encompasses the music community is improper;

⁵⁶ CPE Guidelines, p.22

⁵⁷ Ibid

⁵⁸ The CPE Guidelines mandate that “[t]he panel will be an internationally recognized firm or organization with significant demonstrated expertise in the evaluation and assessment of proposals in which the relationship of the proposal to a defined...community plays an important role,” CPE Guidelines, p.22

⁵⁹ .RADIO CPE, <https://icann.org/sites/default/files/tlds/radio/radio-cpe-1-1083-39123-en.pdf>, p.7, Ex.A15-1

⁶⁰ Ibid, p.2

⁶¹ .HOTEL CPE, p.2, Ex.A14

(iii) The EIU awarded full points to .OSAKA determining there was “*cohesion*” for its community because members self identify as having a tie to Osaka, or with the culture of Osaka;⁶² Similarly, DotMusic’s “*logical alliance*” is “*related to music*” (i.e. has a tie) but its Application was penalized;

(iv) The EIU awarded .ECO full points, stating that “*cohesion and awareness is founded in their demonstrable involvement in environmental activities” which “may vary among member categories.”⁶³ Conversely, the EIU penalized DotMusic with a grade of zero based on similar category variance and members that also have demonstrable involvement in music-related activities;*

(v) The improper grading and evaluation in the .MUSIC Report is even more apparent considering the recent CPE decision providing .GAY a full score under *community establishment* establishing that there is stronger *cohesion* than DotMusic based on “*an implicit recognition and awareness of belonging to a community of others who have come out as having non-normative sexual orientations or gender identities, or as their allies*”⁶⁴ (emphasis added). In contradiction, the EIU determined DotMusic’s “*logical alliance*” operating under a regulated sector that is united by copyright lacked any “*cohesion*” of belonging to a community; and

(vi) The EIU awarded .SPA the full points under *community establishment* and *nexus*, while DotMusic scored zero points and three respectively. A perfunctory comparison between DotMusic’s application and the prevailing .SPA application reveals substantial bias and contradictions. Similarly, based on ICANN’s rationale for the .SPA CPE, it is evident that the .MUSIC application should have consistently and fairly received maximum points as well. According to the .SPA application:

The spa community primarily includes:

- Spa operators, professionals and practitioners
- Spa associations and their members around the world
- Spa products and services manufacturers and distributors

...The secondary community generally also includes holistic and personal wellness centers and organizations. While these secondary community organizations do not relate directly to the operation of spas, they nevertheless often overlap with and participate in the spa community and may share certain benefits for the utilization of the .spa domain.⁶⁵

Yet, the .MUSIC Report penalized the Application under *community establishment* to the fullest extent possible (grading zero points) for lacking “*cohesion*” while the .SPA community applicant

⁶³ .ECO CPE, p.2, Ex.A17

⁶⁴ .GAY CPE, p.2, Ex.A15-2

⁶⁵ .SPA Community Application, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadapplication/123?t:ac=123>, 20A, Ex.A16-2

was given full points even though their definition of the spa community included a “secondary community” that “do[es] not relate directly” to the string. Contrary to the .MUSIC Report, DotMusic’s application is delineated and restricted to music categories and music subsets that only relate to music, yet it received no points for *community establishment*. ICANN assessed that the .SPA application’s defined community had the requisite awareness among its members because members of all the categories recognize themselves as part of the spa community by their *inclusion* in industry organizations and *participation* in their events:

Members...recognize themselves as part of the spa community as evidenced...by their inclusion in industry organizations and participation in their events.⁶⁶

In contrast, ICANN rejected DotMusic’s membership music categories and music subsets as not having the requisite awareness even though, similar to the spa community, all Music Community members also “*participate*” in music-related events and are included in music groups or music subsets as evidenced by DotMusic’s *majority* music (*logical alliance*) community support of organizations with members representing the overwhelming *majority* of music consumed globally.

Moreover, despite a general definition of the *spa community* that included entities with a non-essential, tangential relationship with the spa community and a *secondary community* that did *not relate directly* to the string, the .SPA applicant was also awarded a full score under *nexus*. In contrast DotMusic’s community *name*, the “*Music Community*,” which matches string, lost 1 point for *nexus*.

As illustrated, when compared to other CPE determinations (*See Exhibit A41*), had policies been followed and a consistent evaluation been applied, then the Application should have received maximum points that would have resulted in a passing CPE grade, a conclusion that is also supported by forty-three (43) separate independent experts (*See Exhibit A40*).

(8.4) Facts and procedural violations show that ICANN did not follow its own processes in the determination of the .MUSIC Report, including critical areas relating to *community establishment, nexus and support*. ICANN is the party responsible for ensuring quality control and a predictable, consistent and fair CPE process.

According to ICANN, “all applicants for a new gTLD registry should be evaluated against transparent and predictable criteria.”⁶⁷ There were multiple prejudicial errors and improper procedural issues with ICANN not following the AGB guidelines and requirements, including:

⁶⁶ .SPA CPE Report, Community Establishment, p.2, Ex.A16-1

⁶⁷ According to the Oxford dictionary, the word “fully” is defined as “completely or entirely; to the furthest extent” or “without lacking or omitting anything,” http://www.oxforddictionaries.com/us/definition/american_english/fully

(i) **Policy misapplication of ICANN-accepted GAC Advice adopted by ICANN before the CPE process began is a procedural error.** Contrary to the .MUSIC CPE Report, the ICANN Board accepted GAC Category 1 Advice that music is a cohesive “regulated sector.” This means that the ICANN Board also agrees that the music community has cohesion. By accepting GAC Advice and rendering a decision that music is: (i) a “*string likely to invoke a level of implied trust from consumers, and carry higher levels of risk associated with consumer harm;*” and (ii) that it is a “*string that is linked to [a] regulated sector*” that “*should operate in a way that is consistent with applicable laws,*”⁶⁸ there is reasonable expectation that ICANN would apply this policy acceptance in all evaluations that are processed to ensure transparency, predictability and consistency. This misapplication of a policy adopted by ICANN before the CPE process began is a procedural error. As such, the New gTLD Program procedural process for DotMusic’s evaluation was unpredictable, lacking both transparency and consistency.

(ii) **Not properly identifying the community definition required in 20A that was labeled as a defined term in the Application in reference to the AGB (“Community”):**

The Community is a strictly delineated and organized community of individuals, organizations and business, a “logical alliance of communities of a similar nature (“**Community**”)", that relate to music: the art of combining sounds rhythmically, melodically or harmonically (Application, 20A)

According to the AGB, the Question section for 20A explicitly states:

20A. Provide the name and full description of the community that the applicant is committing to serve. In the event that this application is included in a community priority evaluation, it will be scored based on the community identified in response to **this** question.⁶⁹

ICANN not only disregarded DotMusic’s definition from 20A, the Report does not mention or properly reference DotMusic’s definition. Instead ICANN construed its own general definition from 20D contravening the AGB’s instructions that “*community priority evaluation*” for DotMusic “*will be scored based on the community identified in response to **this** question*” (i.e. the definition identified in the Application answer to 20A not 20D). According to the .MUSIC Report:

[T]he applicant also includes in its application a more general definition of its community: “all constituents involved in music creation, production and distribution, including government culture agencies and arts councils and other complementor organizations involved in support activities that are aligned with the .MUSIC mission” (**Application, 20D**).

⁶⁸ <https://icann.org/en/system/files/correspondence/crocker-to-schneider-23jun15-en.pdf>, pp.1-2, An.5, p.8, Ex.A34

⁶⁹ AGB, Attachment to Module 2, Evaluation Questions and Criteria, <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-04jun12-en.pdf>, Question, 20A, A-14

In other words, ICANN scored DotMusic’s application relying on critically incorrect variables and parameters. In assessing DotMusic’s definition of the Music Community, ICANN misapplied material policy and permitted material procedural defects and inconsistencies in CPE evaluations to occur, resulting in an improper conclusion that DotMusic did not prevail CPE.

(iii) **Not properly identifying the name of the community to address nexus** that was labeled as a defined term in the Application in reference to the AGB (“**Name**”). While the *name* of the community “*Music Community*” was acknowledged by the EIU, it was not applied under its scoring for *nexus*:

The name of the community served is the “Music Community” (“**Community**”) ⁷⁰

*The “MUSIC” string matches the name (“Name”) of the Community and is the established name by which the Community is commonly known by others.*⁷¹ (See Application 20)

According to the Report:

The community as defined in the application is of considerable size, both in terms of geographical reach and number of members. According to the applicant:

The Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries... with a Community of considerable size with millions of constituents (Application, 20A)⁷²

As evidenced, under *nexus*, ICANN misapplied the wrong “*name*” definition by not applying the Application’s *established name* (the “*Music Community*”) inaccurately determining that the “*there is no “established name” for the applied-for string to match...for a full score on Nexus.*”⁷³ It is beyond shadow of a doubt that the established name that the Application defines and identifies, the “*Music Community*,” exactly matches the string .MUSIC.

(iv) **Not applying the alternate criterion to earn maximum points for support** that corresponds “*documented support...from institutions/organizations representing a majority of the overall community addressed.*”⁷⁴ CPE Guidelines provide that if an applicant lacks “documented authority to represent the community”⁷⁵ then the Panel should consider alternative options as follows: First, the Panel should decide whether the applicant has “documented support from the

⁷⁰ Application, 20A

⁷¹ Ibid

⁷² Report, p.4

⁷³ Report, *Nexus*, p.5

⁷⁴ AGB, *Support*, “Also with respect to “Support,” the plurals in brackets for a score of 2, relate to cases of multiple institutions/organizations. In such cases there must be documented support from institutions/organizations representing a majority of the overall community addressed in order to score 2,” 4-18

⁷⁵ CPE Guidelines, pp.16-18

recognized community institution(s)/member organization(s) to represent the community?”⁷⁶ If the applicant meets this criterion then the full two (2) points are awarded. If not, the Panel should then consider whether:

[t]here are multiple institutions/organizations supporting the application, with documented support from institutions/organizations representing a majority of the overall community addressed?⁷⁷

The Application meets this “*majority*” criterion, but this option was not applied to the .MUSIC CPE process. The Application is a global music community initiative supported by organizations with members representing over ninety-five percent (95%) of music consumed globally (an overwhelming majority),⁷⁸ yet the “majority” criterion was not assessed by ICANN in the grading of *Support*. If one excluded all the music related to DotMusic’s supporting organizations and their members, then music as we know it today would not exist. In fact the majority of music would not be available for consumption or enjoyment (**emphasis added**). The absurdity of the findings of the .MUSIC Report is further shown by another key supporter of DotMusic, NAMM, the trade association that represents nearly all the major music instrument and products’ manufacturers.⁷⁹ Without NAMM’s members’ instruments and music products, music cannot be created. Therefore, it is clear that the Application has the support of the “*majority*” of the community addressed.

In summary of (i), (ii), (iii) and (iv), the evidence supports that there is prejudicial pattern of behavior by ICANN not to follow established process and instructions. No other applicant in the New gTLD Program has provided more evidence, correspondence and research to assist ICANN with the CPE process than DotMusic has to ensure a consistent, predictable and fair evaluation in comparison to other community applicants that have prevailed. Judging from the Report’s inconsistent and contradictory rationale and ICANN’s failure to follow due process, it appears that the objective was to find ways to reject DotMusic’s Application by relying on inaccurate facts and not giving DotMusic the same benefit of the doubt given to the CPE applicants that prevailed. At ICANN’s request, DotMusic also provided detailed answers to Clarifying Questions⁸⁰ (“CQ Answers”), including significant credible and reputable evidence substantiating DotMusic’s

⁷⁶ CPE Guidelines, pp.17-18

⁸⁰ See Clarifying Questions (“CQ”), Ex.A20 and Answers to Clarifying Questions (“CQ Answers”), Ex.A21

Application’s position with respect to the *community definition, community establishment* (including “cohesion”), *nexus* and *support*. A cursory review of the CQ Answers would find support to overturn all the points deducted from the Application.

If the EIU carefully reviewed the CQ Answers then it would be clear what the *community definition (community establishment)* and the *name* of the community (*nexus*) were because it was explicitly identified multiple times.⁸¹ As explicitly outlined in the CPE Guidelines, DotMusic’s “*logical alliance*” community definition explicitly meets criteria: “*With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities.*” This is also substantiated by the AGB, which explicitly states that in the case of a community of an “*alliance of groups*” (such as DotMusic’s Application), “*details about the constituent parts are required.*”⁸² DotMusic’s community definition is a “*strictly delineated and organized logical alliance of communities that relate to music*” (Application, 20A) which unequivocally meets this criterion. Contradicting established procedure, the EIU improperly found that the “*logical alliance*” definition has no cohesion. Moreover, while DotMusic followed the AGB and CPE Guidelines and provided details on each of the delineated music categories and music subsets (i.e. the *constituent parts*) demonstrating how they form the “*logical alliance*” community definition, the Application was penalized to the maximum extent under the Report’s *community establishment* for doing so. Further, dictionary definitions for “*logical*”⁸³ and “*alliance*”⁸⁴ establish that these definitions require cohesion and the *requisite awareness*.

The degree of multitude of direct and indirect evidence make it beyond reasonable doubt that overlooking the Application’s *community definition* and *name* of the community identified was

⁸¹ See CQ Answers: The *community definition* of “logical alliance” is referred to and explicitly defined in seven (7) separate pages of the CQ Answers provided to the EIU at p.6, p.8, p.9, p.12, p.14, p.16 and p.17. Also see CQ Answers, *Community Establishment & Definition Rationale and Methodology*, Annex A (pp-22-43) defining the community as “a delineated and organized logical alliance of communities of similar nature related to music” at p.22, p.25, p.38. Also see *Annexes’* table of contents (p.20), which include *Annex D Venn Diagram for Community Definition and Nexus* that explicitly defines and identifies the *community definition* relating to *community establishment* (See Application, 20A) and the *name* of the community “*music community*” relating to *nexus*.

⁸² AGB, Attachment to Module 2, Evaluation Questions and Criteria: “*Descriptions should include: How the community is structured and organized. For a community consisting of an alliance of groups, details about the constituent parts are required,*” Notes, 20A, A-14

⁸³ Oxford Dictionaries “**logical**” definition: (i) *1. Of or according to the rules of logic or formal argument;* (ii) *1.1 Characterized by or capable of clear, sound reasoning;* (iii) *1.2 (Of an action, development, decision, etc.) natural or sensible given the circumstances, see http://oxforddictionaries.com/us/definition/american_english/logical*

⁸⁴ Oxford Dictionaries “**alliance**” definition: (i) *1. A union or association formed for mutual benefit, especially between organizations;* (ii) *1.1 A relationship based on an affinity in interests, nature, or qualities;* (iii) *1.2 A state of being joined or associated, see http://oxforddictionaries.com/us/definition/american_english/alliance*

grossly negligent resulting in a failing grade for the Application. The omission of the Application's *community definition* and *name* from the .MUSIC Report was a gross error because it would have been impossible to ignore them given that they were explicitly mentioned and identified a significantly number of times as evidenced in:

1. The Application, Q20A;
2. The Public Interest Commitments;
3. Nearly *two-thousand correspondence letters* to ICANN and the EIU;⁸⁵
4. Public comments from supporters in ICANN's microsite relating to the Application;
5. Answers to Clarifying Questions that the EIU requested (emphasis added);
6. Testimonies from over 40 independent experts submitted to ICANN and the EIU;
7. An independent Nielsen poll identifying the *community definition*;

As set forth above, ICANN and the EIU contravened the established vital CPE Guidelines and EIU Panel Process procedures.

(v) ICANN and the EIU contravened established CPE Guidelines and EIU Panel Process procedures.

As the Board should be aware, CPE requires:

Consistency of approach in scoring Applications will be of particular importance...^{86 87}

The EIU will fully cooperate with ICANN's quality control process...⁸⁸

The Panel Firm exercises consistent judgment in making its evaluations in order to reach conclusions that are compelling and defensible, and documents the way in which it has done so in each case.⁸⁹

Furthermore, ICANN affirmed in correspondence with DotMusic that "*in accordance with the CPE Panel's process document to help assure independence of the process, ICANN (either Board or staff) is not involved with the CPE Panel's evaluation of criteria, scoring decisions, or underlying analyses. The coordination of the CPE Panel, as explained in the CPE Panel Process Document, is entirely within the work of the EIU's team.*"⁹⁰ Contrary to this correspondence and the procedures outlined in the ICANN's EIU Panel Process document, ICANN also appears to play a critical role in instructing and subjectively guiding the EIU to reach certain determinations by providing the EIU

⁸⁵ See Ex.A.19-4

⁸⁶ CPE Guidelines, p.22

⁸⁷ In an email exchange between ICANN and the EIU, there is evidence of a "quality control process" for "consistency of approach in scoring across applications" (in this case the CPE process for .LLP, .LLC and GMBH), comparing them for consistency purposes with the .MLS CPE Report: "*Can we have an example (such as was provided in MLS) as to what other meanings might exist?*" See C44, ICANN_DR-00458, p.3, Ex.A27

⁸⁸ Ibid, pp.22-23

⁸⁹ EIU Panel Process, <https://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf>, p.3, Ex.A12-2

⁹⁰ See Ex.A23

with rationale, subjective redline edits, comments, presentations and other forms of communication before the final CPE determinations are released publicly.

Public documents disclosed to Dot Registry (the community applicant for .INC, .LLC, and .LLP) and its legal counsel Arif Ali, in an Independent Review Proceeding (“IRP”) against ICANN, present clear evidence that ICANN edited and materially redlined the CPE draft Determinations for .INC, .GMBH, .LLC and .LLC on the EIU’s behalf before their final release, providing substantive and subjective rationale, making substantive redlines as well as suggested edits, which is a serious violation of established procedure and puts ICANN Staff at the heart of CPE decision-making in violation of CPE established procedure.⁹¹ For example, in an email from EIU to ICANN on June 2, 2014 the EIU makes ICANN suggested changes and even asks permission from ICANN to make the same changes to a different application:

From: EIU to ICANN
Email Subject: Re: Updated draft results (4)

...I've made the suggested changes... Quick question: is there a reason why you didn't send back .INC? Should we make the same changes for that evaluation?⁹²

On June 3rd, 2014, the most revealing email shows that ICANN is involved in the decision-making process for determining CPE results, including providing subjective feedback, discussing rationale and providing presentations to the EIU:

From: ICANN to EIU
Email Subject: Re: Updated draft results (4)

...On my initial review they looked really good. We will discuss the rationale in the presentation tomorrow. I would ask we make one change to all of the reports prior to final version...⁹³

Aside from the procedural, policy and quality control process violations by both ICANN and the EIU, it appears from the hands-on instructions, discussions, guidance and more importantly subjective decision-making rationale provided by ICANN to the EIU, that the EIU clearly lacked the necessary training and expertise to make consistent judgment even though the EIU Panel Process document required that:⁹⁴

All EIU evaluators undergo regular training to ensure full understanding of all CPE requirements as listed in the Applicant Guidebook, as well as to ensure consistent judgment. This process

⁹¹ See <https://icann.org/en/system/files/files/additional-submission-exhibits-c35-13jul15-en.pdf>, C042 – C044; Also see Ex.A25, Ex.A26 and Ex.A27

⁹² See Ex.27, C044, ICANN_DR_00457, p. 2

⁹³ Ibid, C044, p. ICANN_DR_00456, p.1

⁹⁴ EIU Panel Process, p.2

included a pilot training process, which has been followed by regular training sessions to ensure that all evaluators have the same understanding of the evaluation process and procedures.

EIU evaluators are highly qualified... and have expertise in applying criteria and standardized methodologies across a broad variety of issues in a consistent and systematic manner.

ICANN and the EIU relied on false and inaccurate material information and refused to take the clearly identified and relevant information into consideration in their rationale and decision-making process, which contradicted established ICANN policies. ICANN's and the EIU's disregard of the *community definition, name* of the community and failure to apply the majority *support* criterion is quite worrisome given the time allotted to determine the Report (July 27, 2015 to February 10, 2016). In an IRP final declaration concerning the .ECO and .HOTEL community applications,⁹⁵ the IRP Panelists agreed and also echoed DotMusic's serious concerns and glaring problems with the CPE Process in general:

[A]t the hearing, ICANN confirmed that...the EIU has no process for comparing the outcome of one CPE evaluation with another in order to ensure consistency. It further confirmed that ICANN itself has no quality review or control process, which compares the determinations of the EIU on CPE applications. Much was made in this IRP of the inconsistencies, or at least apparent inconsistencies, between the outcomes of different CPE evaluations by the EIU, some of which, on the basis solely of the arguments provided by the Claimants, have some merit.⁹⁶ ...[T]he Panel feels strongly that there needs to be a consistency of approach in making CPE evaluations and if different applications are being evaluated by different individual evaluators, some form of outcome comparison, quality review or quality control procedure needs to be in place to ensure consistency, both of approach and marking, by evaluators. As was seen in the .eco evaluation, where a single mark is the difference between prevailing at CPE and not, there needs to be a system in place that ensures that marks are allocated on a consistent and predictable basis by different individual evaluators.⁹⁷ ...ICANN confirmed that the EIU's determinations are presumptively final, and the Board's review on reconsideration is not substantive, but rather is limited to whether the EIU followed established policy or procedure...ICANN confirmed that the core values, which apply to ICANN by virtue of its Bylaws, have not been imposed contractually on the EIU, and the EIU are not, in consequence, subject to them.⁹⁸ The combination of these statements gives cause for concern to the Panel.⁹⁹ The Panel fails to see why the EIU is not mandated to apply ICANN's core values in making its determinations whilst, obviously, taking into account the limits on direct application of all the core values as reflected in that paragraph of the Bylaws. Accordingly, the Panel suggests that the ICANN Board should ensure that there is a flow through of the application of ICANN's core values to entities such as the EIU.¹⁰⁰ In conclusion,...the Claimants in this IRP have raised a number of serious issues which give cause for concern and which the Panel considers the Board need to address.¹⁰¹

(vi) **Google conflict of interest.** Finally, it bears noting that the multiple process violations evidenced in this RR are further exacerbated by the conflict of interest with Google, another .MUSIC applicant.¹⁰² According to ICANN’s Panel Process document,¹⁰³ “*the following principles characterize the EIU evaluation process for gTLD applications: All EIU evaluators, including the core team, have ensured that no conflicts of interest exist.” However, Eric Schmidt, the chairman of Google, was a spokesperson,¹⁰⁴ a trustee¹⁰⁵ and on the board of Economist from November, 2013¹⁰⁶ to December, 2015.¹⁰⁷ DotMusic’s CPE process for .MUSIC conducted by the Economist began in July, 2015.¹⁰⁸ That means for about 5 months during DotMusic’s CPE evaluation the EIU had conflict of interest in its role of managing the CPE Process on behalf of ICANN. This potential conflict of interest supported by what appears to be a strong correlation in success and failure rates in CPE based on whether a community applicant was in Google’s contention set or not. As of February 10th, 2016, there were 22 community applicants that have gone through CPE.¹⁰⁹ Out of the 22 community applicants, 10 were in a contention set with Google. **None of the applicants in contention with Google prevailed CPE. The success rate to prevail CPE without Google in the contention set was approximately 42%** (i.e. 5 out of 12 applications). The EIU passed nearly half the community applications if they were not in a contention set with Google, while failing all applicants competing with Google (including DotMusic). This statistically significant difference is a substantial discrepancy following a strong correlative pattern. ICANN CEO Fadi Chehade and the Board acknowledged the significance and sensitivity of this conflict of interest at the Singapore ICANN Meeting *Public Forum* in February 2015,¹¹⁰ yet nothing was done to ensure the Economist had no conflict of interest when CPE began in July 2015.*

¹⁰² This is not the first time DotMusic reports a conflict of issue relating to .MUSIC. Doug Isenberg represented .MUSIC competitor Amazon in Community Objections (“CO”) filed by DotMusic, while also serving as a New gTLD Program Legal Rights Objection (“LRO”) panelist.

9. What are you asking ICANN to do now?

Requesters ask that the result of the .MUSIC Report be overturned by ICANN, by awarding DotMusic an additional six (6) points (or a passing grade). These are the total points that were deducted by ICANN as a result of ICANN not consistently following the CPE process and not applying the proper scoring guidelines to DotMusic’s Application in accordance with the policies and procedures defined in the AGB. In fact, ICANN engaged in numerous procedural and policy violations (including material omissions and oversights), which lead to substantial flaws in its rationale methodology and scoring process. Additionally a linear comparative analysis between DotMusic’s application and the prevailing CPE applications for .SPA, .RADIO, .ECO, .OSAKA, and .HOTEL leads to the conclusion ICANN contravened the CPE Process and did not employ “consistent judgment in making its evaluations in order to reach conclusions that are compelling and defensible, document[ing] the way in which it has done so in each of the above mentioned community application cases.”¹¹¹

DotMusic’s community Application clearly meets the **trust** claim (*See* ICANN’s 2007 Recommendations and Principles to launch the New gTLD Program, IGH CV-10) given its demonstrable global music community majority support, multi-stakeholder governance structure and music-tailored policies that serve a higher purpose, as outlined in its Application that .MUSIC:

1. Is exclusive only to legitimate members of the entire global music community;
2. Is governed and controlled by the global music community. Each music constituent community type has a governance seat on the multi-stakeholder .MUSIC Board (PAB);¹¹²
3. Is supported by organizations with members representing over 95% of music consumed globally (i.e. a majority);
4. Has enhanced safeguards to protect intellectual property, prevent cybersquatting and eliminate copyright infringement;
5. Has incorporated all IFPI intellectual property protection provisions that include policies to stop domain hopping, takedown policies in the case of piracy, authorization provisions, permanent blocks, privacy/proxy provision, true name/address mandates and trusted sender complaint policies amongst others;
6. Requires registrant validation via a mandatory two-step phone/email authentication process;
7. Protects names of famous music artists and brands by giving registration priority to those entities during a priority-based launch phase. .MUSIC also gives registration priority to community members belonging to legitimate Music Community Member Organizations to spur adoption, trust and safety;
8. Has domain naming conditions that eliminate cybersquatting and famous music brand trademark infringement. Registrants are only allowed to register their own name, acronym or “Doing Business As;”
9. Only allows legal music content and legal music usage; and
10. Will take down any domain infringing on any of its enhanced safeguards.

¹¹¹ EIU Panel Process, p.3

¹¹² *See* Expanding multi-stakeholder Board at <http://music.us/board>

Aligned with its community-based mission, policies and PIC,¹¹³ DotMusic's Application is the only applicant with music-tailored enhanced copyright protection safeguards that include:

- **Stopping Domain Hopping**: All domains that trusted senders...have sent over 10K notices against will be on the block domain list, which will continually be updated, unless there is evidence that the domain has been authorized by most of the applicable rights holders to use the content in question...
- **Take Down Policies**: DotMusic will require all registrants on music to have and implement policies that include the following: (i) upon receipt of a facially valid copyright take down notice, the registrant must search for all copies or links to access the noticed content on the site, and remove all such copies or links from its site; and (ii) it must implement a strong repeat infringer policy.... DotMusic will suspend the domain if the registrant fails to have or enforce such policies.
- **Stay Down and Repeat Offender**: DotMusic will suspend the domain if the registrant fails to have or enforce DotMusic takedown policies.Repeat offenders will be disallowed from registering.
- **Authorization**: Confirmation that "content that they otherwise have the right to post" means that the poster has express authorization to post the content.
- **Permanent Block**: Blocked domains will not be made available for registration by any third party unless there is a two third (2/3) vote by the Advisory Committee...
- **Privacy / Proxy**: Requirement that privacy/proxy services will be compliant with DotMusic's Name Selection policy (mandating that the domain is the name of the registrant, their acronym, "doing business as," description of their mission or activities) and discloses the beneficial registrant as per DotMusic's Registration Policies. If such disclosure is not made then the registrant will not be allowed to proceed with registration.
- **True name and address**: If a .MUSIC domain makes available any music owned or posted by a third party...(directly or indirectly), the domain must prominently post on the site the true name of the website operator, a contact person...phone number, physical address, and email address at which the contact person may be contacted.
- **Trusted Sender Complaint**: If .MUSIC receives a complaint from a trusted sender...then DotMusic will investigate the complaint and suspend the domain, giving the registrant reasonable time to fix compliance matter. The domain will be terminated if registrant does not fix the compliance matter or fails to respond to the complaint.¹¹⁴

The Board should note the level of support for DotMusic's Application and the Application's maximum score under its *Registration Policies* that are aligned with its community-based purpose (*Eligibility, Name Selection, Content and Use and Enforcement*¹¹⁵) as evidence that it is "in the best interest of the Internet community" for DotMusic to be awarded .MUSIC. ICANN Board/NGPC member George Sadowsky¹¹⁶ hit the nail on the head on the *only* goal that matters: "*ensuring user trust in using the DNS*" and "*to strengthen user trust*:"

The reconsideration process is a very narrowly focused instrument, relying solely upon investigating deviations from established and agreed upon process...it is limited in scope. In particular, it does not address situations where process has in fact been followed, but the results of such process have been regarded, sometimes quite widely, as being contrary to what might be best for significant or all segments of the...community and/or Internet users in general..."We are

¹¹⁶ <https://www.icann.org/profiles/george-sadowsky>, <https://www.icann.org/resources/pages/board-of-directors> and <https://www.icann.org/resources/pages/new-gtld-program-committee-2014-03-21-en>

unwittingly substituting the means for the goal, and making decisions regarding the goal on the basis of a means test. This is a disservice to the Internet user community.¹¹⁷

In a statement the week after the release of the .MUSIC Report, ICANN CEO Fadi Chehade agreed that with respect to intellectual property infringement (which is at the heart of the Application's enhanced safeguards), "*ICANN, where necessary and appropriate, shape the discussion and commit to be part of a solution. [ICANN] cannot simply put [its] head in the sand and say these issues are not of [ICANN's] concern:*"

As issues such as intellectual property infringement...are addressed in other fora, ICANN ...where necessary and appropriate, shape the discussion and debate and commit to be part of a solution in keeping with our values and mission. We cannot simply put our head in the sand and say that these issues are outside of the logical infrastructure layer in which we operate and thus not of our concern. Some solutions within the economic and societal layers of digital governance require distributed, innovative and collaborative issue-specific networks, of which the technical community depending on the issue sometimes must be a key part. We must remain part of the global conversations on digital governance, aware and ready to act when necessary.¹¹⁸

Aligned with ICANN's CEO's own statements to protect the public interest and the music community's intellectual property rights, **we request ICANN to overturn the .MUSIC CPE Report and approve DotMusic's community application** because (i) of the preponderance of evidence and support that DotMusic's application exceeds the criteria established for community priority evaluation in comparison to other prevailing CPE applicants;¹¹⁹ (ii) ICANN inaction led to multiple CPE process violations, prejudicial errors and an unfair and inconsistent quality control process when evaluating DotMusic's application (in itself and in comparison to others); and (iii) more importantly "it would be in the best interest of the Internet community" for ICANN to do so given the community application's demonstrable support that represents over 95% of music consumed globally and DotMusic's Public Interest Commitments and music-tailored *Registration Policies* (taken from a "holistic perspective" as required by ICANN Guidelines¹²⁰) that scored

¹¹⁷ Booking.com B.V. v. ICANN, ICDR Case No. 50-2014-000247 (March 3, 2015) Final Declaration at <https://www.icann.org/en/system/files/files/final-declaration-03mar15-en.pdf>, ¶ 119, Ex.A6

¹¹⁸ Fadi Chehade (ICANN CEO), <https://icann.org/en/system/files/correspondence/chehade-to-icann-board-19feb16-en.pdf>, p.6, February 19, 2016, Ex.A33

¹¹⁹ ICANN ignored DotMusic's answers to Clarifying Questions, over 40 testimonies filed by independent experts (See Appendix A, p.36, Ex.A32), an independent Nielsen poll conducted with over 2,000 participants (See Appendix B, p.38, Ex.A32), and nearly 2,000 letters of support (See Ex.A19-1, A19-2, A19-3, A19-4 and A-19-5 and <https://gtldcomment.icann.org/applicationcomment/viewcomments>), which provide clear evidence that substantiates scoring maximum points under *Community Establishment, Nexus and Support*.

¹²⁰ The scoring of the *Registration Policies* section related to *Name Selection, Content and Use and Enforcement* is the only criterion to be graded from a "holistic perspective." See CPE Guidelines, pp.12-14

maximum points. DotMusic also requests: (i) to meet with individual Board members; (ii) a meeting with the ICANN Board; and (iii) a hearing to clarify the positions expressed in this RR.

10. Please state specifically grounds under which you have the standing and the right to assert this Request for Reconsideration, and the grounds or justifications that support your request.

DotMusic is a community applicant for .MUSIC. The justifications under which DotMusic has standing and the right to assert this RR are:

- i) Predictability: [gTLDs] must be introduced in an orderly, timely and predictable way.¹²¹
- ii) Breach of Fundamental Fairness: Basic principles of due process to proceeding were violated and lacked accountability by ICANN, including adequate quality control;¹²²
- iii) Conflict of Interest Issues;
- iv) Failure to Consider Evidence filed; and
- v) Violation of ICANN Articles of Incorporation/Bylaws:
 - 1. Introducing and promoting competition in the registration of domain names where practicable and beneficial in the public interest.¹²³
 - 2. Preserving and enhancing the operational stability, reliability, security, and global interoperability of the Internet.¹²⁴
 - 3. Employing open and transparent policy development mechanisms that (i) promote well-informed decisions based on expert advice, and (ii) ensure that those entities most affected can assist in the policy development process.¹²⁵
 - 4. Making decisions by applying documented policies neutrally and objectively, with integrity and fairness.¹²⁶
 - 5. Acting with a speed that is responsive to the needs of the Internet while, as part of the decision-making process, obtaining informed input from those entities most affected.¹²⁷
 - 6. Remaining accountable to the Internet community through mechanisms that enhance ICANN's effectiveness.¹²⁸
 - 7. While remaining rooted in the private sector, recognizing that governments and public authorities are responsible for public policy [e.g. copyright law and setting certain royalty rates for music's regulated sector] and duly taking into account governments' or public authorities' recommendations.¹²⁹

¹²¹ Final Issue Report on New gTLD Subsequent Procedures, <https://gnso.icann.org/en/issues/new-gtlds/subsequent-procedures-final-issue-04dec15-en.pdf>, at pp.23-24

¹²² JAS established that “*the existence of a visible and well-publicized proactive quality program properly incented all evaluation panel vendors to be appropriately cognizant of evaluation consistency, accuracy, and process fidelity, and perform accordingly.*” The .MUSIC CPE lacked a “*proactive quality control process*” deficient of the Initial Evaluation “*unified approach,*” which “*substantially mitigated the risk of isolation and inconsistent or divergent evaluations,*” ICANN Initial Evaluation Quality Control Program Report, <https://newgtlds.icann.org/en/program-status/application-results/ie-quality-program-26aug14-en.pdf>, p.16. ¹²⁷ ICANN Bylaws, Art. I, § 2.9

¹²⁸ ICANN Bylaws, Art. I, § 2.10

¹²⁹ ICANN Bylaws, Art. I, § 2.11

8. Non-discriminatory treatment: ICANN shall not apply its standards, policies, procedures, or practices inequitably or single out any particular party for disparate treatment unless justified by substantial and reasonable cause, such as the promotion of effective competition.¹³⁰
9. Transparency: ICANN and its constituent bodies shall operate to the maximum extent feasible in an open and transparent manner and consistent with procedures designed to ensure fairness.¹³¹

11. Are you bringing this Reconsideration Request on behalf of multiple persons or entities?

Yes

11a. If yes, Is the causal connection between the circumstances of the Reconsideration Request and the harm the same for all of the complaining parties? Yes.

Do you have any documents you want to provide to ICANN? Yes, see Exhibits

Terms and Conditions for Submission of Reconsideration Requests:

The Board Governance Committee has the ability to consolidate the consideration of Reconsideration Requests if the issues stated within are sufficiently similar. The Board Governance Committee may dismiss Reconsideration Requests that are querulous or vexatious. Hearings are not required in the Reconsideration Process, however Requestors may request a hearing. The BGC retains the absolute discretion to determine whether a hearing is appropriate, and to call people before it for a hearing. The BGC may take a decision on reconsideration of requests relating to staff action/inaction without reference to the full ICANN Board. Whether recommendations will issue to the ICANN Board is within the discretion of the BGC. The ICANN Board of Director's decision on the BGC's reconsideration recommendation is final and not subject to a reconsideration request.

Respectfully Submitted,

Answers to Clarifying Questions

The objective of this Response to the EIU and ICANN is to answer the Clarifying Question (A – E) that was received from ICANN and the EIU on September 29th, 2015. All documentation and evidence provided by DotMusic is within the scope of the Clarifying Question in the areas of *Community Establishment* (Criterion 1) and the *Nexus between Proposed String and Community* (Criterion 2) consistent with the language in DotMusic’s Application¹ and consistent with previous CPE Determinations.²

DotMusic will also provide compelling evidence that the methodology adopted to define the community relating to the Clarifying Question was not construed because DotMusic:

- 1) Used the industry standard methodology using NAICS codes adopted by several of the most prominent music cities (Georgia,³ Nashville,⁴ Seattle,⁵ Detroit,⁶ Austin,⁷ Chicago,⁸ Cleveland⁹ and Memphis¹⁰) in defining, clustering and assessing their local music community’s impact with organized and delineated criteria;
- 2) Used the delineation recommendations by UNESCO of using an organized, delineated and symbiotic cluster of industry classification codes, “since no single standard industry classification adequately encompasses the diversity of musical activity and commerce; rather, it is possible to identify several components which taken together provide a delineation of the extent and coverage of the term “music industry”. This can be done by identifying...groups of stakeholders”¹¹ (emphasis added);

¹¹ UNESCO, The Global Alliance for Cultural Diversity, Division of Arts and Cultural Enterprise, The Music

- 3) Fine-tuned its Registration Policies to calibrate and offset the inefficiencies and deficiencies of the NAICS code methodology of Delineation to ensure there is no substantial overreaching (at either side of the spectrum) in order to completely match the Nexus of the string consistent with DotMusic’s community definition (i.e. to ensure only entities related to the string with the requisite awareness of the community defined are included and not to exclude any entity that has a legitimate purpose in addressing the community represented by the string);
- 4) Conducted a Nielsen/Harris poll with over two-thousand (2,000) diverse participants to ensure that the general public would clearly associate the string with the community defined by DotMusic (See Annex H);
- 5) Provided forty-three (43) expert testimonies agreeing that the Delineation and Nexus of the community defined matches the string as provided by DotMusic in its application (See Annex K);
- 6) Provided support letters from nearly all the most globally-recognized music organizations that comprise of a majority of the global music community as defined and represent over 95% of global music consumed, including organizations, such as the IFPI that *mainly* dedicated to the community.¹² These relevant, non-negligible organizations also provide compelling evidence that DotMusic’s definition is not construed and is indeed a definition supported by these endorsing organizations.

DotMusic used the NAICS Codes subset codes, allowing members to “self-identify” their “music” membership with “music” subsets of the NAICS. This standard NAICS methodology has been adopted by researchers analyzing the music industries, including city-based music industries. (See Annex A for further explanation and detailed analysis on the methodology and rationale adopted as well as Annexes I and J for a complete overview and analysis of the DotMusic application with respect to the CPE Guidelines and the Applicant Guidebook if more clarification is needed).

Industry in the New Millenium: Global and Local Perspectives, October 2002,

¹² For example, when the IFPI files to take down an illegal song on a pirate site, the IFPI also performs the function of protecting other specific rights that may be attributed to other rights holders as well, such as the publishers or songwriters that may also be associated with the song. This symbiotic and overlapping relationship further highlights why the IFPI is an organization *mainly* dedicated to the community defined (See <http://ifpi.org/what-we-do.php> and [https://www.prsformusic.com/SiteCollectionDocuments/Membership/The Music Universe.pdf](https://www.prsformusic.com/SiteCollectionDocuments/Membership/The_Music_Universe.pdf)). Furthermore, the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings...which enables recordings to be uniquely and permanently identified across different services, across borders, or under different licensing deals (See <http://isrc.ifpi.org/en/>).

Answer to Clarifying Question #1: A

The Panel notes that for the following member categories in Table 2 below, the official NAICS code definition refers to a broader industry group or an industry group that is not identical to the one cited by the applicant. The Panel would like to clarify whether all entities identified by the NAICS code (see “Official 2012 NAICS definition:” in the table below) are included in the applicant’s defined community. If all entities included in the official NAICS definition are not included in the proposed community, please clarify the delineation of members and non-members and how that will be determined.

Entities identified by the NAICS code (see "Official 2012 NAICS Definition" in Table 2) are included in the manner that DotMusic's application limits them solely to the Music Community. DotMusic addressed the NAICS Codes and ensured that only "**music**-related" entities that are organized and delineated by the NAICS codes may be members of the "Community" defined. It is noted that neither the Applicant Guidebook (the "AGB") nor the CPE Guidelines provided a concrete meaning for "define" and "definition" (emphasis added). Furthermore, the AGB requires only that the constituents of a community be members of that community. There was no requirement that members of a community "act" as a community nor does the AGB say anything about how community members must "associate themselves." The AGB also has no language disallowing membership based on participation in the community defined.¹³ Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include "a logical alliance members based on categories that are solely community-related" (i.e. in the case of music, they are music-related),¹⁴ "self-identification" in a community (e.g. identifying that they have a tie with the community) or those who have a legitimate purpose in addressing the community (e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose).¹⁵ The AGB also allows for different types of membership just as long as there demonstrable involvement in community-related activities that may vary among member constituent types.¹⁶

As such, DotMusic used the industry standard methodology for defining music industries using NAICS codes, allowing members to "self-identify" their "music" membership with solely the "**music**" subsets of the NAICS codes that only relate to "**music**" (emphasis added) so there is no overreaching whatsoever and the community defined and delineated matches the "**music**" string. In order to match the string with

¹³ For example, in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community" (emphasis added) (Pg.2).

¹⁴ For example, in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members" (emphasis added) (Pg. 2)

¹⁵ For example, in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: [...] Entities, including natural persons who have a legitimate purpose in addressing the community" (emphasis added) (Pg. 2).

¹⁶ For example, in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories" (emphasis added) (Pg. 2).

the community defined it was vital to include all music constituent types (See Annex D, Venn Diagram for Community Definition and Nexus) – including complementary entities e.g. government culture agencies, arts councils and/or government agencies related to copyright -- that are considered essential for the smooth functioning of the music (industry) community and its sector’s regulation (since music is a copyright industry). As stated in DotMusic’s application, all legitimate Community members are included in the definition:

The Music Community encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders.” (Answer to Question 20C)

The only NAICS classifications that were delineated by DotMusic to define the community were those that were considered essential for “music.” (For a more detailed analysis on the rationale and methodology for selecting the NAICS codes sub-sets in relation to music (industry) community defined consistent with the AGB and CPE Guidelines, see Annex A, Community Establishment & Definition Rationale and Methodology).

By way of example NAICS Code 541211 (Offices of Certified Public Accountants) is too broad and is therefore limited by DotMusic to solely “Music Accountants” who would have the requisite awareness of and association with the Community. In this case, only “music accountants” that were members of an mCMO would be delineated as members.

For members with requisite awareness that are also part of existing Music Community Member Organizations (mCMOs), the Application provides a Landrush registration (members of mCMO’s could also register their domains during General Registration as well as indicated below):

Music Community Member Organization (MCMO) Landrush for registrants with demonstrated MCMO memberships...

MUSIC COMMUNITY MEMBER ORGANIZATION (MCMO) LANDRUSH LAUNCH

This is the second phase of .MUSIC domain registration. It is a limited-time period reserved for members of DotMusic-accredited music Community Member Organizations (mCMO). (Application Answer to Question 18(B)(vi) & 20(e))

The mCMO domain allocation method during the Landrush phase was created by DotMusic to allow Community members to register through established Community organizations. During the General Registration phase the TLD is open to all Community members for registration, but also restricted by Eligibility, Use and other Policies, including enhanced safeguards. (Application Answer to Question 20B).

Alternatively, if a “music accountant” is not a member of an mCMO but has a legitimate purpose in addressing the music community, then that “music accountant” could be delineated by demonstrating requisite awareness and identification with the Community by:

- 1) Selecting that corresponding with the NAICS Code 541211 (and as limited by DotMusic to solely “Music” Accountants), and;

2) Certifying acceptance to the DotMusic Registration Policies aligned with the community-based goals and purpose. This certification aligned with community's goals applies to all Community members, including mCMO members:

DotMusic has incorporated enhanced policies to ensure only eligible members of the Music Community who comply with the values, purpose and mission of the TLD can participate; to ensure domains are used in a manner benefitting the Community; to protect intellectual property; and to safeguard domains from malicious conduct and copyright infringement.

USE POLICY

This policy is in place for .MUSIC registrants regardless of the applicable launch phase. It is developed with extensive participation of Music Community members; tailored to meet the specific needs of the Music Community; and solve issues currently existing in the Music Community related to intellectual property infringement and malicious conduct.

The policy is incorporated in the registration agreement for all .MUSIC registrants. DotMusic may modify or revise these use policies at any time...Registrants that do not accept and abide by the registration agreement are disqualified from domain registrations. (Application Answer to Question 20e)

Only those that are defined by and identify with the sub-set of the NAICS code that relates to “music” would qualify as a member of the Community (See Annex B, Venn Diagrams for Clarifying Question A). These music community-tailored Policies ensure that members have the requisite awareness of belonging to the community. This means entities or individuals with a casual, tangential relationship with the string music are excluded (emphasis added) i.e. only entities or individuals that have the requisite awareness of the Community and have taken affirmative steps to associate with either an mCMO or self-identify with the appropriate sub-set of a corresponding NAICS group are delineated as members (emphasis added).

The Registration Process identification process (See Annex G, Registration Process Flowchart for more information) is aligned with the member's requisite awareness of the community defined “logical alliance of communities related to music.” After their self-identifying, the Registry will place the registrant/community member into the corresponding premium channel(s) sorted according to music delineation type. Most importantly, all registrants/community members are governed by the applicant's Community Use Policies and Restrictions that are related to music.

Answer to Clarifying Question #1: B

For the member categories noted in Table 3 below, the applicant provided a corresponding NAICS code, which the Panel could not find listed in an official database³. Please clarify the appropriate code for each member category. If applicable, please also clarify, as per question A, if the official NAICS code definition matches the application's member category, and if not, clarify the delineation of members and non-members and how that will be determined.

<i>Table 3 #</i>	<i>Application's member category</i>	<i>Corresponding NAICS Code Cited by Application</i>
2	Independent music artists, performers, arrangers & composers	711500
11	Music stores	451220
16	Music agents & managers	711400
17	Music promoters & performing arts establishments	711300
20	Music performing arts companies	711100
22	Music record reproducing companies	334612

As clarified in the **Answer to Clarifying Question #1A** above, the official NAICS code definition refers to a broader industry group than that delineated by DotMusic in its Application. As clarified in #1A, members of the delineated community defined only include the “**music**” subset of each NAICS code set as cited in the Application. As the application indicates, every NAICS code is preceded by the applied-for string “**music**” to ensure that the Nexus of the string matches the community defined (i.e. a strictly delineated and organized community of individuals, organizations and business, a “logical alliance of communities of a similar nature” that relate to music (emphasis added): the art of combining sounds rhythmically, melodically or harmonically. (Question 20A)) and to exclude entities that have a no association or a non-essential relationship with “music” i.e. those casual entities that do not have the requisite awareness or recognition of the community are ineligible for registration.

DotMusic used official NAICS codes provided by the United States Department of Labor, Bureau of Labor Statistics (BLS).¹⁷. The appropriate codes and BLS references to Table 3 are:

2 - Independent music artists, performers, arrangers & composers 711500

See http://www.bls.gov/oes/current/naics4_711500.htm and http://www.bls.gov/cew/doc/titles/industry/industry_titles.htm

11 - Music stores 451220

See <http://www.bls.gov/ppi/ppiretailtrade.htm>, http://www.bls.gov/cew/doc/titles/industry/industry_titles.htm,

¹⁷ <http://www.bls.gov>

<http://www.dataplace.org/metadata?cid=112346&all=1> and
<http://naicscode.org/NAICSCode/451220/Prerecorded-Tape-Compact-Disc-and-Record-Stores>

According to the *United States Department of Labor, Bureau of Labor Statistics* (See <http://www.bls.gov/ppi/ppiretailtrade.htm>):

NAICS 443142—Electronic stores are establishments that retail a general line of new consumer-type electronic products; including radios, televisions, computers, computer peripherals, prepackaged computer software, cameras, photographic equipment, photographic supplies, prerecorded audio and video tapes, compact discs (CDs), digital video discs (DVDs), cellular phones and cellular phone plans.

NAICS 443142 is an aggregate of the following 2007 NAICS industries: -443112—Radio, Television, and Other Electronics Stores -443120—Computer and Software Stores -443130—Camera and Photographic Supplies Stores -451220—Prerecorded Tape, Compact Disc, and Record Stores prerecorded audio and video tapes, compact discs (CDs), digital video discs (DVDs), cellular phones and cellular phone plans.

NAICS 443142 is an aggregate of the following 2007 NAICS industries:

- *443112—Radio, Television, and Other Electronics Stores*
- *443120—Computer and Software Stores*
- *443130—Camera and Photographic Supplies Stores*
- *451220—Prerecorded Tape, Compact Disc, and Record Stores*

For more clarification concerning membership delineation and references to the appropriate NAICS codes (including link references) also refer to **Annex C, Venn Diagrams for Clarifying Question B.** and **Answer to Clarifying Question #1A.**

Answer to Clarifying Question #1: C

The last category listed by the applicant is “Music fans/clubs” (see #42 in Table 1). The Panel would like to clarify the individuals and/or entities that would be included in this category.

DotMusic clarifies that only fans that belong to strictly delineated and organized “music fan clubs” are eligible for membership and included in the category. In other words, only “music fan club” entities that have the requisite awareness of the community defined (“a strictly delineated and organized community of individuals, organizations and business, a “logical alliance of communities of a similar nature” that relate to music: the art of combining sounds rhythmically, melodically or harmonically) are members. Casual fans, i.e. those who do not have the requisite awareness of belonging to the community defined, are not eligible.

Some examples to clarify member eligibility include those that belong to recognized music fan clubs or music fan-funding organizations:

The Bryan Adams Fan Club (See <http://bryan-adams-fan-club.vancouver.ca/amfibi.company/ca/c/693462-bryan-adams-fan-club> and <http://www.manta.com/ic/mvqr3rf/ca/bryan-adams-fan-club>).

Ten Club – Pearl Jam’s Official Fan Club (See <https://pearljam.com/tenclub>)

Compass Records Street Team (See <https://compassrecords.com/street-team.php>)

Linkin Park Street Team (See <http://linkinpark.com/users/lpuhq/blogs/6065651>)

PledgeMusic (See <http://www.pledgemusic.com/site/terms>)

For more examples, see **Annex E, Music Fan Club Examples for Clarifying Question C.**

Answer to Clarifying Question #1: D

The application also makes reference to the following description of its community:

.MUSIC relates to the Community by representing all constituents involved in music creation, production and distribution, including government culture agencies and arts councils and other complementor organizations involved in support activities that are aligned with the .MUSIC mission. (application, 20(d))

The Community Priority Evaluation panel would like to clarify to which entities the application is making reference to when citing “other complementor organizations involved in support activities” and whether such organizations fall under one or more of the categories explicitly mentioned in Table I.

According to the CPE Guidelines with respect to Nexus, there is no AGB language disallowing a community definition and delineation that may include complementary entities and subsets of the community, especially if they are essential components of the community defined (emphasis added).¹⁸ Furthermore, according to the AGB and CPE Guidelines, “scoring of applications against these subcriteria will be done from a holistic perspective, with due regard for the particularities of the community explicitly addressed.”

In order to match the string with the community defined it was vital to include all music constituent types – including complementary entities e.g. government culture agencies, arts councils and/or government agencies related to copyright -- that are considered essential for the smooth functioning of the music (industry) community and its sector’s regulation because music is a copyright industry (See Annex F, Music Sector Background: Music is a Copyright Industry for Clarifying Question D).

As such “complementary organizations involved in support activities...aligned with the .MUSIC mission” are vital to the Nexus of the string to ensure the community is “complete” taking into consideration the primary Oxford Dictionary definition of “complement” defined as “a thing that completes”¹⁹ ²⁰ i.e. that makes whole or in the case of *Nexus*, it matches completely (emphasis added). According to the Applicant Guidebook and CPE Guidelines, “to receive the maximum score for Nexus, the applied-for string must match the name of the community.”

¹⁸ For example, in the prevailing .SPA CPE Determination, the EIU awarded full points under Nexus stating that “the community as defined by the application also includes entities which are not spas or spa associations, such as distributors and providers of spa-related products and services. As described by the applicant, these affiliated services align closely with core spa services, and nothing in the application suggests that these entities are a non-essential component of the spa community (emphasis added). Furthermore, this category of the spa community is also included in the membership of organizations such as the International Spa Association. This subset of the community, along with the principal spa community, therefore, meets the requirement for “match” with regard to Nexus” (emphasis added) (Pg. 4 and Pg. 5).

¹⁹ http://www.oxforddictionaries.com/us/definition/american_english/complement

²⁰ In music terms, “complement” is defined as “the musical interval required with a given interval to complete the octave,” <http://www.merriam-webster.com/dictionary/complement>

Music is a copyright industry and a regulated sector. As such, the Community defined is subject to government regulation of similar nature (consistent with the definition of the community, which is a logical alliance of communities related to music are of “similar nature.” As such, “complementor organizations involved in support activities” related to the regulation and/or dedicated promotion of music are eligible for registration.

While in other industries some complementors may be considered peripheral industries, the true test of a “matching” complementor is whether the complementor makes the defined community “whole” in alignment with the definition of “complement.” **Music** is a copyright industry so complementors, such as related government agencies, are essential. If you remove “copyright” and government regulation then the music (industry) community would cease to function as we know it today.

The DotMusic Application did not identify a category under which the “complementor organizations” fall under because the only complementor organization – the International Federation of Arts Councils and Culture Agencies, which is the only organization representing government culture agencies and arts councils globally – is already an mCMO and an essential stakeholder in the community defined as stated in the DotMusic application.²¹

The corresponding NAICS code for IFACCA is *926110 - Cultural and arts development support program administration* which is covered under *Administration of General Economic Programs*.²² DotMusic has not identified any other such complementor constituent type so a NAICS classification code was not necessary for its application. If another such complementary organization exists then they would apply as an mCMO to qualify for a registration.²³

²¹ DotMusic’s application states: “DotMusic will be working closely with the International Federation of Arts Councils and Culture Agencies, with national members from over 70 countries comprised of governments’ Ministries of Culture and Arts Councils covering all continents, to ensure country names protection and the promotion of government-related cultural and music initiatives.” (Answer to Question 22) Customized government-tailored policies (such as appeals processes) have also been created to illustrate the significance of these complementor entities: “DotMusic will implement multiple dispute resolution policies to address dispute over any names not reserved by the above provisions; see response to question #20e and #28 and #29...DotMusic will ensure appropriate procedures to allow governments, public authorities or IGO’s to challenge abuses of names with national or geographic significance at the second level. (Answer to Question 22)

²² http://www.bls.gov/cew/doc/titles/industry/industry_titles.htm

²³ See <http://music.us/mcmo> and http://music.us/DotMusic_Music_Community_MCMO_Application.pdf for mCMO requirements and application

Answer to Clarifying Question #1: E

In addition to the categories of members referred to above, the application also states the following:

Registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership” (application, 20(a))

The application goes on to cite four provisions related to the above, including: “(i) Qualification criteria as delineated by recognized NAICS codes corresponding to Community member classification music entity types...” (application, 20(a)).

The Community Priority Evaluation panel would like to clarify how “registrants will be verified” and what kind “formal membership” will be required.

As stated **Answer to Clarifying Question #1A**, music registrants may be verified if they are members of Music Community Member Organizations (mCMOs). As such, they will have the requisite awareness of belonging to the community defined. The Application provides a Landrush registration (members of mCMO’s could also register their domains during General Registration as well as indicated below):

Music Community Member Organization (MCMO) Landrush for registrants with demonstrated MCMO memberships...

MUSIC COMMUNITY MEMBER ORGANIZATION (MCMO) LANDRUSH LAUNCH

This is the second phase of .MUSIC domain registration. It is a limited-time period reserved for members of DotMusic-accredited music Community Member Organizations (mCMO). (Application Answer to Question 18(B)(vi) & 20(e))

The mCMO domain allocation method during the Landrush phase was created by DotMusic to allow Community members to register through established Community organizations. During the General Registration phase the TLD is open to all Community members for registration, but also restricted by Eligibility, Use and other Policies, including enhanced safeguards. (Application Answer to Question 20B).

Alternatively, if a Community member is not a member of an mCMO but has a legitimate purpose in addressing the music community, then that Community member could be delineated by demonstrating requisite awareness and identification with the Community by:

- 1) Selecting corresponding NAICS subset code (which is limited by DotMusic to solely “Music” constituents), and;

2) Certifying acceptance to the DotMusic Registration Policies aligned with the community-based goals and purpose. This certification aligned with community's goals applies to all Community members, including mCMO members:

DotMusic has incorporated enhanced policies to ensure only eligible members of the Music Community who comply with the values, purpose and mission of the TLD can participate; to ensure domains are used in a manner benefitting the Community; to protect intellectual property; and to safeguard domains from malicious conduct and copyright infringement.

USE POLICY

This policy is in place for .MUSIC registrants regardless of the applicable launch phase. It is developed with extensive participation of Music Community members; tailored to meet the specific needs of the Music Community; and solve issues currently existing in the Music Community related to intellectual property infringement and malicious conduct.

The policy is incorporated in the registration agreement for all .MUSIC registrants. DotMusic may modify or revise these use policies at any time... Registrants that do not accept and abide by the registration agreement are disqualified from domain registrations. (Application Answer to Question 20e)

Only those that are defined by and identify with the sub-set of the NAICS code that relates to “music” would qualify as a member of the Community. These music community-tailored Policies ensure that members have the requisite awareness of belonging to the community. This means entities or individuals with a casual, tangential relationship with the string music are excluded (emphasis added) i.e. only entities or individuals that have the requisite awareness of the Community and have taken affirmative steps to associate with either an mCMO or self-identify with the appropriate sub-set of a corresponding NAICS group are delineated as members (emphasis added).

The Registration Process identification process (See Annex G, Registration Process Flowchart for more information) is aligned with the member's requisite awareness of the community defined “logical alliance of communities related to music.” After their self-identifying, the Registry will place the registrant/community member into the corresponding premium channel(s) sorted according to music delineation type.

Another step that is mandatory is DotMusic's 2-Step Authentication that validates members:

REGISTRY DATA VALIDATION: DotMusic will validate elements of the received WHOIS data as a requirement for domain registration, also providing access to Premium Channels, such as the registrant's:

- Email address through validation links

- Phone number through validated PIN-codes (18B)

REGISTRY DATA VALIDATION

While DotMusic will hold the thick WHOIS data provided through registrars, we will also validate elements of the received WHOIS data:

1. The registrant's email address through validation links
2. The registrant's phone number through validated PIN-codes

Upon successful completion of these two steps, DotMusic will provide the registrant their Music Community membership details; used to join/access the Premium Channels. All future .MUSIC domains associated with the registrant-verified email address will not be re-verified. (Answer to Question 20e)

As stated in the **Answer to Clarifying Question #1A**, the AGB also has no language disallowing membership based on participation in the community defined.²⁴ Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include “a logical alliance members based on categories that are solely community-related” (i.e. in the case of music, they are music-related),²⁵ “self-identification” in a community (e.g. identifying that they have a tie with the community) or those who have a legitimate purpose in addressing the community (e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose).²⁶ The AGB also allows for different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types.²⁷

As such, DotMusic used the industry standard methodology for defining music industries using NAICS codes, allowing members to “self-identify” their “music” membership with solely the “music” subsets of the NAICS codes that only relate to “music” (emphasis added) so there is no overreaching whatsoever and the community defined and delineated matches the “music” string. In order to match the string with the community defined it was vital to include all music constituent types – including complementary

²⁴ For example, in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is “clearly defined” and that, solely on the basis of being “participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community” (emphasis added) (Pg. 2).

²⁵ For example, in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of “categories [that] are a logical alliance of members” (emphasis added) (Pg. 2)

²⁶ For example, in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: “[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: [...] Entities, including natural persons who have a legitimate purpose in addressing the community” (emphasis added) (Pg. 2).

²⁷ For example, in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that “the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who “demonstrate active commitment, practice and reporting.” This involvement may vary among member categories” (emphasis added) (Pg. 2).

entities e.g. government culture agencies, arts councils and/or government agencies related to copyright -- that are considered essential for the smooth functioning of the music (industry) community and its sector's regulation (since music is a copyright industry). The only NAICS classifications that were delineated by DotMusic to define the community were those that were considered essential for "music." (For a more detailed analysis on the rationale and methodology for selecting the NAICS codes sub-sets in relation to music (industry) community defined consistent with the AGB and CPE Guidelines, see Annex A, Community Establishment & Definition Rationale and Methodology).

Furthermore, according to the AGB and CPE Guidelines, "scoring of applications against these subcriteria will be done from a holistic perspective, with due regard for the particularities of the community explicitly addressed." Under Community Establishment, the AGB and CPE Guidelines pertaining to Delineation outline a "non-exhaustive list denot[ing] elements of straight-forward member definitions: fees, skill and/or accreditation requirements, privileges or benefits entitled to members, certifications aligned with community goals, etc.

DotMusic's application also meets these additional "formal membership" criteria:

- (i) Fees e.g. Paid members mCMOs e.g. members of the The Recording Academy
- (ii) Skill and/or accreditation requirements e.g. a music creator/musician/songwriter, manager, accountant, lawyer
- (iii) Privileges or benefits entitled to members e.g. royalties collected (which are government regulated because music is copyright industry and a regulated sector); free exposure/marketing/branding through free mCMOs (such as Reverbnation).

Other benefits and privileges to Community members are inclusion in the DotMusic Premium Channels and the Song Registry:

INNOVATIVE PREMIUM NAMES RESERVATIONS:

DotMusic will reserve premium names that will be used in an innovative manner to benefit eligible members including the development of Premium Channels, such as genres (e.g Rock.MUSIC), that will define the locale web of music, promote Community members based on their classification/category, and improve music discovery. (Answer to Question 20e)

Developing the Music Community Social Network Premium Domain Channels (Premium Channels) sorted by NAICS classifications and category types e.g. genre/language. They will leverage Search Engine Optimization (SEO) best practices to improve .MUSIC site search result rankings. The objective is for .MUSIC domains to signal a badge of trust that enables search engines to provide music consumers more relevant and safer search results while reducing infringing and unlicensed rogue websites. Premium Channel development will also include a global Song Registry. (Answer to Question 20c)

- (iv) Certifications aligned with community goals e.g. All Community members must certify their agreement to the music-tailored DotMusic Registration Policies:

DotMusic has incorporated enhanced policies to ensure only eligible members of the Music Community who comply with the values, purpose and mission of the TLD can participate; to ensure domains are used in a manner benefitting the Community; to protect intellectual property; and to safeguard domains from malicious conduct and copyright infringement.

USE POLICY

This policy is in place for .MUSIC registrants regardless of the applicable launch phase. It is developed with extensive participation of Music Community members; tailored to meet the specific needs of the Music Community; and solve issues currently existing in the Music Community related to intellectual property infringement and malicious conduct.

The policy is incorporated in the registration agreement for all .MUSIC registrants. DotMusic may modify or revise these use policies at any time...Registrants that do not accept and abide by the registration agreement are disqualified from domain registrations. (Answer to Question 20e)

Dispute mechanisms, compliance efforts, and data validation processes will provide an added level of trust. (Answer to Question 18a)

As indicated, with registration, community members are mandated to certify that they align with the community goals and mission and music-tailored registration policies, including to certify that their activity will only relate to legal music activities and content (See Content and Use policy) and be subject to the music-tailored MPCIDRP, including dispute resolution and appeals processes. As mentioned earlier, all registrants must also go through 2-Step authentication to certify authenticity and to increase safety and trust (e.g. to eliminate impostors, impersonators and/or cybersquatters). These processes also improve quality control with respect to enforcing the Name Selection policy. Other quality control policies that are part of the certification agreement include the Content and Use policy that only allows legal music content and use i.e. no one can use a .MUSIC domain without music-related content. This will eliminate peripheral entities or entities that have no association with music. Also, registrants must certify that they will not have a parked page, which eliminates cybersquatters and domain speculators/investors and ensures higher quality, music related content.

ANNEX A

Community Establishment & Definition Rationale and Methodology

Neither the Applicant Guidebook (the “AGB”) nor the CPE Guidelines provided a concrete meaning for “define” and “definition” (emphasis added). Furthermore, the AGB requires only that the constituents of a community be members of that community. There was no requirement that members of a community “act” as a community nor does the AGB say anything about how community members must “associate themselves.” The AGB also has no language disallowing membership based on participation in the community defined.¹ Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include “a logical alliance members based on categories that are solely community-related” (i.e. in the case of music, they are music-related),² “self-identification” in a community (e.g. identifying that they have a tie with the community) or those who have a legitimate purpose in addressing the community (e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community’s mission and purpose).³ The AGB also allows for different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types.⁴ In addition, according to the CPE Guidelines with respect to Nexus, there is no AGB language disallowing a community definition and delineation that may include complementary entities and subsets of the community, especially if they are essential components of the community defined (emphasis added).⁵

As such, DotMusic used the industry standard methodology for defining music industries using NAICS codes, allowing members to “self-identify” their “music” membership with solely the “music” subsets of the NAICS codes that only relate to “music” (emphasis added) so there is no overreaching whatsoever and the community defined and delineated matches the “music” string. In order to match the string with the community defined it was vital to include all music constituent types – including complementary entities e.g. government culture agencies, arts councils and/or government agencies related to copyright -- that are considered essential for the smooth functioning of the music (industry) community and its sector’s regulation (since music is a copyright industry). The only NAICS classifications that were delineated by DotMusic to define the community were those that were considered essential for “music.”

¹ For example, in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is “clearly defined” and that, solely on the basis of being “participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community” (emphasis added) (Pg.2).

² For example, in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of “categories [that] are a logical alliance of members” (emphasis added) (Pg. 2)

³ For example, in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: “[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: [...] Entities, including natural persons who have a legitimate purpose in addressing the community” (emphasis added) (Pg. 2).

⁴ For example, in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that “the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who “demonstrate active commitment, practice and reporting.” This involvement may vary among member categories” (emphasis added) (Pg. 2).

⁵ For example, in the prevailing .SPA CPE Determination, the EIU awarded full points under Nexus stating that “the community as defined by the application also includes entities which are not spas or spa associations, such as distributors and providers of spa-related products and services. As described by the applicant, these affiliated services align closely with core spa services, and nothing in the application suggests that these entities are a non-essential component of the spa community (emphasis added). Furthermore, this category of the spa community is also included in the membership of organizations such as the International Spa Association. This subset of the community, along with the principal spa community, therefore, meets the requirement for “match” with regard to Nexus” (emphasis added) (Pg. 4 and Pg. 5).

This standard NAICS methodology has been adopted by the most prominent music industries and cities studies ever conducted (Georgia,⁶ Nashville,⁷ Seattle,⁸ Detroit,⁹ Austin,¹⁰ Chicago,¹¹ Cleveland¹² and Memphis¹³) in defining, clustering and assessing their local music community's impact with organized and delineated criteria, which is consistent with the Applicant Guidebook with respect to Delineation and CPE Determinations.¹⁴

This NAICS methodology for defining the music (industry) community is standard in research studies:

Several studies have collected data regarding urban music scenes and their economic impact on Metropolitan Statistical Areas (MSAs), including Austin (Texas), Seattle (Washington), Nashville (Tennessee), Atlanta (Georgia), and Memphis (Tennessee). In general, these estimates tally businesses and people associated with music scenes through various sources, and use a multiplier to estimate the economic impact of these businesses and individuals. Edmiston and Thomas (2004) use commercial data from ReferenceUSA, which categorizes businesses by SIC code. Beyers et al. (2004) use U.S. Census data to estimate music-related establishments, employment, and economic impact in the Seattle area. Austin's study (2001) uses U.S. Census data, as well as data from the Texas Music Office, a Texas state government entity charged with promoting the Texas music industry and compiling useful statewide information. Raines and Brown (2006) use ReferenceUSA and U.S. Census data, along with survey data from the local music community, to estimate employment and economic impact around Nashville, Tennessee.

¹⁴ The EIU also used the NAICS to delineate the prevailing .RADIO CPE determination. The prevailing .HOTEL community applicant also used the ISO 18513:2003 classification code for its delineation (The prevailing .SPA and .ECO community applications passed CPE without using industry classifications as part of their delineation).

*Each of these studies serves as a useful reference tool regarding local music scenes in established music cities.*¹⁵

DotMusic also selected NAICS for delineation because it is the most contemporary system of classification:

*In contrast to the SIC system, NAICS identifies hundreds of new and emerging industries.*¹⁶

Furthermore, the NAICS was chosen because it is the standard method for classifying music industries as highlighted in many prominent studies and reports. A reason for the use of NAICS for music (industry) community delineation is the nature of music being a copyright industry. The NAICS allows for a more accurate delineation of industries that specifically distribute copyrighted works (such as the music (industry) community):

NAICS codes may also permit more precise recognition of the industries that specifically distribute copyright protected works.¹⁷

In a study by the Creative Economy Coalition on recent definitions and approaches of measurement of creative economies, such as music, there was emphasis on individuals and entities engaging in activities that involve the creation, production, distribution and usage of goods and/or services, such as in the case of music:

[T]here seems to be reasonably strong congruence around the idea that the creative economy involves both individuals and entities who engage in activities that add value to society in one or more ways through the provision of goods and/or services that are inextricably linked to human creativity manifesting itself in one or more dimensions throughout the process of ideation, creation, production, distribution, and use.¹⁸

DotMusic's methodology was adopted based on the widespread use of NAICS code to define creative industries and communities. For example, according to the Creative Economy Coalition's research concerning reports related to defining creative industries, nearly all used an array of related NAICS codes to define creative industries:

Thirteen NAICS codes were used by 24 or more of the 25 reports; i.e., all or virtually all participants.... Our research suggests that the 39 NAICS codes used by 75% or more of the reports (i.e., 18 or more of the 25) could be considered a strong concurrence set of NAICS

codes¹⁹ ...to be jointly considered in the framing of a definition.²⁰ (which in the case of DotMusic is the music (industry) defined).

A few NAICS codes define a broader industry set, so would include a wider remit than music.²¹ For example, a music lawyer is defined by NAICS code 541110 (Offices of Lawyers). However, other types of lawyers (e.g. divorce lawyers) are also defined by the same NAICS category code 541110:

*[The] U.S. Census data can effectively estimate many categories, but lack specificity in the NAICS codes for some music-related businesses. This lack of specificity leads to overestimation in the absence of further crosschecking or validation.*²²

This is why DotMusic's application has specified that only the "music" subset of the NAICS code qualifies for membership in the defined community for the applied-for string. So in the case of lawyers, only music lawyers would qualify as an eligible community member while divorce lawyers would not. Each NAICS industry group cited by DotMusic only includes the music subset i.e. this is why DotMusic added the word "music" as a requisite for each classification code so there is no overreaching beyond the community defined, "a delineated and organized logical alliance of communities of similar nature related to music" and to ensure only music constituents can register a .MUSIC domain. This way any entities related to a broader industry other than music would be excluded from the community defined by DotMusic. (emphasis added)

The comprehensive study conducted by State of Georgia on the "Economic and Fiscal Impact Analysis of the Music Industry in Georgia"²³ defined, organized and delineated its "Music Industry Definition and Description" using NAICS codes (which was the same industry standard methodology that DotMusic adopted to delineate and organize the community defined):

The music industry is defined for this analysis as being composed of the subsectors described by the NAICS (North American Industrial Classification System) codes presented in Table E-1. Official NAICS codes do not go beyond the 6-digit classifications shown in the table, and some contain non-music elements. Steps were taken to minimize the inclusion of non-music elements by examining the individual firms which comprise

¹⁹ Ibid, Pg.4

²⁰ Ibid, Pg.86

²¹ For example, the fact that recently reformulated NAICS codes lump arts, entertainment and sports together makes it more difficult for researchers to distinguish arts [e.g. music] from other elements." (See Ann Markusen (University of Minnesota), Gregory H. Wassall (Northeastern University), Douglas DeNatale (Community Logic, Inc), Randy Cohen (Americans for the Arts), Defining the Cultural Economy: Industry and Occupational Approaches, November 2006 , Pg.8 and Pg.9,

<http://citeseerx.ist.psu.edu/viewdoc/download?doi=10.1.1.542.4308&rep=rep1&type=pdf>). To ensure that the delineation is consistent with the community defined and matches the applied-for string, DotMusic's application specifically restricts eligibility to only the "music" subset of any NAICS code (See Venn diagrams for more detail).

²³ B. William Riall, Ph.D., Economic and Fiscal Impact Analysis of the Music Industry in Georgia, May 2011, <http://www.georgia.org/wp-content/uploads/2013/09/Georgia-Music-Business-Economic-Impact-Study2011.pdf>

each sector. For example, “Promoters of Performing Arts with Facilities” also includes sports, so all firms that contained sports references were eliminated from the data; similar filtering was done for other sound recording studios.

This definition of the music industry is very similar to that used in two studies done by Georgia State University in 2003 (Edmiston, Kelley, and Marcus Thomas, “The Commercial Music Industry in Atlanta and the State of Georgia: An Economic Impact Study,” Fiscal Research Program Georgia State University (report FRC-85), August 2003.) updated in 2005 (Rushton, Michael and Marcus Thomas, “The Economics of the Commercial Music Industry in Atlanta and the State of Georgia: Industrial Organization and New Estimates of Economic Impacts,” Fiscal Research Program Georgia State University, February, 2005). The primary difference between the industry definition used in this analysis and that used previously is that this definition is in terms of NAICS sectors:

Table E-1: Definition of the Music Industry in Georgia

<u>NAICS Code</u>	<u>Description</u>
334310	Household Audio and Video Equipment Manufacturing
334610	CD, Tape and Record Production
339992	Musical Instrument Manufacturing
451140	Musical Instrument and Supplies Stores
451220	Prerecorded Tape, CD, and Record Stores
512210	Record production
512220	Integrated record production/distribution
512230	Music Publishers
512240	Sound Recording Studios
611610	Fine Arts Schools
711130	Musical Groups and Artists
711310	Promoters of Performing Arts with Facilities
711320	Promoters of Performing Arts without Facilities
711410	Agents
711510	Independent Artists, Writers, and Performers ²⁴

The Georgia Music Industry Study further substantiated NAICS as the standard for defining, organizing and delineating music (industry) communities:

[All] of the data used to describe the music industry is organized by NAICS (North American Industrial Classification System) codes:

Table 2-1: Music Industry Definition and Components

²⁴ Ibid, Pg.2 and Pg.3

Home Audio Equipment Manufacturing (NAICS 33410):

Amplifiers (e.g., auto, home, musical instrument, public address) manufacturing
Automobile radio receivers manufacturing
Car stereos manufacturing
Coin-operated jukebox manufacturing
Compact disc players (e.g., automotive, household-type) manufacturing
Home stereo systems manufacturing
Home tape recorders and players (e.g., cartridge, cassette, reel) manufacturing
Home theater audio and video equipment manufacturing
Jukeboxes manufacturing
Loudspeakers manufacturing
Microphones manufacturing
Portable stereo systems manufacturing
Radio headphones manufacturing
Radio receiving sets manufacturing
Speaker systems manufacturing
Tape players and recorders, household-type, manufacturing

CD, Tape, and Record Production (NAICS 334611, 334612, and 334613):

CD-ROM, software, mass reproducing
Compact discs (i.e., CD-ROM), software, mass reproducing
Cassette tapes, pre-recorded audio, mass reproducing
Compact discs, prerecorded audio, mass reproducing
Phonograph records manufacturing
Pre-recorded magnetic audio tapes and cassettes mass reproducing
Audiotape, blank, manufacturing
Blank tapes, audio and video, manufacturing
Compact discs, recordable or rewritable, blank, manufacturing
Diskettes, blank, manufacturing
Magnetic and optical media, blank, manufacturing
Magnetic recording media for tapes, cassettes, and disks, manufacturing
Magnetic tapes, cassettes and disks, blank, manufacturing
Tapes, magnetic recording (i.e., audio, data, video), blank, manufacturing

Musical Instrument Manufacturing (NAICS 339992)

Musical Instrument and Supplies Stores (NAICS 451140)

Prerecorded Tape, CD, and Record Stores (Naics 451220):

Music stores (e.g., cassette, compact disc, record, tape)
Record stores, new

Record Production (NAICS 512210)

Integrated Record Production/Distribution (NAICS 512220)

Music Publishers (NAICS 512230)

Sound Recording Studios (NAICS 512240)

Other Sound Recording Studios (NAICS 512290):

Music program distribution, pre-recorded
Radio program tape production (except independent producers)
Recording seminars and conferences, audio
Stock music and other audio services
Stock sound library (e.g., general background sounds, stock music)

Fine Arts Schools (NAICS 611610):

Conservatory of music (except academic)
Music instruction (e.g., guitar, piano)
Music schools (except academic)
Performing arts schools (except academic)
Schools, music (except academic)
Voice instruction

Musical Groups and Artists (NAICS 711130)

Promoters of Performing Arts with and without Facilities (NAICS 711310 and 711320):

Arts event managers, organizers and promoters
Arts festival managers, organizers and promoters
Concert hall operators
Concert booking agencies
Concert Managers, Organizers and Promoters
Live arts center operators
Live theater operators
Managers of arts events
Managers of festivals
Managers of live performing arts productions (e.g., concerts)
Music Festival Managers, Organizers, and Promoters
Organizers of live performing arts productions (e.g., concerts)

Performing arts center operators
Promoters of live performing arts productions (e.g., concerts)

Agents (NAICS 711410)

Independent artists, Writers, and Performers (NAICS 711510)²⁵

Another comprehensive Study by the Music City Music Council called *Nashville Music Industry: Impact, Contribution and Cluster Analysis*²⁶ also used NAICS codes to define its (industry) community using cluster sectors that make up the Nashville Music Industry (which was the same industry standard methodology that DotMusic adopted to delineate and organize the community defined):²⁷

*[F]irms will be identified with primary and secondary NAICS classifications. The choices of organizing segments of music derive from a body of research that fashions various approaches. Since the music industry at its heart is a “copyright industry,” it is useful to note the constant evolution of the industry and to recognize that particular components will always be shifting in the mix of the industry (Wikstrom, 2009).*²⁸

The Nashville Music Industry Study noted that there is no single classification code available that covers the entire scope of the music community:

*No single standardized measurement classification, such as NAICS (North American Industry Classification System), offers a singular grouping for music.*²⁹

This is why DotMusic did not use a singular NAICS classification code to delineate and organize the community defined. Taking such a methodology would overreach substantially because major categories of music constituent types would be excluded.

The NAICS categorization and clustering methodology was also adopted by another music industry economic study conducted for the City of Seattle’s Office of Economic development to present findings on the economic impact of Seattle’s music industry (which was the same industry standard methodology that DotMusic adopted to delineate and organize the community defined).³⁰

Another similar Study was conducted by the Anderson Economic Group on the Music Business in Detroit,³¹ which also used the NAICS methodology to “fit [their] definition of the music industry:”

http://web.williams.edu/Economics/ArtsEcon/Documents/Seattle_Music_StudyFinal.pdf, Appendix II Music Industry SIC/NAICS/SOC Codes

³¹ Colby Spencer Cesaro, Alex Rosaen, Lauren Branneman, Anderson Economic Group, Music Business in Detroit, Estimating the Size of the Music Industry in the Motor City,
<http://www.andersoneconomicgroup.com/portals/0/aeg%20report%20-%20music%20business%20in%20detroit.pdf>

To help gather data that fit our definition of the music industry, we identified the following NAICS codes:

33999 Musical Instrument Manufacturing
45114 Music Instrument and Supplies Stores
51222 Integrated Record Production/Distribution
51223 Music Publishers
51224 Sound Recording Studios
51229 Other Sound Recording Industries
61161 Fine Arts Schools
71113 Musical Groups and Artists
71131 Promoters of Performing Arts, Sports and Similar Events with facilities
71132 Promoters of Performing Arts, Sports and Similar Events without facilities
71151 Independent Artists, Writers and Performers³²

*Traditional Business Data for estimating the size of the music industry and benchmarking the music industry...came from the U.S Census Bureau...using ...NAICS codes.*³³

The same methodology was also used by the Center for Economic Development in its study of the Cleveland music sector (which was the same industry standard methodology that DotMusic adopted to delineate and organize the community defined):³⁴

*The Cleveland Music Sector was defined and studied using occupational data from the U.S. Bureau of Labor Statistics...The music sector was defined in terms of core music occupations and support music occupations.*³⁵

*The Cleveland Music Sector was also defined and studied by the industries it encompasses. The Center for Economic Development designed a methodology describing an industry-based Cleveland Music Sector by using a computer program capable of identifying music-related industries through keyword searches (Chapters 1 and 9). Using this program, the Center defined the Cleveland Music Sector as encompassing musicians and music venues from 45 unique industry codes in the North American Industry Classification System (NAICS). See Appendix 1-1 for brief descriptions of the 45 NAICS codes included as part of the Cleveland Music Sector's industry-based definition.*³⁶

The first step in defining the Cleveland Music Sector was to identify and collect the NAICS codes of industries that are involved both with music and music-related activities.... The preceding steps yielded a total of 45 unique music and music-related NAICS codes. Of those 45, all the

³⁵ Ibid, Pg.xiv

³⁶ Ibid, Pg.xv

establishments (companies) in 10 NAICS codes were determined to be completely related to music. These 10 NAICS codes are listed in Table 1-1 (See below). The additional 35 NAICS codes were identified as encompassing both music-related and non-music-related establishments.³⁷

**Table 1-1:³⁸ Industry Sectors
Encompassing All Music-Related
Establishments NAICS Code**

	Definition
334310	Audio and Video Equipment Manufacturing
334612	Prerecorded Compact Disc (except Software), Tape, and Record Producing
339992	Musical Instrument Manufacturing
451140	Musical Instrument and Supplies Stores
451220	Prerecorded Tape, Compact Disc, and Record Stores
512210	Record Production
512230	Music Publishers
512240	Sound Recording Studios
512290	Other Sound Recording Industries
711130	Musical Groups and Artists

Table 1-2:³⁹ Music Subsectors by NAICS Code

NAICS Code	Definition

813410	<i>Civic and Social Organizations</i>
813930	<i>Labor Unions and Similar Labor Organizations</i>
Wholesale	
423690	<i>Other Electronic Parts and Equipment Merchant Wholesalers</i>
423920	<i>Toy and Hobby Goods and Supplies Merchant Wholesalers</i>
423990	<i>Other Miscellaneous Durable Goods Merchant Wholesalers</i>

The City of Austin Economic Development Department's Music & Entertainment Division also released a study on the Austin Music Industry that used NAICS codes and the categorization and sub-categorization methodology of delineating and organizing the Austin Music Industry. The Study re-affirms once again that research studies typically use NAICS codes for categorization to ensure standardization of methodology approach, consistency and comparability. However since there is no single category to delineate and organize the entire music (industry) community, segmentation using sectors and sub-sectors

is required (which was the same industry standard methodology that DotMusic adopted to delineate and organize the community defined):⁴⁰

Typically...research studies...will use the U.S. Federal North American Industry Standard Classification System (NAICS) codes to categorize respondent data. This approach has the advantage of making the data easily comparable to other research studies that use the same method, which can be useful for comparisons or other activities. However, a drawback to using this system to measure the Music Industry is that the standard NAICS classifications do not directly map to the way the Music Industry operates or describes itself.

The segmentation design contains 33 main Music Industry job sectors (and 74 sub-sectors) using common music industry job terminology, and then contains an internal (invisible to the respondent) mapping system, in which each of these “common” job descriptions is then mapped to an NAICS Sector and Subsector. For the purposes of the Austin Music Census, all of the analysis is explained using the common industry job descriptions rather than NAICS classifications...The core of this economy of course is the musicians, but the presence of those musicians spin off the creation of at least 13 other major NAICS economic activity sectors (and a correlating 66 sub-sectors):⁴¹

The thinking and strategic planning around any city-based “Music Industry” is better understood as a number of industries that comprise a large economic system based around commercial music.⁴²

The NAICS classification methodology to define the music (industry) community was also adopted by the Texas Music Office, which delineated the music industry through “conversion of music industry-related Standard Industrial Classification (SIC) codes into North American Industry Classification System (NAICS) codes:”⁴³

- (3652) *CD manufacturers* / 334612 [*Prerecorded Compact Disc (except Software), Tape, and Record Reproducing*]
- (7993) *Jukeboxes* / 713990 [*All Other Amusement and Recreation Industries*]or 334310 [*Audio and Video Equipment Manufacturing incl. jukebox manufacturing*]
- (5099) *Record distributors* / 512220 [*Sound recording, releasing, promoting, and distributing*]
- (2782) *Record jacket, CD booklet, J-card mfgs.* / 323118 [*Blankbook, Looseleaf Binders, and Devices manufacturing*]
- (3652) *Record labels* / 512220 [*Integrated Record Production/Distribution*]
- (3652) *Record pressing plants* / 334612 [*Prerecorded Compact Disc (except Software), Tape, and Record Reproducing*]
- (4832) *Record promotion and record pools* / 513111 [*Radio Networks*]
- (5735) *Record stores* / 451220 [*Prerecorded Tape, Compact Disc, and Record Stores*]
- (4832) *Retail marketing* / 541613 [*Marketing consulting services*]

RECORDING SERVICES

- (7389) Audio engineers / 541330 [Engineering Services]*
- (3695) Audiotape-manufacturers/retail / 334613 [Magnetic and Optical Recording Media Manufacturing incl. Audiotape, blank, manufacturing]*
- (7389) Mastering / 512290 [Other Sound Recording Industries]*
- (7389) Mobile recording studios / 512240 [Sound Recording Studios]*
- (7389) Record producers / 512210 [Record Production incl. Record producers (except independent)]*
- (7289) Recording studios / 512240 [Sound Recording Studios] or [Recording studios, sound, operating on a contract or fee basis] or [Sound recording studios (except integrated record companies)]*
- (7389) Rehearsal studios / 512240 [Sound Recording Studios]*
- (1542) Studio and audio design/construction/consultation / 236220 [Radio and television broadcast studio construction]*
- (3663) Studio equipment mfgs/sales/rental / 532490 [Other Commercial and Industrial Machinery and Equipment Rental and Leasing incl. TV broadcasting and studio equipment rental or leasing]*

TOUR SERVICES

- (7922) Annual events 711310 / [Promoters of Performing Arts, Sports, and Similar Events with Facilities]*
- (7922) Booking agents 711320 / [Promoters of Performing Arts, Sports, and Similar Events without Facilities]*
- (7922) Concert and event production / 711320 [Promoters of Performing Arts, Sports, and Similar Events without Facilities]*
- (3648) Lighting-manufacturers and supplies / 335129 [Other Lighting Equipment Manufacturing incl. Stage lighting equipment manufacturing]*
- (7922) Lighting-services / 541490 [Lighting design services]*
- (1731) PA systems/sound reinforcement / 334310 [Audio and Video Equipment Manufacturing incl. Public address systems and equipment mfg] or 235310 [Electrical contractors]*
- (7359) PA/Staging equipment-rental / 532490 [Audio visual equipment rental or leasing]*
- (7922) Promoters / 711320 [Promoters of Performing Arts, Sports, and Similar Events without Facilities]*
- (7381) Security / 561612 [Security Guards and Patrol Services]*
- (1799) Staging/stage construction / 711510 [Stage set (e.g., concert, motion picture, television) erecting and dismantling, independent]*
- (2759) Ticket printing / 323119 [Other Commercial Printing]*
- (7922) Ticket sales outlets / 561599 [All Other Travel Arrangement and Reservation Services incl. Ticket agencies, theatrical]*
- (4142) Tour buses/transportation / 532120 [Truck, Utility Trailer, and RV (Recreational Vehicle) Rental and Leasing incl. Bus rental or leasing and Trailer rental or leasing]*
- (1799) Tour management and personnel / 541611 [General management consulting services]*

VENUES

- (6512) Auditoriums/Arenas / 711310 [Promoters of Performing Arts, Sports, and Similar Events with Facilities]*
- (5813) Clubs/Dancehalls / 722410 [Drinking Places (Alcoholic Beverages) incl. Night clubs, alcoholic beverage] 713990 [All Other Amusement and Recreation Industries incl. Dance halls, Ballrooms, and Night clubs without alcoholic beverages]*

(6512) Concert Halls/Performing arts centers | 711310 [Promoters of Performing Arts, Sports, and Similar Events with Facilities]

(7941) Stadiums/Amphitheaters/Fairgrounds | 711310 [Promoters of Performing Arts, Sports, and Similar Events with Facilities]⁴⁴

The University of Memphis also released a study⁴⁵ that assessed local music industries and also used the NAICS classification methodology to delineate and organize the music industry in categories:

Commercial music studios, producers, promoters, bands, lawyers, singers, musicians, retail establishments, teachers, professors, and others form parts of the complex fabric of the music industry in the city....The data in Table 5 contain business employment and payroll information for Shelby County, Tennessee (Memphis), Davidson County, Tennessee (Nashville), and Travis County, Texas (Austin) provided by the United States Department of Labor, Bureau of Labor Statistics (BLS).

Since data for some segments are not released by BLS because of confidentiality restrictions, the data tend to understate the number of businesses, employment, and payrolls that could properly be attributed to the music industry. But, it does help in benchmarking the music industry in this area.

Table 5

NAICS	Description
51223	Music Publishers
339992	Musical Instrument Mfg.
33431	Audio and Video Equipment Mfg.

University of Memphis. 2004. *HighBeam Research*. 28 Oct. 2015, <http://www.highbeam.com/doc/1G1-126612058.html> and <http://www.freepatentsonline.com/article/Business-Perspectives/126612058.html>

Another such Report was conducted on the Music Industry in Chicago by the Chicago Music Commission.⁴⁶ Once again, the Report illustrated that there is no classification code to cover the entire music (industry) community and that it was necessary to select NAICS categories and sub-categories to cover the “whole industry” (which was the same industry standard methodology that DotMusic adopted to delineate and organize the community defined). As the Report illustrates, one shortcoming of NAICS codes was that some NAICS codes also lump peripheral industries with categories that contain music industries. For example, “independent artists, writers or performers” lump together both music-related entities and non-music related entities. So that DotMusic does not overreach beyond the community defined, the DotMusic application clarifies that only the “music” component is relevant and peripheral entities not associated with “music” are excluded. This is why for every NAICS code the DotMusic application includes the word **music** as part of each NAICS classification category to clarify that all entities unrelated to music or with a tangential relationship with “**music**” are excluded . This methodology incorporated by DotMusic was to ensure that all entities have the requisite awareness that they belong to the **music** community defined in its application of a strictly delineated and organized logical alliance of communities **related to music** (emphasis added). The Report states:

Because music production involves what Caves calls a “motley crew” using very different skill sets and engaged in very different kinds of productive processes, however, there is no one NAICS code or set of codes covering the whole industry. To begin with, then, it is necessary to pick out those categories of business units that participate in the music industry.

We did this by examining each coded industry category to determine whether it had any connection to music at all, and if so, whether it constituted part of the core component of the music industry or part of its periphery. Businesses wholly or predominantly involved in the performance, production, or distribution of musical activity—such as “musical groups & artists,” “sound recording studios,” and “radio networks”—were easily designated as part of the core component. However, some industry categories, such as “independent artists, writers or performers,” lump together musical and non-musical work. Other categories—for example, “audio and video equipment manufacturing”—define businesses that support the performance, production or distribution of music, but may also support non-musical work. We place both these kinds of hybrids in the peripheral component of the music industry. The table below provides an exhaustive list of the 6-digit industries included in our definition of the music industry.⁴⁷

FIGURE 1 - MUSIC INDUSTRY DEFINITION

NAICS Code Sub-Industry Description

⁴⁶ Lawrence Rothfield, Don Coursey, Sarah Lee, Daniel Silver and Wendy Norris, A Report on the Music Industry in Chicago, Chicago Music Commission, Cultural Policy Center, University of Chicago, 2007, <http://www-news.uchicago.edu/releases/08/pdf/080122.music.pdf>

⁴⁷ Ibid, Defining the Music Industry, Pg.4

CORE MUSIC SUB-INDUSTRIES

339992	<i>Musical instrument manufacturing</i>
451140	<i>Musical instruments and supplies stores</i>
451220	<i>Prerecorded tape, compact disc and record stores</i>
512210	<i>Record production</i>
512220	<i>Integrated record production/distribution</i>
512230	<i>Music publishing</i>
512240	<i>Sound recording studios</i>
512290	<i>Other sound recording industries</i>
515111	<i>Radio networks</i>
515112	<i>Radio stations</i>
711130	<i>Musical groups and artists</i>

PERIPHERAL MUSIC SUB-INDUSTRIES

334310	<i>Audio and video equipment manufacturing</i>
334612	<i>Prerecorded compact disc, tape and record reproducing</i>
611610	<i>Art, drama and music schools</i>
621340	<i>Offices of physical, occupational and speech therapists and audiologists</i>
711110	<i>Theater companies and dinner theaters</i>
711300	<i>Promoters of performing arts, sports and similar events</i>
711400	<i>Agents and managers for artists, athletes, entertainers and other public figures</i>
711500	<i>Independent artists, writers and performers</i>
722400	<i>Drinking places</i> ⁴⁸

The Report all points out another NAICS discrepancy with respect to delineating music profit and non-profit entities:

*A classificatory framework of some kind is indispensable, and like every framework, ours has certain shortcomings. One is that it fails to register the distinction between for-profit and non-profit music businesses.*⁴⁹

With respect to DotMusic's application, in order to match the Nexus of the string with the community defined, DotMusic clarifies that both for-profit and non-profit entities are included in its community delineation:

The Music Community encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders. (20c)

⁴⁸ Ibid, Defining the Music Industry, Pg.5

⁴⁹ Ibid, Defining the Music Industry, Pg.5

DotMusic's methodology and rationale for using NAICS codes is one based on what is traditionally used in research studies. However, as previously illustrated, there are some limitations to using classification codes with respect to overreaching beyond the community defined by DotMusic in its application, as highlighted by several reports on defining the cultural economy and methodological approaches for measuring creative industries (such as the music (industry) community) as well as UNESCO:

*All efforts to operationalize the cultural economy are forced to work with industrial and occupational categories...Given the regional variation, researchers might include different sets of industries in defining their regional cultural economies.*⁵⁰

*[P]roblems of highly aggregated occupational code categories (see Higgs et al., 2008) seem to jeopardize an accurate analysis.*⁵¹

*Implicit in the notion of class is "some kind of self-identity and consistent value system within a socio-political hierarchy" (Clifton, 2008: 66). Indeed, creative individuals have aspects in common. They often get involved in the social networks or communities...and they have common values, principles. (Florida 2002a: 78-9)*⁵²

*[T]he creative class concept needs to be related to a production context that should be interrelated with other organizations, institutional bodies and the community itself, in order to understand the linkages along the value chain and the locally enrooted practices that arise from these interconnections.*⁵³

*One of the most important issues in the analysis of creative activities is the emergent need for a universal conception and a classification system that can accurately gather and map data on these industries.*⁵⁴

*Classification of cultural industries is another issue which requires attention. The lack of a strong theoretical definition has led to misunderstanding and confused the situation concerning structural elements of these industries.*⁵⁵

The term "cultural industries" [such as the music industry community] is used in accordance with UNESCO's view "as a set of activities that produce and distribute cultural goods or services, which at the time they are considered as a specific attribute, use or purpose, embody or convey cultural expressions irrespective of the commercial value they may have" (UNESCO-UIS, 2009). A consensus seems to be emerging for a

working definition of the “core” creative or cultural industries, while there is still confusion surrounding non-core and supporting activities. Usero and del Brío (2011) in their recent article also discuss and assess the contribution of the 2009 UNESCO FCS to the field of measuring the economic contribution of culture.⁵⁶

In the first Resolution of the European Parliament on this topic entitled European Parliament Resolution on Cultural Industries (2002/2017) cultural industries was considered as a field of multidimensional forms of cultural expressions ranging from cultural heritage to audiovisual industries. Two years later, Opinion of European Economic and Social Committee on Europe’s Creative Industries (2004) adopted a prescriptive definition of creative industries by identifying provisional list of activities labelled as creative industries.⁵⁷

There is a lack of a unique and common platform for discussing the classification of cultural industries, the measurement of their economic impact, and the potential of linking and upgrading multidisciplinary approaches. This lack not only has a negative impact on research in this field, but also makes it difficult to build a comprehensive scientific and practical framework for measuring the economic contribution of cultural industries to development.⁵⁸

At present, the statistics for cultural industries have not been harmonised in a systematic manner, and there is no unique statistical methodology.⁵⁹

Despite all the novelties and progress, the „original sin” intractably remains - the vagueness or even lack of clarification regarding the definitions and estimations of creative industries, creative class, cultural activities, creative city, or cultural labour force (Glaeser, 2005; Markusen et al., 2008; Pratt et al., 2009)...So far, the literature has barely come to agreement on what comprises the concepts of creative and cultural economics, as well as their precise boundaries and extent.⁶⁰

The formal [UK’s Department of Culture, Media and Sport (DCMS)] definition of creative industries is “...those activities which have their origins in individual creativity, skill and talent and which have the potential for wealth and job creation through generation and exploitation of intellectual property”...This definition provided the basis for several works developed by national governments worldwide (e.g., DCMS, 2001; Walton and Duncan, 2002; Heng et al., 2003; Scottish Government Social Research, 2009).⁶¹

The Branches of Activity approach categorizes the creative economy in terms of “upstream activities”, i.e., core cultural activities, and “downstream activities”, i.e., commercial and distribution industries, dedicated to the diffusion and commercialization of cultural contents (e.g., Heng et al., 2003; Scott, 2004; UNCTAD 2008: 13). The strength of this perspective lies in the importance of tracing the linkages and

⁵⁶ Ibid, Pg.17

⁵⁷ Ibid, Pg.29

⁵⁸ Ibid, Pg. 80

⁵⁹ Ibid, Pg. 87

⁶⁰ Sara Cruz and Aurora A.C. Teixeira, Industry-based methodological approaches to the measurement of Creative Industries: a theoretical and empirical account, Universidade do Porto, <http://wps.fep.up.pt/wps/wp453.pdf>, Pg.2

⁶¹ Ibid, Pg.4

interdependencies among all the industries that compose the value chain, differentiating the upstream segments from the downstream (Scott, 2004)...Finally, the Systemic/Evolutionary approach holds that creative industries are evolutionary systems characterized by processes mainly grounded in interactions (the “agents - networks - firms” triad) and social networks (Potts et al., 2008: 170). Here, creative industries are defined and modelled as complex systems of activities, where agents and firms interact dynamically through value flows on the basis of a network structure. Supply and demand of creative goods is characterized as a process where “decisions both to produce and to consume are determined by the choice of others in the social network” (Potts et al., 2008: 169-170).⁶²

In order to be as accurate as possible in this mapping and the respective estimation of all the approaches analyzed, we used detailed 5-digit industry codes...The use of ISIC - Rev. 3.1 in all the industry based approaches that were mapped...⁶³

As highlighted by UNESCO and the many research studies and reports, there is no single universal classification code that can accurately map the music (industry) community as defined. To ensure that the community definition matches the string, DotMusic’s application calibrated its delineation to only restrict the “music” subset of each NAICS code (See Venn diagrams).

The Future of Music also indicates the value of using NAICS codes because they are government classifications that provide categories that are consistent and reliable:

Government statistics have some value because they are reliably collected over time.

However, the one discrepancy that DotMusic calibrated in its Application is that the fact that NAICS codes do not include self-employed music entities or musicians e.g. amateurs:

[E]xamining government data can give you a sense of the size and changes over time, but the fact that BLS OES data [i.e. NAICS] does not include self-employed musicians makes it likely that the published number is far lower than reality.

Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.⁶⁴

So that DotMusic does not overreach beyond the community defined by excluding self-employed entities, it clarified in its application the community defined includes commercial, non-commercial and amateurs without discrimination:

⁶² Ibid, Pg.10

⁶³ Ibid, Pg.12. With respect to ISIC vs. NAICS, “definitions of individual categories have been designed in a way that statistical data collected according to NAICS can be re-aggregated into the two-digit divisions of ISIC, Rev.4, ensuring the comparability of data.” (See http://unstats.un.org/unsd/publication/seriesM/seriesm_4rev4e.pdf, Pg.37 and https://www.census.gov/eos/www/naics/concordances/2012_NAICS_to_ISIC_4.xls and <http://www.naics.com/naicswp2014/wp-content/uploads/2014/10/NAICS-to-SIC-Crosswalk.pdf>).

COMPASS RECORDS STREET TEAM

JOIN THE COMPASS RECORDS STREET TEAM

Compass Records is looking for motivated individuals (who appreciate great music) to join our Street Team and help us spread the word about our talented roster. If you are enthusiastic about music and wish to acquire experience in the music industry, the Compass Records Street Team is the perfect opportunity for you.

DETAILS Be one an artist performs or releases a new album considerable work must be done to notify the public on such an occasion. Street Team Representatives place posters in high-traffic areas and distribute handbills/contest postcards to audiences at shows of other similar artists. Street Team Reps keep their ears to the ground about trends and events in their places of residence and help spread the word about upcoming gigs in return. For their efforts, members receive a monthly insider newsletter and are thus the first to hear the latest at Compass Records. Members may also qualify for free merchandise, signed posters, free tickets and more.

WAYS STREET TEAM MEMBERS CAN GET INVOLVED

- Passing out hanging up posters to promote upcoming shows of Compass artists.
- Passing out handbills and contest postcards to audiences at various other shows.
- Hosting parties for new releases.
- Providing Compass with feedback about audience response in their areas, marketing techniques that worked, and their overall promotional experience.
- Announcing performances or album releases on the web (email (no spamming, please!), community blogs, Myspace pages, etc.).

IN APPRECIATION FOR ALL THEIR HELP, STREET TEAM MEMBERS QUALIFY TO RECEIVE AN ARRAY OF REWARDS, INCLUDING

- Posters signed by a variety of artists.
- CDs for listening parties (often before they are officially released).
- Access to special promotional materials.
- Tickets to Compass artists performances.
- And More!

We here at Compass - including the artists with whom we work - have the utmost appreciation for our fan-base and know that we absolutely could not succeed without you. Thank you for supporting independent music.

General Terms and Conditions

- Acceptance of Terms:** PledgeMusic.com Limited ("PledgeMusic") is an online service that facilitates musicians (a "Pledger") contributing to the recording costs of independent musicians (the "Artist") music and also (optionally) to contribute to a charity designated by the Artist (the "Charity") (collectively, the "Service"). The Service is operated from the website www.pledgemusic.com. The use of the PledgeMusic Service by an Artist to raise money from Pledgers shall be referred to as a "Campaign". To participate in the Service you must read and accept all of the terms and conditions of this agreement. Artists are also subject to the terms and conditions in Supplemental Terms and Conditions – Artists, which is incorporated by reference into this agreement. PledgeMusic may modify the terms of this agreement, in our sole discretion, by posting amended terms to the PledgeMusic.com website. Your continued use of the service indicates your acceptance of the amended agreement.
- Participation:** Your participation in the Service may require that you supply certain personal information to PledgeMusic. The information you supply must be full, complete, and accurate. You are required to maintain and update this information to keep it current, complete and accurate. Personal information supplied will be subject to PledgeMusic [Privacy Policy](#), which is incorporated by reference into this agreement. By using the Site or the Service, you are consenting to have your personal data transferred to and processed in the United States.
- Responsible Use / Code of Conduct:** As a condition of participation in the Service you will not use the Services for any purpose that is unlawful or prohibited by these Terms of Service, or any other purpose not reasonably intended by PledgeMusic. Further your use of the Service will be in conformity with the PledgeMusic Code of Conduct, which is incorporated by reference into this agreement. PledgeMusic may remove any content or account at any time for any reason at its sole discretion.
- Abuse:** To report any abuse of the Service please email: info@pledgemusic.com
- Content:** All postings, messages, text, files, images, photos, videos, sounds, or other materials ("Content") posted on, transmitted through, or linked from the Service, are the sole responsibility of the person from whom such Content originated. You are entirely responsible for any item of Content that you post, email or otherwise make available via the Service. PledgeMusic does not control, and is not responsible for, Content made available through the Service, and by using the Service you may be exposed to Content that is offensive, indecent, inaccurate, misleading, or otherwise objectionable. PledgeMusic makes no representation or warranty as to the accuracy, completeness or authenticity of the information contained in such Content. You must evaluate, and bear all risks associated with, the use of any Content or any reliance on said Content, and in no circumstances will PledgeMusic be liable in any way for any Content or for any loss or damage of any kind incurred as a result of the use of any Content made available via the Service. You acknowledge that PledgeMusic does not pre-screen or approve Content, but that PledgeMusic shall have the right (but not the obligation) in its sole discretion to refuse, delete or move any Content that is available via the Service for any reason.
- Trademark and Copyright:** PledgeMusic.com Limited, PledgeMusic, PledgeMusic.com, the PledgeMusic logo, and other names, logos, icons and marks identifying PledgeMusic products and services are trademarks of PledgeMusic.com Limited and may not be used without the prior written approval of PledgeMusic.com Limited. All rights not expressly granted in this agreement are reserved.
- Financial Transactions:** PledgeMusic acts as an intermediary between Pledgers and Artists, and all monies collected are held on account until they are disbursed. After a Campaign reaches a predetermined collection point (the

"Pledge Target"), PledgeMusic will charge participant Pledgers credit cards or payment accounts for the pledged amount. PledgeMusic will then make any charitable contribution required as part of the Campaign, and disburse funds to cover the Artist's recording and associated expenses (including PledgeMusic's fee for running the Campaign). If a Campaign does not reach the Pledge Target, or expires before collecting enough contributions to meet its target, PledgeMusic will neither charge nor accept payments from any Pledger. PledgeMusic shall in no way respond to the performance or obligations of the Artist. After PledgeMusic charges a Pledger's credit card or other payment account there will be no refunds, unless in its sole discretion PledgeMusic determines that a refund is appropriate (and any refunds made shall be subject to any associated transaction costs). PledgeMusic shall under no obligation to become involved in disputes between Pledgers and Artists, or between Pledgers and any third party. In the event of a dispute, you release PledgeMusic, its officers, employees, agents and successors from claims, damages, or demands of any kind, known or unknown, suspected or unsuspected, disclosed or undisclosed, arising out of or in any way related to such disputes and our service. Artists are who are responsible for fulfilling obligations both implied and stated in any campaign they create. PledgeMusic will engage in commercially reasonable efforts to collect monies committed by Pledgers, however PledgeMusic does not guarantee that it will collect the full amount of money committed by Pledgers. PledgeMusic reserves the right to terminate a Campaign and refund a Pledgers payments at any time for any reason.

8. **Termination:** PledgeMusic may terminate or suspend any and all Services, and your PledgeMusic account, immediately and without prior notice or liability, if you breach any of the terms or conditions of the Terms of Service. Upon termination of your account, your right to use the Services will immediately cease. If you wish to terminate your PledgeMusic account, you may simply discontinue using the Services or send an email to info@pledgemusic.com (a termination request will be completed within 30 days). A provision of the General Terms and Conditions which by their nature should survive termination shall survive termination, including, without limitation, ownership provisions, warranty disclaimers, indemnities and limitations of liability.
9. **Disclaimer of Warranties:** YOU EXPRESSLY AGREE THAT USE OF THE SERVICES AND/OR ANY OTHER CONTENT YOU DOWNLOAD FROM PLEDGEMUSIC IS AT YOUR SOLE RISK AND THAT YOU WILL BE SOLELY RESPONSIBLE FOR ANY DAMAGE TO YOUR COMPUTER SYSTEM OR LOSS OF DATA THAT RESULTS FROM THE DOWNLOAD OF FILES, SOFTWARE, SERVICES AND/OR OTHER CONTENT. THE SERVICES AND/OR OTHER CONTENT YOU DOWNLOAD FROM PLEDGEMUSIC ARE PROVIDED ON AN "AS IS" BASIS. PLEDGEMUSIC EXPRESSLY DISCLAIMS ANY AND ALL WARRANTIES OF ANY KIND, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT. PLEDGEMUSIC MAKES NO WARRANTY THAT THE SOFTWARE, SERVICES AND/OR ANY OTHER CONTENT YOU DOWNLOAD FROM PLEDGEMUSIC WILL MEET YOUR REQUIREMENTS, OR THAT THE SOFTWARE OR SERVICE WILL BE UNINTERRUPTED, TIMELY, SECURE, OR ERROR FREE; NOR DOES PLEDGEMUSIC MAKE ANY WARRANTY AS TO THE RESULTS THAT MAY BE OBTAINED FROM THE USE OF THE SERVICE OR AS TO THE ACCURACY OR RELIABILITY OF ANY INFORMATION OBTAINED THROUGH THE SERVICE OR THAT DEFECTS IN THE SOFTWARE WILL BE CORRECTED.
10. **Limitation of Liability:** IN NO EVENT WILL PLEDGEMUSIC OR ITS DIRECTORS, EMPLOYEES OR AGENTS BE LIABLE TO YOU OR ANY THIRD PERSON FOR ANY INDIRECT, CONSEQUENTIAL, EXEMPLARY, INCIDENTAL, SPECIAL OR PUNITIVE DAMAGES, INCLUDING FOR ANY LOST PROFITS OR LOST DATA ARISING FROM YOUR USE OF THE SERVICE, ANY PLATFORM APPLICATIONS OR ANY OF THE SITE CONTENT OR OTHER MATERIALS ON, ACCESSED THROUGH OR DOWNLOADED FROM THE SERVICE, EVEN IF PLEDGEMUSIC IS AWARE OR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED HEREIN, PLEDGEMUSIC'S LIABILITY TO YOU FOR ANY CAUSE WHATSOEVER, AND REGARDLESS OF THE FORM OF THE ACTION, WILL AT ALL TIMES BE LIMITED TO THE AMOUNT PAID, IF ANY, BY YOU TO PLEDGEMUSIC FOR THE SERVICE, BUT IN NO CASE WILL PLEDGEMUSIC'S LIABILITY TO YOU EXCEED £200. YOU ACKNOWLEDGE THAT IF NO SUMS ARE PAID TO PLEDGEMUSIC FOR THE SERVICE, YOU SHALL BE LIMITED TO INJUNCTIVE RELIEF ONLY, UNLESS OTHERWISE PERMITTED BY LAW, AND SHALL NOT BE ENTITLED TO DAMAGES OF ANY KIND FROM PLEDGEMUSIC, REGARDLESS OF THE CAUSE OF ACTION.
11. **External Links:** PledgeMusic may provide links to other websites or resources,

the campaign obligations. If the Artist and P edgeMus c are unable to reach a satisfactory agreement regarding the outstanding campaign obligations of the Artist P edgeMus c may terminate the Campaign and refund monies to P edgeMus c in proportion to the amounts remaining in the account for the Campaign. Interest on all funds held shall accrue to the benefit of P edgeMus c.

6. **ChargeBacks and Refunds:** If, for any reason, P edgeMus c is required to refund monies to P edgeMus c of a Campaign, the Artist will fully compensate P edgeMus c for the amount refunded as well as any associated costs, including but not limited to transaction or administrative costs.
7. **Intellectual Property:** Artist shall fully own all intellectual property to all publications and recordings they create through or result from the Campaign. Artist grants to P edgeMus c a non-exclusive, worldwide, royalty free license to reproduce, distribute, and publicly perform the recordings (as well as any underlying musical compositions) created or contributed by the Artist as part of the Campaign via any means developed, owned, or controlled by P edgeMus c or its partners solely for the purposes of promoting the Artist's Campaign or P edgeMus c. Artist also grants to P edgeMus c a non-exclusive, worldwide license to () to reproduce, display and distribute any artwork, photographs supplied by the Artist, liner notes, metadata, track data files and editorial content relating to the recordings, and () to use the name (including professional name(s)), likeness, performances, photographs, and biographical material of each performer, producer, and songwriter featured on a recording, in connection with promoting the Artist's Campaign or P edgeMus c. Notwithstanding the foregoing, Artist acknowledges and agrees that P edgeMus c's business model may involve free promotional downloads and/or streams of recordings.
8. **Representations, Warranties and Indemnities:** Artist hereby warrants and represents that: () It has the right and power to enter into and fully perform all of its obligations under this Agreement; () It has the authority and right to provide P edgeMus c with the rights granted herein; () P edgeMus c's exercise of the rights granted herein will not infringe upon any copyright, trademark, right of publicity, moral right or other proprietary, intellectual property, contractual or other right of any person anywhere in the world; (v) Neither the recordings, nor any other content provided to P edgeMus c by the Artist violate any applicable laws or regulations, including, without limitation, defamation and obscenity laws; (v) The recordings do not include any uncensored samples or interpositions, Artist shall have the sole responsibility to ensure, as necessary, that all recordings are fully censored; (v) No agreement of any kind entered into by Artist does or will interfere in any manner with P edgeMus c's complete performance of this Agreement, or with the rights granted to P edgeMus c herein; and (v) P edgeMus c shall not be required to make any payments to third parties in connection with the exploitation of the Masters, Controlled Compositions or Content hereunder. Artist will defend, indemnify, and hold harmless P edgeMus c, its parents, subsidiaries, affiliates, and the respective directors, officers, employees, and agents, with respect to any claim, demand, cause of action, or debt or liability brought by or claimed by any third party, including attorneys fees, to the extent that any such claim is based upon or arises out of a breach of any of Licensee's representations, warranties, covenants, or obligations.
9. **Tax or other financial obligations:** Artist will be fully responsible for any taxation or other financial obligations arising out of its participation in the service. If, for any reason, P edgeMus c is required to pay any monies relating thereto directly or indirectly to an Artist's campaign, Artist shall fully reimburse P edgeMus c for those amounts within 30 days of being notified of these payments.

Code of Conduct

1. **Principles:** P edgeMus c.com Limited ("P edgeMus c") is an online service that facilitates music fans (a "P edger") contributing to the recording costs of independent musicians (the "Artist") music and also (optionally) to contribute to a charity designated by the Artist (the "Charity") (collectively, the "Service"). In order to facilitate this we require that all users of the Service abide by this Code of Conduct. P edgeMus c may modify the terms of this Code of Conduct, in our sole discretion, by posting amended terms to the P edgeMus c.com website. Your continued use of the Service indicates your acceptance of the amendments.
2. **When using the Service activities that are not permitted include, but are in no way limited to, the following:**
 1. to act in an abusive or threatening way;
 2. to intimidate or impersonate anyone;
 3. any illegal acts;
 4. any infringement of intellectual property rights;
 5. any commercial activities not approved in writing by P edgeMus c
3. You will not post, email, or otherwise make available Content:

1. that is unlawful, harmful, threatening, abusive, harassing, defamatory, obscene, invasive of another's privacy, or is harmful to minors in any way;
 2. that is pornographic;
 3. that harasses, degrades, intimidates or is hateful toward an individual or group of individuals on the basis of religion, gender, sexual orientation, race, ethnicity, age, or disability;
 4. that impersonates any person or entity, including, but not limited to, a PageMusc employee, or falsely states or otherwise misrepresents your affiliation with a person or entity;
 5. that includes personal or identifying information about another person without that person's explicit consent;
 6. that is false, deceptive, misleading, or defamatory;
 7. that infringes any patent, trademark, trade secret, copyright or other proprietary rights of any party, or Content that you do not have a right to make available under any law or under contractual or fiduciary relationships;
 8. that constitutes or contains "affiliate marketing," "referral code," "junk mail," "spam," "chatters," "pyramid schemes," or unsolicited commercial advertisement;
 9. that constitutes or contains any form of advertising or solicitation;
 10. that includes links to commercial services or websites;
 11. that advertises any illegal service or the sale of any items the sale of which is prohibited or restricted by any applicable law;
 12. that contains software viruses or any other computer code, files or programs designed to interrupt, destroy or limit the functionality of any computer software or hardware or telecommunications equipment;
 13. that disrupts the normal flow of dialogue with an excessive amount of Content (flooding attack) to the Service, or that otherwise negatively affects other users' ability to use the Service; or
 14. that employs misleading email addresses, or forged headers or otherwise manipulated identifiers in order to disguise the origin of Content transmitted through the Service.
4. You agree not to:
1. contact anyone who has asked not to be contacted;
 2. "stalk" or otherwise harass anyone;
 3. collect personal data about other users for commercial or unlawful purposes;
 4. use automated means, including spiders, robots, crawlers, data mining tools, or the like to download data from the Service – unless expressly permitted by PageMusc;
 5. post relevant Content, repeatedly post the same or similar Content or otherwise impose an unreasonable or disproportionate y large load on our infrastructure;
 6. attempt to gain unauthorized access to PageMusc's computer systems or engage in any activity that disrupts, diminishes the quality of, interferes with the performance of, or impairs the functionality of, the Service or PageMusc website; or
 7. use any form of automated device or computer program that enables the submission of posts on PageMusc without each post being manually entered by the author thereof (an "automated posting device"), including without limitation, the use of any such automated posting device to submit posts in bulk, or for automatic submission of posts at regular intervals, or engage in any other acts which could be considered "gaming the system"

Privacy Policy

1. **Principles:** PageMusc.com Limited ("PageMusc") is an online service that facilitates music fans (a "P edger") contributing to the recording costs of independent musicians (the "Artist") musician and a solo (optionally) to contribute to a charity designated by the Artist (the "Charity") (collectively, the "Service"). To achieve this a PageMusc collects and processes certain personal information (the "Personal Information"). PageMusc may modify the terms of this [Privacy Policy](#), in our sole discretion, by posting amended terms to the PageMusc.com website. Your continued use of the Service indicates your acceptance of the amendments.
2. **What information is collected:** When signing up with the Service you will be asked to supply information which may include your name, address, telephone number, email address, credit card details, date of birth, gender, or other information. When using the Service we may collect your browser type, OS type, IP address. We also store certain information in your browser called "cookies". We use session ID cookies to confirm that users are logged in. These cookies terminate once the user closes the browser. By default, we use a persistent cookie that stores your login ID (but not your password) to make it easier for you

to log in when you come back to the Service. You can remove or block these cookies using the settings in your browser if you wish to disable this convenience feature.

3. Why is this information gathered and how is it used: All information gathered by PledgeMusic is for the express purpose of enabling a more productive, customized, and efficient experience for our users. We do not sell user information. Private information gathered may be used to verify users in order to increase the soundness of a Campaign, by a Campaign in which the Pledger is a member to make a statement (as organized by members of that Campaign), or any other disclosure, and only if, approved by the user whose information is being revealed. Campaign information, detached from any private information, will also be reviewed by PledgeMusic staff periodically for the purpose of improving the website and enforcing the General Terms and Conditions. PledgeMusic may occasionally email you notifications regarding new services, the status of a Campaign you are engaged in, internal messages you have received from other site members, and other account information. PledgeMusic may disclose this information to business partners, and Artists running a Campaign to which a Pledger has Pledged.
4. Abuse: Any improper collection or misuse of information provided on PledgeMusic is a violation of PledgeMusic's General Terms and Conditions and should be reported to: nfo@pedgemusic.com
5. Credit Card Information and Security: PledgeMusic does not store credit card information. Credit card transactions are transmitted to a secure financial gateway, and we endeavour to protect the security of your payment information during transactions on by using Secure Sockets Layer (SSL) technology. Credit card information is stored in an encrypted form by our payment gateway provider. PledgeMusic stores only the last four digits of any credit card with a reference ID for the payment gateway.
6. Archives: PledgeMusic may keep copies of user information or Campaigns after the removal from the site in archive storage. This archive storage may include past versions of stored items that have since been modified or deleted.
7. Children Under Age 13: PledgeMusic does not knowingly collect information from persons under the age of 13. If PledgeMusic learns that a posting is by a person under the age of 13, PledgeMusic will remove that post.
8. Children Between the Ages of 13 and 18: We recommend that minors over the age of 13 ask their parents for permission before sending any information about themselves to anyone over the Internet.
9. Changes to this privacy policy: PledgeMusic may amend this privacy policy from time to time, at its sole discretion. Use of information we collect now is subject to the privacy policy in effect at the time such information is used. If we make changes to the privacy policy, we will notify you by posting an announcement on PledgeMusic website to allow you to learn what information we collect, how we use it, and under what circumstances if any, it is disclosed.
10. Conditions of Use: If you decide to visit PledgeMusic website, your visit and any possible dispute over privacy is subject to this privacy policy and our General Terms and Conditions, including limitations on damages, and jurisdiction.
11. Contacting PledgeMusic: If you have any questions about this privacy policy, please contact us. You may also reach us by mail at "Pledge Music, 22 Ende Street, Covent Garden, London, WC2H 9AD", or you can contact us through email at nfo@pedgemusic.com

Copyright Policy

1. PledgeMusic.com is in compliance with international copyright laws including 17 U.S.C. 512 and the Digital Millennium Copyright Act ("DMCA"). It is our policy to respond to any infringement notices and take appropriate actions under the Digital Millennium Copyright Act ("DMCA") and other applicable intellectual property laws.
2. If you are a copyright owner or an agent thereof and believe that any file or other content or link infringes upon your copyrights, you may submit a notification pursuant to the Digital Millennium Copyright Act ("DMCA") by providing us with the following information in writing (see 17 U.S.C 512©(3)):
 1. A physical or electronic signature of a person authorized to act on behalf of the owner of an exclusive right that is allegedly infringed;
 2. Identification of the copyrighted work claimed to have been infringed, or, if multiple copyrighted works at a single online site are covered by a single notification, a representative list of such works at that site;
 3. Identification of the material that is claimed to be infringing or to be the subject of infringing activity and that is to be removed or access to which is to be disabled and information reasonably sufficient to permit PledgeMusic to locate the material;
 4. Information reasonably sufficient to permit PledgeMusic to contact you, such as an address, telephone number, and, if available, an electronic mail;

5. A statement that you have a good faith belief that use of the material in the manner complained of is not authorized by the copyright owner, its agent, or the law; and
 6. A statement that the information in the notification is accurate, and under penalty of perjury, that you are authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.
3. If your notification complies with all of these requirements, you can send it to us by email to info@pedgemus.com. Any notifications not complying with the above requirements will be ignored. Please allow 1-2 business days for an email response.

ANNEX F

Music Sector Background: Music is a Copyright Industry

The community defined by DotMusic -- “a strictly delineated and organized community of individuals, organizations and business, a “logical alliance of communities of a similar nature” that relate to music, the art of combining sounds rhythmically, melodically or harmonically” -- functions in a regulated sector. Evidence to support this assessment include recent ICANN Resolutions and GAC Advice that recognized **music** as a regulated, sensitive sector.¹

As such, one can clearly “categorize the music industry is to consider it as a copyright industry. Copyright legislation is what makes it possible to commodify a musical work...The core of music industry is about ' developing musical content and personalities' (Negus, 1992), and to be able to license the use of that content and those personalities to consumers and business they need to be protected by copyright legislation.... The use of this term is not new in any way, but has been used by several institutions, for instance OECD, IFPI (2004a), Congress of the United States (CBO 2004) and of course by WIPO... The term also has a clearer definition and is less ambiguous than many of the other terms.”²

The music (industry) community is “commonly referred to in the literature and in public policy as one of the ‘cultural industries’ or ‘culture industries’ first coined by Theodor Adorno and Max Horkheimer in Dialectic of Enlightenment (2002). These are usually described as those industries that create, produce and distribute goods and services that are cultural in nature, and may be further defined by their relationship to copyright as a primary means of control over the economic functions of those industries.”³ “The study of the music industries as a function of culture and society is another popular approach to understanding the music industries. Music is culture, and industries are formed from aspects of cultural engagement.”⁴

Governments and their supporting government agencies play an essential complementary⁵ role in the music (industry) community because they regulate copyright. According to the U.S Copyright Office:⁶

The government’s involvement in the music marketplace is unusual and expansive relative to other kinds of works created and disseminated under the Copyright Act. In many cases, it compels copyright owners to license their works at government-set rates.

¹ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

² Patrick Wikström, The Music Industry: Music in the Cloud, Polity Press, Cambridge, 2009, <https://www.google.com/search?q=music+is+a+copyright+industry&ie=utf-8&oe=utf-8#q=music+is+a+%22copyright+industry%22>, Pg. 5

³ Chris Anderton, Andrew Dubber and Martin James, Understanding the Music Industries, Sage Publications Ltd, first edition, 2013, https://us.sagepub.com/sites/default/files/upm-binaries/54808_Anderton_ch_1.pdf, Pg. 8

⁴ Ibid, Pg.9

⁵ For example, IFACCA, a DotMusic supporting organization that is *mainly* dedicated to the community defined, is the sole organization that represents arts councils and government culture agencies globally, which provide essential complementary support services, regulatory enforcement and substantial funding to music globally.

⁶ United States Copyright Office, Copyright and the Music Marketplace, A Report of the Register of Copyright, February 2015, <http://copyright.gov/policy/musiclicensingstudy/copyright-and-the-music-marketplace.pdf>, Pg. 16-18. Also see Appendix D for diagrams concerning Licensing Frameworks. For more examples on royalty flow that many be regulated by government and the symbiotic relationships among music (industry) community members and organizations mainly dedicated to the community, see https://www.prsformusic.com/SiteCollectionDocuments/Membership/The_Music_Universe.pdf.

Regulation of music publishers and songwriters is particularly pervasive: the two most significant areas of their market (mechanical and performance licensing) are subject to mandatory licensing and ratesetting. Antitrust concerns have been the traditional rationale for government intervention. To be sure, where particular actors engage in anticompetitive conduct in violation of antitrust laws, that conduct should be addressed. But compulsory licensing does more than that—it removes choice and control from all copyright owners that seek to protect and maximize the value of their assets.

⁷...[L]icensees urge that government oversight is essential to forestall alleged monopolistic practices on the part of the PROs and large music publishers.⁸ Many licensing transactions are regulated by the government... They represent a series of statutory and judicial mandates that came into effect at various points during the last century to address particular concerns of the day.⁹

Congress passed the first federal copyright act in 1790 (Act of May 31, 1790, ch. 15, 1 Stat. 124)... In 1831, Congress amended the law to provide expressly that musical works were subject to federal copyright protection. (Act of Feb. 3, 1831, ch. 16, 4 Stat. 436). The 1831 amendment, however, provided owners of musical works with only the exclusive right to reproduce and distribute their compositions, i.e., to print and sell sheet music, because, “[a]t the time, performances were considered the vehicle by which to spur the sale of sheet music.” (See Maria A. Pallante, ASCAP at 100, 61 J. COPYRIGHT SOC’Y 545, 545-46 (2014)) In 1897, Congress expanded the rights of music owners to include the exclusive right to publicly perform their works. (Act of Mar. 3, 1897, ch. 392, 29 Stat. 694; see also Zvi S. Rosen, *The Twilight of the Opera Pirates: A Prehistory of the Exclusive Right of Public Performance for Musical Compositions*, 24 CARDOZO ARTS & ENT. L.J. 1157, 1158-59 (2007)). With the 1909 Copyright Act, federal copyright protection for musical works was further extended by adding an exclusive right to make “mechanical” reproductions of songs in “phonorecords”—in those days, piano rolls, but in the modern era, vinyl records and CDs. At the same time, Congress limited the new phonorecord right by enacting a compulsory license for this use... And in 1995, Congress confirmed that an owner’s exclusive right to reproduce and distribute phonorecords of musical works extends to digital phonorecord deliveries (“DPDs”)—that is, the transmission of digital files embodying musical works. (Digital Performance Right in Sound Recordings Act of 1995 (“DPRSRA”), Pub. L. No. 104-39, § 4, 109 Stat. 336, 344-48; see also 17 U.S.C. § 115(c)(3)(A).)¹⁰

Over time, new technologies changed the way people consumed music, from buying and playing sheet music, to enjoying player pianos, to listening to sound recordings on a phonograph or stereo system. (See U.S. COPYRIGHT OFFICE, FEDERAL COPYRIGHT PROTECTION FOR PRE-1972 SOUND RECORDINGS 7, 11 (2011) (“PRE-1972 SOUND RECORDINGS REPORT”); Michael Erlinger, Jr., *An Analog*

⁷ Ibid, Pg. 3

⁸ Ibid, Pg. 12

⁹ Ibid, Pg. 16

¹⁰ Ibid. Pg. 17

Solution in a Digital World: Providing Federal Copyright Protection for Pre-1972 Sound Recordings, 16 UCLA ENT. L. REV. 45, 57-58 (2009).) But it was not until 1971 that Congress recognized artists’ sound recordings as a distinct class of copyrighted works that were themselves deserving of federal copyright protection.(Pub. L. No. 92-140, 85 Stat. 391 (1971) (“Sound Recording Act of 1971”)) This federal protection, however, was limited to sound recordings fixed on or after February 15, 1972, and, until more recently, protected only the exclusive rights of reproduction, distribution, and preparation of derivative works. No exclusive right of public performance was granted. Then, in 1995, Congress granted sound recording owners a limited public performance right for digital audio transmissions—though, as discussed below, that right was made subject to compulsory licensing under sections 112 and 114 of the Copyright Act (DPRSRA §§ 2, 3. The digital performance right is also subject to a number of exceptions, including for transmissions to or within a business for use in the ordinary course of its business, for nonsubscription broadcast transmissions, and for certain geographically limited retransmissions of nonsubscription broadcast transmissions. 17 U.S.C. § 114(d)(1)(A), (B), (C)(ii), (C)(iv)).¹¹

As discussed, the United States government is one of many examples of government oversight and royalty rate-setting that are illustrated in the below charts:¹²

SERVICE TYPE	COPYRIGHT TYPE	REVENUE (%)
Terrestrial radio	Musical work	3.7 (2011-2016) ^[1]
	Sound recording	0.0
	<i>TOTAL</i>	3.7
Pre-existing satellite radio (i.e., Sirius XM)	Musical work	2.4 (2008) ^[2]
	Sound recording	9.0-11.0 (2013-2017)
	<i>TOTAL</i>	11.4-13.4
Pre-existing cable music service (i.e., Music Choice)	Musical work	5.5
	Sound recording	8.0-8.5 (2013-2017)
	<i>TOTAL</i>	13.5-14.0
Noninteractive	Musical work	4.0 (2014) ^[3]

¹¹ Ibid, Pg. 17 and Pg. 18

¹² Loren, Lydia Pallas, The Dual Narratives in the Landscape of Music Copyrights (August 1, 2014). Houston Law Review, Vol. 52, No. 2, 2014. Available at SSRN: <http://ssrn.com/abstract=2551342>

webcasters	Sound recording	25.0-56.0
	<i>TOTAL</i>	<i>29.0-60.0</i> ^[4]
Interactive webcasters	Musical work	10.5
	Sound recording	Unknown ^[5]
	<i>TOTAL</i>	<i>Unknown</i>

TYPE OF COPY	PRICE
Physical phonorecords	\$0.091 per song or \$0.0175 per minute of playing time ^[6]
Digital phonorecord deliveries (DPDs)	\$0.091 per song or \$0.0175 per minute of playing time ^[7]
Limited downloads (tethered devices)	3.9 percent of revenue ^[8]
Ringtones	\$0.24 per song ^[9]

^[1] Rate extrapolated by using the 1.7 percent rate charged by ASCAP, with a 45.6 percent PRO market share for ASCAP, resulting in an industrywide rate of 3.7 percent. See *Pandora Media Inc.*, 6 F. Supp. 3d at 361 (45.6 percent market share; *id.* at 366 (1.7 percent royalty rate).

^[2] Determination of Rates and Terms for Preexisting Subscription Services and Satellite Digital Audio Radio Services, 73 Fed. Reg. 4,080, 4,088 (Jan. 24, 2008) (to be codified at 37 C.F.R. pt. 382); Peter DiCola, *Copyright Equality: Free Speech, Efficiency, And Regulatory Parity in Distribution*, 93 B.U. L. REV. 1837, 1848 (2013).

^[3] This rate is extrapolated by using the 1.85 percent rate set for ASCAP. Using a 45.6 percent PRO market share for ASCAP, this results in an industrywide rate of approximately 4.0 percent. *Pandora Media Inc.*, 6 F. Supp. 3d at 361 (45.6 percent market share); *see id.* at 366 (1.85 percent royalty rate for noninteractive services). This 4 percent approximation was confirmed by the court's description. *Id.* at 346.

^[4] 60 percent is used here because it has been reported that "[i]n 2013, Pandora's content acquisition costs were...over 60 percent of its revenue for that fiscal year." *Pandora Media, Inc.*, 6 F. Supp. 3d at 328

^[5]The arrangements between interactive webcasters and sound recording copyright owners are privately negotiated and not subject to any disclosure requirements. See 17 U.S.C. § 114(e) (2012) (providing for private negotiations).

^[6]*Mechanical License Royalty Rates*, U.S. COPYRIGHT OFF., <http://www.copyright.gov/licensing/m200a.pdf> (last visited July 15, 2015)

^[7] *Ibid.*

^[8]This rate is arrived at by taking the 10.5 percent aggregate rate set by Copyright Office regulation and subtracting 6.6 percent as the portion to be paid for the public performance right. See infra notes 85–91 and accompanying text. 6.6 percent is arrived at by extrapolating from the 3 percent that ASCAP charges interactive webcasters, using a 45.6 percent market share for ASCAP, resulting in an industrywide rate of 6.6 percent. See *Pandora Media, Inc. v. Am. Soc’y of Composers, Authors, & Publishers*, 6 F. Supp. 3d 317, 351, 365 (S.D.N.Y. 2014).

^[9]*Mechanical License Royalty Rates*, supra note 6.

MusicBiz also provides other examples and infographics of Master, Mechanical Rights, and Public Performance/Communication Rights royalties that are regulated by global governments in 12 different countries are handled for the six most frequently requested types of music uses (download, non-interactive, on-demand, sync, lyrics, and karaoke).¹³ This symbiotic and overlapping structure of music (industry) community relationships and royalty structure of rights can also be downloaded below:

According to WIPO:¹⁴

These rights are defined within national copyright laws which are, in large part, shaped by international treaties, many of which are administered by WIPO (see box). Copyright law defines the rights conferred on authors of original works, and those who perform them, as well as those who support their widespread dissemination (i.e. record companies and broadcasters).

¹³ <http://musicbiz.org/press-releases/new-music-biz-infographic-simplifies-global-music-licensing-country-specific-guide/>

¹⁴ World Intellectual Property Organization, http://www.wipo.int/ip-outrreach/en/ipday/2015/creating_value_from_music.html

Once a work has been created – lyrics or musical notes written down, arranged or recorded - copyright protection kicks in. There is no formal obligation to register a work with a national authority, although in some countries, such the US, registering a work with the Library of Congress is the only way to bring a court action for infringement.

Under the 1886 WIPO Berne Convention for the Protection of Literary and Artistic Works,¹⁵ an original work is protected for a minimum of 50 years after the author’s death but in many jurisdictions that figure can be 70 years or more.

In a nutshell, copyright enables those who hold rights in a work to decide how, when and where it may be used and by whom. One of the purposes of copyright is to create the conditions for creators to be able: to earn a living from their talent by getting a financial return on the time and energy they put into producing a work and being recognized as its author.

Copyright includes economic rights which give the creator the right to authorize, prohibit or obtain financial compensation (in the form of equitable remuneration) for:

- the reproduction of a work, for example, on a CD, online or in a film;
- the distribution of copies of a work;
- the communication to the public of a work. If a piece of music is performed in public or played over a sound system in a shopping mall or a disco, a royalty is payable to authors, performers and/or right holders according to the national legislation.
- broadcasting or otherwise making available a work to the public (i.e. via radio, TV or online)
- the adaptation of a work (if someone translates the lyrics of a song and wants to record these using the same music as that of the original song, or changes an original work adding new elements to it, they first need to get authorization from those with rights in the original work). The new adapted work also qualifies for copyright protection in its own right. Depending on the terms of the agreement to license the original work, anyone seeking to publish or use such a work may need to get authorization to do so from those with rights in the original work.

Copyright also confers moral rights (Article 6b is of the Berne Convention) allowing the creator of a work to claim authorship in it (the right of paternity or attribution) and to object to any modification of it that may be damaging or prejudicial to them (the right of integrity).

Under certain circumstances, there are limitations on copyright and related rights (as set out in international and national copyright laws). For example, when someone wants to use a work or a portion of it for teaching, scientific research, news reporting, etc.

Most countries recognize the possibility of using work without the right owner’s authorization but may regulate such use in different ways. Some countries have a list of “permitted uses” whilst others have a general provision in their copyright law (e.g. “fair use” in the US). Considerations in determining “fair use” include the nature and purpose of use, the nature of the work used; the amount of the work used; and the likely impact on the work’s commercial value.

¹⁵ <http://www.wipo.int/treaties/en/ip/berne/>

As a guiding principle, the “free use” of protected works must be confined to certain specific instances; must not “conflict with the normal exploitation of the work”; and must “not unreasonably prejudice the legitimate interests of the author (or right holder).”

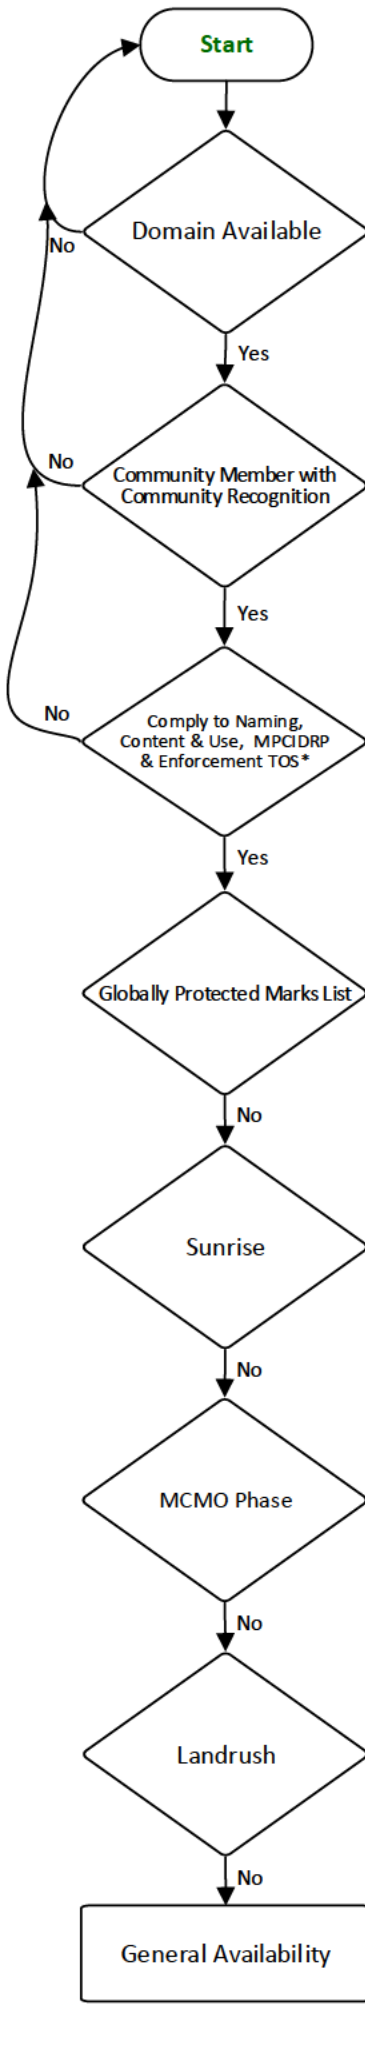

The owner of economic rights in a musical work (moral rights can never be transferred from the original author) can use them to generate income. They can **sell** or **license** them to a third party – a company or individual who is well placed to commercialize the work - in return for a payment known as a royalty, where payments usually depend on the actual use of the work. They can assign the rights to authorize or prohibit certain or all of the acts outlined above. In both instances, the person to whom the rights are sold or assigned becomes the new owner of the copyright. In some countries, e.g. Germany, assignment is not legally possible and so works can only be licensed.

Licensing involves the copyright owner entering into a deal with a third party, authorizing it to use the work for a specific purpose and time period. For example, a songwriter may give permission to a music publisher to authorize the recording of his or her song by performers and record companies. These licenses may be exclusive, involving only one party, or non-exclusive involving multiple parties.

Given the fact that it simply is not practical for authors and performers to negotiate separate licensing deals with every single radio or television station, or business that wants to use their work, musicians and other creators often sign up with, and in so doing, grant exclusive licenses to, a collective management organization. Acting on behalf of songwriters, musicians and performers, CMOs connect creators with those who want to use their work. National laws may also authorize a CMO to negotiate on behalf of authors and performers. CMOs authorize the use of a musician’s work; collect and distribute licensing fees or royalties, and also keep tabs on any misuse or infringement.

Every piece of music is protected by copyright. There is copyright in the music itself; in the lyrics of a song and related rights in the sound recording. If anyone wants to use a musical work, or a portion of it, they must obtain the permission of the copyright holder(s), except in the cases covered by a limitation (see above). Just as CMOs can help artists manage their music and collect associated royalties; they can also help those seeking to obtain permission to use a protected work.

.MUSIC Registration Process Flowchart

*** Registration Policies include:**

- **Eligibility** - Restricted to Music Community members with requisite awareness and recognition of the community addressed: the "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (which includes members of DotMusic Music Community Member Organizations -- MCMOs);
- **Authentication** - Mandatory Two-Step Phone & Email Authentication
- **Naming Conditions** - Name of (entire or portion of) entity or DBA; Acronym; Name recognizing or describing registrant; or Name related to registrant mission or activities;
- **Content & Use** - Only legal music content & legal music-related usage. No parking pages allowed;
- **Enforcement** - Proactive and reactive enforcement measures and anti-abuse procedures with random compliance checks, including appropriate appeals mechanisms to fix compliance issues governed by the music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process ("MPCIDRP"). Independent appeals may be also conducted with the [National Arbitration Forum](#) (NAF).

ANNEX H

Independent Nielsen/Harris Poll

To address the DotMusic Application’s “Community Establishment,” “Community Definition” and “Nexus,” an independent survey was conducted within the United States from August 7-11, 2015 among 2,084 adults ages 18 and older, by Harris Poll¹ on behalf of DotMusic Limited. Figures for age, sex, race/ethnicity, education, region and household income were weighted where necessary to bring them into line with their actual proportions in the population. The data was weighted to reflect the composition of the adult population. The independent polling organization Nielsen/Harris Poll addressed whether the applied-for string was commonly-known (i.e. known by most people²) and associated with the identification of the community defined by DotMusic by asking the question:

If you saw a website domain that ended in “.music” (e.g., www.name.music), would you associate it with musicians and/or other individuals or organizations belonging to the music community (i.e., a logical alliance of communities of individuals, organizations and business that relate to music)?³

Most people, 1562 out of 2084 (i.e. 3 in 4 or 75% of the respondents) responded “Yes,”⁴ which is aligned with the “Nexus” Criterion 2A requirements that the applied for-string is “commonly-known” as the identification of the community addressed by the application.

Furthermore, a majority agreed that DotMusic’s associated definition of the community addressed that matches the string (i.e. a logical alliance of communities of individuals, organizations and business that relate to music) is representative and accurate.

ANNEX I

Trusted. Safe. Licensed.

Enhanced Safeguards to Protect IP.
 Monies Flow to the Music Community.
 Governed by the Global Music Community.
 Available to the Entire Global Music Community.

What is the DotMusic's community-based .MUSIC Initiative?

DotMusic is the only remaining .MUSIC community applicant with policies that ensure that music artists, bands, industry professionals and organizations register a trusted, secure and verified .MUSIC domain — just like a .EDU or .GOV domain — and own their exclusive www.name.music web address.

A community-based .MUSIC differentiates itself from .COM, .NET, .ORG and other domains because:

1. .MUSIC is exclusive only to legitimate members of the entire global music community;
2. .MUSIC is governed and controlled by the global music community. Each music constituent community type¹ has a governance seat on the multi-stakeholder .MUSIC policy advisory board;
3. .MUSIC's community application is supported by a majority of the global music community in terms of headcount, and growing (See <http://music.us/supporters>);
4. .MUSIC has enhanced safeguards to protect intellectual property, prevent cybersquatting and eliminate copyright infringement;
5. .MUSIC has incorporated all RIAA intellectual property protection provisions that include policies to stop domain hopping, takedown policies in the case of piracy, authorization provisions, permanent blocks, privacy/proxy provision, true name/address mandates and trusted sender complaint policies amongst others;
6. .MUSIC requires registrant validation through a mandatory two-step phone and email authentication process;
7. .MUSIC protects names of famous music artists and brands by giving registration priority to those entities during a priority-based launch phase. .MUSIC also gives registration priority to community members belonging to legitimate Music Community Member Organizations to spur adoption, trust and safety;
8. .MUSIC has domain naming conditions that eliminate cybersquatting and famous music brand trademark infringement. Registrants are only allowed to register their own name, acronym or "Doing Business As;"
9. .MUSIC only allows legal music content and legal music usage; and
10. .MUSIC will take down any domain infringing on any of its enhanced safeguard policies.

The DotMusic Mission for .MUSIC is focused on furthering the common interest shared by the entire global music community it serves: the legal promotion and distribution of music. Its purpose is:

1. Creating a trusted, safe online haven for music consumption and licensing;
2. Establishing a safe home on the Internet for Music Community members;
3. Protecting intellectual property and fighting piracy;
4. Supporting musicians' welfare, rights and fair compensation; and
5. Promoting music and the arts, cultural diversity and music education; and
6. Following a multi-stakeholder approach of fair representation of all types of global music constituents without discrimination, including both commercial and non-commercial entities.

For more information on .MUSIC visit: <http://www.music.us>

¹ *Constituent types include artists/bands/musicians, songwriters, major/independent labels, publishers, instrument and music product manufacturers, performance rights organizations, collection societies, unions, managers, engineers, agents, promoters, government ministries of culture, music/arts councils, music associations, music radio and others.*

DotMusic Limited: .MUSIC Community Application Specifications

	DotMusic Limited
"Also Known As"	.MUSIC™
Application ID	1-1115-14110
Total Top-Level Domain Applications Filed	1
Type of Application	Community (Restricted)
Policy Advisory Board & Multi-Stakeholder Governance	Yes
Community Member Organization Resellers/Partners	Yes
Music Organization Accreditation Requirements	Yes. Eligible organizations get priority in MCMO Phase(1)
Who Can Register (Eligibility)	Entire global Music Community
Phone & Email Two-Step Authentication	Yes
Protect Famous Music Artist/Brand Names	Music Globally Protected Marks List (GPML)
Domain Naming Conditions	Yes. 1. Entity name (or portion of); or 2. Doing Business As; or 3. Acronym (AKA); or 4. Name recognizing entity; or 5. Name describing entity
Use:	
Only Legal Music Activities	Yes. Only legal music activities allowed
Only Music-Related Activity Usage	Yes. Only music usage allowed
Prohibits registering of domain with established artist's/brand's name	Yes
Content:	
Only Music-Related Content	Yes. Only music content allowed
Quality Content Control (Parking Pages)	Yes. Parking pages are <u>not</u> allowed
Policy, IP & Copyright Infringement Enforcement	Extensive enforcement measures constituting a coherent set
Enforcement & Appeals Mechanisms	Appropriate appeals mechanisms
Independent Dispute Resolution Provider	Yes. National Arbitration Forum (NAF)
Music-Focused Registration Policy Dispute Resolution	MPCIDRP
Music-tailored Copyright Protection Provisions	Extensive enhanced safeguards and copyright provisions (2)
Community Definition	Organized & delineated logical alliance of music communities
Community Support	Majority. Coalition represents over 95% of global music consumed
Community Objection	There has been no Community Objection or relevant opposition (3)

Community Premium Channels	Yes. Sorted by Type, Genre, Language, Geography, Keyword (5)
Global Legal Song Licensing Registry based on DNS	Yes

(1) DotMusic gives priority to members of Music Organizations during MCMO Phase. During General Availability all Community members (including non-MCMO members) can register .MUSIC.

(2) DotMusic has more enhanced safeguards than all .MUSIC applicants combined. DotMusic has incorporated all IFPI/RIAA IP protection provisions that include stopping domain hopping, takedown policies, authorizations, permanent blocks, privacy/proxy, true name/address and trusted sender complaint policies.

(3) DotMusic addressed all concerns/comments raised by the Music Community and filed the PIC which clarifies how the Application serves the Community and the public interest. According to the ICANN New gTLD Program Applicant Guidebook: "To be taken into account as relevant opposition, such objections or comments must be of a reasoned nature. Sources of opposition that are clearly spurious, unsubstantiated, made for a purpose incompatible with competition objectives, or filed for the purpose of obstruction will not be considered relevant." (Community Priority Evaluation Guidelines, P.20).

(4) By filing these Public Interest Commitments with ICANN, DotMusic commits to serve the Music Community and Public Interest as clarified and may be held accountable via the PICDRP.

(5) The Premium Channels available to all validated community members are sorted/delineated according to NAICS community type (Musician/Band/Professional/Company), Genre (e.g www.Rock.music), Language (e.g French.music), Geography (e.g London.music / France.music) and Keywords (e.g Lyrics.music).

Preface

The objective of this letter to the EIU and ICANN is to provide compelling evidence that DotMusic Limited's community-based application for .MUSIC:

- 1) Is entirely different from that of Far Further's (.music LLC) community-based application for .MUSIC (See .MUSIC Applicant Comparison Chart, Appendix E);
- 2) Should pass CPE based on consistency with respect to points awarded to other CPE applicants by the EIU in their CPE Determinations; and
- 3) Has no opposition that is deemed relevant (i.e. opposition is clearly spurious, unsubstantiated, made for a purpose incompatible with competition objectives, and filed for the purpose of obstruction and should not be considered relevant)

Criterion #1: Community Establishment

1-A Delineation

The Community Priority Evaluation panel should determine that the community, as defined by the application, meets the criterion for Delineation as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook (AGB), because the community defined in the application demonstrates sufficient delineation, organization, and pre-existence. It is respectfully submitted that the application should receive a score of 2 out of 2 points under criterion 1-A: Delineation.

Delineation

Two conditions must be met to fulfill the requirements for delineation: there must be a clear, straightforward membership definition and there must be awareness and recognition of a community (as defined by the application) among its members.

The application defines its community as follows:

The Community is a strictly delineated and organized community of individuals, organizations and business, a "logical alliance of communities of a similar nature ("COMMUNITY")," that relate to music: the art of combining sounds rhythmically, melodically or harmonically. (Question 20A)

According to the .HOTEL¹ EIU Determination for *Delineation*:

.hotel domains will be available for registration to all companies which are member of the Hotel Community on a local, national and international level. The registration of .hotel domain names shall be dedicated to all entities and organizations representing:

1. *Individual Hotels*
2. *Hotel Chains*
3. *Hotel Marketing organizations representing members from 1. and/or 2.*

¹ <http://www.icann.org/sites/default/files/tlds/hotel/hotel-cpe-1-1032-95136-en.pdf>

4. International, national and local Associations representing Hotels and Hotel Associations representing members from 1. and/or 2.

5. Other Organizations representing Hotels, Hotel Owners and other solely Hotel related organizations representing on members from 1. and/or 2.

These categories are a **logical alliance** of members... Furthermore, association with the hotel sector can be verified through membership lists, directories and registers. In addition, the community as defined in the application has awareness and recognition among its members. This is because the community is defined in terms of its association with the hotel industry and the provision of specific hotel services.

According to the AGB, “[d]elineation relates to the membership of a community, where a clear and straight-forward membership definition scores high, while an unclear, dispersed or unbound definition scores low.” As required by the AGB, the application shows a clear and straight-forward membership definition because the application specifies that the Community definition is a “strictly delineated and organized community of individuals, organizations and business...that relate to music: the art of combining sounds, rhythmically, methodically or harmonically.”

According to the application:

DotMusic will use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment beyond reasonable doubt and incorporate safeguards in membership criteria “aligned with the community-based Purpose” ...

Registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership” without discrimination, conflict of interest or “likelihood of material detriment to the rights and legitimate interests” of the Community. (Question 20A)

The Application also provides that the “Community” served consists of:

[M]usic stakeholders being structurally organized using pre-existing, strictly delineated classes and recognized criteria to clearly organize the Community classified by:

- **North American Industrial Classification System codes (NAICS²) used by the Census Bureau and Federal statistical agencies as the classification standard for the purpose of collecting, analyzing, and publishing statistical data related to the U.S.**
- **United Nations International Standard Industrial Classification (ISIC) system³ to “delineate according to what is the customary combination of activities”⁴ such as those representing the Community.**

² <http://www.census.gov/eos/www/naics>

The Music Community is strictly delineated using established NAICS codes that align with the (i) characteristics of the globally recognized, organized Community, and (ii) .MUSIC global rotating multi-stakeholder Advisory Board model of fair representation, irrespective of locale, size or commercial/non-commercial status, organized with the following delineation (corresponding NAICS code in parenthesis):

- **Musical groups and artists (711130)**
- **Independent music artists, performers, arrangers & composers (711500)**
- **Music publishers (512230)**
- **Music recording industries (512290)**
- **Music recording & rehearsal studios (512240)**
- **Music distributors, promoters & record labels (512220)**
- **Music production companies & record producers (512210)**
- **Live musical producers (711130)**
- **Musical instrument manufacturers (339992)**
- **Musical instruments & supplies stores (451140)**
- **Music stores (451220)**
- **Music accountants (541211)**
- **Music lawyers (541110)**
- **Music education & schools (611610)**
- **Music agents & managers (711400)**
- **Music promoters & performing arts establishments (711300)**
- **Music promoters of performing arts with facilities (711310)**
- **Music promoters of performing arts without facilities (711320)**
- **Music performing arts companies (711100)**
- **Other music performing arts companies (711190)**
- **Music record reproducing companies (334612)**

³ http://www.unstats.un.org/unsd/publication/seriesM/seriesm_4rev4e.pdf

⁴ <http://www.unstats.un.org/unsd/class/family/family2.asp?CI=17>

- **Music, audio and video equipment manufacturers (334310)**
- **Music radio networks (515111)**
- **Music radio stations (515112)**
- **Music archives & libraries (519120)**
- **Music business & management consultants (541611)**
- **Music collection agencies & performance rights organizations (561440)**
- **Music therapists (621340)**
- **Music business associations (813910)**
- **Music coalitions, associations, organizations, information centers & export offices (813920)**
- **Music unions (813930)**
- **Music public relations agencies (541820)**
- **Music journalists & bloggers (711510)**
- **Internet Music radio station (519130)**
- **Music broadcasters (515120)**
- **Music video producers (512110)**
- **Music marketing services (541613)**
- **Music & audio engineers (541330)**
- **Music ticketing (561599)**
- **Music recreation establishments (722410)**
- **Music fans/clubs (813410)**

(Question 20A)

Membership is determined through those individuals or entities with requisite awareness that identify as members of the Music Community through either active verified membership and participation in a Music Community Member Organization (mCMO) (of which members comprise over 95% of music produced and consumed worldwide) **or** those individuals or organizations, which may not be mCMO members, but which have requisite awareness of the community and affirmative identify and categorize

themselves according to NAICS/ISIC classifications⁵ and agree to abide by and support the Community focused Use Policies (Also see Venn Diagram, Appendix C).

In support of those goals the Application provides that:

- 1) **DotMusic will incorporate Community membership eligibility restricted only to members verifying themselves as Community members based on NAICS/ISIC classifications and agreeing to Community-focused Use policies and dispute resolution/takedown mechanisms to benefit the .MUSIC Mission/Purpose and multi-stakeholder mission and to protect DotMusic from privacy and monopoly laws. Any violation of the membership criteria, Use and other Policies might lead to the cancellation of membership status, including domain takedown if deemed appropriate.**

Community members will be able to use their membership credentials to be included in the uniquely-classified Premium Channels that are sorted according to NAICS/ISIC classifications. For example, music publishers (NAICS code 512230) will be able to organically self-categorize themselves in a highly relevant manner and be included in the Publishers.MUSIC Premium Channel using their membership credentials to participate. (Question 18B ii);

And

- 2) For members with requisite awareness that are also part of existing Music Community Member Organizations (mCMOs), the Application provides a Landrush registration:

Music Community Member Organization (MCMO) Landrush for registrants with demonstrated MCMO memberships...

MUSIC COMMUNITY MEMBER ORGANIZATION (MCMO) LANDRUSH LAUNCH

This is the second phase of .MUSIC domain registration. It is a limited-time period reserved for members of DotMusic-accredited music Community Member Organizations (mCMO). (Application Answer to Question 18(B)(vi) & 20(e))

The mCMO domain allocation method during the Landrush phase was created by DotMusic to allow Community members to register through established Community organizations. During the General Registration phase the TLD is open to all Community members for registration, but also restricted by Eligibility, Use and other Policies, including enhanced safeguards. (Application Answer to Question 20B).

Applicant requires that members of the Community self-identify by selecting the delineation of the music constituent type to which they belong to or associate with. This identification process is aligned with the member's requisite awareness of the "logical alliance of communities related to music." After

⁵ Members sorted according to these classifications must be music-related

their self-identifying, the Registry will place the registrant/community member into the corresponding premium channel(s) sorted according to music delineation type. Most importantly, all registrants/community members are governed by the applicant's Community Use Policies and Restrictions that are related to music.

According to the .ECO⁶ EIU CPE Determination in *Community Establishment*:

The community as defined in the application has awareness and recognition among its members. According to the application:

The Community has historically structured and organized itself and its work through an international network of organizations, including millions of individual members with strongly aligned goals, values and interests. As well as collaborating via long-standing international multi-stakeholder fora and membership organizations, members traditionally organize through multi-organization alliances around specific events, geographies, and issues.

According to the AGB, "community" implies "more of cohesion than a mere commonality of interest" and there should be "an awareness and recognition of a community among its members." Based on the Panel's research and materials provided in the application, the community members as defined in the application demonstrate the "cohesion" required by the AGB. The application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting."

...the community as defined in the application has awareness and recognition among its members. This is because the community is defined in terms of its association with, and active participation in, environmental activities and environmental conservation and preservation.

The EIU's CPE Determination for .ECO is also consistent with DotMusic's Delineation for .MUSIC. According to the AGB's second Delineation criterion, "community" implies "more of cohesion than a mere commonality of interest" and there should be "an awareness and recognition of a community among its members." The community as defined in the application (the "Community") has awareness and recognition among its members. This is because the community as defined consists of entities that are in the music Community (which may be commonly referred to by many in the general public as the "music industry")⁷, and as participants, whether they be creators (amateur or professional), producers, manufacturers, publishers in this clearly defined industry, they have an awareness and recognition of their inclusion in the music Community. In addition, membership in the Community is sufficiently structured, as the requirements listed in the community definition above show. Members recognize

⁶ <http://www.icann.org/sites/default/files/tlds/eco/eco-cpe-1-912-59314-en.pdf>

⁷ <http://www.encyclopedia.com/doc/1G2-3401802800.html> and http://is.jrc.ec.europa.eu/pages/ISG/documents/FINALMusicreportwithcovers_EB_Corrected_02.pdf

themselves as part of the music community as evidenced, for example, by their inclusion in many music community organizations and participation in their events.

The application's Public Interest Commitments⁸ provide clarification of the application language concerning the requirement of Community awareness and recognition among its members:

- A commitment to not discriminate against any legitimate members of the global music community by adhering to the DotMusic Eligibility policy of non-discrimination that restricts eligibility to Music Community members -- as explicitly stated in DotMusic's Application -- that have an active, non-tangential relationship with the applied-for string and also have the requisite awareness of the music community they identify with as part of the registration process. This public interest commitment ensures the inclusion of the entire global music community that the string .MUSIC connotes. (PIC at p.1)
- A commitment that the string will be launched under a multi-stakeholder governance structure of representation that includes all music constituents represented by the string, irrespective of type, size or locale, including commercial, non-commercial and amateur constituents, as explicitly stated in DotMusic's Application.

As explicitly stated in its Application, DotMusic commits to:

- a. uphold its Community definition of a "logical alliance of communities of similar nature that relate to music" to incorporate all Music Community members;
 - b. accredit eligible non-negligible music organizations of relevance without discrimination if they meet the Music Community Member Organization (MCMO) Accreditation criteria;
 - c. to give members of MCMOs priority to register a .MUSIC domain during the MCMO Launch Phase to help launch .MUSIC responsibly and drive adoption;
 - d. to allow all legitimate members of the Community as defined to register a .MUSIC domain;
 - e. maintain a rotating, global Advisory Committee ("Policy Advisory Board" "PAB") consisting of and representing all multi-stakeholder constituent types. (PIC at p.2)
- [E]ntities with a casual, tangential relationship with music (i.e. without the requisite awareness of belonging to the Community) or those entities belonging to pirate networks or unlicensed networks are entirely excluded from the Music Community

⁸ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadpicposting/1392?t:ac=1392>

definition. (PIC at p.16)

- The defined Community is delineated and organized because it operates in a regulated sector that uses numerous globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless whether the constituent is a commercial, non-commercial or amateur entity. The “music” community cohesion is evidenced in commonly used in classification systems such as the ISMN,⁹ ISRC,¹⁰ ISWC¹¹ and ISNI¹²). (PIC at p.11 and Application Answer to Question 20a)
- DotMusic expects that the substantial majority of all of its registrations will originate from the music entity type classified as “Musical groups and artists” (e.g. See North American Industrial Classification System (NAICS) code 711130¹³ or the United Nations Industrial Classification (ISIC) code 9214¹⁴). (PIC at p.11).
- DotMusic has required all music entity types to be “music”-related. For example, all eligible entities delineated and organized under constituent types (using NAICS as a reference for clearly classifying constituent types) must have an association with the gTLD and “music” with respect to their primary activity. This is because the string naturally identifies all entities involved in music. For example, the NAICS code for “lawyers” is 541110. According to DotMusic’s Application, .music is only restricted to the “music” Community and excludes any peripheral entities. DotMusic’s Application has added the word “music” next to the DotMusic-selected NAICS code to ensure that

⁹ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁰ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI (a DotMusic supporting organization that is mainly dedicated to the Community defined), See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹¹ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹² The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹³ The equivalent code for the NAICS code for “Musical groups and artists” (See <http://unstats.un.org/unsd/cr/registry/regcssm.asp?Cl=230&Lg=1&Co=711130>) under the United Nations International Standard of Industrial Classification (ISIC) is “Musicians and musical groups” with code 9214, See <https://unstats.un.org/unsd/cr/registry/regso2.asp?Cl=17&Co=9214&Lg=1>

¹⁴ See <http://www.census.gov/econ/isp/sampler.php?naicscode=711130&naicslevel=6>. The corresponding code relating to music-related activities according to the United Nations International Standard Industrial Classification (ISIC) is 592 (“sound recording and music publishing activities”), See http://unstats.un.org/unsd/publication/seriesM/seriesm_4rev4e.pdf Pg. 209 and <http://unstats.un.org/unsd/cr/registry/regcs.asp?Cl=27&Co=592&Lg=1>. According to the United Nations, “NAICS does provides more comparability to ISIC” and “NAICS is more detailed and recognizes many more high-tech and service industries,” See <http://unstats.un.org/unsd/class/intercop/expertgroup/1998/ac63-10.pdf>, Pg.8

the eligible Community members are automatically associated with the string. In this example, eligibility is restricted to “Music lawyers (541110)” (See Application Answer to Question 20a below) i.e. general, non-music lawyers are prohibited from registration because they are peripheral entities not automatically associated with the gTLD. (PIC at pp. 11-12).

- music-only eligibility is also in alignment with the Content & Use requirement that any content and usage must be music-only. This coherent set of restrictions serves the public interest because it is consistent with the string’s articulated community-based purpose tailored for music. (PIC at p.12)

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary¹⁵) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries¹⁶).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” (i.e. Each “organized community that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

Based on the Application, DotMusic uses “clear, organized, consistent and interrelated criteria to demonstrate Community Establishment beyond reasonable doubt and incorporate safeguards in membership criteria aligned with the community-based Purpose” (Application Answer to Question 20a). As such, each Community member must have demonstrable involvement in music-related activities aligned with the application’s articulated community-based purpose that follows unified goals which the Community addressed subscribes to, such as:

- 1) creating a trusted identifier and safe haven for music consumption by protecting musicians’ rights and intellectual property,
- 2) fighting copyright infringement/piracy,
- 3) supporting fair compensation and music education;
- 4) following a multi-stakeholder approach supporting all types of global music constituents without discrimination; and
- 5) Multi-stakeholder governance¹⁷ by relevant organizations with Community members representing over 95% of music consumed globally, including many

¹⁵ <http://www.merriam-webster.com/dictionary/cohesion>

¹⁷ See expanding governance board at <http://music.us/board>

entities *mainly* dedicated to the Community. (See Application, Mission and Purpose, Q.18 and Q.20)

This active and overlapping commitment to shared goals among the various types of delineated music constituents are indicative of “cohesion” because they cohere in their activities which are aligned with DotMusic’s clearly defined purpose. The mission and activities overlap among the wide array of supporting member organizations and community members.

Accordingly, it is respectfully submitted that the Panel should determine that the community as defined in the application satisfies both of the conditions to fulfill the requirements for delineation.

Organization

Two conditions must be met to fulfill the requirements for organization: there must be at least one entity mainly dedicated to the community and there must be documented evidence of community activities. According to the AGB, “organized” implies that there is at least one entity mainly dedicated to the community, with documented evidence of community activities.”

According to ICANN’s Applicant Guidebook (“AGB”)¹⁸: “With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.” (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly¹⁹ dedicated to the community which has supported DotMusic. Applicant’s supports include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations. At least seven (7) such entities support Applicant.

One entity that is mainly dedicated to the community is the International Federation of Phonographic Industry (IFPI). The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”²⁰ whose members²¹ – major and

¹⁸ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

¹⁹ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>).

²⁰ <http://www.ifpi.org/about.php>

independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,²² represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”²³ the world’s largest music market with 30% global market share.²⁴ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.” The IFPI has been active since its founding in 1933 and its documented activities and events include market research and global insight, legal policy and litigation, performance rights, anti-piracy, international trade, technology and communications.²⁵

A second entity that is mainly dedicated to the community is the International Federation of Musicians (FIM) representing the “voice of musicians worldwide.” FIM is the only global music body representing musicians and their trade unions globally with members in over 60 countries.²⁶ FIM is the only international federation that is mainly dedicated to and represents musicians globally which has official relations with the United Nations Economic and Social Council (ECOSOC)(Ros C); the United Nations Educational, Scientific and Cultural Organization (UNESCO) (Consultative Status); the World Intellectual Property Organization (WIPO) (Permanent Observer Status); and the Organisation internationale de la Francophonie (OIF). FIM is a member of International Music Council (IMC) founded in 1949 by UNESCO, which represents over 200 million music constituents from over 150 countries and over 1000 organizations.²⁷ FIM’s aim is to “protect and elevate the economic, social and artistic status and interests of musicians, both in their role as performers and as producers of the recording of their own performances.”²⁸

The FIM, founded in 1948, is globally-recognized and has a permanent relationship with the *United Nations Educational, Scientific and Cultural Organization* (UNESCO),²⁹ the International Labor Organization (ILO)³⁰ and the World Intellectual Property Organization (WIPO).³¹ It is recognized and consulted by the Council of Europe,³² the European Commission³³ and the European Parliament.³⁴ It enables it to participate in crucial negotiations on the protection of performers where it can make the voice of musicians heard. The FIM is also member of the International Music Council (IMC).³⁵ It also collaborates with all national and international organizations representing workers in the media field. Activities include the creation of the International Arts and Entertainment Alliance (IAEA)³⁶ with the

³⁶ <http://www.iaea-globalunion.org>

International Federation of Actors (FIA)³⁷ and UNI-Media and Entertainment International (UNI-MEI).³⁸ IAEA is a member of the Council of Global Unions (CGU).³⁹ Furthermore, the FIM works closely with collecting societies administering performers' rights. Its documented activities and events include the furtherance of musicians in all countries, strengthening of international collaboration, promoting of national and international protective legislative (or other) initiatives in the interests of musicians, obtaining and compilation of statistical and other information referring to the music profession and provision of such information to member unions, as well as holding events such as international congresses and conferences.⁴⁰

Another third entity dedicated to the community is the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA). IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.⁴¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per (Application Answer to Question 20a).

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.⁴² The UNESCO strategic partnership⁴³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.⁴⁴ IFACCA's extensive activities, campaigns and global recognition can be evidenced by the recent release of a communique⁴⁵ in collaboration with other leading networks, such as the International Music Council, IFCCD, Agenda 21 for culture (UCLG), Culture Action Europe, Arterial Network, ICOMOS, IFLA and Red Latinoamericana de Arte para la Transformación Social. This global campaign was signed by 900 organisations in 120

⁴⁵ http://media.ifacca.org/files/IFACCA_Sept2015_SDG_ENG.pdf

countries to create a global voice for the cultural sector.⁴⁶

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.⁴⁷

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.⁴⁸ Other small government Ministries of Culture, such as Albania,⁴⁹ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,⁵⁰ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.⁵¹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).⁵²

⁵¹ <http://my.midem.com/en/contact-us/pavilion-representatives/>

⁵² 2011 Annual Report from New Zealand Ministry of Culture:

- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.⁵³
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).⁵⁴ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.⁵⁵
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.⁵⁶
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception⁵⁷ and has a strong focus on music as outlined in its Strategic Plan⁵⁸ with Congress requested to provide \$154,465,000 for fiscal year 2014.⁵⁹
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the "Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa"⁶⁰
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.⁶¹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁶²

Each of IFACCA's members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

A fourth entity NAMM, the International Music Products Association, is an entity mainly dedicated to the community and is a group of non-negligible size that has supported DotMusic. NAMM, formed in 1901, has globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{63 64} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM's members. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM documented activities and events include the NAMM Show, the world's largest event for the music products community.⁶⁵

A fifth global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁶⁶ – a majority of global music.⁶⁷

Another letter⁶⁸ sent to ICANN (on April 14th, 2015) from a sixth entity, the NMPA and on behalf of a music publisher and songwriter community coalition, representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Finally, a seventh example of an "entity *mainly* dedicated to the community," with members that cover hundreds of millions of music constituents with formal boundaries, is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁶⁹

The reach of A2IM Associate⁷⁰ membership covers hundreds of millions of entities (i.e. the reach of A2IM's total membership "geographic breadth is inclusive of all recognized territories covering regions

associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁷¹ – iTunes accounts for 63% of global digital music market⁷² - a majority – with a registered community of 800 million registered members⁷³ available in 119 countries who abide to strict terms of service and boundaries⁷⁴ and have downloaded over 25 billion songs⁷⁵ from iTunes' catalog of over 43 million songs⁷⁶ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁷⁷
- **Pandora**⁷⁸ – Pandora is the world's largest streaming music radio with a community of over 250 million registered members.⁷⁹
- **Spotify**⁸⁰ – Spotify is the world's largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁸¹
- **Vevo**⁸² – Vevo is the world's leading all-premium music video community and platform with over 8 billion monthly views globally.⁸³
- **Youtube**⁸⁴ – Youtube is the world's largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁸⁵ of which 38.4% is music-related.⁸⁶

- **Reverbnation**⁸⁷ – Reverbnation⁸⁸ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The Reverbnation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁸⁹ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁹⁰

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁹¹), China (China Audio Video Association⁹²) and Germany (Initiative Musik).⁹³ A2IM also has Affiliate⁹⁴ associations within the global music community. These include Affiliates such as MusicFirst,⁹⁵ the Copyright Alliance,⁹⁶ the Worldwide Independent Network (WIN)⁹⁷ and Merlin.⁹⁸

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁹⁹ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM’s Label and Associate Membership, A2IM’s Affiliates and the A2IM’s Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size

⁹⁹ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

¹⁰⁰ <http://www.icann.org/sites/default/files/tlds/hotel/hotel-cpe-1-1032-95136-en.pdf>

The community as defined in the application has at least one entity mainly dedicated to the community. There are, in fact, several entities that are mainly dedicated to the community, such as the International Hotel and Restaurant Association (IH&RA), Hospitality Europe (HOTREC), the American Hotel & Lodging Association (AH&LA) and China Hotel Association (CHA), among others.

According to the .ECO¹⁰¹ EIU CPE Determination for *Delineation (Organization)*:

The community as defined in the application has at least one entity mainly dedicated to the community. In fact, several entities are mainly dedicated to the community as defined by the application, such as the International Union for Conservation of Nature (IUCN), World Wide Fund For Nature (WWF), United Nations Environment Program and the Global Reporting Initiative, among others.

Consistent with the .HOTEL and the .ECO EIU CPE Determinations, the equivalent for the International Hotel and Restaurant Association (.HOTEL) and the International Union for Conservation of Nature (.ECO) or World Wide Fund (.ECO) with respect to “music” include the International Federation of Phonographic Industry (IFPI), the International Confederation of Music Publishers (ICMP), the International Federation of Arts Councils and Culture Agencies (IFACCA), the International Federation of Musicians (FIM), the Worldwide Independent Network (WIN), Merlin and many others. The equivalent of Hospitality Europe (.HOTEL) includes the Independent Music Companies Association (IMPALA) and many others. The equivalent of the American Hotel (.HOTEL) and Lodging Association is the American Association of Independent Music.

Accordingly, it is respectfully submitted that the Panel should determine that the community as defined in the application satisfies both of the conditions to fulfill the requirements for organization.

Pre-existence

To fulfill the requirements for pre-existence, the community must have been active prior to September 2007 (when the new gTLD policy recommendations were completed) and must display an awareness and recognition of a community among its members.

The community as defined in the application was active prior to September 2007 as required by the AGB, section 4.2.3. According to the application:

The Community has bought, sold, and bartered music for as long (“LONGEVITY”) as it has been made (R. Burnett, International Music Industry, 1996 and P. Gronow, International History of the Recording Industry, 1998). The Community is a delineated network where production and distribution of music occur in a process relying on labor division and technology. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial (M. Talbot, Business of Music, 2002). The foundation for the structured

¹⁰¹ <http://www.icann.org/sites/default/files/tlds/eco/eco-cpe-1-912-59314-en.pdf>

and strictly delineated Community only resulted from the interplay between the growing music publishing business and an emerging public music concert culture in the 18th century (“PRE-EXISTING”). Consequently, music publishers and concert promoters assumed the function of institutional gatekeepers of the Music Community who decided which music reached consumers and in what form, thus setting the parameters within which creativity was able to unfold (P. Tschmuck, Creativity & Innovation in the Music Industry, Institute of Culture Management & Culture Science, 2006). (Question 20A)

The community as defined in the application was active prior to September 2007.

Furthermore, most of the supporting organizations that fall within the application’s delineation have been active prior to 2007, including the IFPI¹⁰² (1933), FIM¹⁰³ (1948), NAMM¹⁰⁴ (1901) and others. The Panel can determine that because organizations like those referenced above are mainly dedicated to the members of the community as defined by the application, and because they and most others were active prior to 2007, the community as defined in the application fulfills the requirements for Pre-existence.

As discussed above, these organizations and their members, in addition to being active prior to 2007, demonstrate the AGB’s requirements for awareness and recognition.

Accordingly, it is respectfully submitted that the Panel should determine that the community as defined in the application fulfills the requirements for pre- existence.

1-B Extension

The Panel should determine that the community as identified in the application meets the criterion for Extension specified in section 4.2.3 (Community Priority Evaluation Criteria) of the AGB, as the application fulfilled the requirements for the size and longevity of the community. The application should receive a score of 2 out of 2 points under criterion 1-B: Extension.

Size

Two conditions must be met to fulfill the requirements for size: the community must be of considerable size and must display an awareness and recognition of a community among its members.

The community as defined in the application is of considerable size.

¹⁰² <http://www.ifpi.org/downloads/ifpi-a-short-history-november-2013.pdf>

¹⁰³ <http://www.fim-musicians.org/about-fim/history/>

¹⁰⁴ <https://www.namm.org/library/blog/oldest-known-namm-member-photo-donated>

According to the application:

The Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries (“EXTENSION”) with a Community of considerable size with millions of constituents (“SIZE”). (Question 20A)

This is consistent with the .HOTEL,¹⁰⁵ .ECO¹⁰⁶ and .RADIO EIU CPE Determination for Size:

.HOTEL: The community as defined in the application is of a considerable size. The community for .HOTEL as defined in the application is large in terms of the number of members. According to the applicant, “the global Hotel Community consists of more than 500,000 hotels and their associations”

.ECO: The community as defined in the application is of a considerable size. The community for .ECO as defined in the application is large in terms of the number of members. According to the applicant:

40,000+ Not-for-Profit Organizations, eg, 34,376 US environmental organizations (2011 Internal Revenue Service Exempt Organizations Business Master File, National Center for Charitable Statistics); 6,157 in the UK (March 2012, 1/3 of 18,470 Environment / Conservation / Heritage registered charities, Charity Commission); 148,000+ Businesses, eg, 68,200 US businesses committed to environmental sustainability (Pew Charitable Trust, “The Clean Energy Economy”, 2009); 80,000 small and medium enterprises in the EU use certified environmental management systems (Danish Technological Institute, “SMEs and the Environment in the European Union”, 2010); 193+ Environment-focused Governmental Bodies – eg, 193 member states (UN website, March 2012); 18 million+ Individuals, eg, International: WWF, 5M; Greenpeace, 2.8M; FOE, 2M; Ocean Conservancy, 0.5M. National: National Wildlife Federation, 4M; Sierra Club, 1.4M; National Resources Defense Council, 1.2M; The Nature Conservancy, 1M (Members, 2010).

.RADIO: The community as defined in the application is of a considerable size. The community for .RADIO as defined in the application is large in terms of the number of members. According to the application:

Currently, there are about 50,000 radio stations worldwide, according to the figure published by CIA World Facts on their website. In addition, there are at least another 50,000 web radios.

Additionally, as discussed earlier, the community defined by the application demonstrates the recognition and awareness required by the AGB.

¹⁰⁵ <http://www.icann.org/sites/default/files/tlds/hotel/hotel-cpe-1-1032-95136-en.pdf>

¹⁰⁶ <http://www.icann.org/sites/default/files/tlds/eco/eco-cpe-1-912-59314-en.pdf>

While the exact size of the global Music Community as defined is unknown (there is no evidence providing an exact, finite number because amateur entities are also included in the Community's definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic's definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. (PIC at p.13)

Accordingly the Panel should determine that the community as defined in the application satisfies both of the conditions to fulfil the requirements for size and awareness.

Longevity

Two conditions must be met to fulfill the requirements for longevity: the community must demonstrate longevity and must display an awareness and recognition of a community among its members.

The community as defined in the application demonstrates longevity. According to the application:

The Community has bought, sold, and bartered music for as long ("LONGEVITY") as it has been made (R. Burnett, International Music Industry, 1996 and P. Gronow, International History of the Recording Industry, 1998). The Community is a delineated network where production and distribution of music occur in a process relying on labor division and technology. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial (M. Talbot, Business of Music, 2002). The foundation for the structured and strictly delineated Community only resulted from the interplay between the growing music publishing business and an emerging public music concert culture in the 18th century ("PRE-EXISTING"). Consequently, music publishers and concert promoters assumed the function of institutional gatekeepers of the Music Community who decided which music reached consumers and in what form, thus setting the parameters within which creativity was able to unfold (P. Tschmuck, Creativity & Innovation in the Music Industry, Institute of Culture Management & Culture Science, 2006). (Question 20A)

Given the size of the music community and its historical background, the Panel should determine that the pursuits of the community are of a lasting, non-transient nature. Additionally, as discussed above, the community defined by the application demonstrates the recognition and awareness required by the AGB.

The Panel should determine that the community as defined in the application satisfies both of the conditions to fulfill the requirements for longevity.

Criterion #2: Nexus between Proposed String and Community

2A – Nexus

The Panel should determine that the application meets the criterion for Nexus as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the AGB. The string matches the name of the community as defined in the application. The application received a score of 3 out of 3 points under criterion 2-A: Nexus.

To receive the maximum score for Nexus, the applied-for string must match the name of the community or be a well-known short-form or abbreviation of the community name. To receive a partial score for Nexus (of 2 out of 3 points; 1 point is not possible), the applied-for string must identify the community. “Identify means that the applied-for string should closely describe the community or the community members, without over-reaching substantially beyond the community.”

According to the application:

The .MUSIC string relates to the Community by:

- **Completely representing the entire Community. It relates to all music-related constituents using an all-inclusive, multi-stakeholder model**
- **Directly communicating that the content is music-related and representing the Community in a positive and beneficial manner consistent with the .MUSIC Purpose and Use policy**

...The Community is not subject to merely commercial/financial variables. The music Community is driven primarily by technology and the socio-cultural environment that influence music-related media cultures and consumer behavior, including the Community itself.

The socio-cultural environment drives the TLD, including the cultural diversity that provides space within the Community for many genres/participants, general socioeconomic and demographic factors and their impact on diverse local environments, and the support that the Community gives to new creators/performers. The string and Community share a particular cultural ambience: a sensitivity and preference for certain cultural expressions. The ambience is diverse and influential: music preferences of different sections of the society vary, ranging from metal to classical; Socio-economic distributions and demographic patterns.

...The Community and the .MUSIC string share a core value system of artistic expression with diverse, niche subcultures and socio-economic interactions between music creators, their value chain, distribution channel, and ultimately engaging fans as well as other music constituents subscribing to common ideals. (Question 20D)

The Panel should determine that the Community (as defined by the application, including those community organizations supporting the application) are also “commonly known by others” (AGB) both in and outside of the community by the applied-for string “MUSIC” as required by the AGB. Indeed, the word “music” is defined in the application as “the art of combining sounds rhythmically, melodically or harmonically” or “vocal or instrumental sounds (or both) combined in such a way as to produce beauty of form, harmony, and expression of emotion” (Oxford Dictionaries). This common usage of the applied-for string closely aligns with the community as defined in the application.¹⁰⁷

¹⁰⁷ A dictionary or encyclopedia may be used to determine how the applied-for string is used for Nexus evaluation.

Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner with DotMusic’s community-based purpose and connotes community cohesion i.e. only entities with music-related activities are able to register .MUSIC domains.

According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework¹⁰⁸ given the symbiotic overlapping nature of the music (industry) Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

According to the AGB, “with respect to “Nexus,” for a score of 3, the essential aspect is that the applied-for string is commonly known by others as the identification / name of the community.” (CPE Guidelines, Pg.8)

Consistently, to address “Nexus,” an independent survey was conducted by Nielsen/Harris Poll¹⁰⁹ within the United States from August 7th through August 11th, 2015 among 2,084 adults ages 18 and older. Figures for age, sex, race/ethnicity, education, region and household income were weighted where necessary to bring them into line with their actual proportions in the population. The data was also weighted to reflect the composition of the adult population. Nielsen/Harris Poll addressed whether the applied-for string was commonly-known (i.e. known by most people¹¹⁰) and associated with the identification of the community defined by DotMusic by asking the question:

If you saw a website domain that ended in “.music” (e.g., www.name.music), would you associate it with musicians and/or other individuals or organizations belonging to the music community (i.e., a logical alliance of communities of individuals, organizations and business that relate to music)?¹¹¹

These may analyze present and evolving uses of a word, capturing in this case the most prevalent uses of “music”. See: http://oxforddictionaries.com/us/definition/american_english/music

¹⁰⁸ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music (industry) Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

¹⁰⁹ <http://www.harrisinteractive.com/Products/HarrisPollQuickQuery.aspx>

¹¹⁰ <http://www.wordreference.com/es/translation.asp?tranword=commonly%20known>

¹¹¹ Nielsen / Harris Poll, Quick Query Q3505, <http://music.us/nielsen-harris-poll.pdf>,

Fielding Period: August 7-11, 2015, Pg. 1,2,3 and Appendix B

Most people, 1562 out of 2084 (3 in 4 or 75% of the respondents) responded “Yes,”¹¹² which is aligned with the “Nexus” Criterion 2A requirements that the applied for-string is “commonly-known” as the identification of the community addressed by the application.

Furthermore, independent testimonies and disclosures from over 40 experts agree that the application’s defined community matches the applied-for string.¹¹³

DotMusic’s community definition only includes members “related to music” i.e. there is no substantial overreach beyond the community defined. As such, the defined community matches the applied-for string because, according to the application, it “**completely represent[s] the entire Community. It relates to all music-related constituents using an all-inclusive, multi-stakeholder model.**” According to the application, the Community “will be **verified** using **Community-organized, unified “criteria** taken from holistic perspective with due regard of Community particularities” that “**invoke a formal membership**” **without discrimination, conflict of interest or “likelihood of material detriment to the rights and legitimate interests” of the Community.**”

As stated (and reiterated in its Public Interest Commitments), DotMusic’s application does not exclude or discriminate against any legitimate constituent associated with the applied-for string (Also see Venn Diagram, Appendix C). Therefore, the Panel should determine that the applied-for string is the established name by which the community is commonly known by others, and the applied-for string matches the community as defined in the application. Therefore, it is respectfully submitted that the Applicant meets the requirements for a full credit of 3 points on Nexus.

2B – Uniqueness

The Panel should determine that the application meets the criterion for Uniqueness as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the AGB. The application should receive a score of 1 out of 1 point under criterion 2-B: Uniqueness.

The string’s unique phonetic, visual and contextual meaning to identify the “music” Community described in the DotMusic application is also established in a significant number of other languages e.g. musiek (Africaans), muzikë (Albanian), musiqi (Azerbaijani), musika (Basque), музыка (Belarusian), muzika (Bosnian), музика (Bulgarian), música (Catalan), music (Cebuano), musik (Danish), muziek (Dutch), muziko (Esperanto), muusika (Estonian), musika (Filipino), musiikki (Finnish), musique (French), música (Galician), Musik (German), μουσική (Greek), mizik (Haitian Creole), music (Indonesian), musica (Italian), music (Javanese), musica (Latin), mūzika (Latvian), muzika (Lithuanian), музика (Macedonian), muzik (Malay), музика (Maltese), musikk (Norwegian), muzyka (Polish), música (Portuguese), muzică (Romanian), музыка (Russian), музика (Serbian), música (Spanish), muziki (Swahili), music (Swedish), müzik (Turkish), музика (Ukrainian) and others.

¹¹² Nielsen / Harris Poll, Quick Query Q3505, <http://music.us/nielsen-harris-poll.pdf>, Fielding Period: August 7-11, 2015, Pg. 1,2,3 and Appendix B

¹¹³ <http://music.us/expert/letters> and Appendix A

To fulfill the requirements for Uniqueness, the string must have no other significant meaning beyond identifying the community described in the application and it must also score a 2 or a 3 on Nexus. The string as defined in the application demonstrates uniqueness, as the string does not have any other meaning beyond identifying the community described in the application. The Community Priority Evaluation panel should determine that the applied-for string satisfies the condition to fulfill the requirements for Uniqueness.

Therefore, the Panel should determine that the applied-for string satisfies the condition to fulfill the requirements for Uniqueness.

Criterion #3: Registration Policies (Also See Registration Process & Policies Flowchart, Appendix D)

3-A Eligibility

The Panel should determine that the application meets the criterion for Eligibility as specified in section

4.2.3

(Community Priority Evaluation Criteria) of the AGB, as eligibility is restricted to community members. The application should receive a maximum score of 1 point under criterion 3-A: Eligibility.

To fulfill the requirements for Eligibility, the registration policies must restrict the eligibility of prospective registrants to community members. According to the application:

The TLD will be exclusive to the Community... .MUSIC domains will be validated to belong to Community members, who can only use the domains under Community-focused Policies. This way, Internet users will experience trusted interactions with registrants and be confident that any interaction is with legitimate Community members. (Question 18A)

...Registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership” without discrimination, conflict of interest or “likelihood of material detriment to the rights and legitimate interests” of the Community... (Question 20A)

...Music Community Member Organization (MCMO)... phase... is a limited-time period reserved for members of DotMusic-accredited music Community Member Organizations (MCMO). Unique registrations will be granted to the sole registrant and delegated at the close of the time period; multiple registration requests for the same string will go through an auction. ...General Availability... phase of registration of .MUSIC domains. .MUSIC registrations will now be available to Music Community members on a first come, first served basis. (Question 20E)

The DotMusic *Eligibility* policy is consistent with various EIU CPE Determinations for *Eligibility*:

.ECO: To fulfill the requirements for Eligibility, the registration policies must restrict the eligibility of prospective registrants to community members. The application demonstrates adherence to this requirement by restricting eligibility to individuals and entities (non-for-profit, businesses and governments) that are members of the global environmental community and that meet recognized standards.

.RADIO: The application demonstrates adherence to this requirement by restricting eligibility to the community categories mentioned in Delineation, and additionally requiring that the registered domain name be “accepted as legitimate; and beneficial to the cause and values of the radio industry; and commensurate with the role and importance of the registered domain name; and in good faith at the time of registration and thereafter.”

.HOTEL: The application demonstrates adherence to this requirement by restricting eligibility to the narrow category of hotels and their organizations as defined by ISO 18513, and verifying this association through membership lists, directories and registries.

.ART (Dadotart): The application demonstrates adherence to this requirement by restricting eligibility to artists and those who have an identifiable engagement with the arts.

.ART (Eflux): The application demonstrates adherence to this requirement by restricting eligibility to art-related institutions and entities, and professionals or semi-professional members of the art community.

The application therefore demonstrates adherence to the AGB's requirement by restricting domain registration to entities who are members of the community defined by the application. The Panel should determine that the application satisfies the condition to fulfill the requirements for Eligibility.

3-B Name Selection

The Panel should determine that the application meets the criterion for Name Selection as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook, as name selection rules are consistent with the articulated community-based purpose of the applied-for TLD. The application should receive a score of 1 out of 1 point under criterion 3-B: Name Selection.

According to the application:

The Names Selection Policy ensures only music-related names are registered as domains under .MUSIC, with the following restrictions:

- 1) A name of (entire or portion of) the musician, band, company, organization, e.g. the registrants "doing business as" name**
- 2) An acronym representing the registrant**
- 3) A name that recognizes or generally describes the registrant, or**
- 4) A name related to the mission or activities of the registrant" (Question 20E)**

The DotMusic *Name Selection* policy is consistent with various EIU CPE Determinations for *Name Selection*:

.MLS:¹¹⁴ *The application demonstrates adherence to this requirement by specifying that the associated boards use their corporate name or an acronym, while foreign affiliates will also have to include geographical modifiers in their second level domains.*

¹¹⁴ <http://www.icann.org/sites/default/files/tlds/mls/mls-cpe-1-1888-47714-en.pdf>

.LLP,¹¹⁵ .INC,¹¹⁶ and .LLC:¹¹⁷ *The application demonstrates adherence to this requirement by outlining a comprehensive list of name selection rules, such as requirements that second level domain names should match or include a substantial part of the registrant's legal name.*"

Also, the Name Selection Policy also covers the music Globally Protected Marks List (GPML) and does not allow registrants to register a domain containing an established music brands' name that would be deemed confusing to Internet users and the Music Community:

Globally Protected Marks List (GPML) will ensure major music brands and established artists, such as RIAA-certified platinum-selling bands, are protected not cybersquatted. These are reserved at all times. (Question 20E)

...Applicants "cannot register a domain containing an established music brand's name in bad faith that might be deemed confusing to Internet users and the Music Community. (Question 20E)

The DotMusic GPML Name Selection policy is consistent with the .HOTEL¹¹⁸ EIU CPE Determination for *Name Selection*:

[T]he registry has set aside a list of domain names that will be reserved for the major hotel industry brands and sub-brands.

Therefore, the Panel should determine that the application satisfies the conditions to fulfill the requirements for Name Selection.

3-C Content and Use

The Community Priority Evaluation panel should determine that the application meets the criterion for Content and Use as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook, as the rules for content and use are consistent with the articulated community-based purpose of the applied-for TLD. The application should receive a maximum score of 1 point under criterion 3-C: Content and Use.

To fulfill the requirements for Content and Use, the registration policies must include rules for content and use for registrants that are consistent with the articulated community-based purpose of the applied-for gTLD. The application demonstrates adherence to this requirement by specifying that use of the domain name must be beneficial to the cause and values of the Community:

¹¹⁵ <http://www.icann.org/sites/default/files/tlds/llp/llp-cpe-1-880-35508-en.pdf>

¹¹⁶ <http://www.icann.org/sites/default/files/tlds/inc/inc-cpe-1-880-35979-en.pdf>

¹¹⁷ <http://www.icann.org/sites/default/files/tlds/llc/llc-cpe-1-880-17627-en.pdf>

¹¹⁸ <http://www.icann.org/sites/default/files/tlds/hotel/hotel-cpe-1-1032-95136-en.pdf>

.MUSIC will effectively differentiate itself by addressing the key online usage issues of safety, trust, consistency, brand recognition as well as communicate site subject-matter: music-related content. The TLD will be exclusive to the Community and will incorporate enhanced safeguards and Use policies to protect creators, intellectual property and rights holders.

Community members need to be able to distinguish themselves from illegal or unlicensed sites. Ensuring monies flow to rightful owners and the Music Community is critical to the .MUSIC Mission.

DotMusic will provide Premium Channels and a Song Registry where the Community and Internet users can network, share information and engage in commerce in a trusted, secure ecosystem – a safe haven for legal music consumption and song licensing ensuring monies flow to the Community not unlicensed sites.

.MUSIC domains can serve as trusted signals for search engines and used as filters for legal, licensed and safe music sites with relevant, quality content. .MUSIC domains will be validated to belong to Community members, who can only use the domains under Community-focused Policies. This way, Internet users will experience trusted interactions with registrants and be confident that any interaction is with legitimate Community members. (Question 18A)

The application also has Content and Use policies that prohibit the use of parking pages:

PARKING PAGES: DotMusic will prohibit the use of parked pages. .MUSIC sites will be subject to the content and use restrictions described in response to question 18b and question 20e. Parked sites can only be used as temporary pages assigned to a domain at the time of registration and stay in place until the registrant has a website developed and ready to go live in a reasonable time period. (Question 18C iii)

The application also restricts Content and Use to legal music-related activities:

The following use requirements apply:

- **Use only for music-related activities**
- **Comply with applicable laws and regulations and not participate in, facilitate, or further illegal activities**
- **Do not post or submit content that is illegal, threatening, abusive, harassing, defamatory, libelous, deceptive, fraudulent, invasive of another's privacy, or tortious**
- **Respect the intellectual property rights of others by posting or submitting only content that is owned, licensed, or otherwise have the right to post or submit**
- **Immediately notify us if there is a security breach, other member in compliance or**

illegal activity on .MUSIC sites

- Do not register a domain containing an established music brand’s name in bad faith that might be deemed confusing to Internet users and the Music Community
- Do not use any automated process to access or use the .MUSIC sites or any process, whether automated or manual, to capture data or content from any service for any reason
- Do not use any service or any process to damage, disable, impair, or otherwise attack .MUSIC sites or the networks connected to .MUSIC sites (Question 20E)

The DotMusic Content and Use policy is consistent with various EIU CPE Determinations for *Content and Use*:

*.HOTEL:*¹¹⁹ *The application demonstrates adherence to this requirement by specifying that each domain name must display hotel community-related content relevant to the domain name*

*.TAXI:*¹²⁰ *The application demonstrates adherence to this requirement by noting four relevant rules for content and use, which include restricting content to taxi-related issues or indicating a strong connection to it, amongst other rules.*

The Community Priority Evaluation panel should determine that the application satisfies the condition to fulfill the requirements for Content and Use.

3-D Enforcement

The Panel should determine that the application meets the criterion for Enforcement as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the AGB. The application provides specific enforcement measures and outlines coherent and appropriate appeals mechanisms. The application should receive a score of 1 point under criterion 3-D: Enforcement.

Two conditions must be met to fulfill the requirements for Enforcement: the registration policies must include specific enforcement measures constituting a coherent set, and there must be appropriate appeals mechanisms.

The application commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement (to “immediately notify [DotMusic] if there is a security breach, other member noncompliance or illegal activity on .MUSIC sites”) and random compliance checks, with appropriate dispute processes to fix compliance issues under its .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including reasonable time to appeal (i.e. via “dispute processes”) with the registry to fix compliance issues or appeal with an independent dispute resolution provider, such as the National Arbitration Forum (NAF), which already has a

¹¹⁹ <http://www.icann.org/sites/default/files/tlds/hotel/hotel-cpe-1-1032-95136-en.pdf>

¹²⁰ <http://www.icann.org/sites/default/files/tlds/taxi/taxi-cpe-1-1025-18840-en.pdf>

customized DotMusic appeals mechanism in place.¹²¹

According to the application:

REGISTRY DATA VALIDATION

DotMusic will validate elements of the received WHOIS data as a requirement for domain registration, also providing access to Premium Channels, such as the registrant's:

- Email address through validation links
- Phone number through validated PIN-codes (Question 18B iv, Question 20E)

COMPLIANCE & ENFORCEMENT

DotMusic will take proactive and reactive measures to enforce its Policies. Proactive measures are taken at the time of registration. Reactive measures are addressed via compliance and enforcement mechanisms and through dispute processes.

Allegation that a domain is not used for legitimate music purposes or otherwise infringes on Policies shall be enforced under the provisions of the .MUSIC Policy & Copyright Infringement Dispute Resolution Process ("MPCIDRP"); described in question 28 response. (Question 18B iv, Question 20E)

The MPCIDRP is not a replacement for alleged violation of the UDRP/URS/PDDRP/RRDRP, which shall be enforced under the provisions contained therein. (Question 18B iv, Question 20E)

The DRP's are required in the registrars' registration agreements with registrants. Proceedings must be brought by interested 3rd-parties in accordance with associated policies and procedures to dispute resolution providers. (Question 18B iv)

DotMusic will conduct random compliance checks across all the .MUSIC Policies. Periodically a sample of .MUSIC registrations will be verified for compliance with all established Policies. (Question 18B iv, Question 20E)

If a registrant is found out of compliance with any of the .MUSIC Policies the registrant will be notified that the domain will be placed on registry lock. The registrant will have a reasonable time period to fix the compliance matter or the domain will be terminated. (Question 18B iv, Question 20E)

¹²¹ See DotMusic MPCIDRP at <http://www.adrforum.com/RegistrySpec> and [http://www.adrforum.com/users/odr/resources/Music_Policy_and_Copyright_Infringement_Dispute_Resolution_Process_final%20\(2\).docx](http://www.adrforum.com/users/odr/resources/Music_Policy_and_Copyright_Infringement_Dispute_Resolution_Process_final%20(2).docx)

The Sunrise Challenge Process solves disputes concerning domains registered under the Sunrise Policy. (Question 20E)

Repeat offenders of Policies will be placed on a special monitoring list that DotMusic will conduct additional compliance checks against. DotMusic holds the right to prohibit repeat offenders from registering .MUSIC domains for a period of time or indefinitely. (Question 18B iv)

DotMusic will review all policies and processes on a regular basis with involvement from the .MUSIC Advisory Committee and discussed publicly at Community events. (Question 18B iv, Question 20E)

DotMusic will also conduct registrar and registrant surveys based on the level of registrant satisfaction concerning .MUSIC usability and how to improve value proposition. (Question 20E)

[Registrants must] immediately notify [DotMusic] if there is a security breach, other member incompliance or illegal activity on .MUSIC sites. (Question 20E)

DotMusic will implement multiple dispute resolution policies to address dispute over any names not reserved by the above provisions; see response to question #20e and #28 and #29...DotMusic will ensure appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance at the second level. DotMusic will institute a provision in the registry-registrar agreements and the registrar-registrant agreements, to suspend domains names in the event of a dispute. DotMusic may exercise that right in the case of a dispute over a geographic name. (Question 22)

DotMusic and Afiliás may also engage in proactive screening of its zone for malicious use of the domains in the TLD, and report problems to the sponsoring registrars. (Question 28)

The DotMusic Enforcement policy is consistent with various EIU CPE Determinations for *Enforcement*:

.ART (Dadotart): The applicant outlines a comprehensive list of investigation procedures and circumstances in which the registry is entitled to suspend domain names. The application also outlines an appeals process, which will be managed by the registry service provider.

.ECO: The applicant's registry will evaluate complaints against a registrant agreement and decide on an appropriate course of action, which may result in the case being

referred to a dispute resolution process. There is also an appeals mechanism, whereby a registrant has the right to seek the opinion of an independent arbiter approved by the registry.

.HOTEL: The applicant's registry will establish a process for questions and challenges that could arise from registrations and will conduct random checks on registered domains. There is also an appeals mechanism, whereby a registrant has the right to request a review of a decision to revoke its right to hold a domain name.

.RADIO: The enforcement program is based on random checks, and if the content or use of an existing domain name shows bad faith, it will be suspended. There is also an appeals mechanism, which is managed in the first instance by the registry, with appeals heard by an independent, alternative dispute resolution provider.

.SPA: At which time, anyone can utilize the Sunrise Challenge Process to challenge the eligibility of a Sunrise application. The Sunrise Challenge Process is itself an appeal mechanism.

Consistent with other EIU CPE Determinations for *Enforcement*, the application outlines policies that include specific enforcement measures constituting a coherent set. The Panel should determine that the application satisfies both of the two conditions to fulfill the requirements for Enforcement and therefore scores 1 point.

Criterion #4: Community Endorsement

Support for or opposition to a CPE gTLD application may come by way of an application comment on ICANN's website, attachment to the application, or by correspondence with ICANN.

4-A Support

The Community Priority Evaluation panel should determine that the application fully meets the criterion for Support specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook, as the applicant had documented support from the recognized community institution(s)/member organization(s). The application should receive a maximum score of 2 points under criterion 4-A: Support.

To receive the maximum score for Support, the applicant is, or has documented support from, the recognized community institution(s)/member organization(s), or has otherwise documented authority to represent the community. "Recognized" means those institution(s)/organization(s) that, through membership or otherwise, are clearly recognized by the community members as representative of the community. To receive a partial score for Support, the applicant must have documented support from at least one group with relevance. "Relevance" refers to the communities explicitly and implicitly addressed.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.¹²² Such unparalleled global Music Community support also represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support¹²³ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

The Community Priority Evaluation panel should determine that the applicant was not the recognized community institution(s)/member organization(s). However, the applicant possesses documented support from institutions/organizations representing a majority of the community addressed, and this documentation contained a description of the process and rationale used in arriving at the expression of support. The applicant received support from a broad range of recognized community institutions/member organizations, which represented different segments of the community as defined by the applicant. These entities represent a majority of the overall community. The Community Priority Evaluation Panel should determine that the applicant fully satisfies the requirements for Support.

¹²² See <http://music.us/supporters>, <https://gtdresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

¹²³ <http://music.us/supporters>

4-B Opposition

The Community Priority Evaluation panel should determine that the application meets the criterion for Opposition specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook, as the application received no relevant opposition.

According to ICANN's CPE Guidelines:

To be taken into account as relevant opposition, such objections or comments must be of a reasoned nature. Sources of opposition that are clearly spurious, unsubstantiated, made for a purpose incompatible with competition objectives, or filed for the purpose of obstruction will not be considered relevant.¹²⁴

The AGB and CPE Guidelines provide in pertinent part that:

The evaluation process will respect the principles of fairness, transparency, avoiding potential conflicts of interest, and non-discrimination...¹²⁵

To receive the maximum score for Opposition, the application must not have received any opposition of relevance. A few letters were filed for the purpose of obstruction and therefore are not considered relevant.¹²⁶ The application also received letters of opposition, which should be deemed not to be relevant, as they were either from groups of negligible size, or were from entities/communities that do not have an association with the applied for string. As these letters are neither from the recognized community institutions/member organizations, nor were they from communities/entities that have an association with the community they should not be considered relevant.

DotMusic was also alerted of upcoming obstruction orchestrated by competitors, including Donuts as a reaction to the prevailing .SPA determination. Donuts distributed a template opposition letter with instructions to obstruct DotMusic's application revealing that "if a panel decides that this applicant [DotMusic] represents the "music community", [Donuts] application...will be automatically rejected." In its obstruction letter instructions, Donuts also revealed that ".SPA was granted community priority which might have been avoided had letters of opposition been submitted." DotMusic filed a pre-emptive public comment on August 3rd, 2015 alerting ICANN and the EIU of the upcoming obstruction and spurious anti-competitive pattern by applicants such as Donuts.¹²⁷ The first obstruction public

¹²⁴ ICANN CPE Guidelines, <http://newgtlds.icann.org/en/applicants/cpe/guidelines-27sep13-en.pdf>, Pg. 20

¹²⁵ CPE Guidelines, Pg. 22

¹²⁶ The correspondence for .MUSIC includes several letters from DotMusic (See <https://icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-12aug15-en.pdf>) and letters from entities related to an opposition letter. These entities not only withdrew opposition but supported DotMusic. Furthermore, some are currently on DotMusic's Board (<http://music.us/board>). The letter's sender also was included in correspondence which disclosed that their organization and many others were "encouraged" by DotMusic's policies.

¹²⁷ See <https://gtldcomment.icann.org/applicationcomment/commentdetails/12754> and <https://gtldcomment.icann.org/applicationcomment/commentdetails/12738> (August 3, 2015)

comment using Donuts' obstruction talking point template was filed on August 11th, 2015.¹²⁸ Other identical letters followed that were filed either as Public Comments¹²⁹ or as ICANN Correspondence Letters.¹³⁰

An example to showcase the spurious nature of the template letters is the discrepancy and inconsistency illustrated in a letter,¹³¹ which described its organization as one that was "comprised of musicians...and individuals in the music community." Despite acknowledging the existence of the "music community" in its company description, the letter later takes a different position to doubt the existence of the "music community" by incorporating Donuts' talking points which refer to a "'music community,' if such a thing even exists."

In another Donuts coordinated effort, another spurious letter by Donuts' ally, IP Justice, was also attached in Donuts obstruction letter.¹³² This letter was first made public by Donuts¹³³ before IP Justice or ICANN posted it online. IP Justice opposed DotMusic's application on the grounds that it had "concerns...with the "community" TLD concept" and "as a free speech organization, IP Justice agrees that a term as broad and widely touching as "music" does not, and cannot, describe an exclusive "community," and believes that any attempt to utilize the term in such a fashion stifles competition and chills free expression on the Internet."

Just like ICANN states in its response¹³⁴ in Independent Review Process (IRP) proceedings filed by Donuts against the EIU Determinations for .ECO and .HOTEL, similarly IP Justice's arguments and opposition of the CPE Guidelines and DotMusic's community-based Eligibility policies (which require that Eligibility is restricted to community members) are time-barred and are not aligned with the GNSO's recommendations that clearly state that those applications "representing communities be awarded priority in string contention:"

Claimants' argument is time-barred. (Pg.15)... As detailed in the Board's Rationales for the Approval of the Launch of the New gTLD Program, issued in June 2011, the application evaluation procedures, including the CPE procedure (and the decision to grant successful community-based applications priority in cases of string contention), were adopted by the ICANN Board after years of extensive policy development and implementation that included extensive review and analysis by ICANN, as well as input and comment from legal counsel, numerous ICANN communities, Internet stakeholders, and community members from around the world, all in compliance with ICANN's Articles and Bylaws (ICANN Board Rationales at 93-105 (Cls. Ex. RM-11). (Pg.16 and 17). Despite having ample opportunity to do so, Claimants did not challenge the CPE process at the time the Guidebook was implemented. If Claimants, or anyone else for that matter, had concerns related to these issues, they were properly pursued at the time, and not years later. (Pg.18)

¹³³ <https://gtldcomment.icann.org/applicationcomment/commentdetails/12813> and

<http://www.donuts.domains/images/pdfs/music-CPE-comment-Aug2015.pdf>

¹³⁴ <https://www.icann.org/en/system/files/files/icann-response-birch-mmx-irp-request-redacted-27apr15-en.pdf>

When an applicant submits a community-based application, it is not, as the Claimants imply, simply seeking to “exploit the application process” (IRP Request ¶ 47). As set forth in the Guidebook, community-based applicants agree to operate the applied-for gTLD “for the benefit of a clearly delineated community” (Guidebook § 1.2.3.1, Cls. Ex. RM-5). This involves implementing “dedicated registration and use policies for registrants in [the applied-for gTLD],” (Guidebook § 1.2.3.1, Cls. Ex. RM-5) policies that substantially restrict the sorts of domain name registrations a gTLD may accept and thereby might significantly limit the potential profitability of a gTLD. (Pg.6)...The recommendation of the GNSO that applications representing communities be awarded priority in string contention (ICANN Board Rationales for the Approval of the Launch of the New gTLD Program at 94 (“ICANN Board Rationales”) (Cls. Ex. RM-11)). (Pg.10)

Inconsistently, IP Justice did not oppose any other Community applicants’ applications. For example, IP Justice did not file opposition against Far Further’s (.music LLC) community application for .MUSIC even though Far Further included eligibility policies that excluded a majority of the global music community (a discriminatory policy that DotMusic publicly opposed and EIU concluded excluded a majority of the music community in their EIU Determination). If IP Justice had any sincere concerns about competition then it would have opposed Far Further (and other community applicants) as well but chose to target DotMusic Limited’s application instead despite DotMusic’s Public Interest Commitments which re-iterate and re-affirm:

A commitment to not discriminate against any legitimate members of the global music community by adhering to the DotMusic Eligibility policy of non-discrimination that restricts eligibility to Music Community members -- as explicitly stated in DotMusic’s Application -- that have an active, non-tangential relationship with the applied-for string and also have the requisite awareness of the music community they identify with as part of the registration process. This public interest commitment ensures the inclusion of the entire global music community that the string .MUSIC connotes,¹³⁵ (Enumerated Commitment #3)

A commitment that the string will be launched under a multi-stakeholder governance structure of representation that includes all music constituents represented by the string, irrespective of type, size or locale, including commercial, non-commercial and amateur constituents, as explicitly stated in DotMusic’s Application.¹³⁶ (Enumerated Commitment #5)

In another Donuts coordinated effort, another spurious letter was filed by Rightside, Donuts co-applicant for .MUSIC, disingenuously stating that “it is preposterous...to claim that there exists a “music community,””¹³⁷ which is defined by DotMusic as a “delineated and organized logical alliance of music communities.” Such statements are inconsistent with public marketing material for promoting the

¹³⁵ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadpicposting/1392?t:ac=1392>

¹³⁶ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadpicposting/1392?t:ac=1392> , Commitments #3 & #5

¹³⁷ <https://www.icann.org/en/system/files/correspondence/hammock-to-crocker-et-al-12aug15-en.pdf>

.BAND music-themed gTLD, which is operated by Donuts and Rightside. Marketing material clearly mentions promotions to “music communities” (Pg.2).¹³⁸ Another .BAND Marketing Kit also refers to the “music sector,” organizing it according to delineated music community types, such as record companies, publishing, and “other music-related sectors” (Pg.6). The Kit also refers to and recognizes many music communities and organizations that have supported DotMusic e.g. BMI, ASCAP, Reverbnation, A2IM, BPI, NMPA, IFPI, Harry Fox, NARAS, PRS, RIAA, SESAC and many others (Pg. 1, 2, 3, 9, 10). The Kit also quotes the IFPI a few times as an authoritative source for their research (which further highlights the IFPI’s status as an organization mainly dedicated to the Music Community), while also recognizing the existence of an organized “music industry”...“a massive engine worth more than US\$130 billion globally”(Pg.3).¹³⁹ Such revealing statements highlight that any opposition letters that doubt or shun the existence of the community are spurious and filed for the purpose of obstruction.

Accordingly, the Community Priority Evaluation panel should determine that there is no relevant opposition to the application. The Community Priority Evaluation Panel should determine that the applicant satisfies the requirements for Opposition.

Conclusion

For the aforementioned reasons, it is respectfully submitted that the Applicant satisfies all criteria to establish Community and should prevail with a passing grade in CPE.

Transparency and accountability mechanisms, including the quality control requirement of compelling and defensible documentation, forms an integral part of ICANN’s decision-making standards. The AGB and CPE Guidelines provide in pertinent part that:

*The evaluation process will respect the principles of fairness, transparency, avoiding potential conflicts of interest, and non-discrimination...*¹⁴⁰

*Consistency of approach in scoring Applications will be of particular importance...*¹⁴¹

*The EIU will work closely with ICANN when questions arise and when additional information may be required to evaluate an application...*¹⁴²

*The EIU will fully cooperate with ICANN’s quality control process...*¹⁴³

¹³⁸ <http://branding.rightside.co/api/download/28qb-dj9ehrud>

¹³⁹ <http://branding.rightside.co/api/download/28qj-3k4nku8>

¹⁴⁰ CPE Guidelines, Pg. 22

¹⁴¹ CPE Guidelines, Pg. 22

¹⁴² CPE Guidelines, Pg. 22 and Pg.23

¹⁴³ CPE Guidelines, Pg. 22 and Pg.23

*The panel must be able to exercise **consistent** and somewhat subjective judgment in making its evaluations in order to reach conclusions that are compelling and defensible...*¹⁴⁴

*The panel must be able to document the way in which it has done so in each case.*¹⁴⁵

*All EIU evaluators undergo regular training to ensure full understanding of all CPE requirements as listed in the Applicant Guidebook, as well as to ensure **consistent judgment** (CPE Panel Process Document, Pg.2)...*

*The Panel Firm exercises **consistent judgment** in making its evaluations in order to reach conclusions that are compelling and defensible, and documents the way in which it has done so in each case (CPE Guidelines, Pg.22 and CPE Panel Process Document, Pg. 3).*¹⁴⁶

In the case of opposition letters, community applicants must be given the opportunity to provide context and a challenge to any opposition letter if deemed relevant so that the EIU have a complete understanding of the subject-matter and adequately take into consideration both perspectives (just like any fair and equitable proceeding) before reliably determining that the panel has incorporated a “consistent and somewhat subjective judgment in making its evaluations in order to reach conclusions that are compelling and defensible.” The EIU “panel must be able to document the way in which it has done so in each case.”¹⁴⁷

DotMusic’s CPE must be evaluated using the **same consistent criteria and precedents** that were established in prior EIU determinations to ensure “**consistency of approach across all applications:**”

“All Applications will subsequently be reviewed by members of the core project team to verify accuracy and compliance with the AGB, and to ensure consistency of approach across all applications.”¹⁴⁸ (emphasis added)

In the prevailing CPE Determinations for .RADIO, .SPA and .HOTEL, the EIU consistently referred to the community as the “**(industry) community.**” as an acceptable threshold to its “Community Establishment”, “Nexus” and “Support” criteria:

According to the .RADIO prevailing CPE determination:

In addition, the community as defined in the application has awareness and recognition among its members. This is because the community as defined consists of

¹⁴⁴ CPE Guidelines, Pg. 22

¹⁴⁵ CPE Guidelines, Pg. 22

¹⁴⁶ CPE Guidelines, Pg.22, and CPE Panel Process Document, <http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf>, Pg.3

¹⁴⁷ ICANN CPE Guidelines, Pg. 22

¹⁴⁸ CPE Guidelines, Pg. 22

entities and individuals that are in the radio industry, and as participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community. In addition, membership in the (industry) community is sufficiently structured, as the requirements listed in the community definition above show.¹⁴⁹

According to the .SPA prevailing CPE determination:

The community as defined in the application has awareness and recognition among its members. This is because the community as defined consists of entities that are in the spa industry, and as participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community. In addition, membership in the (industry) community is sufficiently structured, as the requirements listed in the community definition above show. Members of all three of these membership categories recognize themselves as part of the spa community as evidenced, for example, by their inclusion in industry organizations and participation in their events.¹⁵⁰

According to the .HOTEL prevailing CPE determination:

This community definition shows a clear and straightforward membership. The community is clearly defined because membership requires entities/associations to fulfill the ISO criterion for what constitutes a hotel. Furthermore, association with the hotel sector can be verified through membership lists, directories and registers. In addition, the community as defined in the application has awareness and recognition among its members. This is because the community is defined in terms of its association with the hotel industry.¹⁵¹

Following the rationale in the aforementioned EIU Determinations, DotMusic's community-based application would overwhelmingly exceed the minimum "(industry) community" threshold for the applied for string because its application is supported by organizations with members that **represent over 95% of global music consumed**. In fact, DotMusic's application has amassed the largest coalition of music-related organizations to support a music cause. Just like in the CPE application cases of .RADIO, .HOTEL and .SPA, DotMusic is supported by a global "(industry) community," with members that have the requisite awareness and recognition of the community defined.

Furthermore, in the .ECO prevailing CPE Determination it was found that "involvement in...activities" and the "interdependence and active commitment to shared goals" are "indicative of the "cohesion"

¹⁴⁹ <https://www.icann.org/sites/default/files/tlds/radio/radio-cpe-1-1083-39123-en.pdf>, Pg.2

¹⁵⁰ <https://www.icann.org/sites/default/files/tlds/spa/spa-cpe-1-1309-81322-en.pdf>, Pg.2

¹⁵¹ <https://www.icann.org/sites/default/files/tlds/hotel/hotel-cpe-1-1032-95136-en.pdf>, Pg.2

that the AGB requires in a CPE-eligible community.” The .ECO prevailing CPE determination provides in pertinent part that:

...Each individual or entity has a clear, public and demonstrable **involvement in environmental activities**. The **interdependence and active commitment to shared goals** among the various membership types **are indicative of the “cohesion” that the AGB requires in a CPE-eligible community**. The Panel found that entities included in the membership categories defined in the application are shown to cohere in their work towards clearly defined projects and goals that overlap among a wide array of member organizations...Furthermore, businesses that are included in the applicant’s defined community have voluntarily opted to subject themselves to evaluation of their compliance with environmental standards that qualify them for the accreditations referenced in the application. As such, the defined community’s membership is found to meet the AGB’s standard for cohesion, required for an adequately delineated community.¹⁵²

It follows that DotMusic’s community-based application should exceed the minimum threshold for “Community Establishment” because the DotMusic application and purpose follows unified goals which the represented global “Music Community” which “encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders” addressed subscribes to, such as:

- Creating a trusted, safe online haven for music consumption
- Establishing a safe home on the Internet for Music Community members regardless of locale or size
- Protecting intellectual property and fighting piracy
- Supporting musicians’ welfare, rights & fair compensation
- Promoting music and the arts, cultural diversity and music education
- Following a multi-stakeholder approach of fair representation of all types of global music constituents, including a rotating regional advisory board working in the best interests of the Music Community

(Mission and Purpose, Q.18 and Q.20)

DotMusic developed its Mission and Registration Policies using feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008, which gave the Community open opportunities to engage (e.g. via events, meetings, social media, ICANN’s 2012 public comment period or other correspondence). DotMusic has participated in hundreds of international music/domain events (<http://music.us/events>) and still continues to engage Community members. (See Question 18 and Question 20).

¹⁵² <https://www.icann.org/sites/default/files/tlds/eco/eco-cpe-1-912-59314-en.pdf>, Pg.3

Furthermore, in comparison, DotMusic's community-application has more music-tailored policies and enhanced safeguards aligned with DotMusic's community-based purpose to serve the interests of the global music community than all .MUSIC applicants combined. (See .MUSIC Applicant Comparison Chart, Appendix E)

Therefore, it is respectfully submitted that, consistent with other CPE Determinations, DotMusic satisfies all criteria to establish Community and should prevail with a passing grade in CPE.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

² <http://music.us/supporters>

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application Answer to Question 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector. "Music" is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

DotMusic's application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexa.com/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

countries.¹³ This means that if a Music Community member's copyright rights are violated in any other signatory country's jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community's rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community's *Establishment* and definition is "cohesive" and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is "closely united" and functions as a "whole"

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The "music" string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain's registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN "to provide accurate WHOIS contact data" or else their domain "registration may be suspended or even cancelled".¹⁸

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: “*With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.*” (AGB, 4-12). The community as defined in the DotMusic application has at least one entity *mainly*²⁰ dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government

²⁶ 2011 Annual Report for Cyprus Ministry of Culture, Section 1.2 "Music"

(http://www.moec.gov.cy/en/annual_reports/annual_report_2011_en.pdf). Activities include Music Performances in Cyprus (1.2.1) and Abroad (1.2.2), Subsidization of Paphos Aphrodite Festival (1.2.3), Music Publications (1.2.4), Subsidization and Purchases of Digital Records (1.2.5), Promotion for Cypriot musical creativity abroad (1.2.6),

Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴

Cyprus Symphony Orchestra Foundation (1.2.7), Music Information Centre (1.2.8), Developing Music Education (1.2.9), Organising of the 1st Musicological Symposium (1.2.10) and Musical Festivities for the European Volunteerism Year (1.2.11)

³³ <http://www.pch.gc.ca/eng/1294862453819/1294862453821>

³⁴ Department for Culture, The Importance of Music, A National Plan for Music Education,

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁸
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”⁴¹ whose members⁴² – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁴³ represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”⁴⁴ the world’s largest music market with 30% global market share.⁴⁵ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.”

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁶

The reach of A2IM Associate⁴⁷ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁸ – iTunes accounts for 63% of global digital music market⁴⁹ - a majority – with a registered community of 800 million registered members⁵⁰ available in 119 countries who abide to strict terms of service and boundaries⁵¹ and have downloaded over 25 billion songs⁵² from iTunes’ catalog of over 43 million songs⁵³ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵⁴
- **Pandora**⁵⁵ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁶
- **Spotify**⁵⁷ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵⁸
- **Vevo**⁵⁹ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁶⁰

⁵⁷ <http://a2im.org/groups/spotify>

⁵⁸ <https://press.spotify.com/us/information/>

⁵⁹ <http://a2im.org/groups/vevo/>

- **Youtube**⁶¹ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁶² of which 38.4% is music-related.⁶³
- **ReverbNation**⁶⁴ – ReverbNation⁶⁵ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁶ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁷

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶⁸), China (China Audio Video Association⁶⁹) and Germany (Initiative Musik).⁷⁰ A2IM also has Affiliate⁷¹ associations within the global music community. These include Affiliates such as MusicFirst,⁷² the Copyright Alliance,⁷³ the Worldwide Independent Network (WIN)⁷⁴ and Merlin.⁷⁵

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁶ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA “on behalf of over 15 national and international trade associations” also expressed its support for .MUSIC to be under a “community” application model, including encouraging statements in support of DotMusic’s policies that stated that the coalition “was encouraged to see” that DotMusic “included several measures to deter and address copyright infringement within that TLD.” The “coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world’s music”⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

The International Music Products Association, NAMM, is another globally-recognized and relevant group of non-negligible size that has supported DotMusic.⁸⁰ NAMM, formed in 1901, is *mainly* dedicated to the global music community by representing the international music products industry and community, with globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{81 82} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM’s members. Without these musical instruments and products, music as we know it today would not be created or produced. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM’s mission is “to strengthen

⁸¹ https://www.namm.org/files/showdir/ExhibitorList_WN15.xls

⁸² <http://www.musictrades.com/global.html>

the music products industry and promote the pleasures and benefits of making music.”⁸³ NAMM also hosts the NAMM Show, the world's largest event for the music products industry.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁴ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸⁵ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸⁶

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community. Community members may register a .MUSIC by either:

⁸³ <https://www.namm.org/about>

⁸⁴ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸⁵ <http://music.us/supporters>

⁸⁶ See <http://music.us/nexus>

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸⁷ given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

⁸⁷ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Research/Work Experience:

Timing & Time Perception: Reviews, Brill Publishing House & University of Groningen, NL, 2014-2017

Position: Editor-in-Chief

Editor of this new and unique journal that aims to bring together all reviews on timing and time perception from different disciplines and perspectives.

Timing & Time Perception, Brill Publishing House, NL, 2013-2017

Position: Editor-in-Chief

Proposer and Editor of this new and unique journal that aims to bring together all research on timing and time perception from different disciplines and perspectives.

University of Athens, Department of Philosophy and History of Science, Greece, 2012-2015

Funded by: Cognitive Mechanisms in the Perception, Representation, and Organization of Knowledge (COGMEK), THALIS National Research Funding

PIs: Dr. Konstantinos Moutousis & Prof. Stella Vosniadou

Position: Researcher

As a researcher in COGMEK under the Group: *Spatial and Temporal Perception: General characteristics and the role of higher-level cognitive processes*, I will investigate whether or not learning and priming modulates synchrony perception and how this modulation can enhance or inhibit the peak and decline of the time-course of time perception through development. I will also co-supervise two doctoral students.

Cognitive Systems Research Institute (CSRI), Athens, Greece, 2011-present

Funded by: Time In MEntaL activitY: theoretical, behavioral, bioimaging and clinical perspectives (TIMELY), ISCH Action TD0904, 2010-2013. COST-ESF Networking grant (<http://www.timely-cost.eu>) & POETICON ++, FP7-ICT-Cognitive Systems, Interaction, Robotics

Director: Katerina Pastra, Ph.D.

Position: Coordinator/Researcher

TIMELY is a networking project between scientists working on time and time perception for the exchange of expertise and establishment of new collaborations. TIMELY seeks to explore fundamental questions on TP by bringing together, for the first time, senior and junior scientists from different disciplines and perspectives. Specifically, TIMELY will focus on four main themes:

- *Conceptual analysis and measurement of time*
- *Exploring Cognitive, Linguistic, and Developmental factors associated with TP variability*
- *Extending time research to ecologically-valid stimuli*

- *Uncovering the neural correlates of TP*

POETICON++ will be a continuation of the work done in POETICON on for discovering the “languages” of sensorimotor representations and the correspondences with natural language.

Institute for Language and Speech Processing (ILSP), Research Centers “Athena”, Athens, Greece, 2008-2011

Funded by: POETICON, European Commission 7th Framework Programme, Cognitive Systems and Robotics, STREP Project ICT-215843.

Department Head: S. Piperidis

Position: Post-doctoral Researcher

The POETICON project follows an empirical approach for discovering the “languages” of sensorimotor representations and the correspondences with natural language. Guided by cognitive experiments, it employs cutting-edge equipment and established cognitive protocols for collecting face and body movement measurements, visual object information and associated linguistic descriptions from interacting human subjects, with the objective to create an extensible computational resource which associates symbolic representations with corresponding sensorimotor representations.

Hellenic Institute of Transport (HIT), Center for Research and Technology Hellas (CERTH), Athens, Greece, 2007-08

Funded by: Center for Research and Technology Hellas (CERTH)

Department Head: Aggelos Bekiaris, Ph.D.

Position: Post-doctoral Researcher

Focusing on the study of the relationship of the driver with the vehicle and methods to increase safety while driving. Tasks included working with a driving simulator or real driving experiments. Involved in the European Union funded programs of:

- HUMABIO (Human monitoring and authentication using biodynamic indicators and behavioural analysis)
- ACTIBIO (Unobtrusive authentication using activity related and soft biometrics)
- TRAIN ALL (Integrated system for driver training and assessment using interactive education tools and new training curricula for all modes of road transport)
- DRUID (Driving under the influence of drugs, alcohol and medicines)
- SENSATION (Advanced sensor development for attention, stress, vigilance and sleep/wakefulness monitoring),
- ASK IT (Ambient intelligence system of agents for knowledge based and integrated services for mobility impaired users)
- IN SAFETY (Infrastructure and safety).

Crossmodal Research Laboratory, Department of Experimental Psychology, University of Oxford, UK, 2004-07

Funded by: Newton Abraham Studentship, Medical Sciences.

Lab Supervisor: Prof. Charles Spence, Ph.D.

Position: Doctoral Student

Focusing on the study of audiovisual temporal perception for complex stimuli using psychophysical and neuroimaging techniques.

Department of Neurology II and Center for Advanced Imaging Medicine, University of Magdeburg, Germany, 2006

Funded by: Visiting Scientist DFG Grant

Lab Supervisor: Toemme Noesselt, Ph.D.

Position: Visiting Scientist

Focusing on the study of auditory, visual, and tactile synchrony perception using psychophysical and fMRI techniques.

Max Planck Research Institute for Biological Cybernetics, Dr. Logothetis Department, Germany, 2004-05

Funded by: Max Planck Society

Lab Supervisor: Zoe Kourtzi, Ph.D.

Position: Research Scientist

Focusing on the study of visual perception using Glass Patterns using fMRI and psychophysical methods.

Behavioral Neuroscience Laboratory, Department of Psychology, CSU Long Beach, USA, 2003-04

Lab Supervisor: Diane W. Lee, Ph.D.

Position: Research Assistant

Focusing on understanding the processes underlying learning and memory formation, investigating the role of hippocampus in learning, and injury-induced hippocampal neurogenesis.

Boeing Corporation, Phantom Works, Long Beach, USA, 2003-04

Funded by: Boeing Corporation

Lab Supervisor: Jack Dwyer, Ph.D.

Position: Research Assistant

Focusing on the development of effective radar systems that function based on the principles of the mechanisms governing the human eye.

Psychoacoustics Laboratory, Dep. of Psychology, CSU Long Beach, USA, 2002-05

Lab Supervisor: Thomas Z. Strybel, Ph.D.

Position: Research Assistant

Investigation of unimodal and crossmodal (auditory and visual) perception of apparent motion.

Event Organization/Co-organization:

Conferences:

- International Conference on Timing and Time Perception, March 31st–April 3rd, 2014, Corfu, Greece (<http://www.finalconference.timely-cost.eu/>).

- 4th Annual Conference of the Hellenic Cognitive Science Society, June 6-8th, 2013, Athens, Greece (<http://cogsci13.helleniccognitivesciencesociety.gr/>).

Workshops:

- Workshop on *Temporal Prediction*, October 18th, 2013, Granada, Spain.
- Workshop on *Development of Timing and Time Perception: A lifespan perspective*, October 16-17th, 2013, Granada, Spain.
- Workshop on the *Applying the senses in the classroom*, November 20th, 2011, Athens, Greece.
- International Workshop on the *Multidisciplinary Aspects of Time and Time Perception*, October 7th-8th, 2010, Athens, Greece (<http://timely-cost.eu/1st-international-workshop-multidisciplinary-aspects-time-perception>).
- ECOLIFE Festival, Agora, OAKA Olympic Sports Complex, Athens, Greece, June 2006. *The Unique Fair on Environmental Friendly Products & Services*, 3-day “Food for thought” Multisensory sensory experience exhibition. *Funded by: British Council in Greece*

Satellite Meetings:

- Satellite Meeting on the *Neurobiology of Time: From Normality to Dysfunction*, September 9th, 2011, Seville, Spain (<http://www.ebbs-seville2011.com/index.php/scientific-programme/satellite>).

Symposiums:

- *Time to act: New perspectives on embodiment and timing* at the International Conference on Timing and Time Perception, March 31st-April 3rd, 2014, Corfu, Greece.
- 1-Day Symposium at the 4th Hellenic Cognitive Science Society Annual Conference on *Timing in Clinical Populations*, June 7th, 2013, Athens, Greece.
- 1-Day Symposium at the 13th Hellenic Conference of Psychological Research on *Timing in perception: Visual instability-temporal distortion [Ο χρόνος στην αντίληψη: Οπτική αστάθεια - χρονική διαστρέβλωση]*, May 15-19th, 2013, Alexandroupoli, Greece.
- 2-Day International Symposium on *Temporal Processing Within and Across Senses*, October 4th-5th, 2012, Tuebingen, Germany.
- 3-Day International Symposium on the *Time and the Conscious Brain*, October 31st- November 2nd, 2011, HWK, Delmenhorst, Germany.
- EuroCogSci2011 Symposium on the *Current advances on Time perception: Psychophysical, Neuronal, and Applied Perspectives*, May 21st-24th, 2011, Sofia, Bulgaria.
- Symposium at the International Neuropsychological Society (INS) meeting *Time and Cognition: From behavioral studies to brain imaging*, June 30-July 3, Krakow, Poland.

Training Schools:

- 5-Day Training School on the *Imaging Time*, February 23-27th, 2013, Magdeburg, Germany.
- 5-Day Training School on the *Temporal Timing and Time Perception: Procedures, Measures, & Applications*, February 4-8, 2013, Corfu, Greece.

- 3-Day Training School on *Dynamical systems for psychological timing and timing in speech processing*, May 2nd-4th, 2012, Vietri sul Mare, Italy.
- 5-Day Training School on the *Temporal processing in clinical populations*, March 26th-30th, 2012, Thessaloniki, Greece.
- 5-Day Training School on the *Psychophysical, Computational and Neuroscience Models of Time Perception*, April 4th-8th, 2011, Groningen, Netherlands (<http://timely-cost.eu/training-school-2>).

Chairing:

- Oral Session: Children's Learning & Perception in the *13th International-2nd World Conference of the Association of Psychology and Psychiatry for Adults and Children (APPAC)*, "Psychology, Neuropsychiatry & Social Work in Modern Times", May 20-23, 2008, Athens, Greece.
- Experimental Psychology Session in the *3rd Annual D. Phil. Students Meeting*, 22 June 2007, University of Oxford, Medical Sciences Division.

Teaching Experience:

Lecturer:

- *Research Methods in Experimental Psychology*, Department of Philosophy and History of Science, University of Athens, Greece, 2014-15
- *Multisensory Perception and Attention*, Department of Philosophy and History of Science, University of Athens, Greece, 2009-13
- *Cognitive Psychology*, Department of Philosophy and History of Science, University of Athens, Greece, 2011-14
- *Introduction to Cognitive Psychology II*, Department of Psychology, Panteio University, Athens, Greece, 2009-10
- *Current Topics in Cognitive Psychology*, Department of Psychology, Panteio University, Athens, Greece, 2009-10
- *Introduction to Cognitive Psychology I*, Department of Psychology, Panteio University, Athens, Greece, 2008-10

Graduate Assistant, PSYCH 110, *Introduction to Behavioral Statistics*, Department of Psychology, CSU Long Beach, USA, 2002-04

Tutor (Math & Psychology), Professional Tutors of America, Brea, USA, 2002-03

Laboratory Instructor, PSYCH 310, *Intermediate Statistics*, Department of Psychology, CSU Long Beach, USA, Summer Session 2002

Student Supervision:

Master thesis supervision:

Talks & Poster Presentations:

Talks:

- Vatakis, A. (2014). Time in mental activity. Invited talk at the *ESOF2014*, June 23, Copenhagen, Denmark.
- Vatakis, A. (2014). Timing and the senses in complex events. Invited seminar at the *Centre for the Study of the Senses, University of London*, May 8, London, UK.
- Sgouramani, E., & Vatakis, A. (2014). “While we dance...”: The effects of expertise, space, speed, and prediction on duration judgments. Invited talk presented at the *International Conference on Timing and Time perception*, March 31-April 3, Corfu, Greece.

- Vatakis, A. (2013). Synchronizing my lips with my voice. Invited talk at the *Speech and Time Talk Series at Aiginition Hospital*, Athens, Greece.
- Vatakis, A., & Maniadakis, M. (2013). Timing in humans and robots. Invited tutorial presented at the *Joint ROBOTDOC and POETICON++ Spring School on Developmental Robotics and Cognitive Bootstrapping*, 18-20 March, Athens, Greece.
- Sgouramani, E., & Vatakis, A. (2013). Alternating speed on dance videos influences duration judgments in dancers and non-dancers. Talk presented at the *14th International Multisensory Research Forum (IMRF)*, 3-6 June, Jerusalem, Israel.
- Sgouramani, E., & Vatakis, A. (2013). The influence of speed on duration estimation in dancers and non-dancers. Talk included in the symposium “Time in perception: Binocular rivalry-temporal distortions”, *14th Conference of the Hellenic Psychological Society*, 15-19 May 2013, Alexandroupoli, Greece.
- Vatakis, A., Pastra, K., & Dimitrakis, P. (2012). Acquiring object affordances through touch, vision, and language. Talk presented at the *13th International Multisensory Research Forum*, 19-22 June, Oxford, UK.
- Sgouramani, E., Muller, C., van Noorden, L., Leman, M., & Vatakis, A. (2012). In search of lost time: Does dance experience enhance time perception on audiovisual asynchronies and whole-body synchronization-continuation? Invited talk presented at the *Institute for Psychoacoustics and Electronic Music (IPEM)*, 23 February, Ghent University, Belgium.
- Vatakis, A. (2012). Η χρονική αντίληψη πολυαισθητηριακών ερεθισμάτων [Time perception for multisensory stimuli]. Invited talk at the *Symposium of Science and art-Science & Art: Time as the 4th dimension* organized by the Hellenic Society of Physics and Charokopeio University, January 20-22, Athens, Greece.
- Vatakis, A. (2011). Improving literacy by engaging the senses. Invited talk presented at the *Eugenidio Foundation*, November 19th, Athens, Greece.
- Vatakis, A. (2011). Temporal recalibration: Asynchronous audiovisual speech exposure extends the temporal window of multisensory integration. Talk presented at the EBBS2011 Satellite Meeting “Neurobiology of Time: From Normality to Dysfunction”, Seville, Spain.
- Vatakis, A. (2011). Οπτικοακουστική χρονική ευαισθησία και η επίδραση της βαρύτητας στις κινήσεις αντικείμενων [Audiovisual temporal sensitivity and the effect of gravity of moving objects]. Talk presented at the *13th Hellenic Conference of Psychological Research*, Athens, Greece.
- Vatakis, A., Pastra, K., & Dimitrakis, P. (2011). Ανακαλύπτοντας τον ορισμό ενός αντικείμενου και τις δυνατότητες χρήσης του (affordances) μέσω της γλώσσας [Uncovering the definition of an object and its affordances through language]. Talk presented at the *13th Hellenic Conference of Psychological Research*, Athens, Greece.
- Vatakis, A. (2010). Audiovisual temporal perception and integration: Acquired deficits in audiovisual temporal perception for complex stimuli. Talk presented at the “Time and Cognition: From behavioral studies to brain imaging” Symposium at the International Neuropsychological Society (INS), June 30-July 3, Krakow, Poland.
- Vatakis, A. (2010). Time in mental activity: theoretical, behavioral, bioimaging, and clinical perspectives. Invited talk presented at the *3rd COST 2102 International Training School*, 15-17 March, Caserta, Italy.

- Vatakis, A. (2009). The concept of psychological time and the case of audiovisual temporal perception. Invited talk presented at the *ESF SCSS Exploratory Workshop: Qualities in Perception Science*, 2-6 November, Rovereto, Italy.
- Spence, C., Navarra, J., Vatakis, A., Hartcher-O'Brien, J., & Parise, C. (2009). The multisensory perception of synchrony. Talk presented at the *Symposium: Multisensory Integration at the 32nd European Conference on Visual Perception (ECVP)*, August 24-28, Regensburg, Germany.
- Vatakis, A. (2008). Asynchronous audiovisual speech exposure extends the temporal window of multisensory integration. Paper presented at the *2nd Annual Meeting of the Hellenic Society for Neuroscience*, October 16-19, Athens, Greece.
- Vatakis, A. (2008). Η αντίληψη του χρόνου στην πειραματική ψυχολογία [Temporal perception in Experimental Psychology: An overview]. Invited talk at the 'A symposium on Time', September 12-14, Kozani, Greece.
- Vatakis, A. (2008). Time perception: A multidisciplinary approach. Invited talk presented at the *POETICON 2nd Technical Meeting, Collaboration Activities*, July 7-8, Athens, Greece.
- Vatakis, A. (2008). Investigating temporal perception in infants using complex stimuli. Paper presented at the *13th International Conference of the Association of Psychology and Psychiatry for Adults and Children (A.P.P.A.C.)*, May 20-23, Athens, Greece.
- Vatakis, A., & Spence, C. (2007). Investigating the factors that influence the temporal perception of complex audiovisual events. Paper presented at the *2nd European Cognitive Science 2007 Conference (EuroCogSci07)*, May 23-27, Delphi, Greece.
- Vatakis, A. (2006). Synchrony perception and temporal recalibration of complex audiovisual stimuli. Invited talk presented on Oct. 31st at the *Department of Biological Psychology and Neuropsychology, University of Hamburg, Research Group-Dr. Brigitte Roeder*, Hamburg, Germany.
- Vatakis, A. (2006). Temporal perception of audiovisual speech stimuli. Invited talk presented on Sept. 13th at the *REVES Research Group-Dr. George Drettakis*, INRIA Sophia-Antipolis, France.
- Vatakis, A., & Spence, C. (2006). Factors modulating the temporal perception of audiovisual speech stimuli. Paper presented at the *7th Annual Meeting of the International Multisensory Research Forum*, June 18-21, Dublin, Ireland.
- Sanabria, D., Lyons, G., Vatakis, A., & Spence, C. (2006). Perceptual grouping and hand posture effects on crossmodal interactions. *Experimental Psychology Meeting*, April 10-12, Birmingham, UK.
- Vatakis, A. (2005). Audiovisual synchrony perception for complex stimuli. Paper presented at the *2nd year Graduate Student Presentations, Department of Experimental Psychology, University of Oxford*, Oxford, UK.
- Vatakis, A. (2005). Audiovisual synchrony perception for complex stimuli: How 'special' is speech? Invited talk presented on May 25th at *St. Edmund Hall College, University of Oxford*, UK.
- Kourtzi, Z., Vatakis, A., & Krekelberg, B. (2005). Global motion from form in the human visual cortex. Paper presented at the *Annual Meeting of the Vision Sciences Society*, Sarasota, Florida.

Vatakis, A., & Strybel, T.Z. (2003). Auditory and visual apparent motion with crossmodal moving distractors. Paper presented at the *Spring Meeting of the Western Psychological Association*, Vancouver, B.C.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application, 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector, a "Music" regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is "closely united" and "interdependent" (i.e. Each "organized community of similar nature that relates to music" which is part of the "logical alliance of communities that relate to music" is not mutually exclusive).

In short, the applied-for string ("Music") matches the name of the "Music" Community as defined by DotMusic's application. DotMusic's "Music Community" definition accurately represents the common definition of the "Music Community," which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA’s members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The “Size” covered reaches over a hundred million music entities i.e. “considerable size with millions of constituents” per Application Answer to Question 20a.

The string “music” falls under the jurisdiction of each country’s Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

²⁹ 2011 Annual Report from New Zealand Ministry of Culture:

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **ReverbNation**⁵⁸ – ReverbNation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷³ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁷⁴

According to the Applicant Guidebook ("AGB"), to receive the maximum score for Nexus, the applied-for string -- "music" -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the "Music Community" entirely matches the applied-for "music" string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community

⁷¹ <https://www.icann.org/en/system/files/correspondence/riaa-to-icann-05mar15-en.pdf>, Pg.1

⁷² <https://www.icann.org/en/system/files/correspondence/riaa-to-icann-05mar15-en.pdf>, Pg.3, Appendix A

⁷³ <http://music.us/supporters>

⁷⁴ See <http://music.us/nexus>

defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility criteria and content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential

relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

² <http://music.us/supporters>

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application, 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector, a "Music" regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is "closely united" and "interdependent" (i.e. Each "organized community of similar nature that relates to music" which is part of the "logical alliance of communities that relate to music" is not mutually exclusive).

In short, the applied-for string ("Music") matches the name of the "Music" Community as defined by DotMusic's application. DotMusic's "Music Community" definition accurately represents the common definition of the "Music Community," which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA’s members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The “Size” covered reaches over a hundred million music entities i.e. “considerable size with millions of constituents” per Application Answer to Question 20a.

The string “music” falls under the jurisdiction of each country’s Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

²⁹ 2011 Annual Report from New Zealand Ministry of Culture:

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **ReverbNation**⁵⁸ – ReverbNation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁶⁵ <http://a2im.org/groups/tag/associate+members/>

⁶⁶ <http://musicfirstcoalition.org/coalition>, The musicFIRST Coalition, with founding members A2IM, RIAA, and Recording Academy represents musicians, artists, managers, music businesses, and performance right advocates.

⁶⁷ <http://www.copyrightalliance.org/members>

⁶⁸ <http://www.winformusic.org>

⁶⁹ <http://www.merlinnetwork.org>

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Another letter⁷³ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷⁴ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

⁷⁴ <http://music.us/supporters>

B) Nexus⁷⁵

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries

⁷⁵ See <http://music.us/nexus>

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic's community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic's application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined "music" Community and applied-for "music" string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application, 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector, a "Music" regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is "closely united" and "interdependent" (i.e. Each "organized community of similar nature that relates to music" which is part of the "logical alliance of communities that relate to music" is not mutually exclusive).

In short, the applied-for string ("Music") matches the name of the "Music" Community as defined by DotMusic's application. DotMusic's "Music Community" definition accurately represents the common definition of the "Music Community," which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexa.com/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN's Applicant Guidebook ("AGB")¹⁹: *"With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members." (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly²⁰ dedicated to the community which has supported DotMusic, which include several "international federation of national communities of a similar nature" relating to music, music coalitions and other relevant and non-negligible music organizations.*

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word "mainly" is defined as "*more than anything else*" (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community "by representing all constituents involved in music creation, production and distribution" (Application Answer to Question 20d). Supporting organizations related to that string that are "mainly" dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

²¹ http://www.ifacca.org/membership/current_members/

influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁹

²⁹ <http://my.midem.com/en/contact-us/pavilion-representatives/>

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the "Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa"³⁸

³⁸ 2010-2011 Annual Report for the National Arts Council South Africa, National Arts Council South Africa, <http://www.nac.org.za/media/publications/AR%2010-11%20NAC.PDF/download>, Page 11. Also Mmino, the South African – Norwegian Education Music Programme, solely funds music projects funding a total of 294 projects. Thirteen projects were allocated funding for a total of R1,680,600 of which R1,381,000 went towards music educational and R299,600 to exchange projects (Page 10)

- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴¹

The reach of A2IM Associate⁴² membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴³ – iTunes accounts for 63% of global digital music market⁴⁴ - a majority – with a registered community of 800 million registered members⁴⁵ available in 119 countries who abide to strict terms of service and boundaries⁴⁶ and have downloaded over 25 billion songs⁴⁷ from iTunes’ catalog of over 43 million songs⁴⁸ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁹

⁴⁸ <https://www.apple.com/itunes/features/>

⁴⁹ <https://www.apple.com/itunes/working-itunes/sell-content/music-faq.html>

- **Pandora**⁵⁰ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵¹
- **Spotify**⁵² – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵³
- **Vevo**⁵⁴ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁵
- **Youtube**⁵⁶ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁷ of which 38.4% is music-related.⁵⁸
- **Reverbnation**⁵⁹ – Reverbnation⁶⁰ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The Reverbnation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶¹ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶²

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶³), China (China Audio Video Association⁶⁴) and Germany (Initiative Musik).⁶⁵ A2IM also has Affiliate⁶⁶ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁷ the Copyright Alliance,⁶⁸ the Worldwide Independent Network (WIN)⁶⁹ and Merlin.⁷⁰

⁶⁷ <http://musicfirstcoalition.org/coalition>, The musicFIRST Coalition, with founding members A2IM, RIAA, and Recording Academy represents musicians, artists, managers, music businesses, and performance right advocates.

⁶⁸ <http://www.copyrightalliance.org/members>

⁶⁹ <http://www.winformusic.org>

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷¹ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises).

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the "voice of the recording industry worldwide"⁷² whose members⁷³ – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁷⁴ represents "approximately 85% of all legitimate recorded music produced and sold in the United States,"⁷⁵ the world's largest music market with 30% global market share.⁷⁶ Formed in 1933, the IFPI's mission was to "represent the interests of the recording industry worldwide in all fora."

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷⁷ – a majority of global music.⁷⁸

⁷⁸ <https://www.icann.org/en/system/files/correspondence/riaa-to-icann-05mar15-en.pdf>, Pg.3, Appendix A

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁰ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸¹ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸²

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music

⁷⁹ <https://www.icann.org/en/system/files/correspondence/aguirre-to-icann-board-ciu-14apr15-en.pdf>

⁸⁰ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸¹ <http://music.us/supporters>

⁸² See <http://music.us/nexus>

entities to be included as part of the Community. Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸³ given the symbiotic overlapping nature of the Community as

⁸³ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

² <http://music.us/supporters>

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application Answer to Question 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector. "Music" is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

DotMusic's application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexa.com/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

countries.¹³ This means that if a Music Community member's copyright rights are violated in any other signatory country's jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community's rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community's *Establishment* and definition is "cohesive" and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is "closely united" and functions as a "whole"

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The "music" string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain's registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN "to provide accurate WHOIS contact data" or else their domain "registration may be suspended or even cancelled".¹⁸

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: “*With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.*” (AGB, 4-12). The community as defined in the DotMusic application has at least one entity *mainly*²⁰ dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government

²⁶ 2011 Annual Report for Cyprus Ministry of Culture, Section 1.2 "Music"

(http://www.moec.gov.cy/en/annual_reports/annual_report_2011_en.pdf). Activities include Music Performances in Cyprus (1.2.1) and Abroad (1.2.2), Subsidization of Paphos Aphrodite Festival (1.2.3), Music Publications (1.2.4), Subsidization and Purchases of Digital Records (1.2.5), Promotion for Cypriot musical creativity abroad (1.2.6),

Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴

Cyprus Symphony Orchestra Foundation (1.2.7), Music Information Centre (1.2.8), Developing Music Education (1.2.9), Organising of the 1st Musicological Symposium (1.2.10) and Musical Festivities for the European Volunteerism Year (1.2.11)

³⁴ Department for Culture, The Importance of Music, A National Plan for Music Education,

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁸
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”⁴¹ whose members⁴² – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁴³ represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”⁴⁴ the world’s largest music market with 30% global market share.⁴⁵ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.”

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁶

The reach of A2IM Associate⁴⁷ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁸ – iTunes accounts for 63% of global digital music market⁴⁹ - a majority – with a registered community of 800 million registered members⁵⁰ available in 119 countries who abide to strict terms of service and boundaries⁵¹ and have downloaded over 25 billion songs⁵² from iTunes’ catalog of over 43 million songs⁵³ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵⁴
- **Pandora**⁵⁵ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁶
- **Spotify**⁵⁷ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵⁸
- **Vevo**⁵⁹ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁶⁰

⁵⁷ <http://a2im.org/groups/spotify>

⁵⁸ <https://press.spotify.com/us/information/>

⁵⁹ <http://a2im.org/groups/vevo/>

- **Youtube**⁶¹ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁶² of which 38.4% is music-related.⁶³
- **Reverbnation**⁶⁴ – Reverbnation⁶⁵ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The Reverbnation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁶ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁷

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶⁸), China (China Audio Video Association⁶⁹) and Germany (Initiative Musik).⁷⁰ A2IM also has Affiliate⁷¹ associations within the global music community. These include Affiliates such as MusicFirst,⁷² the Copyright Alliance,⁷³ the Worldwide Independent Network (WIN)⁷⁴ and Merlin.⁷⁵

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁶ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises).

⁷⁵ <http://www.merlinnetwork.org>

⁷⁶ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA “on behalf of over 15 national and international trade associations” also expressed its support for .MUSIC to be under a “community” application model, including encouraging statements in support of DotMusic’s policies that stated that the coalition “was encouraged to see” that DotMusic “included several measures to deter and address copyright infringement within that TLD.” The “coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world’s music”⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

The International Music Products Association, NAMM, is another globally-recognized and relevant group of non-negligible size that has supported DotMusic.⁸⁰ NAMM, formed in 1901, is *mainly* dedicated to the global music community by representing the international music products industry and community, with globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{81 82} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM’s members. Without these musical instruments and products, music as we know it today would not be created or produced. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM’s mission is “to strengthen

⁸⁰ http://music.us/letters/NAMM_International_Music_Products_Association.pdf

⁸¹ https://www.namm.org/files/showdir/ExhibitorList_WN15.xls

⁸² <http://www.musictrades.com/global.html>

the music products industry and promote the pleasures and benefits of making music.”⁸³ NAMM also hosts the NAMM Show, the world's largest event for the music products industry.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁴ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸⁵ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸⁶

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community. Community members may register a .MUSIC by either:

⁸³ <https://www.namm.org/about>

⁸⁴ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸⁵ <http://music.us/supporters>

⁸⁶ See <http://music.us/nexus>

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸⁷ given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

⁸⁷ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Name: Daniel James Wolf

Title: PhD Ethnomusicology, Wesleyan University

Organization: Material Press, Frankfurt am Main

Dr. Daniel James Wolf

Education

BA (Music), UC Santa Cruz

MA (World Music)

PhD (Ethnomusicology), Wesleyan University

Biography

Daniel James Wolf (born September 13, 1961 in Upland, California) is an American composer of serious music and a music scholar.

Wolf studied composition study with Gordon Mumma, Alvin Lucier, and La Monte Young, as well as musical tunings with Erv Wilson and Douglas Leedy and ethnomusicology. BA University of California Santa Cruz, MA, PhD, Wesleyan University. Important contacts with Lou Harrison, John Cage, Walter Zimmermann. Managing Editor of *Xenharmonikon*, 1985-89. Based in Europe from 1989, he is known as a member of the "Material" group of composers, along with Hauke Harder, Markus Trunk.

Wolf's compositions apply an experimental approach to musical materials, with a special interest in intonation, yet often display a surface that playfully - if accidentally - recalls historical musics. Major works include *The White Canoe*, an opera seria for handpuppets to the libretto by Edward Gorey and four string quartets.

Three distinct streams combine to form Wolf's oeuvre. Wolf makes sound installations, experimental concert works based on sound structures mostly free from historical associations, and experimental concert works based on reifying the tradition of European art music (or other world musics, particular Javanese gamelan) and then performing operations on its internal principles. The following remarks pertain to this last body of work.

Composer Wolf identifies with the experimental music tradition--especially its American West Coast manifestation-- spiritually, intellectually and personally. Nevertheless, in that portion of his work where his choice of musical materials and forms derive from common practice harmony and counterpoint, he might, to some, suggest a conservative neoclassicist. Where neoclassicism means pursuing classical ideals with novel sonic resources, Wolf's actually employs the reverse tactic -- he virtuosically explores reasonably familiar classical or neoclassical materials with no a priori commitment to received ideals.

He jokingly calls his method "dysfunctional harmony." A metaphor might help explain his meaning. Imagine the principles of common practice music as carried by some genetic code subject to mutations. Either intuitively or methodically, Wolf mutates certain genes and produces harmony or counterpoint that systematically engages our historical understanding but still undermines our expectations. In the long run biological mutations either prove

adaptive (and proliferate) or maladaptive (and disappear), but when the sport first appears, it holds only its strangeness, orthogonal to any world of value.

In this respect Wolf has deeply internalized the experimental ethos. Typical composers employ trial and error as they search for some effect, while strict aleatoric composers, after Cage, perform trials and simply accept the effect. Wolf performs Cageian experiments, mostly in his head, with or without the aid of chance procedures, but in doing so nevertheless engages musical functionality though without making a fetish of it.

While Wolf's tendency towards small forms and quiescent gestures often tickles a listener's notions of the musically elegant, his mutated materials make for music that must fall just shy of received standards of elegance. Much of the power of his music derives from a tension that dwells in the negative space between the forms Wolf actually achieves and the engaged listener's induced desire for a perfectly elegant idealization.

Rather than a post-modernist's theatrical pastiche and cold irony, Wolf's detente with the great tradition has a tragic aspect. One might compare Wolf's engagement with the past to that of the uncompromising realist in literature, drama or the visual arts, one who takes on the practices of the great tradition but rejects the hegemonic repression encoded in naive heroicism and idealization.

He has written extensively about modern and experimental music, systematic musicology, and speculative music theory. Extensive critical and theoretical writings on musical intonation and speculative music theory, especially the interaction between tuning systems and tonal musics, 20th century and American experimental music, ancient Greek and Hellenistic music, mannerism, Viennese classicism, Southeast Asian musics. Organology. Ethnomusicological fieldwork in central Mexico, Ireland, Suriname, central Java, Germany and southern California.

Other Experience

Member of the Gravity Resisters' Pension Fund Orchestra, 1980-present.

Editor, XENHARMONIKON (a journal of new music and intonation systems), 1985-89.

Curator, Folk Music Center Museum, Claremont (1979-89)

Music Curator, Real Art Ways, Hartford, CT (1985-86)

Guest Curator, Ontario (California) Museum of History and Art (1989).

Research Assistant to Prof. John Hajdu (J.-B. Lully: Sacred Motets).

Teaching Assistant to Profs. Linda Burman-Hall (theory and musicianship), Neely Bruce (music history survey), and David McAllester (ethnomusicology).

Studied Gamelan with Undang Sumarna, Sumarsam, I.M. Harjito, Ki Suhardi, Heri Djajasumadi, and Oemartopo. Instructor, Javanese Gamelan, Museum für Volkerkunde,

Frankfurt. Member, Gamelan Orchestras WACANA BUDAYA, Frankfurt, and TOPANG BANG, Budapest.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application Answer to Question 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector. “Music” is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

DotMusic’s application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians’ rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

countries.¹³ This means that if a Music Community member's copyright rights are violated in any other signatory country's jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community's rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community's *Establishment* and definition is "cohesive" and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is "closely united" and functions as a "whole"

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The "music" string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain's registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN "to provide accurate WHOIS contact data" or else their domain "registration may be suspended or even cancelled".¹⁸

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: “*With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.*” (AGB, 4-12). The community as defined in the DotMusic application has at least one entity *mainly*²⁰ dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government

²⁶ 2011 Annual Report for Cyprus Ministry of Culture, Section 1.2 "Music"

(http://www.moec.gov.cy/en/annual_reports/annual_report_2011_en.pdf). Activities include Music Performances in Cyprus (1.2.1) and Abroad (1.2.2), Subsidization of Paphos Aphrodite Festival (1.2.3), Music Publications (1.2.4), Subsidization and Purchases of Digital Records (1.2.5), Promotion for Cypriot musical creativity abroad (1.2.6),

Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴

Cyprus Symphony Orchestra Foundation (1.2.7), Music Information Centre (1.2.8), Developing Music Education (1.2.9), Organising of the 1st Musicological Symposium (1.2.10) and Musical Festivities for the European Volunteerism Year (1.2.11)

³³ <http://www.pch.gc.ca/eng/1294862453819/1294862453821>

³⁴ Department for Culture, The Importance of Music, A National Plan for Music Education,

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁸
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”⁴¹ whose members⁴² – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁴³ represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”⁴⁴ the world’s largest music market with 30% global market share.⁴⁵ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.”

⁴⁵ <http://www.statista.com/topics/1639/music/>

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁶

The reach of A2IM Associate⁴⁷ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁸ – iTunes accounts for 63% of global digital music market⁴⁹ - a majority – with a registered community of 800 million registered members⁵⁰ available in 119 countries who abide to strict terms of service and boundaries⁵¹ and have downloaded over 25 billion songs⁵² from iTunes’ catalog of over 43 million songs⁵³ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵⁴
- **Pandora**⁵⁵ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁶
- **Spotify**⁵⁷ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵⁸
- **Vevo**⁵⁹ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁶⁰

⁵⁹ <http://a2im.org/groups/vevo/>

- **Youtube**⁶¹ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁶² of which 38.4% is music-related.⁶³
- **ReverbNation**⁶⁴ – ReverbNation⁶⁵ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁶ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁷

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶⁸), China (China Audio Video Association⁶⁹) and Germany (Initiative Musik).⁷⁰ A2IM also has Affiliate⁷¹ associations within the global music community. These include Affiliates such as MusicFirst,⁷² the Copyright Alliance,⁷³ the Worldwide Independent Network (WIN)⁷⁴ and Merlin.⁷⁵

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁶ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises).

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA “on behalf of over 15 national and international trade associations” also expressed its support for .MUSIC to be under a “community” application model, including encouraging statements in support of DotMusic’s policies that stated that the coalition “was encouraged to see” that DotMusic “included several measures to deter and address copyright infringement within that TLD.” The “coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world’s music”⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

The International Music Products Association, NAMM, is another globally-recognized and relevant group of non-negligible size that has supported DotMusic.⁸⁰ NAMM, formed in 1901, is *mainly* dedicated to the global music community by representing the international music products industry and community, with globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{81 82} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM’s members. Without these musical instruments and products, music as we know it today would not be created or produced. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM’s mission is “to strengthen

⁸⁰ http://music.us/letters/NAMM_International_Music_Products_Association.pdf

⁸¹ https://www.namm.org/files/showdir/ExhibitorList_WN15.xls

⁸² <http://www.musictrades.com/global.html>

the music products industry and promote the pleasures and benefits of making music.”⁸³ NAMM also hosts the NAMM Show, the world's largest event for the music products industry.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁴ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸⁵ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸⁶

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community. Community members may register a .MUSIC by either:

⁸³ <https://www.namm.org/about>

⁸⁴ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸⁵ <http://music.us/supporters>

⁸⁶ See <http://music.us/nexus>

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸⁷ given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

⁸⁷ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

David Michael Ramirez II, Ph.D.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application, 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector, a "Music" regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is "closely united" and "interdependent" (i.e. Each "organized community of similar nature that relates to music" which is part of the "logical alliance of communities that relate to music" is not mutually exclusive).

In short, the applied-for string ("Music") matches the name of the "Music" Community as defined by DotMusic's application. DotMusic's "Music Community" definition accurately represents the common definition of the "Music Community," which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA’s members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The “Size” covered reaches over a hundred million music entities i.e. “considerable size with millions of constituents” per Application Answer to Question 20a.

The string “music” falls under the jurisdiction of each country’s Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

²⁹ 2011 Annual Report from New Zealand Ministry of Culture:

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **Reverbnation**⁵⁸ – Reverbnation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The Reverbnation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Another letter⁷³ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷⁴ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

⁷⁴ <http://music.us/supporters>

B) Nexus⁷⁵

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries

⁷⁵ See <http://music.us/nexus>

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application Answer to Question 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector. “Music” is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

DotMusic’s application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians’ rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: “*With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.*” (AGB, 4-12). The community as defined in the DotMusic application has at least one entity *mainly*²⁰ dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government

²⁶ 2011 Annual Report for Cyprus Ministry of Culture, Section 1.2 "Music"

(http://www.moec.gov.cy/en/annual_reports/annual_report_2011_en.pdf). Activities include Music Performances in Cyprus (1.2.1) and Abroad (1.2.2), Subsidization of Paphos Aphrodite Festival (1.2.3), Music Publications (1.2.4), Subsidization and Purchases of Digital Records (1.2.5), Promotion for Cypriot musical creativity abroad (1.2.6),

Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴

Cyprus Symphony Orchestra Foundation (1.2.7), Music Information Centre (1.2.8), Developing Music Education (1.2.9), Organising of the 1st Musicological Symposium (1.2.10) and Musical Festivities for the European Volunteerism Year (1.2.11)

³⁴ Department for Culture, The Importance of Music, A National Plan for Music Education,

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁸
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”⁴¹ whose members⁴² – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁴³ represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”⁴⁴ the world’s largest music market with 30% global market share.⁴⁵ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.”

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁶

The reach of A2IM Associate⁴⁷ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁸ – iTunes accounts for 63% of global digital music market⁴⁹ - a majority – with a registered community of 800 million registered members⁵⁰ available in 119 countries who abide to strict terms of service and boundaries⁵¹ and have downloaded over 25 billion songs⁵² from iTunes’ catalog of over 43 million songs⁵³ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵⁴
- **Pandora**⁵⁵ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁶
- **Spotify**⁵⁷ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵⁸
- **Vevo**⁵⁹ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁶⁰

⁵⁷ <http://a2im.org/groups/spotify>

⁵⁸ <https://press.spotify.com/us/information/>

⁵⁹ <http://a2im.org/groups/vevo/>

- **Youtube**⁶¹ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁶² of which 38.4% is music-related.⁶³
- **ReverbNation**⁶⁴ – ReverbNation⁶⁵ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁶ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁷

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶⁸), China (China Audio Video Association⁶⁹) and Germany (Initiative Musik).⁷⁰ A2IM also has Affiliate⁷¹ associations within the global music community. These include Affiliates such as MusicFirst,⁷² the Copyright Alliance,⁷³ the Worldwide Independent Network (WIN)⁷⁴ and Merlin.⁷⁵

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁶ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA “on behalf of over 15 national and international trade associations” also expressed its support for .MUSIC to be under a “community” application model, including encouraging statements in support of DotMusic’s policies that stated that the coalition “was encouraged to see” that DotMusic “included several measures to deter and address copyright infringement within that TLD.” The “coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world’s music”⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

The International Music Products Association, NAMM, is another globally-recognized and relevant group of non-negligible size that has supported DotMusic.⁸⁰ NAMM, formed in 1901, is *mainly* dedicated to the global music community by representing the international music products industry and community, with globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{81 82} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM’s members. Without these musical instruments and products, music as we know it today would not be created or produced. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM’s mission is “to strengthen

⁸¹ https://www.namm.org/files/showdir/ExhibitorList_WN15.xls

⁸² <http://www.musictrades.com/global.html>

the music products industry and promote the pleasures and benefits of making music.”⁸³ NAMM also hosts the NAMM Show, the world's largest event for the music products industry.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁴ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸⁵ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸⁶

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community. Community members may register a .MUSIC by either:

⁸³ <https://www.namm.org/about>

⁸⁴ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸⁵ <http://music.us/supporters>

⁸⁶ See <http://music.us/nexus>

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸⁷ given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

⁸⁷ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Dimitrios Vatakis

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application, 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector, a “Music” regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN's Applicant Guidebook ("AGB")¹⁹: *"With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members."* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly²⁰ dedicated to the community which has supported DotMusic, which include several "international federation of national communities of a similar nature" relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word "mainly" is defined as "*more than anything else*" (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community "by representing all constituents involved in music creation, production and distribution" (Application Answer to Question 20d). Supporting organizations related to that string that are "mainly" dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

²¹ http://www.ifacca.org/membership/current_members/

influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁹

²⁹ <http://my.midem.com/en/contact-us/pavilion-representatives/>

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the "Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa"³⁸

³⁷ http://www.ifacca.org/national_agency_news/2013/04/10/us-president-requests-154465000-neh-2014/

³⁸ 2010-2011 Annual Report for the National Arts Council South Africa, National Arts Council South Africa, <http://www.nac.org.za/media/publications/AR%2010-11%20NAC.PDF/download>, Page 11. Also Mmino, the South African – Norwegian Education Music Programme, solely funds music projects funding a total of 294 projects. Thirteen projects were allocated funding for a total of R1,680,600 of which R1,381,000 went towards music educational and R299,600 to exchange projects (Page 10)

- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴¹

The reach of A2IM Associate⁴² membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴³ – iTunes accounts for 63% of global digital music market⁴⁴ - a majority – with a registered community of 800 million registered members⁴⁵ available in 119 countries who abide to strict terms of service and boundaries⁴⁶ and have downloaded over 25 billion songs⁴⁷ from iTunes’ catalog of over 43 million songs⁴⁸ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁹

- **Pandora**⁵⁰ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵¹
- **Spotify**⁵² – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵³
- **Vevo**⁵⁴ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁵
- **Youtube**⁵⁶ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁷ of which 38.4% is music-related.⁵⁸
- **Reverbnation**⁵⁹ – Reverbnation⁶⁰ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The Reverbnation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶¹ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶²

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶³), China (China Audio Video Association⁶⁴) and Germany (Initiative Musik).⁶⁵ A2IM also has Affiliate⁶⁶ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁷ the Copyright Alliance,⁶⁸ the Worldwide Independent Network (WIN)⁶⁹ and Merlin.⁷⁰

⁶⁸ <http://www.copyrightalliance.org/members>

⁶⁹ <http://www.winformusic.org>

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷¹ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises).

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the "voice of the recording industry worldwide"⁷² whose members⁷³ – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁷⁴ represents "approximately 85% of all legitimate recorded music produced and sold in the United States,"⁷⁵ the world's largest music market with 30% global market share.⁷⁶ Formed in 1933, the IFPI's mission was to "represent the interests of the recording industry worldwide in all fora."

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷⁷ – a majority of global music.⁷⁸

⁷⁸ <https://www.icann.org/en/system/files/correspondence/riaa-to-icann-05mar15-en.pdf>, Pg.3, Appendix A

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁰ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸¹ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸²

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music

⁷⁹ <https://www.icann.org/en/system/files/correspondence/aguirre-to-icann-board-ciu-14apr15-en.pdf>

⁸⁰ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸¹ <http://music.us/supporters>

⁸² See <http://music.us/nexus>

entities to be included as part of the Community. Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸³ given the symbiotic overlapping nature of the Community as

⁸³ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application Answer to Question 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector. "Music" is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

DotMusic's application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

*Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.*⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

countries.¹³ This means that if a Music Community member's copyright rights are violated in any other signatory country's jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community's rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community's *Establishment* and definition is "cohesive" and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is "closely united" and functions as a "whole"

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The "music" string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain's registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN "to provide accurate WHOIS contact data" or else their domain "registration may be suspended or even cancelled".¹⁸

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity *mainly*²⁰ dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government

²⁶ 2011 Annual Report for Cyprus Ministry of Culture, Section 1.2 "Music"

(http://www.moec.gov.cy/en/annual_reports/annual_report_2011_en.pdf). Activities include Music Performances in Cyprus (1.2.1) and Abroad (1.2.2), Subsidization of Paphos Aphrodite Festival (1.2.3), Music Publications (1.2.4), Subsidization and Purchases of Digital Records (1.2.5), Promotion for Cypriot musical creativity abroad (1.2.6),

Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴

Cyprus Symphony Orchestra Foundation (1.2.7), Music Information Centre (1.2.8), Developing Music Education (1.2.9), Organising of the 1st Musicological Symposium (1.2.10) and Musical Festivities for the European Volunteerism Year (1.2.11)

³⁴ Department for Culture, The Importance of Music, A National Plan for Music Education,

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁸
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”⁴¹ whose members⁴² – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁴³ represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”⁴⁴ the world’s largest music market with 30% global market share.⁴⁵ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.”

Also Mmino, the South African – Norwegian Education Music Programme, solely funds music projects funding a total of 294 projects. Thirteen projects were allocated funding for a total of R1,680,600 of which R1,381,000 went towards music educational and R299,600 to exchange projects (Page 10)

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁶

The reach of A2IM Associate⁴⁷ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁸ – iTunes accounts for 63% of global digital music market⁴⁹ - a majority – with a registered community of 800 million registered members⁵⁰ available in 119 countries who abide to strict terms of service and boundaries⁵¹ and have downloaded over 25 billion songs⁵² from iTunes’ catalog of over 43 million songs⁵³ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵⁴
- **Pandora**⁵⁵ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁶
- **Spotify**⁵⁷ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵⁸
- **Vevo**⁵⁹ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁶⁰

⁵⁷ <http://a2im.org/groups/spotify>

⁵⁸ <https://press.spotify.com/us/information/>

⁵⁹ <http://a2im.org/groups/vevo/>

- **Youtube**⁶¹ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁶² of which 38.4% is music-related.⁶³
- **ReverbNation**⁶⁴ – ReverbNation⁶⁵ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁶ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁷

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶⁸), China (China Audio Video Association⁶⁹) and Germany (Initiative Musik).⁷⁰ A2IM also has Affiliate⁷¹ associations within the global music community. These include Affiliates such as MusicFirst,⁷² the Copyright Alliance,⁷³ the Worldwide Independent Network (WIN)⁷⁴ and Merlin.⁷⁵

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁶ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA “on behalf of over 15 national and international trade associations” also expressed its support for .MUSIC to be under a “community” application model, including encouraging statements in support of DotMusic’s policies that stated that the coalition “was encouraged to see” that DotMusic “included several measures to deter and address copyright infringement within that TLD.” The “coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world’s music”⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

The International Music Products Association, NAMM, is another globally-recognized and relevant group of non-negligible size that has supported DotMusic.⁸⁰ NAMM, formed in 1901, is *mainly* dedicated to the global music community by representing the international music products industry and community, with globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{81 82} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM’s members. Without these musical instruments and products, music as we know it today would not be created or produced. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM’s mission is “to strengthen

⁸¹ https://www.namm.org/files/showdir/ExhibitorList_WN15.xls

⁸² <http://www.musictrades.com/global.html>

the music products industry and promote the pleasures and benefits of making music.”⁸³ NAMM also hosts the NAMM Show, the world's largest event for the music products industry.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁴ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸⁵ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸⁶

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community. Community members may register a .MUSIC by either:

⁸³ <https://www.namm.org/about>

⁸⁴ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸⁵ <http://music.us/supporters>

⁸⁶ See <http://music.us/nexus>

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸⁷ given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

⁸⁷ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Service: University (SPU & elsewhere)

- 2015 - present Serving on Faculty Affairs Council, Seattle Pacific University
 2003-2010 Provided access to scholarship funds to SPU students, resulting in tens-of-thousands of dollars of financial aid (not loans - gifts) over those years.
 2006-2009 Served on Faculty Status Committee, Seattle Pacific University
 2006 Helped secure a \$5,000 annual Fellowship for the Graduate Program in Organizational Psychology, Seattle Pacific University. Discontinued after 2010.
 2005 Presented "Anecdotes About and (Mis) Adventures in Apprenticeship from the Middle Ages Through Colonial America" at the Alumni retreat at Camp Casey.
 2005 Served as committee member for doctoral dissertation, "Time Perspective, Acculturation, and Psychological Well-being in Mexican Americans," Heather Romero, School of Psychology, Family & Community, Seattle Pacific University
 2005 Mentored male student as part of Campus Ministries program.
 2005 Faculty sponsor of Spanish Club.
 2005 Organized, in collaboration with Dr. Patrick McDonald, *The Second Annual Medieval Studies Symposium of the Puget Sound Roundtable*, held in January, 2004 at Seattle Pacific University, adding Cappella Romana to the list of events for an evening concert at First Free Methodist Church.
 2004 Organized, in collaboration with Drs. Owen Ewald and Patrick McDonald, *The First Annual Medieval Studies Symposium of the Puget Sound Roundtable*, held in January, 2004 at Seattle Pacific University.
 2004 Panel member in discussion of Dan Brown's *The Da Vinci Code*, at Seattle Pacific University, with Drs. Rob Wall, Alberto Ferreiro and Randy Maddox.
 2003-2006 Elected to three-year term on the Undergraduate Policies and Evaluation Committee (UPEC), Seattle Pacific University.
 2003 Guest lecture about the Crusades and the Military-Religious Orders in Doug Durasoff's Christianity and World Politics class.
 2002-2007 Humanities Award Coordinator, Seattle Pacific University
 2002-2010 Regularly assisted in Premiere, now Early Registration, for incoming students.
 2002-2005 Participated in one interview committee for faculty candidate and regularly for Pre-med students.
 2002 Led devotional for faculty senate and presented at Faculty Retreat.
 2000-2001 Web designer for Thunderbird Language Institute
 1999-2000 Faculty Senator-at-Large, AGSIM.
 1997-2001 Advisor, instructor, Tai Chi Club, AGSIM.

1996-1997 Member, Career Services Internship, Scholarship, Curricular Initiative Committees, AGSIM.
1997 Director of Spanish Language Program, AGSIM Guadalajara Program in Jalisco, Mexico.

Service: Departmental

2015 Working with Dr. Robert Baah on proposal for an M.A. in Spanish Literature program.
2015 Working with Dr. Robert Baah to create course, Spanish for Medical Professionals.
2003-2010 Coordinated Oral Proficiency Interviews with the American Council of Teachers of Foreign Languages.
2001-2010 Participated in European Symposia.
2004 Assisted in revision of Placement Exam, Seattle Pacific University
1998 Coordinator, Level III Language classes, AGSIM.
1990-1991 Director, Undergraduate Language Courses, Howard University (HU), responsible also for design of Advanced Placement Spanish courses for high schools and honors program for college junior and seniors majoring in Romance Languages.
1990-1991 Chairman or Member: Undergraduate Studies, Curricular Development, Study Abroad, and Library Acquisitions committees, HU.
1985 Assisted course directors with administrative details of Romance Languages courses, University of Missouri-Columbia Summer School.

Service: Extra-Institutional

2010 - present Content Matter Expert (SME) for ProTrans, a private company specializing in elite translation and translation training for public and private sector. Accredited in 2015 by IACET (International Association for Continuing Education and Training).
2009 Editorial consultant in an ITT bid to supply COMINT expertise and support to a Latin American country.
2006 Panel member in discussion of Dan Brown's *The Da Vinci Code*, at Bellevue Presbyterian Church.
2003 Served as consultant to State of Washington Professional Educator Standards Board regarding ETS test for Spanish teachers, recommended by Frank Kline, School of Education, Seattle Pacific University.
2001-2006 Member, Editorial Board of *The Journal of Language for International Business (JOLIB)*, published by The American Graduate School of International Business (Thunderbird), Glendale, AZ.
1999 Served on Board of Reviewers for New Visions in Foreign Language Resource Center, Iowa State University, Ames, Iowa.
1998 Executive Board Member, the Arizona Language Association. Represented Maricopa County.
1991-2 Designed, taught courses for medical, fire and rescue, police and others. Howard University adult programs.

Community Involvement

2013 Joined St. Anne Parish, Queen Anne, to endeavor to prepare daughter for First Communion. Also attend other parishes in region (Spanish-speaking).
2001-2012 Fundraising for Queen Anne Help Line, help supply balls for local youth sports teams.
1993 Guest lecturer, Gonzaga High School, Washington, D.C., on Dante Alighieri and Petrarch.
1993 Special Olympics, Washington, DC. Donated time to the event and private Spanish lessons

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application, 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector, a “Music” regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN's Applicant Guidebook ("AGB")¹⁹: *"With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members."* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several "international federation of national communities of a similar nature" relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

²⁹ 2011 Annual Report from New Zealand Ministry of Culture:

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **ReverbNation**⁵⁸ – ReverbNation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁶⁹ <http://www.merlinnetwork.org>

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷³ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁷⁴

According to the Applicant Guidebook ("AGB"), to receive the maximum score for Nexus, the applied-for string -- "music" -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the "Music Community" entirely matches the applied-for "music" string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community

⁷¹ <https://www.icann.org/en/system/files/correspondence/riaa-to-icann-05mar15-en.pdf>, Pg.1

⁷² <https://www.icann.org/en/system/files/correspondence/riaa-to-icann-05mar15-en.pdf>, Pg.3, Appendix A

⁷³ <http://music.us/supporters>

⁷⁴ See <http://music.us/nexus>

defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility criteria and content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

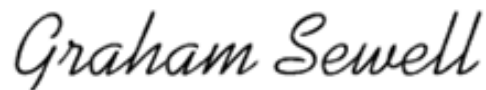

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential

relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

² <http://music.us/supporters>

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application, 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector, a “Music” regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN's Applicant Guidebook ("AGB")¹⁹: *"With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members."* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several "international federation of national communities of a similar nature" relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

²⁹ 2011 Annual Report from New Zealand Ministry of Culture:

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **ReverbNation**⁵⁸ – ReverbNation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁶⁹ <http://www.merlinnetwork.org>

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Another letter⁷³ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷⁴ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁷⁵

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries

⁷⁵ See <http://music.us/nexus>

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic's Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

To ICANN and the Economist Intelligence Unit ("EIU"):

Please accept this letter as an indication of my professional opinion that there is compelling evidence for DotMusic's application to convincingly meet the full criteria under Community Priority Evaluation on the following points: (1) the Music Community's *Establishment* as defined by DotMusic; (2) the matching Nexus between the "music" Community and the "music" string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing the global Music Community addressed and defined.

Please also find below the analysis of the DotMusic application pertaining to the Community Priority Evaluation criteria, and on which my assessment is based. The analysis is consistent with key findings in my research field of organization studies that focus specifically on matters relating to community (see for example: Glynn, 2008;² Marquis, Glynn & Davis, 2007;³ Marquis, Lounsbury & Greenwood, 2011;⁴ Schneiberg & Lounsbury, 2008;⁵ Thornton, Ocasio & Lounsbury, 2012).⁶ My credentials are attached below this analysis to identify my level of expertise and specialized knowledge with respect to the music community's organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) "Music Community" members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each "organized community of similar nature that relates to music." These organized and aligned communities are closely united and make "music" as we know it today. It is this self-awareness and interdependence that gives the "Music Community" its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the "Music Community's" use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The "Music Community" functions in a regulated sector with global copyright protections – it is clear that the "community," as defined, implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate a globally-recognized set of standards for the protection of the "Music Community" member rights with relation to their copyrighted music works around the world;
- 4) The "Music" Community -- as defined by DotMusic - - has at least one entity dedicated to the community supporting DotMusic's application. Such documented *Support* includes several "international federation of national communities of a similar nature," music coalitions and others that are strongly associated with "music," which represent a majority of the Community with considerable millions of members worldwide.⁷
- 5) The Nexus of the "music" Community matches the "music" applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The "Music Community" definition -- which incorporates the strict fundamental attributes of

⁷ <http://music.us/supporters>

a closely united Community definition that is "organized" and "delineated" -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸ from institutions/organizations representing this Community.

There is substantive evidence that DotMusic fulfils the *Nexus, Community Establishment and Support* criteria for the "Music" string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application's global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that "Music" would not function as it does today without the participation of all music constituent types that interconnect to match the "music" string with the "music" Community definition.

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) Music Community Definition, Establishment & Community Endorsement⁹

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application, 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector

⁸ <http://music.us/supporters>

⁹ See <http://music.us/establishment>

that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector, a "Music" regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.¹⁰

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary¹¹) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries¹²).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is "closely united" and "interdependent" (i.e. Each "organized community of similar nature that relates to music" which is part of the "logical alliance of communities that relate to music" is not mutually exclusive).

In short, the applied-for string ("Music") matches the name of the "Music" Community as defined by DotMusic's application. DotMusic's "Music Community" definition accurately represents the common definition of the "Music Community," which is confirmed by Wikipedia.

According to Wikipedia:¹³

¹⁰ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

¹¹ <http://www.merriam-webster.com/dictionary/cohesion>

¹²

http://www.oxforddictionaries.com/us/definition/american_english/cohesion

¹³ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexa.com/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an "ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music"...UNESCO identifies the music community as a "community of identity" implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.¹⁴

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to

conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

¹⁴ Music Community. In Wikipedia. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a). According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁵

The Berne Convention for the Protection of Literary and Artistic Works¹⁶ provides that each of the 168 contracting

¹⁵

http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹⁶ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

parties¹⁷ (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹⁸ This means that if a Music Community member's copyright rights are violated in any other signatory country's jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community's rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community's *Establishment* and definition is "cohesive" and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is "closely united" and functions as a "whole"

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The "music" string is commonly used in classification systems such as ISMN,¹⁹ ISRC,²⁰ ISWC,²¹ ISNI.²² (Application Answer to

¹⁷

http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹⁸ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁹ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

²⁰ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

²¹ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO

Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain's registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN "to provide accurate WHOIS contact data" or else their domain "registration may be suspended or even cancelled".²³

Without such Music Community "cohesion" and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes "music" as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN's Applicant Guidebook ("AGB")²⁴: "With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such,

(International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and

http://www.iso.org/iso/catalogue_detail?csnumber=28780

²² The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and

http://www.iso.org/iso/catalogue_detail?csnumber=44292

²³ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

²⁴ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

provided the requisite awareness and recognition of the community is at hand among the members." (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several "international federation of national communities of a similar nature" relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁵ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²⁶ The UNESCO strategic partnership²⁷ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million

²⁵ http://www.ifacca.org/membership/current_members/

²⁶ http://www.ifacca.org/strategic_partners/

²⁷ http://www.ifacca.org/strategic_partners/

music constituents from over 150 countries and over 1000 organizations globally.²⁸

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁹

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.³⁰ Other small government Ministries of Culture, such as Albania,³¹ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,³² all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded

country-based pavilion initiatives at Midem, the world's largest music conference.³³

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁴
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁵
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³⁶ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³⁷
- The United Kingdom Department for Culture and Education (DfE) will fund music education at

³⁷ <http://www.pch.gc.ca/eng/1294862453819/1294862453821>

significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁸

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁹ and has a strong focus on music as outlined in its Strategic Plan⁴⁰ with Congress requested to provide \$154,465,000 for fiscal year 2014.⁴¹
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the "Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa"⁴²
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.⁴³
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁴

Each of IFACCA's members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

³⁸ Department for Culture, The Importance of Music, A National Plan for Music Education, https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

Also Mmino, the South African – Norwegian Education Music Programme, solely funds music projects funding a total of 294 projects. Thirteen projects were allocated funding for a total of R1,680,600 of which R1,381,000 went towards music educational and R299,600 to exchange projects (Page 10)

⁴³ Singapore Arts Council, <http://www.nac.gov.sg/media-centre/news-releases/news-detail?id=c2db15e2-c319-40ec-939c-d58735d0a91c>

⁴⁴ <http://www.taiteenkeskustoimikunta.fi/documents/10162/31704/TY+tilastotiedote+1+12+.pdf>, Page 1 and Page 23

Another clear example of an "entity dedicated to the community" with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁵

The reach of A2IM Associate⁴⁶ membership covers hundreds of millions of entities (i.e. the reach of A2IM's total membership "geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁷ – iTunes accounts for 63% of global digital music market⁴⁸ - a majority – with a registered community of 800 million registered members ⁴⁹ available in 119 countries who abide to strict terms of service and boundaries⁵⁰ and have downloaded over 25 billion songs⁵¹ from iTunes' catalog of over 43 million songs ⁵² covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵³

- **BMG**⁶⁵ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁶

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport ⁶⁷), China (China Audio Video Association⁶⁸) and Germany (Initiative Musik).⁶⁹ A2IM also has Affiliate ⁷⁰ associations within the global music community. These include Affiliates such as MusicFirst,⁷¹ the Copyright Alliance,⁷² the Worldwide Independent Network (WIN)⁷³ and Merlin.⁷⁴

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁵ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁷³ <http://www.winformusic.org>

⁷⁴ <http://www.merlinnetwork.org>

⁷⁵ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and

<https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷⁶ – a majority of global music.⁷⁷

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support ⁷⁸ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfils the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁷⁹

According to the Applicant Guidebook ("AGB"), to receive the maximum score for Nexus, the applied-for string -- "music" -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The Nexus of the "Music Community" entirely matches the applied-for "music" string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization ("MCMO"); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: "the strictly delineated and organized logical alliance of communities of similar nature related to music."

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The nexus of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the "music" string and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community's definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic's definition of the Community and

⁷⁹ See <http://music.us/nexus>

mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the *Community definition, eligibility criteria and content and use requirements* ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic's community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic's application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined "music" Community and applied-for "music" string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfils the criteria for Nexus.

Respectfully Submitted,

Relevant expertise for .MUSIC

I have written a peer-reviewed publications as well as a PhD on the workings of the popular music industry, focusing on how value is created, attributed and appropriated. My research has been used to examine (potential) forms of market abuse in the field of popular music. Funded by the US Social Science Research Council, I have teamed up with advocacy groups such as the Future of Music Coalition in an attempt to devise a research instrument that could help curb corruption in the music industry by identifying distinct diffusion patterns that indicated bribery (together with my colleagues Gabriel Rossman at UCLA and Ming Ming Chiu at Perdue University). This study appeared in *Sociological Methodology*. In another instance, UC Berkeley Professor David Teece, the pioneering scholar behind the influential *Dynamic Capabilities Approach*, used my study as an expert account on the functioning of the music industry in the ground-breaking trial on copyright and the Internet (among the litigants were *Napster*, *MTV*, *Apple*, *RIAA*, *Yahool*, *Sony*, *AOL*, and others). This trial redefined the regulation of online markets and the boundaries of copyright. This study that appeared in the *Journal of Management Studies*.

See: <http://www.loc.gov/crb/proceedings/2006-3/riaa-ex-o-103-dp.pdf>

I am currently researching the history of electronic music on grant that I received from Konrad Boehmer, former Chairman of BUMA/STEMRA, the Dutch music copyright association.

I have convened numerous academic workshops and colloquia on the workings of markets at the major international conferences in the field of management and organization studies.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic's Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community's *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the "music" Community and the "music" string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community's organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) "Music Community" members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each "organized community of similar nature that relates to music." These organized and aligned communities are closely united and make "music" as we know it today. It is this self-awareness and interdependence that gives the "Music Community" its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the "Music Community's" use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;

¹ <https://gtdresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

3) The "Music Community" functions in a regulated sector with global copyright protections – it is clear that the "community," as defined, implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate a globally-recognized set of standards for the protection of the "Music Community" member rights with relation to their copyrighted music works around the world;

4) The "Music" Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic's application. Such documented *Support* includes several "international federation of national communities of a similar nature," music coalitions and others that are strongly associated with "music," which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the "music" Community matches the "music" applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The "Music Community" definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is "organized" and "delineated" -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the "Music" string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application's global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that

² <http://music.us/supporters>

³ <http://music.us/supporters>

(3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

*Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.*⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexa.com/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member's copyright rights are violated in

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

“Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) Music Community Definition, Establishment & Community Endorsement⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application, 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector, a “Music” regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and

⁴ See <http://music.us/establishment>

⁵ https://www.icann.org/en/system/files/bm_briefing-materials-2-05feb14-en.pdf, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

any other signatory country's jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community's rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community's *Establishment* and definition is "cohesive" and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is "closely united" and functions as a "whole"

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The "music" string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain's registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN "to provide accurate WHOIS contact data" or else their domain "registration may be suspended or even cancelled".¹⁸

Without such Music Community "cohesion" and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/what-is.htm> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about/whois> and <https://www.icann.org/resources/pages/faqs-00-2012-02-25-en>

IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's

membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the "Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa"³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸

Also Mmino, the South African – Norwegian Education Music Programme, solely funds music projects funding a total of 294 projects. Thirteen projects were allocated funding for a total of R1,680,600 of which R1,381,000 went towards music educational and R299,600 to exchange projects (Page 10)

music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: “*With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.*” (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA’s members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The “Size” covered reaches over a hundred million music entities i.e. “considerable size with millions of constituents” per Application Answer to Question 20a.

The string “music” falls under the jurisdiction of each country’s Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs.

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members

- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA's members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an "entity dedicated to the community" with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM's total membership "geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes' catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world's largest streaming music radio with a community of over 250 million registered members.⁵⁰

³⁸ Singapore Arts Council, <http://www.nac.gov.sg/media-centre/news-releases/news-detail?id=c2db15e2-c319-40ec-939c-d58735d0a91c>

⁴⁸ <https://www.apple.com/itunes/working-itunes/self-content/music-faq.html>

⁴⁹ <http://a2im.org/groups/pandora>

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷³ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

⁷² https://www.icann.org/en/system/files/correspondence_riaa-to-icann-05mar15-en.pdf, Pg.3, Appendix A

⁷³ <http://music.us/supporters>

- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴
- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **Reverbnation**⁵⁸ – Reverbnation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The Reverbnation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

B) Nexus⁷⁴

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility criteria and content and use* requirements ensure that peripheral industries

⁷⁴ See <http://music.us.nexus>

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic's community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic's application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined "music" Community and applied-for "music" string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Signature: _____

Date: April 14, 2015

Name: John Snyder

Title: Chair, Department of Music Industry Studies

Organization: Loyola University New Orleans

About the Expert: See attached CV and Biography

John Snyder

John Snyder grew up playing piano and trumpet and attended the University of North Carolina at Greensboro on several music scholarships. In college he booked his band on a Caribbean, North Atlantic, European, North African tour one summer and a tour of Japan, Taiwan, the Philippines, and the Pacific Islands the next.

As a music and video producer Snyder has produced hundreds of recordings and CD reissues and compilations. Recordings he has produced have received 32 Grammy nominations and 5 Grammys. In addition, Snyder has held positions at the upper levels of many major recording companies. As the assistant to the president of CTI Records, Creed Taylor, Snyder oversaw legal and business affairs, publishing, manufacturing, distribution, and artists and repertoire operations.

Under the tutelage of Herb Alpert, he served as director of Horizon Jazz Series for A&M Records. Snyder later served as director of jazz production for Atlantic Records under the guidance of Ahmet and Nesuhi Ertegun; his responsibilities included production, manufacturing, promotion, publicity, and marketing. Snyder opened his own record company, Artists House, in 1977, releasing recordings by Ornette Coleman, Gil Evans, Chet Baker, Andrew Hill, Thad Jones & Mel Lewis, and Paul Desmond, among others.

Snyder has degrees in music education and law from the University of North Carolina, and is currently a member of the New York Bar. As a member of the New York Chapter of The National Academy of Recording Arts and Sciences (NARAS), he served on the Board of Governors, the Education Committee, the Jazz Committee, and the Grammy in the Schools Committee, among others.

As an artist manager, Snyder managed Chet Baker, Gerry Mulligan, Jim Hall, Gil Evans, Ornette Coleman, and Art Pepper, among others. As a music producer Snyder produced records with Etta James, Dave Brubeck, Count Basie Orchestra, George Shearing, Sun Ra, Cecil Taylor, Gerry Mulligan, Chet Baker, Dizzy Gillespie, Art Blakey, Derck Trucks, Mavis Staples, James Cotton, Junior Wells, the Muddy Waters Band, Charles Brown, Honeyboy Edwards, Robert Lockwood, Jr., and Gatemouth Brown, among others. He also recorded Eric Clapton, Paul Simon, Shirley Caesar, Buddy Guy, Santana, Bonnie Raitt, Bobby Womack, Dr. John, Wynona Judd, Stevie Wonder, Gregg Allman, and Isaac Hayes.

Snyder has been on the faculty of the Loyola University New Orleans College of Music and Fine Arts faculty since 2004 where he is the Conrad N. Hilton Eminent Scholar in Music Industry Studies and Chair of the Department of Music Industry Studies. He is also Project Director for the Center of Music and Arts Entrepreneurship (www.cfmae.org) and co-founder of the artist health and wellness initiative, Athletes and the Arts (www.athletesandthearts.com).

Snyder is also President of Artists House Foundation (<http://www.artistshousemusic.org/>) that was funded by Herb Alpert (1.6 million dollars) to help musicians and music entrepreneurs create sustainable careers.

Snyder was appointed to the New Mexico Music Commission, for which he wrote the enabling legislation, by Governor Bill Richardson and appointed to the Louisiana Music Commission by Governor Kathleen Blanco and Governor Bobby Jindal.

JOHN SNYDER – Curriculum Vitae

WORK EXPERIENCE

2004-2014 **Loyola University, New Orleans, Louisiana**
Conrad N. Hilton Eminent Scholar in Music Industry Studies

Professor, Chair of the Department of Music Industry Studies
 Director of the Center for Music and Arts Entrepreneurship

- Responsible for 300 students and 15 faculty, including curriculum development, expanding production facilities, and expanding the nature and reach of the Department.
- Created student company program – The Entrepreneurial Unit (EU) Program (six student-run, for-profit companies).
- Administered several federal grants, supervised a staff of 5, supervised the expenditure of almost 1.5 million dollars to train students, create “content”, build websites, and broadcast programming (www.cfmae.org).
- Founded the campus-wide initiative, The Year of the Writer (www.yearofthewriter.com); published a book of faculty and student essays, “Secret Trespasses”.
- Founded the health and wellness national initiative, Athletes and the Arts and built a website for it (www.athletesandthearts in conjunction with the Performing Arts Medical Association and the American College of Sports Medicine, among others. Conducted a pain/exercise survey for all instrumental students in the College of Music & Fine Arts, fall 2014.
- Responsible for the production and webcasting of various campus productions and events, including those from the Walker Percy Center for Writing and Publishing, The Center for the Study of New Orleans, and various concerts, operas and other productions from the College of Music and Fine Arts.
- Responsible for establishing a relationship between the College of Music and Fine Arts and the Louisiana State Museum, New Orleans in respect of internships and performance opportunities.
- Wrote and built a website to brand Loyola University (<http://thecreativeuniversity.us/>), summer 2013.
- Responsible for developing new, interdisciplinary degrees in Filmmaking and Popular and Commercial music (summer 2014) and for redeveloping the curriculum for Music Industry degrees (<http://loyolamediaarts.info/>).
- Responsible for building and producing the content for a new website for the Department of Film and Music Industry Studies (<http://creativeprofessions.org/>)

- 2002-2014** **Artists House Foundation, New Orleans, Louisiana**
President (501 (c) 3 educational foundation)
- Produced the NYU Jazz Master Class Series (Cecil Taylor, Barry Harris, Hank Jones, Clark Terry, Jimmy Heath, Percy Heath, Benny Golson, Teo Macero, Kenny Werner, Phil Woods, Toots Thielemans) – raised over \$500,000 to do this. Produced a trumpet instructional DVD at Juilliard with Warren Vache, “The Art of the Trumpet”.
 - Created the website www.artistshousemusic.org and produced thousands of hours of interview and seminar content concerning the business, legal, pedagogical and technological aspects of the music world. This site is visited by more than 50,000 people a month, has over 150,000 monthly viewers on its YouTube channel, and over 58,000 Twitter followers.
 - Began the master class series, “Louisiana Masters” (Clarence “Gatemouth” Brown) at Loyola in 2005.
 - CD and DVD Producer of legendary artists Gerry Mulligan, Bob Brookmeyer, among others.
 - Built and wrote a free online course for musicians and music entrepreneurs (summer 2013); currently has over 3600 students (<https://www.udemy.com/bandasbusiness/>).
- 2001-2002** **Fairfield University, Fairfield, Connecticut**
Adjunct Instructor
- Taught a three hour, once a week course to over a hundred students, “The Music Business”.
- 2002-2003** **University of North Carolina, Greensboro, North Carolina**
Visiting Instructor
- Taught two courses: “Music Production” and “Careers in Music”
- 1987-2014** **John Snyder Productions, New York, New York; Norwalk, Connecticut; New Orleans, Louisiana**
Independent Music Producer, Member of New York Bar
- Produced over 300 recordings for A&M Records, Island Records, Music Masters, PolyGram, Telarc International, RCA Records, Private Music, Columbia Records, Landside Records, Concord Records, Verve, GRP Records, Island Records, Novus Records, House of Blues, V-2 Records, Evidence Records, Rounder Records, Surrounded By Entertainment, King Records, among others. I continue to produce music in the local community and occasionally on the national level. List attached.
 - Produced thirty-two Grammy nominated recordings, five of which won Grammys.
 - Produced over 400 reissue recordings and compilations on CD for GRP Records, A&M Records, RCA Records, Concord Records, Sony Music, Columbia Records, among others.

- Artist Management - Hiram Bullock, Gerry Mulligan, Jim Hall, Chet Baker.
- Publishing – President of Saben Music; managed Mulligan Publishing.
- NARAS Board of Governors, NYC Education Committee, NYU Grammy in the Schools Committee, Jazz Selection Committee.
- DVD Producer (Bobby Short, Etta James, Bob Brookmeyer, Warren Vache, Gerry Mulligan).
- Audio Book Producer for the John Templeton Foundation.

1985-1987 **Atlantic Records, New York, New York**
Director of Jazz Production

- Production/Packaging - produced new recordings and reissues, including preparation of the 12 volume, "Atlantic Jazz"; supervised all album packaging.
- Grammy nominee.
- Director of the Jazz Department - responsible for promotion, publicity, and marketing efforts; managed staff of four.

1977-1983 **Artists House Recording Company, New York, New York**
Owner/President

- Production/Packaging - produced new recordings, supervised album packaging, developed label image.
- Grammy nominee, winner of various jazz polls, New York Art Directors Club winner.
- Sales/Marketing - established network of U.S. distributors and international licensees; direct-mail marketing.
- Artist Management - Gil Evans, Jim Hall, Art Pepper, Chet Baker, Ornette Coleman; produced tours of U.S., Europe, and Japan.
- Legal/Business Affairs - arranged for capitalization and international licensing agreements; managed staff of ten; NARAS Board of Governors.

1975-1977 **A&M Records, New York, New York**
Founder/Director of Horizon Jazz Series

- Production/Packaging - produced new recordings, supervised album packaging, developed label image.
- Grammy nominee, Grammy winner, winner of various jazz polls, New York Art Directors Club winner.
- Legal/Business Affairs - responsible for contract negotiations, supervised international licensees for Horizon; managed staff of four.

1973-1975 **CTI Records, New York, New York**
Assistant to President (Creed Taylor)

- Artists and Repertoire - planned recording projects; co-produced concert tours of U.S. and Japan.
- Manufacturing/Distribution - supervised manufacturing operations; supplied product to U.S. distributors and international licensees.
- Publishing - administered publishing subsidiaries; editor, Don Sebesky's textbook "The Recording Arranger".
- Legal/Business Affairs - in-house counsel; managed all contract negotiations and recording commitments.

1963-1973 **Professional Musician**
Trumpet

- Organized and led entertainment troupes for successful tours of the Caribbean, Newfoundland, Iceland, the United Kingdom, Europe, North Africa, Japan, Taiwan, the Philippines, Guam, Midway, Okinawa, Hawaii (during summers and holidays in college).
- Organized and managed band as college sophomore to play weekend engagements in the local area.
- Performed in touring shows, circuses, hockey games, night-club acts, churches, etc.

EDUCATION

1970-1973 **University of North Carolina, School of Law, Chapel Hill**
Juris Doctor

1966-1970 **University of North Carolina, School of Music, Greensboro**
Bachelor of Music Education, Magna Cum Laude

- Cone Music Scholarship, School of Music Scholarship, University Honors Scholarship.
- Member of School of Music Curriculum Committee (only student member).
- President of University Concert Band and Symphony Orchestra.
- Leader of music group, "The Eleventh Hour", including local tours, backing up national touring acts, and tours of Europe, Northern Africa, and the Far East during the summers while attending UNC-G.

1975-2014 See attached

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

² <http://music.us/supporters>

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application Answer to Question 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector. “Music” is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

DotMusic’s application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians’ rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

*Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.*⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: “*With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.*” (AGB, 4-12). The community as defined in the DotMusic application has at least one entity *mainly*²⁰ dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government

²⁵ U.S Copyright Office, <http://www.copyright.gov/carp/m200a.html>

²⁶ 2011 Annual Report for Cyprus Ministry of Culture, Section 1.2 "Music"

(http://www.moec.gov.cy/en/annual_reports/annual_report_2011_en.pdf). Activities include Music Performances in Cyprus (1.2.1) and Abroad (1.2.2), Subsidization of Paphos Aphrodite Festival (1.2.3), Music Publications (1.2.4), Subsidization and Purchases of Digital Records (1.2.5), Promotion for Cypriot musical creativity abroad (1.2.6),

Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴

Cyprus Symphony Orchestra Foundation (1.2.7), Music Information Centre (1.2.8), Developing Music Education (1.2.9), Organising of the 1st Musicological Symposium (1.2.10) and Musical Festivities for the European Volunteerism Year (1.2.11)

³⁴ Department for Culture, The Importance of Music, A National Plan for Music Education,

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁸
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”⁴¹ whose members⁴² – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁴³ represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”⁴⁴ the world’s largest music market with 30% global market share.⁴⁵ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.”

Also Mmino, the South African – Norwegian Education Music Programme, solely funds music projects funding a total of 294 projects. Thirteen projects were allocated funding for a total of R1,680,600 of which R1,381,000 went towards music educational and R299,600 to exchange projects (Page 10)

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁶

The reach of A2IM Associate⁴⁷ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁸ – iTunes accounts for 63% of global digital music market⁴⁹ - a majority – with a registered community of 800 million registered members⁵⁰ available in 119 countries who abide to strict terms of service and boundaries⁵¹ and have downloaded over 25 billion songs⁵² from iTunes’ catalog of over 43 million songs⁵³ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵⁴
- **Pandora**⁵⁵ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁶
- **Spotify**⁵⁷ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵⁸
- **Vevo**⁵⁹ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁶⁰

⁵⁷ <http://a2im.org/groups/spotify>

⁵⁸ <https://press.spotify.com/us/information/>

⁵⁹ <http://a2im.org/groups/vevo/>

- **Youtube**⁶¹ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁶² of which 38.4% is music-related.⁶³
- **ReverbNation**⁶⁴ – ReverbNation⁶⁵ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁶ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁷

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶⁸), China (China Audio Video Association⁶⁹) and Germany (Initiative Musik).⁷⁰ A2IM also has Affiliate⁷¹ associations within the global music community. These include Affiliates such as MusicFirst,⁷² the Copyright Alliance,⁷³ the Worldwide Independent Network (WIN)⁷⁴ and Merlin.⁷⁵

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁶ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA “on behalf of over 15 national and international trade associations” also expressed its support for .MUSIC to be under a “community” application model, including encouraging statements in support of DotMusic’s policies that stated that the coalition “was encouraged to see” that DotMusic “included several measures to deter and address copyright infringement within that TLD.” The “coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world’s music”⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

The International Music Products Association, NAMM, is another globally-recognized and relevant group of non-negligible size that has supported DotMusic.⁸⁰ NAMM, formed in 1901, is *mainly* dedicated to the global music community by representing the international music products industry and community, with globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{81 82} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM’s members. Without these musical instruments and products, music as we know it today would not be created or produced. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM’s mission is “to strengthen

⁸¹ https://www.namm.org/files/showdir/ExhibitorList_WN15.xls

⁸² <http://www.musictrades.com/global.html>

the music products industry and promote the pleasures and benefits of making music.”⁸³ NAMM also hosts the NAMM Show, the world's largest event for the music products industry.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁴ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸⁵ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸⁶

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community. Community members may register a .MUSIC by either:

⁸³ <https://www.namm.org/about>

⁸⁴ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸⁵ <http://music.us/supporters>

⁸⁶ See <http://music.us/nexus>

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸⁷ given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

⁸⁷ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

ACADEMIC BACKGROUND

- 2009 **PhD in Computer Science and Digital Communication**, Universitat Pompeu Fabra. **European Doctorate**. Title: "*Voice Processing and Synthesis by Performance Sampling and Spectral Models*". Supervisor: Dr. Xavier Serra.
- 2002 **Master in Computer Science and Digital Communication**, Universitat Pompeu Fabra. Title: "*Audio Time-Scale Modification in the Context of Professional Post-Production*". Supervisor: Dr. Xavier Serra.
- 1997 **Telecommunication Engineering**, Universitat Politècnica de Catalunya. Final Engineering Project: "*Desenvolupament d'un entorn gràfic per a l'anàlisi, transformació i síntesi de sons mitjançant models espectrals*", Supervisors: Dr. Climent Nadeu, Dr., Xavier Serra.
- 1981-1997 **Music studies** in the Conservatorio Isaac Albéniz, Girona. Composition studies in Alois Haba School, Barcelona.

PROFESSIONAL EXPERIENCE

- Since 1998 Researcher and project manager in the Music Technology Group, Universitat Pompeu Fabra, Barcelona.
- Since 2011 Cofounder of Voctro Labs, S.L., Spin-Off of the Universitat Pompeu Fabra, Barcelona.
- 2010 Visiting researcher, Centre for Interdisciplinary Research on Music Media and Technology (CIRMMT), McGill University, Montreal, Canada, from May to August, under the supervision of Dr. Catherine Guastavino.
- 2003 Visiting researcher, Royal Institute of Technology (KTH), Stockholm, from June to August, funded by MOSART EU project IST-215244, under the supervision of Dr. Johan Sundberg.
- 2001 Software License Agreement of a polyphonic audio time-scaling software to the Universitat Pompeu Fabra, with the obligation to sublicense it to Yamaha Corporation.

TEACHING EXPERIENCE

- 2010-2011 Universitat Pompeu Fabra, Department of Information and Communication Technologies, Associated Professor, *Digital Speech Processing* course, Audiovisual Systems Engineering.
- 2011 Teacher of the program *Introduction to research: Estades d'Estiu de Ciència*, Science for young people (Joves i Ciència) E2C3, Caixa Catalunya.
- 2009 Positive evaluation as a PhD Professor (*Professor Lector*), Agency for the Quality of the University System in Catalonia (AQU).
- 2009 Teacher of the program *Introduction to research: Estades d'Estiu de Ciència*, Science for young people (Joves i Ciència) E2C3, Caixa Catalunya.
- 1999-2001 Universitat Pompeu Fabra, Department of Information and Communication Technologies, Associated Professor, *Audio Signal Processing* course, Computer Science Engineering.
- 1996-1998 Secondary education teacher at the *Escola de Formació Professional d'Imatge i So*, Barcelona.

PhD Thesis Supervised

- Musevic, S., September 2013. "*Non-Stationary and High-Resolution Sinusoidal Analysis*". PhD program in Information, Communication and Audiovisuals Technologies, DTIC, Universitat Pompeu Fabra, Barcelona.

PhD Thesis under Supervision

- Umbert, M., expected defense in 2015. "*Expressive Control of Singing Voice Synthesis*". PhD program in Information, Communication and Audiovisuals Technologies, DTIC, Universitat Pompeu Fabra, Barcelona.

- Coleman, G., expected defense in 2015. "Audio Transformation by Descriptors". PhD program in Information, Communication and Audiovisuals Technologies, DTIC, Universitat Pompeu Fabra, Barcelona.

Final Project and Master Thesis Supervised

Member of the following PhD Juries

- Van der Schaar, M., 2010, "*An Acoustic Bio-Metric for Sperm Whales*", PhD Thesis, Automàtica, Robòtica i Visió Program, Universitat Politècnica de Catalunya.

GRANTS AND PRIZES

- June 2013 National Commendation for Invention award given by the *Japan Institute of Invention and Innovation (JIII)* for the invention of original and natural singing voice synthesis technology disclosed in the patent No.4153220.
- Sept. 2012 *Premi del Consell social de la Universitat Pompeu Fabra a la transferència del Coneixement*. Prize awarded by the Social Council of the Universitat Pompeu Fabra to the excellent track-record in technology transfer.
- April 2011 Second prize of the VALORTEC contest on Business Initiatives organized by ACCIÓ (www.acc10.cat) to the *Voctro Labs Spin-Off Company Initiative*.
- April 2011 Prize awarded by the *Centre Internacional de Negocis de Catalunya (CINC)* to the *Voctro Labs Spin-Off Company Initiative*.

- Sept. 2010 *Premi del Consell social de la Universitat Pompeu Fabra a la transferència del Coneixement*. Prize awarded by the Social Council of the Universitat Pompeu Fabra in the category of PhD thesis with big knowledge transfer potential.
- June 2007 Rosina Ribalta Prize, by EPSON Foundation, to the best PhD Project on Information Technology and Communications. The EPSON foundation awards the quality and methodology of the projects, their social and scientific interest and the merits of the candidate.
- 5-8/2003 Research grant at Royal Institute of Technology (KTH), granted by MOSART EU Project, IST-215244.
- 1997-1998 Student grant for the project "Audio Morphing", granted by Duy SA.

FINANCED PROJECTS

DATES	TITLE AND ROLE IN THE PROJECT	FINANCING ENTITY
4/2007-3/2014	<i>Singing Voice Synthesis</i> (seven one-year projects) Researcher and team manager	Yamaha Corp, Japan
4/2010-9/2012	<i>Monet</i> Researcher and team manager	Yamaha Corp, Japan
4/2009-3/2010	<i>MinusOne</i> Researcher and team manager	Yamaha Corp, Japan

2001-2002	<i>Time Machine - High Quality Time-Scaling of Polyphonic Audio</i> Researcher and team manager	Yamaha Corp, Japan
01/02/2000-31/10/2001	RAA (<i>Recognition and Analysis of Audio</i>). IST-1999-12585 Research and development	European Commission
1997-1999	<i>Voice Morphing System for Impersonating in Karaoke</i> Researcher and team manager	Yamaha Corp, Japan

PATENTS

PRIORITY DATE AND NUMBER	INVENTORS, TITLE, PATENT NUMBER AND DESIGNATED STATES	APPLICANT
15/4/2013 JP2013000084579	Keijiro, S., Bonada, J. <i>Singing Synthesizing Database Generation Device, and Pitch Curve Generation Device</i> Patent pending JP	Yamaha Corp
10/1/2013 JP2013164584	Janer, J., Marxer, R., Bonada, J., Kazunobu, K. <i>Acoustic Processor</i> Patent pending JP	Yamaha Corp
21/6/2012 JP2012-139455 US20140006018	Bonada, J., Merlijn Blaauw, Yuji Hisaminato <i>Voice Synthesis Apparatus: Voice Quality Modification by Spectral Morphing</i> Patent pending JP, US	Yamaha Corp
7/6/2012 JP2012-129798	Bonada, J., Merlijn Blaauw, Makoto Tachibana <i>Voice Synthesis Apparatus: Phase Model</i> Patent pending JP	Yamaha Corp
18/5/2012 JP2012-115065 US20130311189	Bonada, J., Villavicencio, F. <i>Voice Synthesis Apparatus: Spectral Transformation Compensation for Probabilistic Envelope Conversion</i> Patent pending JP, US	Yamaha Corp
14/5/2012	Bonada, J., Merlijn Blaauw, Makoto Tachibana	Yamaha Corp

JP2012-110359 EP2530671	<i>Voice Synthesis Apparatus: Unit Interpolation</i> Patent pending JP, Europe	
28/10/2010	Bonada, J., Janer, J., Marxer, R., Umeyama, Y., Kondo, K., Garcia, F. <i>Technique for Estimating Particular Audio Component</i> Patent pending JP, US, AL, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HR, HU, IE, IS, IT, LI, LT, LU, LV, MC, MK, MT, NL, NO, PL, PT, RO, RS, SE, SI, SK, SM, TR	Yamaha Corp
02/07/2009 JP20090157527	Keijiro, S., Bonada, J. <i>Apparatus and method for creating singing synthesizing database, and pitch curve generation apparatus and method</i> Patent pending JP, US	Yamaha Corp
02/07/2009 JP20090157531	Keijiro, S., Bonada, J. <i>Apparatus and method for creating singing synthesizing database, and pitch curve generation apparatus and method</i> Patent pending JP, US	Yamaha Corp
08/12/2008 JP20080312209	Kenmochi, H., Bonada, J. <i>Chorus Synthesizer, Chorus Synthesizing Method and Program</i> Patent pending JP	Yamaha Corp
06/02/2008 US20080026977	Janer, J., Bonada, J., de Boer, M., Loscos, A. <i>Audio Recording Analysis and Rating</i> Patent pending US	Universitat Pompeu Fabra, BMAT Licensing SL
10/10/2007 JP20070264052	Streich, S., Bonada, J., Samuel, R. <i>Elementary Piece Retrieving Device and Program</i> US7812240 JP,US	Yamaha Corp
09/10/2007 JP20070263253	Fujishima, T., de Boer, M., Bonada, J., Samuel, R., de Jong, F., Streich, S. <i>Music Piece Processing Device and Program</i> Patent pending JP	Yamaha Corp
25/09/2007 JP20070246610	Fujishima, T., de Boer, M., Bonada, J., Samuel, R., de Jong, F., Streich, S. <i>Music Piece Processing Device and Program</i> Patent pending JP	Yamaha Corp
13/09/2007 US20070900902	Bonada, J. <i>Audio Signal Transforming</i> Patent pending US	Universitat Pompeu Fabra
16/11/2007 US20070946860P US20070970109P US20070988714P	Gómez, E., Herrera, P., Cano, P., Janer, J., Serra, J., Bonada, J., El-Hajj Shadi, W., Aussenac, T., Holmbert, G. <i>Music Similarity Systems and Methods Using Descriptors</i> Patent pending US	Universitat Pompeu Fabra
30/03/2007 JP20070092185	Fujishima, T., Arimoto, K., Ong; B.S., Streich, S., Bonada, J., de Boer, M. <i>Sound Conversion Apparatus and Program</i> JP4544258 JP	Yamaha Corp
09/01/2007 JP20070001058	Fujishima, T., Bonada, J., de Boer, M. <i>Tone Processing Apparatus and Method</i> US7750228	Yamaha Corp

	JP, US, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HR, HU, IE, IS, IT, LI, LT, LU, LV, MC, MT, NL, NO, PL, PT, RO, SE, SI, SK, TR, AL, BA, MK, RS	
19/05/2006 JP20060139911	Oshita, H., Kenmochi, H., Bonada, J., Loscos, A. <i>Voice Processor and Program</i> Patent pending JP	Yamaha Corp
27/10/2004 JP20040311637	Fujishima, T., Bonada, J. <i>Pitch Shifting Apparatus</i> US7490035 JP, US, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IS, IT, LI, LT, LU, LV, MC, NL, PL, PT, RO, SE, SI, SK, TR	Yamaha Corp
04/03/2006 JP20060058771	Kenmochi, H., Bonada, J., Loscos, A. <i>Singing Synthesis Device and Program</i> Patent pending JP	Yamaha Corp
21/06/2006 JP20060171331	Kenmochi, H., Yoshioka, Y., Bonada, J. <i>Singing Synthesizer, Singing Synthesizing Method, and Program for Singing Synthesis</i> Patent pending JP	Yamaha Corp
09/03/2001 JP20010067258	Hisaminato, Y., Bonada, J. <i>Voice Synthesizing Apparatus</i> US7065489 JP, US, AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LI, LU, MC, NL, PT, SE, TR, AL, LT, LV, MK, RO, SI	Yamaha Corp
28/12/2000 JP20000401041	Kenmochi, H., Serra, X., Bonada, J. <i>Singing Voice Synthesizing Apparatus, Singing Voice Synthesizing Method, and Program for Realizing Singing Voice Synthesizing Method</i> US7016841 JP, US, AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LI, LU, MC, NL, PT, SE, TR, AL, LT, LV, MK, RO, SI	Yamaha Corp
26/05/2006 JP20060146868	Fujishima, T., Bonada, J., Loscos, A., Mayor, O. <i>Device, Method, and Program for Processing Sound Signal</i> JP4367437 JP	Yamaha Corp
30/05/2005 JP20050157758	Kenmochi, H., Bonada, J., Loscos, A. <i>Device and Program for Synthesizing Singing</i> JP4432834 JP	Yamaha Corp
26/05/2005 JP20050154738	Fujishima, T., Loscos, A., Bonada, J., Mayor, O. <i>Sound Signal Processing Apparatus, Sound Signal Processing Method and Sound Signal Processing Program</i> Patent pending JP, US, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IS, IT, LI, LT, LU, LV, MC, NL, PL, PT, RO, SE, SI, SK, TR, AL, BA, HR, MK, YU	Yamaha Corp
10/03/2005 JP20050067907	Kenmochi, H., Yoshioka, Y., Bonada, J. <i>Voice Processor and Program</i> Patent pending JP, US, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IS, IT, LI, LT, LU, LV, MC, NL, PL, PT, RO, SE, SI, SK, TR, AL, BA, HR, MK, YU	Yamaha Corp
02/02/2005 JP20050026855	Kenmochi, H., Bonada, J. <i>Voice Synthesizer and Program</i> EP1688912 JP, US, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR,	Yamaha Corp

	HU, IE, IS, IT, LI, LT, LU, LV, MC, NL, PL, PT, RO, SE, SI, SK, TR, AL, BA, HR, MK, YU	
15/12/2005 JP20050361612	Fujishima, T., Sekine, S., Kamiya, S., Bonada, J., Fabig, L., Mayor, O., Loscos, A. <i>Device, Method, and Program for Deciding Voice Quality</i> JP4432893 JP	Yamaha Corp
21/11/2005 JP20050336272	Hisaminato, Y., Bonada, J. <i>Voice Synthesizer</i> JP4353174 JP	Yamaha Corp
09/03/2001 JP20010067257	Yoshioka, Y., Bonada, J. <i>Device, Method, and Program for Analyzing and Synthesizing Voice</i> JP3711880 JP, US, AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LI, LU, MC, NL, PT, SE, TR, AL, LT, LV, MK, RO, SI	Yamaha Corp
28/04/2005 JP20050132799	Yoshioka, Y., Bonada, J. <i>Voice Analysis and Synthesizing Apparatus, Method and Program</i> JP4349316 JP	Yamaha Corp
19/11/2004 JP20040336224	Kenmochi, H., Bonada, J. <i>Aparatus for and Program of Processing Audio Signal</i> Patent pending JP, US, DE, GB	Yamaha Corp
18/10/2004 JP20040302795	Kenmochi, H., Serra, X., Bonada, J. <i>Singing Synthesizer</i> JP3985814 JP	Yamaha Corp
21/10/1999 JP19990300268	Yoshioka, Y., Serra, X., Schiementz, M., Bonada, J. <i>Device and Method for Voice Conversion and Method of Generating Dictionary for Voice Conversion</i> JP4430174 JP, US	Yamaha Corp
27/02/2002 JP20020052006	Kenmochi, H., Bonada, J., Loscos, A. <i>Singing Voice Synthesizing Method</i> US6992245 JP, US, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LI, LU, MC, NL, PT, RO, SE, SI, SK, TR, AL, LT, LV, MK	Yamaha Corp
28/02/2002 JP20020054487	Kenmochi, H., Yoshioka, Y., Bonada, J. <i>Singing Voice Synthesizing Apparatus, Singing Voice Synthesizing Method and Program for Singing Voice Synthesizing</i> US7135636 JP, US	Yamaha Corp
12/08/2002 JP20020235039	Kenmochi, H., Bonada, J. <i>Apparatus and Method for Chorus Synthesis and Program</i> JP4304934 JP	Yamaha Corp
09/08/2002 JP20020233085	Kondo, K., Bonada, J. <i>Device, Method, and Program for Time-Base Companding of Audio Signal</i> JP3858784 JP	Yamaha Corp
13/09/2001 JP20010278292	Bonada, J., Hisaminato, Y. <i>Sound Source Waveform Generator, Voice Synthesizer, Sound Source Waveform Generation Method and Program</i> JP3967571 JP	Yamaha Corp
22/12/1999	Kawashima, T., Schiementz, M., Bonada, J.	Yamaha Corp

JP19990365271	<i>Device and Method for Voice Conversion</i> JP4509273 JP	
21/10/1999 JP19990300275	Kayama, H., Serra, X., Bonada, J. <i>Device and Method for Aural Signal Processing</i> JP4455701 JP	Yamaha Corp, Universitat Pompeu Fabra
21/10/1999 JP19990300270	Kondo, T., Loscos, A., Cano, P., Bonada, J. <i>Device and Method for Adding Harmony Sound</i> Patent pending JP	Yamaha Corp, Universitat Pompeu Fabra
21/10/1999 JP19990300269	Yoshioka, Y., Bonada, J. <i>Signal Analyzer and Singal Analysis Method</i> JP4286405 JP	Yamaha Corp, Universitat Pompeu Fabra
21/10/1999 JP19990300267	Kawashima, T., Serra, X., Bonada, J. <i>Device and Method for Processing Musical Sound</i> JP3802293 JP	Yamaha Corp, Universitat Pompeu Fabra
16/06/1998 JP19980169045	Yoshioka, Y., Bonada, J. <i>Voice Transforming Device, Voice Transforming Method and Storage Medium which Records Voice Transforming Program</i> JP3706249 JP, US, AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LI, LU, MC, NL, PT, SE, AL, LT, LV, MK, RO, SI	Yamaha Corp

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application Answer to Question 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector. "Music" is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

DotMusic's application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexa.com/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

countries.¹³ This means that if a Music Community member's copyright rights are violated in any other signatory country's jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community's rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community's *Establishment* and definition is "cohesive" and hence cannot be construed since the Community is a logical alliance of music communities that establish a clearly delineated and organized Community structure that is "closely united" and functions as a "whole"

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The "music" string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain's registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN "to provide accurate WHOIS contact data" or else their domain "registration may be suspended or even cancelled".¹⁸

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity *mainly*²⁰ dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word “mainly” is defined as “*more than anything else*” (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community “by representing all constituents involved in music creation, production and distribution” (Application Answer to Question 20d). Supporting organizations related to that string that are “mainly” dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized "Music Community" include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a "statutory rate" set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA's membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA's membership support the "performing arts" and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government

²² http://www.ifacca.org/strategic_partners/

²³ http://www.ifacca.org/strategic_partners/

²⁴ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

²⁵ U.S Copyright Office, <http://www.copyright.gov/carp/m200a.html>

²⁶ 2011 Annual Report for Cyprus Ministry of Culture, Section 1.2 "Music"

(http://www.moec.gov.cy/en/annual_reports/annual_report_2011_en.pdf). Activities include Music Performances in Cyprus (1.2.1) and Abroad (1.2.2), Subsidization of Paphos Aphrodite Festival (1.2.3), Music Publications (1.2.4), Subsidization and Purchases of Digital Records (1.2.5), Promotion for Cypriot musical creativity abroad (1.2.6),

Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world's largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴

Cyprus Symphony Orchestra Foundation (1.2.7), Music Information Centre (1.2.8), Developing Music Education (1.2.9), Organising of the 1st Musicological Symposium (1.2.10) and Musical Festivities for the European Volunteerism Year (1.2.11)

³⁴ Department for Culture, The Importance of Music, A National Plan for Music Education,

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180973/DFE-00086-2011.pdf, Page 4, 2011

- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁸
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the “voice of the recording industry worldwide”⁴¹ whose members⁴² – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁴³ represents “approximately 85% of all legitimate recorded music produced and sold in the United States,”⁴⁴ the world’s largest music market with 30% global market share.⁴⁵ Formed in 1933, the IFPI’s mission was to “represent the interests of the recording industry worldwide in all fora.”

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁶

The reach of A2IM Associate⁴⁷ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴⁸ – iTunes accounts for 63% of global digital music market⁴⁹ - a majority – with a registered community of 800 million registered members⁵⁰ available in 119 countries who abide to strict terms of service and boundaries⁵¹ and have downloaded over 25 billion songs⁵² from iTunes’ catalog of over 43 million songs⁵³ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁵⁴
- **Pandora**⁵⁵ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁶
- **Spotify**⁵⁷ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵⁸
- **Vevo**⁵⁹ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁶⁰

⁵⁷ <http://a2im.org/groups/spotify>

⁵⁸ <https://press.spotify.com/us/information/>

⁵⁹ <http://a2im.org/groups/vevo/>

- **Youtube**⁶¹ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁶² of which 38.4% is music-related.⁶³
- **ReverbNation**⁶⁴ – ReverbNation⁶⁵ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁶ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶⁷

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶⁸), China (China Audio Video Association⁶⁹) and Germany (Initiative Musik).⁷⁰ A2IM also has Affiliate⁷¹ associations within the global music community. These include Affiliates such as MusicFirst,⁷² the Copyright Alliance,⁷³ the Worldwide Independent Network (WIN)⁷⁴ and Merlin.⁷⁵

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁶ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA “on behalf of over 15 national and international trade associations” also expressed its support for .MUSIC to be under a “community” application model, including encouraging statements in support of DotMusic’s policies that stated that the coalition “was encouraged to see” that DotMusic “included several measures to deter and address copyright infringement within that TLD.” The “coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world’s music”⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

The International Music Products Association, NAMM, is another globally-recognized and relevant group of non-negligible size that has supported DotMusic.⁸⁰ NAMM, formed in 1901, is *mainly* dedicated to the global music community by representing the international music products industry and community, with globally-recognized members and exhibitors that include Yamaha, Roland, Sennheiser, Sony, Fender, Harman, Kawai, Shure, Steinway, Audio-Technica, AKAI, Gibson, Peavey, Korg, AKG, Selmer, JBL, Alesis, Ibanez, AVID, Casio, DW, Sabian, Pearl, Zildjian, Martin, Ludwig, Marshall and others.^{81 82} Every amateur and professional musician worldwide uses music products manufactured and distributed by NAMM’s members. Without these musical instruments and products, music as we know it today would not be created or produced. NAMM and its trade shows power the \$17 billion global music products industry serving as a hub for the global music community wanting to seek out the newest innovations in musical products, recording technology, sound and lighting. NAMM’s mission is “to strengthen

⁸⁰ http://music.us/letters/NAMM_International_Music_Products_Association.pdf

⁸¹ https://www.namm.org/files/showdir/ExhibitorList_WN15.xls

⁸² <http://www.musictrades.com/global.html>

the music products industry and promote the pleasures and benefits of making music.”⁸³ NAMM also hosts the NAMM Show, the world's largest event for the music products industry.

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁴ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸⁵ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸⁶

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community. Community members may register a .MUSIC by either:

⁸³ <https://www.namm.org/about>

⁸⁴ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸⁵ <http://music.us/supporters>

⁸⁶ See <http://music.us/nexus>

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸⁷ given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

⁸⁷ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Name: Jordi Janer, Ph.D

Title: Cofounder

Organization: Voctro Labs (Barcelona)

Jordi Janer, PhD

Jordi Janer is an audio technologist who works as Senior Researcher at the Music Technology Group of the Universitat Pompeu Fabra (MTG-UPF) in Barcelona.

Graduated in Electronic Engineering (2000), he worked as DSP engineer at Creamware GmbH, (Germany, 2000-2003), designing and developing audio effects and virtual synthesizers. He joined later the MTG-UPF, where he obtained the PhD degree in 2008 on voice interaction. His academic experience includes visiting research stays at McGill University (Canada, 2005) and at Northwestern University (USA, 2009).

His activity as a researcher and project manager involved various publicly-funded research projects (2004-2013), and industrial joint-research collaborations with Yamaha Corp. (Japan). He is coauthor of 11 patents and more than 30 scientific publications. In 2011 he cofounded Voctro Labs (See <http://www.voctrolabs.com>), a spin-off company specialized on voice processing solutions for the audiovisual media industry.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application, 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector, a “Music” regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA’s members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The “Size” covered reaches over a hundred million music entities i.e. “considerable size with millions of constituents” per Application Answer to Question 20a.

The string “music” falls under the jurisdiction of each country’s Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **ReverbNation**⁵⁸ – ReverbNation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Another letter⁷³ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷⁴ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁷⁵

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries

⁷⁵ See <http://music.us/nexus>

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application, 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector, a "Music" regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is "closely united" and "interdependent" (i.e. Each "organized community of similar nature that relates to music" which is part of the "logical alliance of communities that relate to music" is not mutually exclusive).

In short, the applied-for string ("Music") matches the name of the "Music" Community as defined by DotMusic's application. DotMusic's "Music Community" definition accurately represents the common definition of the "Music Community," which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA’s members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The “Size” covered reaches over a hundred million music entities i.e. “considerable size with millions of constituents” per Application Answer to Question 20a.

The string “music” falls under the jurisdiction of each country’s Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

²⁹ 2011 Annual Report from New Zealand Ministry of Culture:

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁴⁰ <http://a2im.org/about-joining/>

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **ReverbNation**⁵⁸ – ReverbNation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁶⁹ <http://www.merlinnetwork.org>

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Another letter⁷³ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷⁴ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

⁷⁴ <http://music.us/supporters>

B) Nexus⁷⁵

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries

⁷⁵ See <http://music.us/nexus>

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Name: Juliane Jones

Title: Juliane Jones, PhD

Organization: The University of British Columbia

About Dr. Juliane Jones

Singer-Songwriter

Ethnomusicologist

PH.D in Ethnomusicology
University of British Columbia

Profile

Singer-songwriter and ethnomusicologist Juliane Jones finds harmony in what seems like self-identity dissonance. “I occupy a middle space – my world is about intersections,” the New York-based songstress explains. Juliane’s father is Welsh, and her mother is from LA. She has lived internationally in five different places and speaks fluent Chinese and French. She is an ethnomusicologist, producer, and songwriter.

Juliane’s new experimental Chinese songwriting project integrates traditional Chinese music genres of *guqin*, *pipa* and *xiao* music, Chinese opera, and Buddhist chant into Western popular music idioms. It pushes the boundaries of performance by blending languages, timbres, and concepts in a way that is conscious of the stakes of translation and appropriation. Based on research begun during a Fulbright fellowship in China, Juliane’s songs and instrumental tracks are a celebration of cultural understanding.

Juliane performs and records music for the screen with leading Chinese instrumentalists around the world. Recent recordings feature pipa virtuoso Zhou Yi, bamboo flute master Miao Yimin, and the acclaimed Chinese opera (*kunqu*) artist Qian Yi.

Education

University of British Columbia Sept 2009-Nov 2014
Ph.D. (Ethnomusicology) November 2014

Royal Holloway University of London Sept 2008-Aug 2009
Mmus Advanced Musical Studies (Composition)

National Taiwan University, ICLP, Taipei, Taiwan June 2008-Aug 2008

The Shanghai Conservatory of Music Aug 2005-July 2006
Advanced Non-degree Student (*Jinxiusheng*)

The University of Chicago Sept 2001-Aug 2005
B.A., East Asian Studies, Minor: Music

Princeton in Beijing, Beijing, China June 2002-Aug 2002

The Taft School, Watertown, Connecticut Diploma, June 2001

L'Ecole Americaine, Rennes, France Sept 1999-June 2000

Dissertation Topic

Contemporary *Kunqu* Composition

Advisor: Dr. Michael Tenzer

Committee members: Dr. Joseph Lam, Dr. Nathan Hesselink,

1) Explores a new subfield of ethnomusicology, the application of ethnography to composition.

2) Investigates the contemporary form of a vitally important historical, operatic musical tradition inscribed on the UNESCO list of intangible heritage in 2001.

3) Is based on two years of fieldwork in Shanghai, China (2005-2007) and follow up trips in 2011 and 2013. Primary research techniques include:

a) Composition lessons with composers in Shanghai and Nanjing.

b) Interviews, both formal and informal.

c) Translation of Chinese composition treatises dating to the sixteenth century and contemporary composition treatises.

d) Analysis of musical scores, live performances, and sound recordings.

Prepared To Teach

The Singer-songwriter (Extensive experience as a producer and performer, General examination field in popular music studies)

Genre and Popular Music (General examination field)

Music in Twentieth Century China (Dissertation specialization)

Rhythm and Human Experience (Teaching assistant under Dr. Michael Tenzer)
Conducted two sections. Prepared class assignments and some course examinations.
Lectured on groove guitar, jazz diffusion, and the origin of music.

Cross-cultural Guitar Studies (General examination field)

Honors and Grants

Vanier Canada Graduate Scholarship Sept 2010-Sept 2013. Recipient for 3 years (\$50,000 per year)

University of British Columbia Graduate fellowship (\$16,000) Sept 2009-Sept 2010

Royal Holloway International Excellence Scholarship September 2008

IIE Fulbright Fellowship, Shanghai, China Aug 2006-June 2007

Asada Eiji BA Thesis Prize, best BA Thesis in East Asian Studies June 2005

University of Chicago Dean's List, 2001-2005

Paper Presentations

“Play the Bluebird”: Open Mics and Writers’ Nights June 2014
in Nashville, Tennessee

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

² <http://music.us/supporters>

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application, 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector, a “Music” regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN's Applicant Guidebook ("AGB")¹⁹: *"With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members."* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several "international federation of national communities of a similar nature" relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the "IMC") in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

²⁹ 2011 Annual Report from New Zealand Ministry of Culture:

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁵¹ <http://a2im.org/groups/spotify>

⁵² <https://press.spotify.com/us/information/>

⁵³ <http://a2im.org/groups/vevo/>

- **Youtube**⁵⁵ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁶ of which 38.4% is music-related.⁵⁷
- **ReverbNation**⁵⁸ – ReverbNation⁵⁹ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The ReverbNation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶⁰ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶¹

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶²), China (China Audio Video Association⁶³) and Germany (Initiative Musik).⁶⁴ A2IM also has Affiliate⁶⁵ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁶ the Copyright Alliance,⁶⁷ the Worldwide Independent Network (WIN)⁶⁸ and Merlin.⁶⁹

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷⁰ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises.

⁶⁹ <http://www.merlinnetwork.org>

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Another letter⁷³ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷⁴ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁷⁵

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries

⁷⁵ See <http://music.us/nexus>

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic's community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic's application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined "music" Community and applied-for "music" string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic's definition of the "Music Community" as a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" (See Application, 20a) is factually accurate and representative of the "Music Community." Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The "Music Community" definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. "Music Community" members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each "organized community of similar nature that relates to music" that comprises the "Music Community." Without such cohesiveness and interdependency, the defined "Music" Community matching the applied-for string ("Music") would not be able to function in its regulated sector, a "Music" regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is "closely united" (As per the definition of "cohesion" according to Merriam-Webster dictionary⁶) or "united or form a whole" (As per the definition of the word "cohesion" according to Oxford Dictionaries⁷).

The "Music Community" as defined (a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music") establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is "closely united" and "interdependent" (i.e. Each "organized community of similar nature that relates to music" which is part of the "logical alliance of communities that relate to music" is not mutually exclusive).

In short, the applied-for string ("Music") matches the name of the "Music" Community as defined by DotMusic's application. DotMusic's "Music Community" definition accurately represents the common definition of the "Music Community," which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en,Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved March 23, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) International Federations and Organizations Dedicated to Community Functions:

According to ICANN’s Applicant Guidebook (“AGB”)¹⁹: *“With respect to “Delineation” and “Extension,” it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members.”* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly dedicated to the community which has supported DotMusic, which include several “international federation of national communities of a similar nature” relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²⁰ IFACCA’s members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The “Size” covered reaches over a hundred million music entities i.e. “considerable size with millions of constituents” per Application Answer to Question 20a.

The string “music” falls under the jurisdiction of each country’s Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²¹ The UNESCO strategic partnership²² is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²³

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ http://www.ifacca.org/membership/current_members/

²¹ http://www.ifacca.org/strategic_partners/

²² http://www.ifacca.org/strategic_partners/

²³ <http://www.imc-cim.org/about-imc-separator/who-we-are.html>

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁴

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁵ Other small government Ministries of Culture, such as Albania,²⁶ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁷ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁸

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries’ and arts councils’ substantial connection to and support of “music” is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA’s membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).²⁹
- The Australian Government/Council For The Arts invested \$51.2 million for the nation’s orchestras; \$21.6 million for opera; \$10.8 million for other music artists and

[http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20\(D-0448383\).PDF](http://www.mch.govt.nz/files/Annual%20report%202011%202012%20pdf%20version%20(D-0448383).PDF)

organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³⁰

- Canada Council for the Arts is Canada’s national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³¹ The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³²
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³³
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁴ and has a strong focus on music as outlined in its Strategic Plan³⁵ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁶
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the “Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa”³⁷
- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁸
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.³⁹

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴⁰

The reach of A2IM Associate⁴¹ membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴² – iTunes accounts for 63% of global digital music market⁴³ - a majority – with a registered community of 800 million registered members⁴⁴ available in 119 countries who abide to strict terms of service and boundaries⁴⁵ and have downloaded over 25 billion songs⁴⁶ from iTunes’ catalog of over 43 million songs⁴⁷ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁸
- **Pandora**⁴⁹ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵⁰
- **Spotify**⁵¹ – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵²
- **Vevo**⁵³ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁴

⁷⁰ <https://www.icann.org/en/system/files/correspondence/bengloff-to-chehade-et-al-20aug14-en.pdf> and <https://www.icann.org/en/system/files/correspondence/bengloff-to-crocker-et-al-07mar15-en.pdf>

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷¹ – a majority of global music.⁷²

Another letter⁷³ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed "support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest."

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁷⁴ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁷⁵

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music entities to be included as part of the Community.

Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries

⁷⁵ See <http://music.us/nexus>

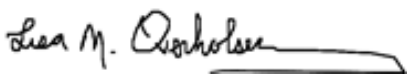

and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration.

The inclusion of every music constituent type is paramount to the purpose of the string. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework given the symbiotic overlapping nature of the Community as defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (2) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (3) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application, 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector, a “Music” regulated sector that was publicly recognized by both ICANN and the Government Advisory Committee.⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;
- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

According to Wikipedia:⁸

Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.⁹

ii) *An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:*

DotMusic’s definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexa.com/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

According to DotMusic, the Music Community’s geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, “registrants will be verified using Community-organized, unified “criteria taken from holistic perspective with due regard of Community particularities” that “invoke a formal membership (Application Answer to Question 20a).” The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string “music” and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the “music” string).

DotMusic’s Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the “Music Community” as defined implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members’ rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world’s population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other countries.¹³ This means that if a Music Community member’s copyright rights are violated in any other signatory country’s jurisdiction, then the music community member will have the music copyright rights given by that country. Music Community members are clearly aware of the collective Community’s rights, which could not be made possible without these cohesive and globally-recognized set of standards. If such standards were not coherent or enforced then music would not be able to exist in its current form and the industry component of the Music Community sector would not exist. As such, the Community’s *Establishment* and definition is “cohesive” and hence cannot be construed since the Community is a logical alliance of music

¹⁰ http://www.rightsdirect.com/content/rd/en/toolbar/copyright_education/International_Copyright_Basics.html

¹¹ http://www.wipo.int/treaties/en/text.jsp?file_id=283698

¹² http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15

¹³ <http://www.britannica.com/EBchecked/topic/62482/Berne-Convention>

communities that establish a clearly delineated and organized Community structure that is “closely united” and functions as a “whole”

Further evidence to substantiate the cohesive, symbiotic and overlapping nature of the Community, includes other globally-recognized standards and classification systems, which identify who the individual songwriters, publishers and rights holders are and which songs they are associated with so that Community members are appropriately compensated, regardless of whether the constituent is a commercial, non-commercial or amateur entity. The “music” string is commonly used in classification systems such as ISMN,¹⁴ ISRC,¹⁵ ISWC,¹⁶ ISNI.¹⁷ (Application Answer to Question 20a). For example, if a music entity would like to distribute their music, either commercially or for free, then an ISRC can be assigned to globally identify any specific music work. An ISRC, which facilitates efficient music discovery and community member payment, is constructed from 12 characters representing country, registrant, year of registration and designation (i.e. the serial number assigned by the registrant). With respect to domains, an equivalent system that relates to identifying a specific domain’s registrant and other relevant information pertaining to the domain is WHOIS. Domain registrants are required by ICANN “to provide accurate WHOIS contact data” or else their domain “registration may be suspended or even cancelled”.¹⁸

Without such Music Community “cohesion” and standardized systems functioning in its regulated sector, the Music Community would not be able to create, market and distribute their music. By the same token, fans would not be able to identify the music they are listening to with a specific music artist, regardless of whether the listening activity or behavior is commercial or non-commercial in nature. The socio-economic structure that characterizes “music” as commonly-known today would be non-existent without these organized and delineated elements that commonly define the Community.

¹⁴ The International Standard Music Number (ISMN) is a unique number for the identification of all notated music publications from all over the world. The ISMN is an ISO certified global standard number (ISO 10957:2009). See <http://www.ismn-international.org/whatis.html> and

http://www.iso.org/iso/home/store/catalogue_ics/catalogue_detail_ics.htm?csnumber=43173

¹⁵ The ISRC (International Standard Recording Code) is the international identification system for sound recordings and music video recordings. The ISRC is an ISO certified global standard number (ISO 3901:2001) and is managed by the IFPI. See <http://isrc.ifpi.org>, <https://www.usisrc.org/about/index.html> and http://www.iso.org/iso/catalogue_detail?csnumber=23401

¹⁶ The ISWC (International Standard Musical Work Code) is a unique, permanent and internationally recognized reference number for the identification of musical works. The ISWC has been approved by ISO (International Organization for Standardisation) as a global standard (ISO 15707:2001) and is managed by CISAC. See <http://www.iswc.org/en/faq.html> and http://www.iso.org/iso/catalogue_detail?csnumber=28780

¹⁷ The International Standard Name Identifier (ISNI) is the ISO certified global standard number (ISO 27729) for identifying the millions of contributors to creative works and those active in their distribution. ISNI holds public records of over 8 million identities and 490,000 organizations. See <http://www.isni.org/> and http://www.iso.org/iso/catalogue_detail?csnumber=44292

¹⁸ <https://whois.icann.org/en/about-whois> and <https://www.icann.org/resources/pages/faqs-f0-2012-02-25-en>

iii) *International Federations and Organizations mainly Dedicated to the Community:*

According to ICANN's Applicant Guidebook ("AGB")¹⁹: *"With respect to "Delineation" and "Extension," it should be noted that a community can consist of...a logical alliance of communities (for example, an international federation of national communities of a similar nature... viable as such, provided the requisite awareness and recognition of the community is at hand among the members."* (AGB, 4-12). The community as defined in the DotMusic application has at least one entity mainly²⁰ dedicated to the community which has supported DotMusic, which include several "international federation of national communities of a similar nature" relating to music, music coalitions and other relevant and non-negligible music organizations.

One of these entities include the only international federation of national communities relating to government culture agencies and arts councils, which has an integral association with music globally: the International Federation of Arts Councils and Culture Agencies (IFACCA).

IFACCA is the only international federation that represents government culture agencies and arts councils globally. These national communities are governmental institutions that play a pivotal role with respect to music.²¹ IFACCA's members cover the majority of music entities globally, regardless of whether they are commercial, non-commercial or amateurs. Government ministry of culture and council agencies related to music cover a majority of the overall community with respect to headcount and geographic reach. The "Size" covered reaches over a hundred million music entities i.e. "considerable size with millions of constituents" per Application Answer to Question 20a.

The string "music" falls under the jurisdiction of each country's Ministry of Culture governmental agency or arts/music council (emphasis added). The degree of power and

¹⁹ <https://newgtlds.icann.org/en/applicants/agb/guidebook-full-11jan12-en.pdf>

²⁰ Per the Oxford and Merriam Webster dictionaries, the word "mainly" is defined as "*more than anything else*" (See <http://www.oxforddictionaries.com/definition/english/mainly> and <http://www.merriam-webster.com/dictionary/mainly> respectively). According to DotMusic, the string .MUSIC relates to the Community "by representing all constituents involved in music creation, production and distribution" (Application Answer to Question 20d). Supporting organizations related to that string that are "mainly" dedicated to the Community and its activities, include the International Federation of Arts Councils and Culture Agencies (IFACCA) representing government culture ministries and arts councils, the International Federation of Musicians (FIM) representing musicians globally, the International Federation of Phonographic Industry (IFPI) representing the recording industry worldwide, the International Confederation of Music Publishers (ICPM) representing the voice of global music publishing, the International Association of Music Information Centres (IAMIC), the American Association of Independent Music (A2IM), whose associate members represent a majority of music consumed, the Independent Music Worldwide Independent Network (WIN) representing independent music worldwide, the International Society for Music Education (ISME) the premiere international organization representing music education, and many others (See support at <http://music.us/supporters> and <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392>).

²¹ http://www.ifacca.org/membership/current_members/

influence of government ministry of culture and council agencies with respect to music surpasses any organization type since these agencies (i) provide the majority of funding for music-related activities; (ii) regulate copyright law; and (iii) encompass all the music entities that fall under their country, regardless whether these entities are commercial, non-commercial or amateurs. IFACCA is globally recognized by its strategic partners, such as UNESCO, a United Nations agency representing 195 member states and the European Commission.²² The UNESCO strategic partnership²³ is relevant, especially since UNESCO founded the International Music Council (the “IMC”) in 1949, which represents over 200 million music constituents from over 150 countries and over 1000 organizations globally.²⁴

Government activities in the clearly delineated and organized “Music Community” include setting statutory royalty rates. For example, in the United States, mechanical royalties are based on a “statutory rate” set by the U.S. Congress. This rate is increased to follow changes in the economy, usually based on the Consumer Price Index. Currently, the mechanical statutory rate is \$0.091 for songs five minutes or less in length or \$.0175 per minute for songs that are over five minutes long.²⁵

Ministries of culture and arts councils (that comprise IFACCA’s membership) support musicians, musical performances, independent music artists, non-commercial musical expression and education in their respective countries. The 165 ministries of culture, arts councils and affiliates that comprise IFACCA’s membership support the “performing arts” and music specifically. Without the financial and logistical support of arts councils and the ministries of culture, the music community would be adversely affected, and in some countries, may not exist in any appreciable manner. For example, the Ministry of Culture 2011 budget for the small country state of Cyprus for culture funding was €34,876,522 with critical support of music activities.²⁶ Other small government Ministries of Culture, such as Albania,²⁷ or government Ministries of Culture and Arts Councils from countries with larger populations, such as India,²⁸ all provide critical support and substantial advocacy for music. Other examples include government institutions collaborating and advocating music through their funded country-based pavilion initiatives at Midem, the world’s largest music conference.²⁹

Government ministries and arts councils provide critical support for the Music Community, including commercial music organizations. By way of example, government ministries' and arts councils' substantial connection to and support of "music" is noted in the reports of funding and support for music. Some examples to showcase the degree of power of the IFACCA's membership towards the string and global and national music are music investment and music funding (Annual reports by governments and councils):

- New Zealand Ministry of Culture has funded significant music projects. Some include the REAL New Zealand Music Tour (\$415,000), the New Zealand String Quartet (\$150,000) and New Zealand Music Commission: (\$1,378,000).³⁰
- The Australian Government/Council For The Arts invested \$51.2 million for the nation's orchestras; \$21.6 million for opera; \$10.8 million for other music artists and organizations; \$13.1 million for multi-platform artists and organizations; and \$4 million in miscellaneous funding, including sector building and audience development initiatives and programs.³¹
- Canada Council for the Arts is Canada's national, arts funding agency investing \$28 million in its Canada Council Musical Instrument Bank (Page 16) and \$28,156,000 in Music Arts Programs (Page 66).³² The Government of Canada also renewed its annual investment of \$27.6 million over five years in the Canada Music Fund.³³
- The United Kingdom Department for Culture and Education (DfE) will fund music education at significant levels: £77 million, £65 million and £60 million will be available in the three years from April 2012.³⁴
- The United States National Endowment of the Arts has awarded more than \$4 billion to support the arts since its inception³⁵ and has a strong focus on music as outlined in its Strategic Plan³⁶ with Congress requested to provide \$154,465,000 for fiscal year 2014.³⁷
- The National Arts Council of South Africa invested 2,536,131 ZAR in Music and 9,995,000 ZAR in Orchestras and has focused strongly on the "Strengthening of live indigenous music and advocating the revival of the live music circuit in South Africa"³⁸

³⁷ http://www.ifacca.org/national_agency_news/2013/04/10/us-president-requests-154465000-neh-2014/

³⁸ 2010-2011 Annual Report for the National Arts Council South Africa, National Arts Council South Africa, <http://www.nac.org.za/media/publications/AR%2010-11%20NAC.PDF/download>, Page 11. Also Mmino, the South African – Norwegian Education Music Programme, solely funds music projects funding a total of 294 projects. Thirteen projects were allocated funding for a total of R1,680,600 of which R1,381,000 went towards music educational and R299,600 to exchange projects (Page 10)

- The Singapore Arts Council will fund \$10.2 million in the arts under its 2013 Grants Framework, including the Ding Yi Music Company and Siong Leng Musical Association.³⁹
- In 2011, the support for artistic activities by the Arts Council of Finland was €32.4 million of which €4,921,850 was awarded to music.⁴⁰

Each of IFACCA’s members has a clear association with, and mandate to support the music arts in their countries. In most countries, their ministry of culture/arts council is the largest funder and marketing supporter of the music arts.

Another clear example of an “entity *mainly* dedicated to the community” with members that cover hundreds of millions of music constituents with formal boundaries is A2IM, the American Association of Independent Music. A2IM has two types of members: U.S independent Label members and Associate members. A2IM membership for Labels and Associates is invoked formally through an application and if accepted would require annual membership dues.⁴¹

The reach of A2IM Associate⁴² membership covers hundreds of millions of entities (i.e. the reach of A2IM’s total membership “geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents – See Application Answer to Question 20a).

Organized and strictly delineated communities related to music that are A2IM members include:

- **Apple iTunes**⁴³ – iTunes accounts for 63% of global digital music market⁴⁴ - a majority – with a registered community of 800 million registered members⁴⁵ available in 119 countries who abide to strict terms of service and boundaries⁴⁶ and have downloaded over 25 billion songs⁴⁷ from iTunes’ catalog of over 43 million songs⁴⁸ covering a global music community, regardless of genre or whether the community entities are amateur, professional, commercial or non-commercial. To add music to iTunes, all music artists must have a formal membership with iTunes via an Apple ID registration, which includes a current credit card on file.⁴⁹

⁴⁹ <https://www.apple.com/itunes/working-itunes/sell-content/music-faq.html>

- **Pandora**⁵⁰ – Pandora is the world’s largest streaming music radio with a community of over 250 million registered members.⁵¹
- **Spotify**⁵² – Spotify is the world’s largest music streaming community with over 50 million active registered members in 58 countries and over 30 million songs. The music community uploads 20,000 songs every day.⁵³
- **Vevo**⁵⁴ – Vevo is the world’s leading all-premium music video community and platform with over 8 billion monthly views globally.⁵⁵
- **Youtube**⁵⁶ – Youtube is the world’s largest music video streaming community with millions of music creators -- amateur, professional, commercial or non-commercial -- and over 1 billion registered members covering all regions globally. 6 billion hours of video is watched every month on Youtube,⁵⁷ of which 38.4% is music-related.⁵⁸
- **Reverbnation**⁵⁹ – Reverbnation⁶⁰ is one of the world’s largest music community and a leading music distributor with over 3.87 million musicians, venues labels and industry professionals covering every country globally. The Reverbnation community grows by over 50,000 artists, bands, labels and industry professionals monthly.
- **BMG**⁶¹ – BMG is focused on the management of music publishing and recording rights. BMG has an international presence and represents over 2.5 million music rights globally.⁶²

A2IM also includes members that are associated with global government agencies which exclusively represent substantial music economies and music members, such as France (BureauExport⁶³), China (China Audio Video Association⁶⁴) and Germany (Initiative Musik).⁶⁵ A2IM also has Affiliate⁶⁶ associations within the global music community. These include Affiliates such as MusicFirst,⁶⁷ the Copyright Alliance,⁶⁸ the Worldwide Independent Network (WIN)⁶⁹ and Merlin.⁷⁰

⁶⁵ <http://a2im.org/groups/initiative-musik-gmbh>

⁶⁶ <http://a2im.org/groups/tag/associate+members/>

⁶⁷ <http://musicfirstcoalition.org/coalition>, The musicFIRST Coalition, with founding members A2IM, RIAA, and Recording Academy represents musicians, artists, managers, music businesses, and performance right advocates.

⁶⁸ <http://www.copyrightalliance.org/members>

⁶⁹ <http://www.winformusic.org>

A2IM also represents a recognized Music Coalition representing the interests of the Global Independent Music Community.⁷¹ The A2IM Coalition includes Merlin, a global rights agency for the independent label sector, representing over 20,000 labels from 39 countries, Worldwide Independent Network (representing label creators in over 20 countries), Association of Independent Music (representing largest and most respected labels in the world), and IMPALA (Independent Music Companies Association on behalf of over 4,000 independent music companies and national associations across Europe, representing 99% of music actors in Europe which are micro, small and medium sized enterprises).

Cumulatively, A2IM's Label and Associate Membership, A2IM's Affiliates and the A2IM's Global Independent Music Community Coalition, covers a majority of the global music community. Its cumulative membership is in the hundreds of millions of entities with formal boundaries belonging to strictly organized and delineated communities related to music as per the Community Definition and Size (See Application answer to Question 20a).

The IFPI is another entity *mainly* dedicated to the Community. The IFPI is the only organization that represents the interests of the recording industry worldwide. It is the "voice of the recording industry worldwide"⁷² whose members⁷³ – major and independent companies -- represent a majority of all commercial music consumed globally. For example, the RIAA, an IFPI national group member,⁷⁴ represents "approximately 85% of all legitimate recorded music produced and sold in the United States,"⁷⁵ the world's largest music market with 30% global market share.⁷⁶ Formed in 1933, the IFPI's mission was to "represent the interests of the recording industry worldwide in all fora."

Another global Music Community Coalition led by the RIAA "on behalf of over 15 national and international trade associations" also expressed its support for .MUSIC to be under a "community" application model, including encouraging statements in support of DotMusic's policies that stated that the coalition "was encouraged to see" that DotMusic "included several measures to deter and address copyright infringement within that TLD." The "coalition members represent the people that write, sing, record, manufacture, distribute and/or license over 80% of the world's music"⁷⁷ – a majority of global music.⁷⁸

Another letter⁷⁹ sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a majority of the global music publishing community, also expressed “support [for] the .MUSIC community applications because respecting and protecting music rights serves the global music community and the public interest.”

Collectively, the DotMusic application received support from the largest coalition of music community member organizations ever assembled to support a cause representing over 95% of music consumed globally.⁸⁰ Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support⁸¹ from institutions/organizations representing a majority of the Community addressed. Music -- as commonly-known by the general public and experienced today -- would not be possible without these supporting, non-negligible and relevant organizations that have endorsed DotMusic.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Community Establishment* and *Community Endorsement* from the majority of the global Music Community as defined.

B) Nexus⁸²

According to the Applicant Guidebook (“AGB”), to receive the maximum score for Nexus, the applied-for string -- “music” -- must match the name of the community or be a well-known short-form or abbreviation of the community name.

The *Nexus* of the “Music Community” entirely matches the applied-for “music” string because it represents the entire global Music Community as commonly-known and perceived by the general public. This definition allows for all constituents with a requisite awareness of the Community defined to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination. The definition of the Community requires that members have an active, non-tangential relationship with the applied-for string and the requisite awareness of the music community they identify with as part of the registration process. It is clear that the general public will directly associate and equate the string with the Community as defined by DotMusic. There is no possibility of overreaching beyond the definition or allowing unrelated non-music

⁷⁹ <https://www.icann.org/en/system/files/correspondence/aguirre-to-icann-board-ciu-14apr15-en.pdf>

⁸⁰ See <http://music.us/supporters>, <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/downloadattachment/142588?t:ac=1392>, Bloomberg BNA at http://music.us/RIAA_Backs_DotMusic.pdf Pg.1, and <http://diffuser.fm/will-dot-music-domains-make-the-internet-better/>

⁸¹ <http://music.us/supporters>

⁸² See <http://music.us/nexus>

entities to be included as part of the Community. Community members may register a .MUSIC by either:

- 1) Identifying that they belong to a Music Community Member Organization (“MCMO”); or
- 2) Identifying the community they belong to, which is consistent with the definition of the Community: “the strictly delineated and organized logical alliance of communities of similar nature related to music.”

All Community members are aware of and recognize their inclusion in the defined Community by identifying which clearly defined community they belong to and have an active participation in. The *nexus* of the applied-for string ensures inclusion of the entire global community that the string represents while excluding unrelated-entities not associated with the string. This way there is a clear match and alignment between the “music” sting and the Community defined.

While the exact size of the global Music Community as defined is unknown (there is no empirical evidence providing an exact, finite number because amateur entities are also included in the Community’s definition), it is in the considerable millions as explicitly stated in the DotMusic Application. DotMusic’s definition of the Community and mutually-inclusive Registration Policies ensure that eligible members are only music-related and associated with the string. This is because the string identifies all constituents involved in music. Music-only participation optimizes the relevancy of .MUSIC domains to the string and entirely matches the *nexus* between the string and Community defined. According to DotMusic, the Community *definition, eligibility* criteria and *content and use* requirements ensure that peripheral industries and entities not related to music are excluded so that the string and the defined Community matches and aligns in a consistent manner consistent with DotMusic’s community-based purpose i.e. only entities with music-related activities are able to register .MUSIC domains.

Membership aligns with the *nexus* of the Community and the string, which is explicitly relevant to music. The string as defined in the application demonstrates uniqueness because it has no other significant meaning beyond identifying the community described in the application. According to DotMusic’s application, any tangential or implicit association with the *nexus* of the Community and the string is not regarded as a delineated membership since it would be considered unclear, dispersed or unbound. Such unclear, dispersed or unbound tangential relationships with the defined “music” Community and applied-for “music” string would not constitute a qualifying Community membership and would be ineligible for registration. Every type of music constituent critically contributes to the function and operation of the music sector within a regulated framework⁸³ given the symbiotic overlapping nature of the Community as

⁸³ ICANN has disclosed that the string .MUSIC is a sensitive string operating in a regulated sector. ICANN also accepted Government Advisory Committee (GAC) advice for safeguards to protect the Music Community and the public interest (See <https://icann.org/en/system/files/correspondence/crocker-to-dryden-3-29oct13-en.pdf> Pg.7)

defined and structured. Music would not function as it does today without the participation of all music constituent types which cumulatively match the string with the Community definition.

In conclusion, there is substantive and compelling evidence that DotMusic entirely fulfills the criteria for *Nexus*.

Respectfully Submitted,

EDUCATION

University of Chicago, Chicago, Illinois

2011 Doctor of Philosophy in Music (Ethnomusicology)

- *Conferral:* August 2011
- *Dissertation:* ““Can You Feel it Too?": Intimacy and Affect at Electronic Dance Music Events in Paris, Chicago, and Berlin.”
- *Committee:* Travis A. Jackson (supervisor), Steven Rings, Lauren Berlant, Kaley Mason

University of Toronto, Toronto, Ontario, Canada

2004 Master of Arts in Music (Musicology)

- *Master's Thesis:* “The Soft Pink Meaning: A Case Study of Close Reading in Electronic Dance Music.”

2002 Bachelor of Music (Music History & Culture)

EMPLOYMENT

University of Groningen, Groningen, Netherlands

2014–Present Assistant Professor of Music, Department of Arts, Culture, and Media

- “Music in Practice: Music Festivals”
- “Popular Music History and Analysis”
- “The Study of Popular Music: Analytical and Theoretical Approaches”
- MA Seminar, “Music and Globalization”

Max Planck Institute for Human Development, Berlin, Germany

2013–2014 Postdoctoral Research Fellow

- *Research Group:* “Felt Communities? Emotions in Europe’s Musical Life”

- *Projects: Book: Together, Somehow: Intimacy, Music, and Affect on the Dance Floor.* // Further ethnographic fieldwork for “The Techno Jetset: Mobility, Tourism, and Class in Berlin’s Electronic Dance Music Scenes”

University of Groningen, Groningen, Netherlands

2012–2013 Substitute Lecturer for Prof. Kristin McGee (Music)

- “The Study of Popular Music: Analytical and Theoretical Approaches”:
 - May 24, 2013: “Disco and Sexuality”
 - March 27, 2013: “Place and Race in Colombian Popular Music”
- MA Seminar: “Globalization and Music”:
 - September 14, 2012: “Cities, Clubs and Party Tourism”
 - September 9, 2012: “Dance Music and Electronica”

Freie Universität, Berlin, Germany

2011–2012 Postdoctoral Research Fellow

- Berlin Program for Advanced German and European Studies
- *Project:* Ethnographic fieldwork for “The Techno Jetset: Mobility, Tourism, and Class in Berlin’s Electronic Dance Music Scenes”

University of Chicago, Department of Music, Chicago, Illinois

2009–2010 Lecturer

- “Nightlives: Music and Nighttime” (MUSI 23910), a self-designed course with the Whiting Teaching Fellowship
- “Music in Western Civilization I” (MUSI 121)

2008 Lecturer

- Co-Lecturer, MA-level “Theories of Gender and Sexuality” (GNDR 314) with Lauren Berlant
- “Music in Western Civilization I & II” (MUSI 121-2)
- “Introduction to World Music” (MUSI 102)

2006 Course Assistant

University of Toronto, Department of Music, Toronto, Ontario, Canada

2002–2004 Teaching Assistant

ADDITIONAL EMPLOYMENT

Ecole nationale des chartes, Paris, France

2008–2009 Enseignant de langue (Language Instructor)

- Taught advanced English to undergraduate and graduate students, with emphasis on academic speaking and writing.

PROFESSIONAL DEVELOPMENT

- 2011 SEM-NEH Summer Institute, “Ethnomusicology and Global Culture”, June 20–July 1
- Society for Ethnomusicology and National Endowment for the Humanities
 - For the development of classroom pedagogy and projects concerning “global culture.”

HONORS AND AWARDS

- 2011 Lise Waxer Student Paper Prize (Popular Music Section), Society for Ethnomusicology (Los Angeles, 2010)
- 2011–2012 Postdoctoral Fellowship, Berlin Program for Advanced German and European Studies, Freie Universität, Berlin.
- 2010–2011 James C. Hormel Dissertation Fellowship in Lesbian and Gay Studies The Center for Gender Studies, University of Chicago.
- 2010 Wadmond Research Fund, University of Chicago.
- 2009 Whiting Teaching Fellowship, University of Chicago.
- 2008–2009 Assistanceship for Alternative Learning Technologies in Paris University of Chicago, College I.T. and Study Abroad Program.
- 2008 Wadmond Research Fund, University of Chicago.
- 2006–2007 Assistanceship for Alternative Learning Technologies in Paris University of Chicago, College I.T. and Study Abroad Program.
- 2006 Cathy Heifetz Memorial Award, University of Chicago.
- 2004–2009 Five-year Century Fellowship, University of Chicago.
- 2003–2004 Ontario Graduate Scholarship, Ontario Ministry of Training.
- 2003–2004 Canada Graduate Scholarship, Social Sciences and Humanities Research Council, Canada.
- 2003–2004 Gordon Cressey Student Leadership Award, University of Toronto.

PROFESSIONAL ACTIVITIES AND SERVICE

- 2015 Stream Organizer, with Dorina M. Buda. Conference: “Affect Theory: Worldings, Tensions, Futures,” at Millersville University, Lancaster, PA,

- October 14–17.
<http://www.affecttheorymu.com/>
- 2014–Present Secretary. *Opleidingcommissie* (program committee), University of Groningen.
- 2013 Conference Organizer and Host. “Resonances: Music, Affect, and the City,” at the Max Planck Institute for Human Development, Berlin, November 7-8.
<https://www.mpib-berlin.mpg.de/en/news/events/resonances-music-affect-and-the-city>
- 2012–Present Foreign Languages Editor. *Dancecult: Journal of Electronic Music Culture*.
- 2010–2011 Production Assistant and Reader. *Dancecult: Journal of Electronic Dance Music Culture*.
- 2006–2011 Founding Member and Co-Coordinator. Affective Publics Workshop, University of Chicago.
- 2010–2011 Program Committee. For the 2011 Meeting of the US chapter of the International Association for the Study of Popular Music (IASPM-US), Cincinnati, Ohio.
- 2010 Session Chair. “Scenes and Communities.” Meeting of the US chapter of the International Association for the Study of Popular Music (IASPM-US), New Orleans, Louisiana, April 10.
- 2010 Session Chair. “The Aesthetic Edge.” Meeting of the US chapter of the International Association for the Study of Popular Music (IASPM-US), New Orleans, Louisiana, April 9.
- 2007–2009 Student Seat Officer. US chapter of the International Association for the Study of Popular Music (IASPM-US).
- 2007–2008 President. Graduate Music Society, University of Chicago.
- 2003–2004 Co-President. Music Graduate Students Association, University of Toronto.
- 2003–2004 Search Committee. Dean of the Faculty of Music, University of Toronto.
- 2002–2003 Representative (Music). Graduate Student Union, University of Toronto.

2001–2002 Search Committee. Ethnomusicology, Faculty of Music, University of Toronto.

PERFORMANCE/CREATIVE ACTIVITIES

2012–Present Co-founder, magazine editor, performer, and essayist. *La Mission* artist collective / record label. www.joinlamission.com

2005–2007 Founder and director. Georgian Vocal Ensemble, University of Chicago.

2004–2006 Vocalist. Early Music Ensemble, University of Chicago.

Re: Expert Testimony on (i) Community Establishment; (ii) Nexus; and (iii) Support for DotMusic’s Community-Based Application¹ for .MUSIC (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (“EIU”):

Please accept this letter that indicates that there is substantive and compelling evidence that the DotMusic application convincingly meets the full criteria under Community Priority Evaluation on the following points: (i) the Music Community’s *Establishment* as defined by DotMusic; (ii) the matching *Nexus* between the “music” Community and the “music” string (or top-level domain); and (iii) that DotMusic possesses documented *Support* from organizations representing a majority of the global Music Community addressed and defined.

Please see my credentials attached hereto that identify my level of expertise and specialized knowledge with respect to the music community’s organization and delineation.

SUMMARY

DotMusic has established the following:

- 1) Its Community definition recognizes the cohesive, symbiotic and overlapping nature of the global Music Community. The definition includes those associated with commercial and non-commercial creation, performance, marketing and distribution of music;
- 2) “Music Community” members have the requisite awareness and recognition of the interdependency, overlapping and cohesive nature of each “organized community of similar nature that relates to music.” These organized and aligned communities are closely united and make “music” as we know it today. It is this self-awareness and interdependence that gives the “Music Community” its strength. With exponential growth of the Internet, mobile and the Domain Name System (DNS), the “Music Community’s” use and reliance on the Internet to create, market and disseminate music-related content, products, services and activities will continue to grow;
- 3) The “Music Community” functions in a regulated sector with global copyright protections – it is clear that the “community,” as defined, implies “more of cohesion than a mere commonality of interest” with an “awareness and recognition of a community among its members.” Several international treaties mandate a globally-recognized set of standards for

¹ <https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392>

the protection of the “Music Community” member rights with relation to their copyrighted music works around the world;

4) The “Music” Community -- as defined by DotMusic -- has at least one entity mainly dedicated to the community supporting DotMusic’s application. Such documented *Support* includes several “international federation of national communities of a similar nature,” music coalitions and others that are strongly associated with “music,” which represent a majority of the Community with considerable millions of members worldwide.²

5) The *Nexus* of the “music” Community matches the “music” applied-for string because it represents the entire global Music Community – a community that pre-existed 2007 with a size in the considerable millions of constituents. The “Music Community” definition -- which incorporates the strict fundamental attributes of a closely united Community definition that is “organized” and “delineated” -- ensures that all of its constituent members have a requisite awareness of the community as defined, including both commercial and non-commercial stakeholders, to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination.

6) DotMusic has received support from the largest coalition of Music Community member organizations ever assembled to support a cause. Such unparalleled global Music Community support represents an overwhelming majority of the global Music Community as defined. Cumulatively, DotMusic possesses documented support³ from institutions/organizations representing a majority of the Community as defined and recognized in the DotMusic application.

There is substantive evidence that DotMusic fulfills the *Nexus, Community Establishment and Support* criteria for the “Music” string. The inclusion and representation of every music constituent type is paramount to the articulated purpose of the string. DotMusic and its application’s global Music Community supporters substantiate that every type of music constituent contributes to the function and operation of the music sector within a regulated framework. The symbiotic nature of the Community as defined and structured means that “Music” would not function as it does today without the participation of all music constituent types that interconnect to match the “music” string with the “music” Community definition.

³ <http://music.us/supporters>

ASSESSMENT OF COMMUNITY DEFINITION, ESTABLISHMENT AND NEXUS

A) *Music Community Definition, Establishment & Community Endorsement*⁴

DotMusic’s definition of the “Music Community” as a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music” (See Application Answer to Question 20a) is factually accurate and representative of the “Music Community.” Community characteristics include:

i) An Organized, Cohesive, Interdependent Logically-Allied Community:

The “Music Community” definition covers the regulated, interdependent and cohesive nature of the music sector that exists today. “Music Community” members have the requisite awareness and recognition of the interdependent, overlapping and cohesive nature of each “organized community of similar nature that relates to music” that comprises the “Music Community.” Without such cohesiveness and interdependency, the defined “Music” Community matching the applied-for string (“Music”) would not be able to function in its regulated sector. “Music” is a regulated sector comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music that was publicly recognized by both ICANN and the Government Advisory Committee⁵

As a result, the Music Community as defined is “closely united” (As per the definition of “cohesion” according to Merriam-Webster dictionary⁶) or “united or form a whole” (As per the definition of the word “cohesion” according to Oxford Dictionaries⁷).

DotMusic’s application follows unified principles that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians’ rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination (See Application Answers to 18).

The “Music Community” as defined (a “strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music”) establishes that:

- (1) There is an awareness and recognition among its members;

⁴ See <http://music.us/establishment>

⁵ <https://www.icann.org/en/system/files/bm/briefing-materials-2-05feb14-en.pdf>, Pg.3

⁶ <http://www.merriam-webster.com/dictionary/cohesion>

⁷ http://www.oxforddictionaries.com/us/definition/american_english/cohesion

- (2) The organized and delineated logical alliance of communities exists; and
- (3) The Community is “closely united” and “interdependent” (i.e. Each “organized community of similar nature that relates to music” which is part of the “logical alliance of communities that relate to music” is not mutually exclusive).

In short, the applied-for string (“Music”) matches the name of the “Music” Community as defined by DotMusic’s application. DotMusic’s “Music Community” definition accurately represents the common definition of the “Music Community,” which is confirmed by Wikipedia.

According to Wikipedia:⁸

*Music community is defined as a logical alliance of interdependent communities that are related to music, which include commercial participants...and non-commercial participants...and consists of an “ensemble of practices and institutions that make possible and regulate the production, distribution and consumption of music”...UNESCO identifies the music community as a “community of identity” implying common identifiable characteristics and cohesive attributes such as sharing a music culture, norms and subscribing to common ideals related to music...The music community is not defined as much by demographic indicators such as race, gender, and income level, as it is by common values, cohesive norms and interconnected structures to build a community identity. It refers to music-related individuals and organisations in a shared environment with shared understandings and practices, modes of production and distribution. The shared organisation of collective musical activities, identity and community value is created as result of infrastructure and a shared set of common values...Many studies outline the historical, cultural, and spatial significance of the music community, including how its identity is formed through musical practices. The music community shares a cohesive and interconnected structure of artistic expression, with diverse subcultures and socio-economic interactions...subscribing to common ideals. Under such structured context music consumption becomes possible regardless whether the transaction is commercial and non-commercial.*⁹

⁸ Wikipedia is ranked 6th among the ten most popular websites (Alexa, Retrieved March 23, 2015 from <http://www.alexacom/siteinfo/wikipedia.org>) and constitutes the Internet's largest, most frequently updated and popular general reference work (See OECD, OECD Internet Economy Outlook 2012, OECD Publishing, http://www.oecd-ilibrary.org/science-and-technology/oecd-internet-economy-outlook-2012_9789264086463-en, Pg.172) that compares favorably to the accuracy of other encyclopedias (such as the Britannica) according to a 2012 study conducted in partnership with Oxford University (See <http://blog.wikimedia.org/2012/08/02/seven-years-after-nature-pilot-study-compares-wikipedia-favorably-to-other-encyclopedias-in-three-languages>).

⁹ Music Community. In *Wikipedia*. Retrieved July 6, 2015, from https://en.wikipedia.org/wiki/Music_community

ii) An Aware, Pre-Existing and Recognized Community of Considerable Millions Worldwide:

DotMusic's definition of the Community covers all Community members associated with the string, each with a requisite awareness of the Community that can be validated through their natural association with a particular music-related community that they clearly identify with. According to DotMusic, all Music Community members must identify their music-related community in order to demonstrate their requisite awareness of the defined Community as part of the .MUSIC registration and validation process.

According to DotMusic, the Music Community's geographic breadth is inclusive of all recognized territories covering regions associated with ISO-3166 codes and 193 United Nations countries with a Community of considerable size with millions of constituents (Application Answer to Question 20a).

According to DotMusic, "registrants will be verified using Community-organized, unified "criteria taken from holistic perspective with due regard of Community particularities" that "invoke a formal membership (Application Answer to Question 20a)." The defined Community represents all music-related entities with a clear and straightforward membership with the Community involved in the legal production, performance, promotion, and distribution of music worldwide. According to DotMusic, the Music Community members must have an active, non-tangential relationship with the applied-for string "music" and also have the requisite awareness of the music-related community that they are a part of by specifically identifying it as part of the registration and validation process (i.e. upon successful registration and validation, each community member will be given a unique community identification number that will automatically associate them with their identified community and the "music" string).

DotMusic's Community definition matches the applied-for string because it allows both commercial and non-commercial stakeholders to register a .MUSIC domain without any conflicts of interests, over-reaching or discrimination/exclusion. Given the regulated sector of the community, it is clear that the "Music Community" as defined implies "more of cohesion than a mere commonality of interest" with an "awareness and recognition of a community among its members." Several international treaties mandate cohesive and globally-recognized set of standards for the protection of the music community members' rights with relation to their copyrighted music works around the world.¹⁰

The Berne Convention for the Protection of Literary and Artistic Works¹¹ provides that each of the 168 contracting parties¹² (representing an overwhelming majority of the world's population) provides automatic protection for music works first published in other countries of the Berne union and for unpublished music works whose authors are citizens of or resident in such other
