

LGR-4 Code Table for non-CJK code points

Integration Panel

Date: 2020-11-05

This document shows the repertoire for LGR-4 code points not part of the CJK blocks presented in the form of marked up tables in a format similar to that used for character code charts in the Unicode Standard. Code cells with background color:

- Green: code points that are part of the LGR, including all members of code point sequences.
- Pink: code points that are not PVALID in IDNA2008 [RFC5892] [IDNAREG].
- White: PVALID code points which are *excluded* from the Root Zone in a generic fashion (digits, hyphen), or by being excluded from the Maximum Starting Repertoire [MSR-4].
- Lavender: PVALID code points not included in the LGR as results of decisions during the development of the LGR.

Unicode blocks that contain no repertoire of the LGR are suppressed.

In these code tables, code points are listed as part of the merged LGR (green) even if the LGR does not list the code point by itself, but only defines a code point sequence containing the code point. Code points that are marked “out-of-repertoire” by a reflexive variant mapping of type “out-of-repertoire-var” in any element LGR are shown as part of the merged LGR only if they occur in at least one element LGR without such mapping.
