Dear Sir / Madam,

The fact that our Organization opposition voice was completely dismissed, "EBU does not reflect the views of all amateur radio operators globally." while IARU have membership in several countries around the world they still do not represent amateur radio globally, IARU members represent themselves they do not negotiate for Non-IARU members at country level with their respective Telecommunication Authority.

The Non-Member IARU amateur radio Organization is more active in many countries around the world than IARU members, take an example look at the Republic of Trinidad and Tobago Non-IARU member very active in its country amateur radio development see attach the Framework for the Authorisation of Amateur Radio Services, look at the standards set by Trinidad and Tobago Amateur Radio League {TTARL}, and there are many more stories like this from around the world, it's not the IARU members but Non-IARU Members are progressing on their own strength and voices must be heard.

Amateur Radio have a very large development and research ongoing in VoIP activities taking into consideration echolink alone thousand of amateur radio operators are on this VoIP mode if EBU get its way hams will now have to apply for a license from EBU to operate echolink and all the necessary VoIP amateur radio stuff, is the IARU going to be getting financial benefits, this is not in the best interest of Non-IARU Members as amateur radio provide voluntary services world wide.

IRESA is not a specialised Organization as being branded and misrepresented but an international organisation IRESA duty also extends to other important areas beside amateur radio in our special Consultative Status with the Economic and Social Council United Nations 2012 according to IRESA United Nations Status,IARU is also a United Nations NGO but with Roster Status ,IRESA status is one above IARU we have Special Consultative Status at the United Nations,IRESA areas of responsibility are —>
http://www.iresintl.com/_mgxroot/page_10802.html .

Look at the Substantive session of 2013 Geneva, 1-26 July 2013 High-level segment: annual ministerial review Statement submitted by International Radio Emergency Support Coalition, a non-governmental Organization in consultative status with the Economic and Social Council to the United Nations Secretary General is this the work of a specialised Organization or a multidisciplinary Organization —>
http://www.iresintl.com/_mgxroot/page_10832.html .

What impact will this have on Third World Countries ,Small Islands Development States keeping in mind the ITU ICT trust for rural development and the United Nations Millennium Development goals what will the end Results as it pertain to the following.

Role of ICT in development of rural areas

Limitations of ICT in poor remote rural areas

Distribution of ICT in poor remote rural areas {PRRA's}

Development of Women and Young Girls

ICT and community development

Sustainability

VoIP is playing a very crucial development role in the decimation of information,education and empowering oppress Young Girl's and Women around the world look at the many radio station on VoIP one example The Street 91.9 FM this radio station is giving ordinary people the chance for their voices to be heard and many like them around the world ,is ICANN going to stop this empowerment of people worldwide by having EBU get it wishes this is conflict of interest ,who are going to be the financial beneficiary EBU at the expense of the world .

IRESA is calling on ICANN to review EBU application and reject it out right as it's not in the best interest of World development and is a conflict of

interest yes to regulation but via the involvement of ITU through countries regulators Telecommunication Authority .
