RE: Modify Internationalized Domain Name (IDN) Service for RSEP ID: 01133697

On 04 September 2022, dotBERLIN GmbH & Co. KG notified ICANN org of dotBERLIN GmbH & Co. KG's plans to make certain modifications to its existing Cyrillic script table associated with its IDN Registry Service for the .berlin TLD.

ICANN conducted a review of dotBERLIN GmbH & Co. KG's request and determined the modifications did not raise significant Security, Security or competition issues as defined in the RSEP (<https://www.icann.org/resources/pages/registries/rsep/policy-en>). ICANN further determined that implementation of the Registry Service modifications does not require a material change to the Registry Agreement. The registry operator is free to deploy the service modifications as proposed.

Sincerely,

DocuSigned by:
