124868	SO-AC, GNSO Secretariat Support Program, FY17	Staff will continue the existing program effort for a new 12-month period. ICANN staff will provide and manage part-time in-kind support on a pilot basis for administrative staff support resources to non-contracted GNSO communities (equivalent of approximately 12 hours a week of support per community) in FY17. Funds will not be provided directly to the community. Support will be offered on a "functional" basis and managed by the ICANN staff (i.e., specific staff assigned to specific functions like elections, telephone support, etc.). Staff will coordinate specific points of contact for the community to ensure that requests for service are provided in a timely manner.					0.0	0.0	0.1	0.0	0.0	0.0	0.1			
124869	SO-AC, Regional Outreach - CROPP, FY17	The CROPP program has been in place over two years and is showing steady growth in community interest and usage for certain communities. Staff has recommended that the program be continued for one additional year in its now mature phase to see if the substantial benefits realized by a number of community groups can be solidified. But, all eligible communities are not utilizing the program equally. By potentially exploring other outreach and engagement options, individual communities may be able to maximize their outreach and engagement strategies in a more tailored way. For FY17, Staff will again administer a more comprehensive Regional Outreach Program that will permit eligible communities that have developed a strategic outreach and engagement plan (and posted that plan on the ICANN Community wiki) to choose to continue to employ the CROPP program or, instead, to pursue a more activity-focused strategy. In recognition of their specific requests for this type of support (and as a pilot effort), the BC, IPC, ISPCP, NCUC and NPOC may choose to avail themselves of a community outreach event rather than the CROPP program itself. This decision will allow an individual community to elect to use the CROPP program OR to host, co-host or sponsor a targeted community outreach/engagement event at one point during the fiscal year. To confirm their eligibility, the potentially-eligible communities must produce a clear plan explaining their FY17 outreach goals and planned expectations so that the selected activities can be coordinated with the appropriate ICANN Regional engagement teams. Staff to develop/modify program parameters and calendars to effectively manage the provision of these resources.					0.0	0.0	0.0	0.0	0.0	0.0	0.0

			124203	FY17 Identifier Threat Awareness & Preparedness (ITAP)	a. Threat Intelligence and Response Preparation involves the exchange of information that reveals or anticipates a threat or an imminent attack of a global nature involving identifier systems and the concomitant preparation of defenses against attack, increase in vigilance, or countermeasures (e.g., increasing diversity or capacity as a resiliency measure). b. Coordinated Response involves the fulfillment of roles ICANN plays (typically, as a facilitator, notifier, knowledge or information contributor) in response to security events or incidents where identifier systems have been targeted or employed as instruments of attack (e.g., abuse or misuse of domains or the DNS by a globally-distributed botnet).		0.2	0.0	0.0	0.0	0.0	0.0	0.2

1.3 Evolve policy development and governance processes, structures and meetings to be more accountable, inclusive, efficient, effective and responsive	1.3.2 Reinforce Stakeholder Effectiveness, Collaboration and Communication Capabilities	124865	SO-AC Communications Management and Support, FY17	Effective and regular communications are critical to improved community collaboration and engagement. This project identifies a number of specific "task" activities that support the development and management of a number of core communications tools made available to the community.		0.1	0.0	0.0	0.0	0.0	0.1	
		124866	Document Production Pilot Program, FY17	Embark on second phase of FY16 pilot program to assess the potential, practical processes and mechanisms for providing ICANN community groups with support for the research, development, collaboration, drafting and editing of documents for submission within the policy development processes of ICANN.		0.0	0.0	0.0	0.0	0.0	0.0	
		124868	SO-AC, GNSO Secretariat Support Program, FY17	Staff will continue the existing program effort for a new 12-month period. ICANN staff will provide and manage part-time in-kind support on a pilot basis for administrative staff support resources to non-contracted GNSO communities (equivalent of approximately 12 hours a week of support per community) in FY17. Funds will not be provided directly to the community. Support will be offered on a "functional" basis and managed by the ICANN staff (i.e., specific staff assigned to specific functions like elections, telephone support, etc.). Staff will coordinate specific points of contact for the community to ensure that requests for service are provided in a timely manner.		0.0	0.0	0.1	0.0	0.0	0.1	
		124869	SO-AC, Regional Outreach - CROPP, FY17	The CROPP program has been in place over two years and is showing steady growth in community interest and usage for certain communities. Staff has recommended that the program be continued for one additional year in its now mature phase to see if the substantial benefits realized by a number of community groups can be solidified. But, all eligible communities are not utilizing the program equally. By potentially exploring other outreach and engagement options, individual communities may be able to maximize their outreach and engagement strategies in a more tailored way. For FY17, Staff will again administer a more comprehensive Regional Outreach Program that will permit eligible communities that have developed a strategic outreach and engagement plan (and posted that plan on the ICANN Community wiki) to choose to continue to employ the CROPP program or, instead, to pursue a more activity-focused strategy. In recognition of their specific requests for this type of support (and as a pilot effort), the BC, IPC, ISPCP, NCUC and NPOC may choose to avail themselves of a community outreach event rather than the CROPP program itself. This decision will allow an individual community to elect to use the CROPP program OR to host, co-host or sponsor a targeted community outreach/engagement event at one point during the fiscal year. To confirm their eligibility, the potentially-eligible communities must produce a clear plan explaining their FY17 outreach goals and planned expectations so that the selected activities can be coordinated with the appropriate ICANN Regional engagement teams. Staff to develop/modify program parameters and calendars to effectively manage the provision of these resources.		0.0	0.0	0.0	0.0	0.0	0.0

		124203	FY17 Identifier Threat Awareness & Preparedness (ITAP)	Identifier threat awareness and preparedness. Projects in this area fall into two categories:  a. Threat Intelligence and Response Preparation involves the exchange of information that reveals or anticipates a threat or an imminent attack of a global nature involving identifier systems and the concomitant preparation of defenses against attack, increase in vigilance, or countermeasures (e.g., increasing diversity or capacity as a resiliency measure).  b. Coordinated Response involves the fulfillment of roles ICANN plays (typically, as a facilitator, notifier, knowledge or information contributor) in response to security events or incidents where identifier systems have been targeted or employed as instruments of attack (e.g., abuse or misuse of domains or the DNS by a globally-distributed botnet).		0.2	0.0	0.0	0.0	0.0	0.2

		124206	FY17 - SSR Analytics	Identifier SSR Analytics. Projects in this area are intended to develop metrics or analytics for identifier systems and include:  a. Root system metrics. Definition of metrics, collection conventions, and analytics that provide information related to the SSR of root (and by extension, TLD) operations. (Note: this is to be coordinated with the root operator and other external communities, and will consider SSAC's root scaling recommendations.) b. Innovative uses of data. This initiative will explore ICANN's access to DNS-OARC, "L" root or other big DNS data, such as Day In The Life (DITL), to observe what effects the increase in delegations, IPv6 and DNSSEC usage, or new criminal misuses of DNS have on SSR.		0.3	0.0	0.2	0.0	0.0	0.5
